The second movement, 'Jeux de vagues', is a masterpiece of suggestion in which Debussy blurred the outlines by trills and heterophonic scoring. It is instructive to compare the end of this movement with the coda of *L'après-midi*, also in E major and making use of flute, harp and muted brass. The later passage is less compact, perhaps less 'perfect', but Debussy continues to imbue it with a sense of expectancy that is quite unanalysable; no wonder he was not satisfied with his earliest version. The answer to this expectancy is the simple but menacing noise of the tumultuous sea. If the second movement was a study of light, the third movement is a study of colour and space, and of the elemental power at which the first movement had only hinted. Some critics have found the Franckian main tune rather blatant, even weak, but if this is true the final grafting on to it of the chorale takes advantage of the weakness to good effect.

At the theme's second appearance the high A \flat harmonic on the first violins creates an amazing impression of space, an orchestral use of the 'technique of illusion' which Lockspeiser has mentioned in connection with the piano works: the listener tends not to hear the harmonic itself, only the effect it has on the texture as a whole, a procedure which we may legitimately term 'impressionist'. But in general the logic of this movement is traditional enough and leads to the first wholly extrovert ending since the piano *Fantaisie*.

La mer occupied Debussy for nearly two years from the summer of 1903. In the meantime he wrote the two *Danses* for cross-strung chromatic harp and string orchestra, commissioned by the firm of Pleyel in liaison with the Brussels Conservatory as a test piece for a class that was being initiated there in this new instrument. Compared with *La mer*, the *Danses* are chaste and formal. The first, based on a piano piece by the Portuguese composer Francisco de Lacerda, belongs to the stately genre of *Danseuses de Delphes*, the second sparkles rather more – certainly it is hard to find in either a musical explanation for Fauré's review, in which he referred to the 'usual collection of harmonic peculiarities'. Much the same directness and simplicity governs the *Trois chansons de Charles d'Orléans* for unaccompanied chorus. Debussy had finished the two outer songs in 1898. The first is largely based on the Aeolian mode, addressed with decently restrained adoration to the beloved. The last illustrates the cruel sterility of winter not only by fairly obvious chromaticism but also (a typical *jeu d'esprit*) by a passage of fugal imitation. In the central song, composed ten years later, the word 'tabourin' is enough to turn Debussy towards Spain, especially since he was at the time already involved in his largest 'Spanish' work.

The three movements collectively entitled *Ibéria* themselves form the central movement of his orchestral *Images*. Here Debussy, with the resources of a large orchestra, faced the temptations of direct sound-painting, whereas on the piano any imitation had to pass through the filter of his own 'plaisir'. Perhaps the most impressive thing about *Ibéria* is Debussy's skill (as in *l'êtes*) in flirting with vulgarity without ever losing his aristocratic poise. Guitars and castanets are plentiful, even trombone glissandos, but involvement is tempered with objectivity. The clarinets for example, which gain a new melodic importance in these *Images*, are directed on their first entry to be 'elegant and fairly rhythmical' as opposed to sloppily sentimental. In the central 'Parfums de la nuit' sultry passion is suggested by the orchestration but there is no romantic denouement; instead the darkness dissolves into the morning light of a festival, a transitional passage of which Debussy was particularly proud. This last movement consists of what Debussy called 'realities', thrown at the audience in an apparently incoherent assembly of ideas and bathed in a hard, garish luminosity. Even if the procedure is not subtle in the sense of contrived, it is certainly a crucial step in the abandonment of linear motivic thinking in much 20th-century music. Equally certainly it is not 'impressionist'.

Gigues and *Rondes de printemps* together balance this largely extrovert central movement. *Gigues* is not so much sad as tragic. Throughout there is a feeling that happiness is within reach, and the music of the *Keel Row* brings with it a certain desperate jollity, like that of

the fool in *King Lear*. But as the flute rules *L'après-midi*, so the baleful timbre of the oboe d'amore is stronger than any mere tune. There are no 'realities' in *Gigues*, nor in *Rondes*, in which Debussy for the fourth time used the nursery tune 'Nous n'irons plus au bois'. The mood of the piece is a kind of refined nostalgia. But unlike nostalgia proper, it never becomes self-indulgent or repetitive. Indeed a contemporary critic found that, while it was based with an almost academic strictness on the nursery tune, it lacked emotional coherence. Part of the secret lay no doubt in the complexity of the orchestration, the primal function of timbre, entrusted in *Gigues* to the oboe d'amore, is here disseminated among the whole orchestra. The interplay of rhythms, too, is extremely subtle and contained within an overall fluidity of tempo.

Debussy's last three orchestral works were all ballets, two of which were orchestrated with the assistance of others. Of these, *La boîte à joujoux* is undoubtedly a success on its own modest terms as 'a work to amuse children, nothing more', but *Khamma*, an Egyptian ballet written for the English dancer Maud Allan, has generally and unfairly been written off as a failure. Debussy referred to its 'trumpet calls which suggest revolt and fire and which send a shiver down your back', indicating that if he wrote it in the first place for money he had nevertheless responded in some degree to the 'childishly simple' scenario.

Debussy harboured similar feelings about the plot of *Jeux*, which he wrote for Dyaglev in the late summer of 1912, but in this case a simple structure encouraged a particularly rich response. As in 'Jeux de vagues' from *La mer*, the title 'games' seems to have suggested to Debussy a framework of rules which was but the starting-point for the substance of the game itself, consisting of an infinite variety of strokes and gestures. In *Jeux* the substance is the endless variation of the basic, undulating phrase, the orchestral colours and the proliferating arabesques; even if these 'accessories' do not help to get the ball over the net, they are what makes the game worth watching. Stravinsky considered *Jeux* an orchestral masterpiece, but found some of the music (that is, the ideas) too easy on the ear ('trop lalique'). It is at least questionable whether this distinction is valid. The logic of the work is hard to see on the page. The fragments coalesce towards the end into a promising theme, but this is cut short at the climax and leads to a poetic disintegration, which, like that in 'Jeux de vagues', gave the composer second thoughts. Certain ideas, such as the dark stillness of the park at the opening or the flight and force of the tennis ball, find traditional expression, but there is at no time a jarring between such external ideas and the inner development of the music. *Jeux* was first greeted with incomprehension, then forgotten. Now, at the other extreme, it is a cult object of the avant garde who, in their admiration for its technical wonders, perhaps lose sight of its emotional power. As in Ravel's *La valse*, and yet how differently, the waltz is isolated as a cultural phenomenon and placed in a new and disturbing context, we see that the opium of the dancing classes is no longer potent. To borrow Debussy's own phrase about *The Rite of Spring*, *Jeux* is 'a beautiful nightmare'.

4. CHAMBER MUSIC. Apart from an early Piano Trio in G (c1879) and a *Nocturne et scherzo* for cello and piano, both written for himself and his partners in von

Meck's musical establishment, Debussy's earliest essay in this genre is his String Quartet (1893), although 'essay' is hardly appropriate for such a radical reinterpretation of the medium. The opening theme provides material for three of the four movements but, characteristically, Debussy allowed himself freedom from cyclic tyranny in the slow movement where a certain Russian melancholy comes to the fore. One of the chief novelties of the first movement is that the rhythm and overall shape of the main theme assume priority over its original harmonic structure and over the exactness of melodic details. It is meaningful to distinguish between the endless variation which Debussy applies here and the intervallic kind of development which appeals more to the German mentality. Of the four movements the scherzo is undoubtedly the most startling. In the combination of arco and pizzicato and in the pervading cross-rhythms the listener loses track of any thematic thread and instead is forced to appreciate the texture as texture. The result is almost orchestral in its variety and stands as the earliest model for those quartet writers of the 20th century (Webern, Bartók) for whom timbre has assumed a dominant role. It is no surprise to find the composer 15 years later complaining of the difficulty of making a piano arrangement of the work. The immediate critical reaction was mostly of puzzlement. Dukas recognized its stature but Chausson, to whom Debussy had confided details of the work in progress, was profoundly disappointed and said so. A second quartet was destined by Debussy to soothe this disappointment, but the break in their friendship no doubt

explains why this work never became more than a project.

In 1910, for the annual practical examinations at the Conservatoire, Debussy completed two pieces for clarinet and piano: the *Première rapsodie* as the test piece proper and a sight-reading exercise later published as the *Petite pièce*. The latter is unpretentiously charming (rather like *The Little Shepherd in Children's Corner*) but the *Rapsodie* is, in the words of Debussy's friend Robert Godet, 'the most dreamlike of his rhapsodies', he exploited both the cantabile and *con agilità* aspects of the clarinet's character in a truly Mozartian fashion, without plumbing Mozartian depths. The work gains greatly from the composer's own orchestral arrangement.

Debussy's final chamber works were the three sonatas, of a projected set of six, which he wrote between the summer of 1915 and the spring of 1917. In the Cello Sonata (1915) the traditionally sustained legato of the instrument is almost ignored. Instead Debussy seems to have been bent on turning it into a bass guitar - he himself dubbed the work 'Pierrot angry with the moon'. Where there are passages of legato they eventually dissolve into nervous ornaments. Logical continuity is stretched beyond one's immediate understanding by persistent variation of speed and by a free modulation which often becomes a surrealistic juxtaposition of different ideas. The second movement in particular is an extension of the essentially non-thematic structure in the scherzo of the String Quartet. When, in the third and final movement, something in the nature of a theme does

5. Claude Debussy with his second wife, Emma Bardac

appear, it has the effect of a sarcastically disingenuous remark dropped into an otherwise wholly allusive conversation. If the tone of the Sonata for flute, viola and harp is less challenging, it too is built on understatement. The harmonic language is surprisingly simple and the occasional turn of phrase harks back to Debussy's melodic style of the 1890s, but the message thus conveyed is undeniably of the 20th century. Partly this is a question of the scoring: Debussy had originally planned to use an oboe instead of the viola, but the string instrument is undoubtedly more effective not only for pitch but also in mediating between plucked strings and woodwind, between the evanescent and the controlled sound. Partly it is the free assembly, even more pronounced than in the Cello Sonata, of thematic elements: the six ideas of the first movement return, with or without extensive variation, in the order 2 5 6-3 4 1-5-3. Partly it is such innovations in the sonata tradition as the narcissistic echoes which bring the work to a halt in the second bar of the first movement. The composer said of it: 'I don't know whether it should move us to laughter or tears. Perhaps both?'

The Violin Sonata (1917) was the last work Debussy finished. He had particular difficulty with the final movement, settling in the end for a version of his original idea; and even if the end may seem a rather too facile solution, it is surely wrong to dismiss the work as worthless. The middle movement is an exercise in the fantastic, including some surprisingly wholehearted tunes, and the first is remarkable for its fluid extensions of the rhythms one expects. The writing for the violin betrays Debussy's admiration for the true 'gypsy' style, and at the recapitulation he was patently torn between the claims of form and those of fantasy. The result is two parallel streams of invention in which it is possible to see foreshadowed many of the concepts of dualism to be found in later 20th-century music.

5 SONGS The earlier part of Debussy's output of songs presents chronological problems: dates of composition and extent of revision are often quite untraceable. That said, one can at least begin to describe the general character of much of this early work. Two influences are apparent above all others: that of French opera (whether Gounod or Massenet, the atmosphere at least is very similar) and that of the amateur singer Mme Vasnier. The smooth, unsurprising lines of the 19th-century French tradition are everywhere in evidence in the songs Debussy wrote before leaving for Rome in 1885. A song such as *Rondeau* (1882) is almost a pre-echo of Manon's apostrophe to her 'petite table': the melody is suspended in a glutinous diatonic substance, compounded chiefly of added 6th or dominant 7th, gently stirred from time to time, but which binds the melody to a complaisant servitude. The influence of Vasnier works in a different direction. She possessed a high, agile voice, and for her Debussy wrote the great majority of his songs before 1885. The unpublished *Rondel chinois* is a diverting vocalise and little more, but the first version of *Fantoches* and two other Verlaine settings, *Pantomime* and *Pierrot*, manage to extract some expressive content from the style.

In view of Debussy's deficient education, it is perhaps surprising that even in his early 20s he was responding to the quality of the poets he set. Generally the sentimental effusions of Banville and Bourget get what they deserve, the former's *Zéphyr* becoming almost a parody

of itself. But where a second-rate poet surpasses himself (Bourget in *Beau soir*), or when the poet is of the order of Verlaine or Mallarmé, Debussy's setting reflects this. The style may still be that of French opera, and there may still be passages of vocalise, but the germ of sincerity is transmitted. In *Beau soir* (to which the chronological provisos apply) the antithesis of E major and G minor at the end of the piano introduction is a warning of the ambivalent mood of the poem, leaving the details of such ambivalence to be filled in by the singer. The penultimate chord, as in several songs of this period, is an augmented 5th, but here Debussy integrated the cliché by aligning it chillingly with the second syllable of 'tombeau'. The only published song to show a foretaste of genius is *Apparition* on a poem by Mallarmé. Perhaps it is noteworthy that with *Beau soir* this is one of the few not dedicated to Vasnier. Certainly there is nothing wanton or irrelevant in the vocal line, from which Debussy was to extract one complete phrase for use in *Pelléas et Mélisande*. Some of the word-setting is still a little heavy and stilted, but the lines themselves are magnificently wide, resting on harmonies and textures that are always changing. Both the opening phrase, on one note, marked 'réveusement', and the ending, lulled by juxtaposed major triads, take the listener into the dream world of Mallarmé's poem.

With the *Ariettes oubliées* Debussy moved decisively towards the style of his maturity. In *Green* the piano part provides a framework of two-bar phrases on which the varied melodic line is built; it concerns itself with melody and atmosphere, the voice with rhythm and words, a division that enabled Debussy to mould the vocal line after the natural inflections of the French language. At the same time he was alive to the overall shape of the poem as the poet's mood passes from ardour, through fear, to hope, so the initial A♭ minor only at the end finds some repose in the tonic G♯ major. The confinement of the vocal line within narrower limits also gave Debussy the opportunity to make an expressive point with occasional wide leaps or melismata. In *C'est l'extase*, Debussy marked in this way the 'muted rolling of the pebbles under the water' and 'the soft cry of the ruffled grass', the climactic points in the poet's imagery, and he caught the plainer language of the final verse in a return to syllabic word-setting and a high proportion of repeated notes. To convey the tragic monotony of *Il pleure dans mon coeur*, the vocal line coincides throughout with the 40 two-bar phrases of the piano part, and the opening Dorian modality is consciously exploited as an atmospheric device. A refined symbolism is at work in *Chevaux de bois*, dating in essentials from 1885, where the circular movement of the horses on the merry-go-round is mirrored by 'circular' melody and harmony that return predictably to their starting-point; and in *L'ombre des arbres*, where the recurring octave E♯ discreetly but powerfully suggests the unidentified fate by which the traveller's hopes are shattered. Even though this E♯ octave is heard at three pitches, it is hardly an exaggeration to see it as an early example of an 'objet sonore', a single sound conceived in terms of one particular instrument or combination of instruments, and one which plays a structural role.

Simultaneously with the *Ariettes* Debussy worked on the *Cinq poèmes de Baudelaire*. Laloy, in his biography of 1909, noted that 'finding a vocal line and a consistent mood to fit these works, which resemble the pictures of

Manet and sometimes those of Cézanne in their dense complexity, was something of a *tour de force*. The effect of the piano part is indeed that of a reduction from a well-filled orchestral score, and in general Debussy continued along the path he had abandoned after *Apparition*. The influence of Wagner is prevalent, especially in *Recueillement* with its images of love, night and death. Debussy coped with the formal problems of setting the long poem *Le balcon* by development through insertion as against development through repetition, and in *Harmonie du soir* he even reflected in the music the stringent 'pantoum' form of the poem, in which the second and fourth lines of one quatrain become the first and third lines of the next. Unique in the set is *Le jet d'eau*, completed in March 1889. The image of water obviously moved Debussy to abandon the almost experimental style of the other songs, the texture is more open and nearly devoid of chromatic inner parts. Debussy later orchestrated this song alone of the five but Vuillemoz's criticism, 'listening to this unblended and colourless orchestration one misses the piano', points, if in a backhanded way, at the essentially pianistic style of the accompaniment, depending for its effect on the sympathetic resonance between the vibrating strings.

These preoccupations with sonority and with the idiomatic setting of the French language continued in the songs of the next decade. *Les angelus*, *Les cloches* and *De soir*, show three imaginative attempts at capturing the sound of bells while in *L'échelonnement des haies* Debussy even managed to evoke the synthetic sound of 'cloches comme des flûtes'. The variety of style between songs is very wide, compare for instance the conversational tone of *Dans le jardin* with the heroic sweep and bold colours of *La mer est plus belle*. All these tendencies came together for the first time in the masterly first set of *Fêtes galantes*. Debussy had made two versions of an earlier setting of *En sourdine*, in which the piano pulsates on expressively dissonant chords; in this published setting he exploited the same kind of texture but the subtleties of interplay between voice and piano were made finer and the whole song became a logical development, in terms not of notes but of mood, from the insistent melancholy of the nightingale's refrain. *Fantoches* is essentially a song of 1882, but the revision mixed triple rhythms with the original duple ones and integrated the ending into the rest of the song, both the sort of improvements that one might have expected. It is an extraordinary little Harlequinade that seems at first insubstantial, but the economy of the writing masks passages of heavy irony - one rarely hears the Spanish imitation in the middle section given its full weight - and it is a perfect partner for the other two songs, lightening but not dispelling their nostalgic lyricism. In the final *Clair de lune* Debussy combined a sensitivity to every inflection of the text with a grasp of the structure of the whole and consciously manipulated his by now extensive harmonic vocabulary to serve both these ends, as in the evocative but also structurally valid use of successive triads, and the perfect cadence at the words 'et sangloter d'extase les jets d'eau'.

It is typical of Debussy, with his motto 'toujours plus loin', that he should have followed this achievement with an experiment. Throughout the 1890s he toyed with the idea of becoming a writer, and the *Proses lyriques* are settings of four of his own poems. In general the imagery is dense, and occasionally unfortunate; the aims

of Debussy the poet were hardly compatible with those of Debussy the composer, and he was forced thereby to compose in a rather convoluted musical style. The last two are generally considered better than the others, a view that Debussy possibly held himself, since he chose these two to form part of the first ever all-Debussy programme, given in Brussels on 1 March 1894. *De fleurs* begins simply and includes several well-characterized passages, but clumsy tremolos invade the texture towards the end. *De soir* is probably the best. Once more the bells ring and in the transformation of the holiday scene as evening falls Debussy caught some of the magic of the similar passage in *Chevaux de bois*. The final apostrophe to the Virgin is spare and unaffected, an understated summary more in accordance with the composer's true nature.

By the summer of 1895 Debussy had finished the first and basic version of *Pelléas et Mélisande* and his involvement with Maeterlinck's dream world is reflected in the settings he made between 1897 and 1898 of three of the *Chansons de Bilitis* by his friend Louÿs. The poet's technique is the same as in his novel *Aphrodite*, to lend blatantly erotic situations a certain dignity by placing them in an antique never-never land. Like *Mélisande*, *Bilitis* is so innocent that one is almost persuaded to believe in her enduring chastity. Debussy's music catches the ambiguity of these prose poems by a mixture of modality (largely Dorian) and chromaticism, and by a style of word-setting that is melodically simple with many repeated notes, but rhythmically fluid. Particularly in the third song, *Le tombeau des nautades*, the tension between the flexible vocal line and the unrelenting semiquavers of the accompaniment perhaps suggests *Bilitis*'s unwillingness to come to terms with realities. Only in the middle song, *La chevelure*, is passion released and the narrow range of the vocal line expands

6. Claude Debussy with his daughter Chou-Chou at Moulleau, 1916

(see ex.3). The major 9th harmony is activated by the gradually accelerating rhythm of the voice and the climax is balanced not only by the contrary motion of voice and piano but by their coincidence on B and E.

che

The two settings of Charles d'Orleans in the *Trois chansons de France* (1904) mark the beginning of what has been called a 'classical' style. Certainly they are not as sensual as the Bilitis songs and the piano writing is unusually non-atmospheric. Also of 1904 is the second set of *Fêtes galantes*. If the first set was a celebration of his ardent affair with Gaby, this one marks Debussy's final break with his first wife and the beginning of his liaison with Emma Bardac. It is not surprising that his view of love is less than wholeheartedly enthusiastic. The disenchantment, hinted at by Verlaine but not brought out by Debussy in the first set, is here plainly evident. The nostalgia of *Les ingénus* is more painful than sweet, as Debussy suggested by frequent use of the whole-tone chord, and the figure of the statue in *Le faune* warns the lovers of 'an unhappy end to these moments of content'; this song contains one of Debussy's most extended and imaginative passages of ostinato, a dry, distant drumming on two notes that from the fourth bar carries through to the end. Call it 'fate' or whatever, the effect is powerfully sinister. No more hopeful message is to be found in the final *Colloque sentimental*, arguably the most moving song Debussy ever wrote. Two ghosts recall their old love. For one the passion is still real, for the other love too is dead: "Does your heart beat faster at the mention of my name? Or in your dreams do you still find me?" "No". It is a mark of Debussy's genius that this monosyllable, bald and even risible on the page, provokes tears rather than laughter. He also integrated into the song different styles to project the three characters: a plain chordal style for the disenchanted lover; a richer, more operatic one for the other; and a spare, linear recitative for the narrator who frames the lovers' conversation. Perhaps the touch most revealing of what Debussy had learnt in the 13 years since the first set of *Fêtes galantes* is the reappearance of the nightingale's

song from *En sourdine* as the first ghost begins to reminisce. The warm 9ths and triads of the original accompaniment become acidly dissonant diminished 7ths over the A \flat which pulses through the uncommunicative dialogue.

The move towards melodic and harmonic simplicity continued in the cycle *Le promeneur des deux amants* of which the first song, *La grotte*, had originally formed part of the *Trois chansons de France*. Although in this later set *La grotte* is followed by two other songs also on texts by the 17th-century poet Tristan Lhermite, it is possible to feel that its post-Pelléas evocative style as-sorts ill with their clearcut elegance; added to which there was something about stagnant water that struck deep into Debussy's imagination. In combining passion with precision he was more successful in the *Trois ballades de Villon* (1910). The singer is commanded to deliver the *Ballade de Villon à s'amye* 'with an expression as much of anguish as of regret' and the lover's shifting emotions are beautifully underlined by the subtle modulations, hesitant rhythms and imaginative timbres of the piano writing, while the vocal line returns from time to time to the superficially ungrateful chromaticism of the *Chansons de Bilitis*. The central prayer runs the risk of seeming like a pastiche of itself with its bare 5ths, parallel triads and modal contours but Debussy's control is absolute, as it is over the delicate touches of chromaticism that paint the damned in Hell and over a tonal scheme that suggests the contentment of a deep, orthodox faith through the movement from A minor to C major. The final *Ballade des femmes de Paris* bears the palm for the wittiest, most zestful song of his output. Through the incessant chatter of semiquavers comes an affection for the failings and peculiarities of Parisian woman, of whose charms Debussy, like Villon, was not wholly without experience.

Apart from the musically insignificant *Noel des enfants* (1915) Debussy's last songs were the *Trois poèmes de Mallarmé* (1913). In returning from Renaissance to contemporary poetry Debussy was possibly motivated by the move his own style had made in the last few years towards abstraction and non-traditional syntax, particularly in *Jeux*, which he had completed the previous autumn. Certainly these settings match the texts in their elliptical harmonic progressions and mere suggestions of melody. *Placet futile* is an avowal of love to a shepherdess painted on a Sèvres teacup. The playful artificiality of Mallarmé's poem finds an echo in the distorted memories of an 18th-century minuet and in a profusion of ornaments that are just as important to the texture as any of the more solid materials beneath. In *Eventail* such ornaments assume the principal role; just as the fan itself is a substitute for the crude spoken language, so Debussy enriched the atmosphere of the poem with discreet agitations of the fingers.

6. PIANO WORKS. Debussy's slow development as a writer for the piano is something of a mystery but not a total one. His teacher Marmontel is quoted as saying 'Debussy isn't very fond of the piano, but he loves music'. From this one may gather that even at the Conservatoire Debussy was aware of the limitations of the instrument. There are descriptions of him launching himself at the piano, overdoing every effect, as though moved by a deep hatred. On the other hand Fargue

remembered his playing in the 1890s. 'he cradled it [the piano], talked softly to it, like a rider to his horse, a shepherd to his flock or a thresher to his oxen'. It is significant that on this occasion he was performing the uncompleted score of *Pelléas*. Among the varied accounts of his playing, agreement is reached on only two points. that it was like nobody else's, and that it had about it an orchestral quality. At all events, the two approaches outlined above, at the extremes of boldness and refinement, both display an unwillingness to treat the piano as it had been treated in the past, and a determination to subdue it to his will.

In his earlier years Debussy shied away from the challenge which the piano held ready for him. Quite possibly he identified it also with the 'castles in the air' built by the father of the budding virtuoso, and with their ultimate collapse. The *Deux arabesques* are the earliest of his pieces that have held even a small place in the modern repertory, and are charming, unpretentious salon pieces. Five other works published in 1890-92, although heard even less often, are in many ways more interesting and in places prophetic of Debussy's mature style, even if he still lacked the technique or the vision to expand such passages beyond a few bars. Among the palpable weaknesses are the lumpy bridge-passages leading into the middle sections and the endings, either awkward or predictable, but the *Nocturne* is an accomplished piece of lyrical writing, like Fauré without the harmonic surprises. The opening theme of the *Danse* begins in pentatonic fashion and Debussy remembered it in the song *L'échelonnement des haies*, published during 1891, for 36 bars, in the central section, he avoided a cadence and built textures that look ahead to *Masques* 15 years later. Ravel liked the *Danse* well enough to produce an orchestral version in 1923.

The exact placing of the *Suite bergamasque* in Debussy's output is problematical since there are no means of knowing what alterations he made to it between its composition in 1890 and its publication in 1905. Individual bars of the *Prélude* are fluid and sensuous in effect but the resolutions are too often through scales and other traditional devices for the magic to last, although the final passage treats the major and minor 7th degrees of the scale as equal alternatives in the manner of *L'après-midi*. The *Menuet* is the most revealing of the transition taking place in Debussy's musical language; within the delicate framework of an 18th-century pastiche are encompassed a lyrical tune à la Massenet, solid blocks of four-part writing à la Chausson and an ending that evaporates through a Debussian glissando. Reliance on traditional arpeggio patterns in the left hand robs *Clair de lune* of the prophetic air it might otherwise have breathed but, as in the *Nocturne* and *Danse*, there are moments at least when the texture lures attention away from the syntax. Unfortunately the final *Passepied* is bedevilled by a trite second theme, and all Debussy's modal ingenuity is deployed in an attempt to save it, so that out of this uninspiring fragment he produces two magical passages. These are achieved by the use first of inversion and second of a successive combination of triple and duple rhythms. Once more, the ending breaks away from conventional practice in its widespread texture and its modal opposition of B major and F# minor.

The year before the first performance of *Pelléas* Debussy published the three pieces entitled *Pour le piano*. The *Prélude* shows, quite apart from the force-

fulness of its ideas, a tightness of construction that Debussy had not so far achieved. The interweaving of two, complementary themes, and the subtlety with which chords of the augmented 5th prepare the way for the extended whole-tone passage, both show a craftsman's hand, as do many points of detail. Ravel claimed that *Pour le piano* 'said nothing really new' but there is no precedent for the individual sound of an 4. Th

novelty resides not just in the whole-tone harmony, but in the texture created by the trill and (surely) the pedal, in the melodically otiose but beautiful minim A♭s, in the teasing antithesis of triplets against semiquavers and in the syncopated placing of the triplets' repeat. The final *Toccata* similarly mixes brilliant fingerwork with evocative textures, and Aeolian modality with the whole-tone scale, and it is crowned with an ending that is, for Debussy, unusually emphatic. Seven successive, slow, loud chords of the tonic major will not be found again in his output. But the best of the set is undoubtedly the *Sarabande*. Again the mode is basically Aeolian but the control of chromaticism within it is masterly. For the first time in Debussy's piano works there are times when tonality is momentarily submerged and it is a measure of his extension of the key system that D major can follow G# minor with complete inevitability. An earlier version of the *Sarabande* exists as the second of three *Images* written in 1894 and all dedicated, like the final *Sarabande*, to Yvonne Lerolle, Chausson's niece. The 80 or so changes that Debussy made to the first version were largely in suppressing excessive chromatic alterations and allowing the modal harmony to stand uncluttered. The first *Image*, marked 'mélancolique et doux', is rather in the nostalgic style of Chausson, while the third, usually referred to as an early version of *Jardins sous la pluie* because it contains the tune 'Nous n'irons plus au bois', is in fact a totally different and very exciting piece. The discreet, almost private nature of these *Images* is reflected in Debussy's own words at the head of the score: 'These pieces would shrink in terror from the brilliantly illuminated salons regularly frequented by those who do not like music. They are rather "conversations" between the piano and oneself'.

But, for all the beauties that these earlier pieces contain, it was not until 1903 that Debussy really faced the challenge of the instrument. His new approach proclaims itself in the title of the set, *Estampes*, as well as in those of the individual pieces. In calling them 'prints' he possibly intended to convey a refinement, an abjuration of the grand manner, yet they are not self-evident pastiches such as the *Passepied* from *Pour le piano*. *Pagodes*

reflects his interest in eastern music, and it is revealing that in the first of his pieces to break away from traditional piano textures Debussy should have chosen to look beyond Western civilization altogether. It is difficult to write about the piece without mentioning 'impressionism', a word which Debussy found meaningless or at best ill-used, but a short example (ex 5)

shows what the term denotes in this context. The low B dictates that the sustaining pedal be held throughout and the effect on the rest of the three-fold texture bears obvious resemblances to the way that impressionist painters tended to use light – beyond that assertion lie the areas of controversy. One can see also that the movement in the three parts is graded according to their pitch, so that in performance all emerge at a similar volume and are heard as one, composite sound. With the second piece Debussy provoked another of the many 'affaires' with which his life was studded. After the first performance in 1898 of Ravel's *Habanera* for two pianos, Debussy had borrowed the score. Five years later he produced *La soirée dans Grenade*, marked 'mouvement de Habanera' and centred, like Ravel's piece, round languorously repeated C's. Some 70 years later it is possible to judge what different conclusions the two men drew from similar propositions. Whereas Ravel developed his ideas with perceptible logic, Debussy threw together a series of impressions and out of their friction grows an understandable excitement. *Jardins sous la pluie* is, in a sense, a reworking of the *Prélude* from *Pour le piano* in terms of Debussy's latest discoveries, the final 11 bars in particular are a miraculous synthesis of prestidigitation and expressive effect.

The two piano works of 1904, *Masques* and *L'isle joyeuse*, were both inspired by 18th-century subjects. In *Masques* Debussy returned for inspiration to the world of 'fêtes galantes' (he had finished his second set of songs of this title a few months earlier) and in particular to a texture of alternating hands that is first found in the song *Mandoline*. Many of Debussy's special effects – curling chromatic tunes in the middle of the keyboard, passages of whole-tone and pentatonic harmony, juxtaposed chromatic triads in root position – here go to make up a vigorous yet strangely touching work, and one that is all too rarely played. The more popular *L'isle joyeuse*, suggested by Watteau's *L'embarquement pour Cythère*, is one of Debussy's happiest inspirations. It manages to be extrovert without ever tending towards the plebeian; even the traditional left-hand arpeggios have 'a touch of class', arranged in groups of five against the three

quavers in the right. Certainly Debussy plays no jokes with the listener's expectations, 'happiness is no laughing matter'.

One can relate the last two of the first series of *Images* (1905) to earlier works of the composer, considering the *Hommage à Rameau* as a development in both size and harmonic subtlety of the earlier *Sarabande*, and *Mouvement* as a more whimsical and elusive version of *Jardins sous la pluie*. But the opening piece, *Reflets dans l'eau*, has no clear ancestry. The rhythms of water, symmetrical to the casual eye, but in fact full of life-giving asymmetries, the sound of water, monotonous and hypnotic, even (in a good performance) the feel of water, come across with a fidelity that Liszt and Ravel had not achieved. Debussy used a wide area of keyboard, often at a low dynamic level, and built his material from short phrases. These he treated rather like the pebble dropped into the water, which initiates a series of movements only indistinctly related to its own shape but defined by its size, force and density. The final bars, marked 'lent, dans une sonorité harmonieuse et lointaine', afford a glimpse of Debussy's preoccupation, already audible in *Fêtes*, with the movement of sounds in space.

With the second series of *Images* (1907) Debussy reached the country towards which his steps had been leading for some 15 years, the country where sensation is king. The sounds of bells through leaves, the sight of a goldfish lit by sunlight shining through water, both are complex sensations, and the first a mixture of sound and sight in the manner of *Reflets dans l'eau*. But all three pieces of this set go beyond the earlier work in their harmonic richness, in their mercurial changes of mood, and in their demands on independence of finger; all are written on three staves. *Cloches à travers les feuilles* is notable for passages of mixed dynamics which suggest an orchestral sound, although no orchestra could match the rich texture of Debussy's piano writing. The name of the second, *Et la lune descend sur le temple qui fut*, was suggested to Debussy, after he had written the piece, by the dedicatee, Laloy, who was deeply interested in the Orient: the balance of this title admirably reflects the poise and precision of Debussy's music, in which traditionally 'oriental' features such as open 4ths and 5ths acquire a new dignity from being combined. The dangers of adapting a literally visual approach to this music are illustrated by the third piece, *Poissons d'or* where the sight of the goldfish is merely the spark that kindles the composer's imagination. The quick movements of the fish suggest trills, trills suggest arpeggios and arpeggios suggest chords, while tunes and accompaniments exchange roles with bewildering speed. The final cadenza in its alternation of black-note and white-note groups perhaps recalls Ravel's *Jeux d'eau*, but the whole is guided by a powerful fantasy which leaves ornamental fountains, and goldfish, far behind.

In writing *Children's Corner* that same year for his daughter, Debussy was pleased to aim two lighthearted blows at targets which especially attracted him: finger exercises and Wagner, in *Doctor Gradus* and the *Golliwogg's Cake-walk*. These mark the entry of humour into his piano writing, but at least two of the other four pieces merit a deeper response. In *The Little Shepherd* the free, natural, unaccompanied tune of the shepherd's pipe is three times caught by a web of harmonies and dragged down to a cadence; finally it abandons its dreams of freedom and conforms. *The Snow is Dancing*

portrays the not entirely disagreeable ennui that grows from looking out at a snowy landscape.

The two sets of *Préludes*, published in 1910 and 1913, contain Debussy's last important offerings to the amateur pianist and also his last homage to the genre of descriptive writing that began with Schumann. In placing his evocative titles at the ends of the pieces he seems to have recognized that they are often less of a help than an impediment to understanding. As with *Poissons d'or*, a title like *Ce qu'a vu le vent d'ouest* may have planted the seed but the piece should certainly not be viewed literally as a west-east itinerary; the title is merely symbolic of the violence and mystery in which the music abounds. Perhaps the most remarkable feat, in the first book at least, is Debussy's success in incorporating elements of popular music: Neapolitan song in *Les collines d'Anacapri*, music-hall song in *Minstrels*, guitar-strumming in *La sérénade interrompue* and an unidentifiable but definitely non-serious style in *La danse de Puck*. At the other extreme lie the hieratic *Danseuses de Delphes*, perhaps suggested to Debussy by his project in collaboration with Ségalen on the myth of Orpheus, and the well-known *La cathédrale engloutie*, his most thorough exploration of the points of contact between the piano and bells. It is a piece that needs a virtuoso command of the sustaining pedal, for which, characteristically, Debussy wrote indications addressed not to the player's feet but to his ears – 'in a gentle, harmonious haze', 'gentle and fluid', 'emerging from the haze gradually'. In every piece he established a unique identity at the start through melody (*La fille aux cheveux de lin*), texture (*Danseuses de Delphes*), harmony (*Voiles*), ornaments (*Minstrels*) or rhythm (the iambic opening of *Des pas sur la neige* which 'should sound like a melancholy, snowbound landscape') and then allowed his fancy to play upon it.

The second book does not maintain throughout this high level of inspiration and craftsmanship. Some of the pieces (*Bruyères*, *Canope*, *Hommage à S. Pickwick Esq.*) sound rather as though they were rescued from a bottom drawer and *Les tierces alternées* hardly belongs with its companions – unless Debussy inserted it as a joke, tempting us to invent an evocative title. *Général Lavine – excentric* is the only successful comic number, a sketch of a music-hall juggler, but three of the scenic pieces are of the highest quality: *Brouillards*, where he depicted the disembodied fog in bitonal harmonies; *La terrasse des audiences du clair de lune*, in which the twin inspirations of moonlight and the Orient led him to write in a style of powerful delicacy, almost a compendium of his favourite piano techniques and textures; and *Feuilles mortes*, in which the subtle colours of dead leaves are matched by the subtle and precisely graded harmonies (ex.6). The different weighting of what is

effectively the same chord is a detail with which many a lesser composer might not have concerned himself, and one that shows clearly the value to Debussy of the sonority of a chord quite apart from its harmonic function.

Debussy's last important works for the instrument were the two books of *Etudes*, which he wrote at Pourville during August and September 1915. Earlier in the year he had edited the piano works of Chopin for his publisher, Jacques Durand; and, while he realized that in dedicating his own studies 'to the memory of Chopin' he was certainly meeting the challenge that he had earlier chosen to ignore, he had a confidence in these pieces which one rarely finds in him during his last years. In the first book he explored the traditional areas of study-writing – 3rds, 6ths, octaves and the dexterity of the fingers – with the exception of *Pour les quartes*. Here the manipulation of 4ths led him to write music of a percussive clarity, full of wayward chromaticism and strong bell-like sonorities in which rhythm, melodic outline and harmonic tension interact. One could call it Classical, in the sense that it is a work of understatement in which every nuance produces an effect, or Romantic in that it is informed with a certain wistful, almost sly humour. Debussy kept the cascading 4ths in the middle of the piece just this side of tea-house chinoiserie.

In the second book he was concerned not with the letters but with the vocabulary of music. The studies *Pour les degrés chromatiques* and *Pour les notes répétées*, quite apart from their technical difficulties, are by their nature fitted to stretching tonality beyond the limits of what was generally considered comfortable in 1915. If *Pour les notes répétées* relies for its coherence almost entirely on consistent textures and rhythms, *Pour les agréments* lives by the delicious uncertainty as to what is or is not an *agrément*. The 'divine arabesque' which Debussy recognized in Bach's music permeates the whole structure so that traditional distinctions between melody and accompaniment can no longer be made. Movement between keys is effortless and often elliptical. In the ten bars, for example, that lead to the return of the opening idea, Debussy threw several amusing asides into the conversation but the main point is never for a moment lost. In *Pour les sonorités opposées* he explored further the possibilities of the layered textures in which bells and distant trumpet calls combine to repudiate their source in a box of hammers. One may also note the juxtapositions of disparate materials, a technique introduced in *La soirée dans Grenade*, flaunted in *La sérénade interrompue*, and here used with a fine discretion. The central section of *Pour les arpèges composés* brings the only hint of levity into this second book which ends with the massive *Pour les accords*. In a letter to Durand Debussy wrote: 'these *Etudes* will be useful in teaching pianists that to embark on a musical career they must first have a formidable technique'. The fierce outer sections of this final piece constitute Debussy's nearest approach to the 19th-century 'war-horse'. Having faced the piano's challenge and won, he now threw out a challenge of his own. If pianists were to succeed where he himself had failed, they must have 'les mains redoutables'.

Debussy's works for piano duet begin with the four movements of the *Petite suite*, probably better known in Büsser's orchestral version. With four hands at his disposal Debussy was able to experiment more easily with unusual textures; for example the *Menuet* contains

two beautiful passages where melodies are doubled at the 10th below. Only the long-drawn tune of *En bateau* gains undeniably from transcription. The most surprising movement is the final *Ballet*, of a festive bluntness uncharacteristic of Debussy at any period, for which he seems to have taken Chabrier as his model. All the movements are in simple ternary form, but he seems to have been aiming at further integration, because in every case the repeat of the opening section is accompanied by elements from the central one. Apart from the lively *Marche écossaise*, a fantasy written for a Scottish general on an air which purported to be a family tune of the Earls of Ross, the only other pieces Debussy wrote for this medium were the *Six épigraphes antiques* (1914), based on music he had composed 14 years earlier to accompany a recitation of some of Louÿs's *Chansons de Bilis*. The world of the *Préludes* is recreated in images of exotic lands (Greece and Egypt) and of nature (rain and night). The writing is spare and Debussy cultivated a carefully defined monotony, either of harmony or rhythm or both. Five of the six pieces end *pianissimo* or less, and in the final one the optimistic return of the theme from the first is tactfully but irrecoverably stifled.

Of the works for two pianos, *Lindaraja* is a feeble essay in the Spanish style, and only *En blanc et noir* merits description here (see fig. 7). The composer wrote of these pieces that they 'derive their colour and feeling merely from the sonority of the piano'. In spite of this adjuration not to read any programme into the work, it is hard not to see it as Debussy's considered statement on war. The central movement, which he thought the best, is dedicated to a young friend killed in action that year and resorts to trumpet calls and relentless intonations of *Ein feste Burg*. The first movement is a display of the strength and confidence that made such a holocaust possible; the last, dedicated to Stravinsky, a presentment of the shattered morale and exhausted resources that were to be its aftermath, illumined only by the light of hope. Among the many miracles in this masterpiece are the textures, some of a rich clarity, others hard-edged (as at the end of the second movement), and the freedom of harmonic movement already remarked on in the *Etudes*, in spite of which, the D major ending to the D minor last movement conveys consolation in a wholly traditional manner.

7 MUSICAL IDEALS Although Debussy was no infant prodigy from a technical point of view, he seems to have realized early that for him the ideal music was something radically different from what surrounded him. One of his teachers at the Conservatoire, Emile Durand, saw his individuality in another light: one of his reports for 1878 reads 'With his feeling for music and abilities as an accompanist and sight-reader, Debussy would be an excellent pupil if he were less sketchy and less cavalier'; and for the following year: 'A pupil with a considerable gift for harmony, but desperately careless'. If Durand had been more perceptive he might have gone further than to find Debussy's harmonizations 'certainly ingenious', but then Debussy himself had no clear idea of where he was going. With the Prix de Rome behind him and several years' security ahead, he attacked the problem, realizing that the conventional minds of the Institut might well be shocked by the results. Working on *Diane au bois* he wrote to M. Vasnier from Rome in 1886: 'It may be in fact that I have taken on a task that is too much for me; there is no precedent so I am obliged to

invent new forms. I could turn to Wagner but I don't need to explain to you the folly of such an attempt'. This objective view of Wagner, at this time the god to whom the French musical world was busy making obeisance, seems to have been somewhat disturbed by his visit to Bayreuth in 1888, but on his return next year the magic was no longer so powerful. In conversations with his composition teacher Ernest Guiraud, already referred to, Debussy showed that his aims had now clarified, even if his technique was still not sufficient to realize them: of musical drama 'The ideal would be two associated dreams'; 'A prolonged development does not, cannot fit the words'; In general, 'rhythms cannot be contained within bars'; 'Themes suggest their orchestral colouring'; 'There is no theory. You have merely to listen. Fantasy [plaisir] is the law'. At the same time he was not advocating musical anarchy: 'I feel free because I have been through the mill, and I don't write in the fugal style because I know it'.

The first fruit of this search for a music that was precisely imagined yet fluid and untrammelled by rules was *L'après-midi*; significantly, a work based on a symbolist poem. Debussy recognized in the writings of Baudelaire, Verlaine and especially Mallarmé not only a fantasy and freedom that were missing from contemporary music, but also a concentration of feeling. The opening flute solo is just such a concentration of diverse emotions, dreamy idleness, good humour and speculative lust, and one may judge its potency by comparing it with the innocuous solo line at the beginning of *Printemps*. Certainly the chromatic outline of the faun's phrase is no mere imitation or 'impression' of a panpipe; it is the primary symbol of the work and one should appreciate the silence that surrounds it.

If one has to accord Debussy an '-ism', then 'symbolism' would probably be the most truthful. In a letter to Chausson in 1893 he wrote of his newly begun work on *Pelléas* 'I have found, and what is more quite spontaneously, a technique which strikes me as fairly new, that is silence (don't laugh) as a means of expression and perhaps the only way to give the emotion of a phrase its full power'. This desire for simplicity and space never left him. As a child he used to prefer small pictures with large margins, and in 1913 he wrote of the Annamite theatre he had seen nearly 25 years earlier: 'A small, shrieking clarinet is the guide of the emotion; a tam-tam the organizer of terror . . . and that is all'. *Pelléas* itself is the most complete summary of Debussy's ideals up to his 40th year. Critics have written of its reticence without noticing that this reticence is a concentration of feeling not a lack of it; obviously for those writing at the time, nurtured on Verdi, Wagner and Strauss, it was hard to appreciate that passion need not be measured in decibels.

From 1901 Debussy wrote articles for a number of magazines in which one can follow the development, without radical change, of the views he expressed to Guiraud. In April 1902 he wrote of his reasons for choosing *Pelléas*: 'I wanted from music a freedom which it possesses perhaps to a greater degree than any other art, not being tied to a more or less exact reproduction of Nature but to the mysterious correspondences between Nature and Imagination'. To reinforce this freedom, there must be others. The public must be free to state their opinion: 'In art there can be no obligatory respect; that is the sort of nonsense that has been off-loaded on to a number of people who have become

7. Autograph of part of the second movement of Debussy's 'En blanc et noir', composed 1915 (F-Pn MS.989)

respectable only through having lived long ago'. The response itself should be free, unfettered by a formal musical education - 'Love of art does not depend on explanations' - or by experience as in the case of those who say of a new work 'I need to hear that several times' Utter rubbish! When we really listen to music, we hear immediately what we need to hear'. But the hardest-won freedom of all is that of the artist, who must please only himself 'Truly, that day far in the future - I hope as far as possible - when I shall no longer stir up controversy, I shall reproach myself bitterly'; but (in a letter of 1911) 'how much one has first to find and then suppress, to reach the naked flesh of emotion'.

One theme that runs through Debussy's later thoughts is the need for French music to be true to itself. Gluck and the imitators of Wagner came under heavy fire and he held up Rameau as the great neglected figure of French musical history. Rather than Wagner, the model should be Musorgsky, not for imitation, but as an example of directness and truth of utterance within a native tradition. This is not a call for provincial narrow-mindedness, and indeed Debussy could hardly be convicted of this; his taste in the visual arts was catholic, embracing Turner, Moreau and Hokusai, and in music itself the styles of the Near and Far East as well as Spain. But all influences had to be held in balance and the neck of eloquence well and truly wrung. Music, for Debussy, lay neither in the scholastic nor the bombastic, but in the playing of the gypsy violinist Radès. 'In a cheap, ordinary café, he gives the impression of playing in the depths of a dark forest, and calls up from the bottom of your soul a kind of melancholy that we rarely bring to the surface. He could drag secrets from an iron safe.' Here was the 'naked flesh of emotion'.

8 DEBUSSY AND THE MUSICAL WORLD. Such ideals, intransigently held and all too eloquently expressed, did not help to make Debussy an establishment figure. Until the production of *Pelléas* he remained remote from the mainstream of French musical life, happier in the 'Chat Noir' than at the meetings of the Société Nationale. He entertained a secret love for the music of Massenet but had little time for the Franckian school headed by d'Indy and did his best to persuade Chausson not to overdo the counterpoint but to let his imagination run (he himself felt that the end of the *Poème* for violin and orchestra marked Chausson's finest inspiration). Among composers his most faithful friend was Satie, his most implacable enemy Saint-Saëns who as late as 1915 wrote to Fauré: 'I advise you to look at the pieces for two pianos, *Noir et blanc* [sic], which M. Debussy has just published. It's incredible, and the door of the Institut must at all costs be barred against a man capable of such atrocities'. Saint-Saëns had his way.

Pelléas suddenly made Debussy an 'important' composer. For his parents' sake he accepted the Légion d'honneur in 1903 and every major work from then on was eagerly scrutinized by the critics. He was content to leave his piano works chiefly in the hands of Viñes until his debts forced him on to the platform in 1910. His career as a conductor was similarly motivated, although he was certainly unhappy about early performances of *La mer* under Chevillard, and his own performance in 1908 came as a revelation to many. He also found Parné's conducting in the rehearsals of *Ibéria* 'rather left-hand' (i.e. intellectual), and in both conductors he missed the improvisational fluidity that he sought, even if his own unavailing struggles with *Ibéria* in Turin

convinced him that the task was no easy one.

Apart from money, Debussy's chief problems in the first decade of the century were the estrangement from a majority of his friends over his second marriage, and the rise of 'debussisme'. As one may easily imagine, the last thing he wanted was to be the head of a school of composers, but many critics and journalists seemed determined to force the role on him, and the affair reached a climax with the publication of *Le cas Debussy* in 1909, and in particular 'M. Claude Debussy et le snobisme contemporain', an article in it by Raphaël Cor. The article, full of bigotry and spite, asks such questions as: 'Has anyone noticed that among the many beautiful passages in *Ariane et Barbe-Bleue* by Dukas, produced in 1907, the least successful act is certainly the second, in which Debussy's influence is predominant?'. Debussy was just as annoyed by those who wanted him to turn out endless replicas of *Pelléas*, and he had to find his own way between the opposing camps of hostility and blind devotion. Worst of all was his realization that so few of his contemporaries could see beyond the trills and the whole-tone chords to the spirit of his music. *Le martyre* brought him a short-lived notoriety and *Jeux* not even that, after which World War I put a stop to any but small-scale music-making. The effect of the war was thus to reinforce Debussy's desire, in his illness, to turn in upon himself and to work in his own way for the preservation of French culture. The destructive intrusion of *Ein feste Burg* into the second movement of *En blanc et noir* is his most poignant comment on the world as he saw it; the last three sonatas, signed 'Claude Debussy, musicien français', the pledge of his hope for the future.

(i) *Debussy and Ravel* There is no record of any Debussy-Ravel correspondence but it seems likely that they first met early in 1898 at the first performance of Ravel's *Sites auriculaires*. Two years later Ravel was present at a private play-through that Debussy gave of *Pelléas* and their relations were certainly friendly until the time of its production. The break in their friendship occurred for various complementary reasons: the supposed similarity between Ravel's *Habañera*, from *Sites auriculaires*, and Debussy's later *La soirée dans Grenade*; Debussy's disappointment that Ravel should squander his undoubted gifts in the 'factitious Americanism' of the *Histoires naturelles*, no doubt a good measure of jealousy on Debussy's part; and possibly a remark that Ravel made on the morality of Debussy's second marriage - a mutual friend, Misia Sert, later claimed that Ravel contributed to a small weekly allowance for Debussy's first wife after Debussy abandoned her. Already in 1904 such an intelligent layman as Rolland could write: 'I have met a variety of musicians. Among them, one who is more Debussyste than Debussy, Ravel'. Such remarks annoyed Debussy extravagantly. As Lockspeiser pointed out, in Debussy's letters Ravel's name is never mentioned 'without a note of sarcasm, irony or concern' and he expressed considerable annoyance in 1913 when he found that Ravel had set two of the same Mallarmé poems as himself - largely, one imagines, because he was afraid that this would be the signal for another orgy of comparison. On the other hand, apart from an understandable feeling of propriety for the new textural and harmonic ideas in *Jeux d'eau*, Ravel all his life revered Debussy as a master. Besides making a number of arrangements of Debussy's music, he gave the first performance of *D'un cahier d'esquisses*, and to the 'Tombeau de Debussy'

printed in the *Revue musicale* of 1920 he contributed no brief *pièce d'occasion* but the first movement of his Sonata for violin and cello. Towards the end of his life he said to a friend, of *L'après-midi*: 'It was hearing this work, so many years ago, that I first understood what real music was'.

(ii) *Debussy and Stravinsky* Debussy and Stravinsky first met backstage after the first performance of *The Firebird* on 25 June 1910. Debussy's immediate reactions were commendatory, although Stravinsky related that Debussy later qualified his praise with: 'After all, you had to begin somewhere'. In Russia Stravinsky had been impressed by Ziloti's performances of *L'après-midi* and the *Nocturnes* but there is little of Debussy's manner to be found in *The Firebird*, rather more of Rimsky-Korsakov's *Petrushka* was the one work of Stravinsky over which Debussy never expressed a reservation, referring to an 'orchestral infallibility that I have found only in *Parsifal*' and to the 'sonorous magic' in the 'Tour de passe-passe' (figs. [58–64] in the miniature score). There followed a period of close friendship, during which Debussy asked Stravinsky's advice about the scoring of *Jeux*, and together they performed the piano-duet version of *The Rite of Spring*, Debussy playing the bass at sight without apparent difficulty. However, after the première of *The Rite* Debussy's appreciation of Stravinsky became tinged almost with fear. In a letter of 1916 he described Stravinsky as 'a spoilt child who, from time to time, makes rude gestures at music'.

He professes to be friends with me because I have helped him climb to a rung on the ladder from which he lobes grenades that don't all explode'. If Debussy felt that Ravel was squandering his gifts, then perhaps Stravinsky was being all too successful. Acknowledging the present of a score of *The Rite* Debussy wrote to him: 'for me, who descend the other slope of the hill but keep, however, an intense passion for music, for me it is a special satisfaction to tell you how much you have enlarged the boundaries of the permissible in the empire of sound', a task which Debussy had begun but which he knew he was now too ill to pursue very far. On the other hand, Stravinsky, like Ravel, never doubted his debt to the older man. He may have found *Pelléas* 'a great bore on the whole, in spite of many wonderful pages' but he also confirmed that 'the musicians of my generation and I myself owe the most to Debussy'.

(iii) *Debussy's musical style and its posthumous influence.* The details of Debussy's technique are easy to catalogue but, as with catalogues, they give little idea of the quality of the product. His desire to free himself from tonality led him to use the church modes and melodic lines inspired by plainsong, the whole-tone scale and chords, synthetic modes such as the major scale with sharp 4th and flat 7th and parallel 9ths and triads in which each chord is no more than a colouring of the melodic line. Rhythmically he was for a long time bound by the four-bar phrase (often a two-bar one repeated, with or without variation in the fourth bar) but the combination and succession of duplets and triplets frequently rounds off the squareness of the structure. From *La mer* onwards he achieved a new fluidity of rhythm, particularly in orchestral works where he tended to present several planes of timbre and material simultaneously. The influence of the Orient, especially of the Javanese gamelan, operated not only on his scoring as such but on his conception of what was 'permissible in the empire of sound' – what in the 19th century had

been noise was now music. Above all, as has been well said, Debussy brought music out of the salon and the concert hall and into the open air, even to an immaterial existence independent of place or space.

If one omits Schoenberg, who quite failed to recognize his rival's stature, a list of 20th-century composers influenced by Debussy is practically a list of 20th-century composers *tout court*. Bartók acknowledged the 'insights' that Debussy's music gave him into harmony and orchestration, as *Bluebeard's Castle* and *The Miraculous Mandarin* testify, *Wozzeck* owes much to *Pelléas*, and Webern's interest in timbre stems in part from Debussy, for Varèse the beginning of *L'après-midi* provided the model for those numerous opening paragraphs where a single note sets up a gravitational field, and even Les Six, after Cocteau's initial diatribes, came round individually to a more sober appreciation.

Among the leading musical minds of the 1950s and 1960s, Cage obviously looks back to Debussy's example of 'letting sounds be themselves', on the need to re-educate ourselves in what we expect of music, and on the value of silence, for Messiaen at ten years old *Pelléas* was 'a veritable bombshell', and works of Boulez like *Phédon* and *Éclat/multiples* can be seen as further extensions of the fragmentary coherence in *Jeux*, while the whole *raison d'être* of electronic music is the same extension of those boundaries on which *L'après-midi* first exerted an insidious pressure. Can it be entirely fortuitous that the major 9th, Debussy's best beloved among chords, sounds throughout the 70 minutes of Stockhausen's *Stimmung*, coupled with the recitation of magic names? Let Debussy have the last word: 'We must agree that the beauty of a work of art will always remain a mystery, in other words we can never be absolutely sure "how it's made"'. We must at all costs preserve this magic which is peculiar to music and to which, by its nature, music is of all arts the most receptive'.

WORKS

OPÉRAS

Axel (l'Isle Adam), 1 scene, c1888, unpubd.
Rodrigue et Chimène (3 C. Mendes, after G. de Castro and Corneille), vocal score of Acts 1 (in part), 2 and 3, 1890–92, unpubd.
Pelléas et Mélisande (5 Maeterlinck, abridged Debussy), 1893–5, 1901–2, Opera-Comique, 30 April 1902, vocal score (1902), vocal score rev. (1907), full score (1904), sketches (Lucs, Geneva, 1977).
Le diable dans le beffroi (2 tableaux, Debussy, after Poe) 1902–11, inc., sketches for scenario and music in Lockspeiser *Debussy et Edgar Poe* (1962).

La chute de la maison Usher (2 scenes, Debussy, after Poe), 1908–17, inc., orig. planned as 3 scenes, New Haven, 25 Feb 1977, complete text and vocal score of scene 1 (prologue) and part of scene 2 (Usher's monologue) in Lockspeiser *Debussy et Edgar Poe* (1962).

BALLETIS

Khamma (legende dansée, W. L. Courtney, M. Allan), 1911–12, beginning orchd Debussy, rest Koehlin under Debussy's supervision, Opera-Comique, 26 March 1947, pf score (1916).

ROGER NICHOLS (work-list with ROBERT ORLEDGE)

Decadt, Jan (b Ieper, 21 June 1914). Belgian composer. He studied harmony, counterpoint and fugue at the Ghent Royal Conservatory, and composition with Jean Absil in Brussels. He is director of the Peter Benoit Music Academy at Harelbeke. In 1957 he became professor of counterpoint and fugue at the Antwerp Conservatory and in 1971 started teaching composition

at the Ghent Conservatory. His appreciation of the contemporary school of Flemish painters is evident in the *Colardyn Suite*, *Permeke Suite* and *Muzikale monografie voor een groot schilder*.

De Caix d'Hervelois, Louis. See CAIX D'HERVELOIS, LOUIS DE

Decani and cantoris. The two halves of the choir in an English church: decani is the south side, cantoris the north. The names mean 'dean's [side]', 'cantor's [side]', and refer to the two highest officials of the chapter of a medieval cathedral. The CANTOR, or precentor, ranked immediately after the dean in secular cathedral establishments. The dean's stall was at the west end of the choir, facing east, just to the south of the central aisle, the cantor's was opposite, north of the aisle. For certain duties the choir was divided into two equal halves. The singers on the dean's side – decani – took the leading part one week, those on the cantor's side – cantoris – the next, during the seasons of the three great festivals the alternation was daily. Psalms, canticles and hymns were sung in alternation between the two halves. Together with much other Latin terminology, the names survived the Reformation, and have been used ever since in cathedral music to signify the two halves of the choir.

NICHOLAS TEMPERLEY

Decapella (fl c1550). Composer of 11 chansons printed by Attaignant and Du Chemin in Paris in 1549 and 1550. Most are in the contrapuntal, syllabic style introduced by Janequin, with simple rustic texts and melodic material which is probably of popular origin. It is possible that he is identifiable as Hugo de la Chapelle, the composer of two motets, *Tribularer si nescirem* and *Ave regina coelorum*, published at Lyons by Moderne ten years earlier, or alternatively Andreas Capellus (Andrea Capella), the composer of a five-voice *Magnificat* and four hymns, *Cujus sacra viscera*, *Nobis natus, nobis datus*, *O lux beata Trinitas* and *Qui pascis inter lilia*, printed in Wittenberg by Rhau (1540-42).

WORKS

(all for 4vv)

- Belle commère, Dieu vous gard, 1549²⁴; En Tour la feste Saint Martin 1549²⁴; Faictes si vous plaisi vostre ausmosne, 1549²⁶; Hélas Vénus, trop tu me fuz contraire, 1549²⁷; Le temps vaudroit de soy, 1549²⁷; Passant mélancolie un soir, 1549²⁷
- Si vous aviez, comme moy, faim, 1550⁹; Ung doux baiser m'est bien permis, 1549²²; Ung soir Guillot à sa Cathin a dict, 1549²²; Un viel soudard priot une fille, 1549²⁶; Veoir, deviser et converser, 1549²⁷

FRANK DOBBINS

Decaux, Abel (b Auffay, 1869; d Paris, 19 March 1943) French composer, organist and teacher. He studied at the Paris Conservatoire under Massenet, Widor and Guilmant. A remarkable improviser, he was organist at the Sacré-Coeur in 1903. In 1926 he emigrated to Rochester, New York, where he worked as a teacher of the organ and composition until 1937, when he returned to Paris to teach the organ at the Ecole César Franck. He was known in the USA as 'the French Schonberg', although the harmony of his best-known compositions, the four piano pieces of *Clairs de lune* (1900-07, published 1913), hardly reaches beyond late Liszt. The first three anticipate the deathly stark tone-painting of Ravel's 'Le gibet', while the last, 'La mer', is a thundering treatment of a typical impressionist subject.

ALAIN LOUVIER

Decem (It.) An ORGAN STOP

Deceptive cadence. A term, principally used in American writings, for an interrupted cadence, that is, a CADENCE in which an expected tonic resolution is interrupted, usually by the substitution of a submediant resolution (V-VI).

Dechevrens, Antoine (b Chêne-Bourg, nr Geneva, 3 Nov 1840, d Geneva, 17 Jan 1912) Swiss musicologist. He entered the Jesuit order in 1861 and taught music in Paris, philosophy in Vannes and theology at the University of Angers. He was the leading figure among a group of Jesuit scholars including Gerhard Geitmann, Ludwig Bonvin and Alexander Fleury, who supported a modern restoration of Gregorian chant rhythm based on a mensural system of proportional long and short note values. This group strongly opposed the equalist principles of free non-measured rhythm advocated by the Solesmes school under André Mocquereau. Dechevrens' theories like those of the Solesmes scholars, relied heavily on the neumatic notation with special signs and letters in the early St Gall manuscripts. He believed that the time value of a note is affected by adjacent notes, and is therefore variable. In *Les vraies mélodies grégoriennes* he presented both the manner in which he thought that the melodies were originally sung (using bar-lines as a device to mark divisions of the melody, see ex.1), and modern transcriptions (in which he imposed

regular 2/4 or 4/4 metre by altering rhythms and ornamentation; see ex.2). About 1902 Dechevrens returned to Switzerland where he founded the music periodical *Voix de St Gall* (1906-7) to which he contributed many articles. He defended his theories at the

Second Congress of the International Musical Society at Basle in 1906 and in an 'open letter' to Peter Wagner.

JOHN A. LEMFSON

Decibel (dB). A logarithmic unit used for expressing the difference in level between sounds of different intensity or electrical signals of different powers. It is related entirely to the ratio of the two quantities measured. If two signals have intensities I_1 and I_2 then their difference in level is defined as $10 \log_{10} (I_2/I_1)$. The scale is logarithmic and gives results that are nearer to the experience of listeners than would be those of a linear scale. Differences in level expressed in decibels may be added and subtracted. If two sounds seem to the ear, when heard alternately, to have the same loudness and one of them is a standard 1000 Hz that is n dB above the accepted threshold of hearing at that frequency, the other tone whatever its pitch or timbre is said to have an equivalent loudness of n phons. See also SOUND, §4.

Decima (It.) (1) TENTH.

(2) An ORGAN STOP (Decem)

Décima (Sp.). A verse form, commonly sung, comprising ten lines (rhyme scheme *abbaacddc*) which develops a theme introduced by a quatrain (rhymed *abab*). Textual material may be set or improvised, religious or secular. In Venezuela *décimas* are sung in parallel 3rds and accompanied by the *cuatro* (small four-string guitar) in primary triad harmony to either *merengue* or *joropo* rhythms. The *décima* is common throughout Latin America and is particularly characteristic of Argentine and Chilean *payas* (*payadas*), *tonos* and *estilos*.

WILLIAM GRADANTE

Decius [Degnus, Deeg, Tech a Curia], **Nikolaus** [Nickel von Hof] (b Hof an der Saale, c.1485, d. after 1546) German Kantor and composer. A member of a respected family of Hof, he matriculated on 16 October 1501 at Leipzig University where he took the Bachelor of Arts and later the Bachelor of Both Laws degrees. He then seems to have entered the church, having made an unsuccessful application to Zwickau, he was made provost of the Benedictine monastery at Steterburg, near Brunswick, in 1519. There he wrote a commentary on Matthew, *Summula doctrinam Ihesu Christi ex Codice Matthei* (Brunswick, 1521). Parts of it are written in

Low German, betraying the influence of Luther (who preferred the use of the vernacular) and the Reformation movement. On January 1522 Decius was appointed rector of the Lyceum at Hanover, but within a few months he returned to Brunswick as a teacher at the Katharine and Aegidian schools. It was probably during this year that he wrote three sacred hymns in Low German to replace parts of the Latin Ordinary of the Mass. In 1523 he went to Wittenberg to study the theology of the reformed church and, recommended by Luther, he became a preacher in Stettin in 1524. He left Stettin in the late 1520s, in 1530 he is mentioned as a deacon in Liebstadt, and in 1534 he went to Mühlhausen, near Elbing. From 1540 he was deputy Kantor to Hans Kugelmann and assistant court preacher to Duke Albrecht of Prussia in Königsberg for three years, before returning to Mühlhausen. He seems to have left Mühlhausen in 1546.

Decius's three hymns, *Aleyne God yn der Hoge v'reere* (Gloria), *Hyllich ys Godt de vader* (Sanctus) and *O Lam Gades unschuldig* (Agnus Dei) are probably the oldest evangelical hymns, preceding Luther's first ones by a year. The melodies are based on the corresponding Gregorian chants. The polyphonic music which he is said to have composed in Brunswick does not appear to have survived.

HANS-CHRISTIAN MÜLLER

Decke (Ger.) BELLY.

Decker, Joachim (b Hamburg, c1575, d Hamburg, 15 March 1611) German organist and composer. He was the son of Eberhard Decker, city Kantor of Hamburg from 1561 to 1605. Joachim was organist at the Nikolikirche, Hamburg, from 1596 (or possibly 1593) to 1611. None of his organ music survives, but he was the major contributor to the *Melodeyen Gesangbuch* (Hamburg, 1604), which contains 30 of his four-part German chorale settings. They are chordal settings with the melody in the soprano and were designed for congregational singing with organ accompaniment, an innovation of the collection; seven appear in Organum, i/26-7 (Lippstadt, 1950) and one in Antiqua Chorbuch, i (Mainz, 1951).

FREDERICK K. GABLE

Declamation. In music, the relation between verbal stress and melodic accent in the setting and delivery of a text. J. G. Walther (*Musicalisches Lexicon*, 1732) applied to music the rationalistic concept of declamation, which originally dealt with speech, and focussed his attention on recitative. Jean-Jacques Rousseau (*Dictionnaire*, 1768) dealt with declamation as the relationship between musical and linguistic accent, which had been much discussed in French singing treatises, such as Bémigne de Bacilly's *Remarques curieuses sur l'art de bien chanter* (1688). Declamation as an aspect of artistic singing (particularly in the performance of recitative) remained in the forefront of French vocal pedagogy until the 20th century. A. de Martin ('Traté de chant', *EMDC*, II/i (1926), p. 928) listed the qualities of declamation as 'delivery, articulation, pronunciation, slurring, accent, phrasing, style, *slancio* etc'.

OWEN JANDER

Deconet, Michele (b Kehl, nr Strasbourg, c1712; d Venice, after 1780) Italian violin maker of Alsatian birth. He was a soldier in the French army and a violinist before he turned to instrument making some years after arriving in Venice. He was probably a pupil of Pietro Guarneri of Venice, though much of his work was equally influenced by that of Montagnana. He was active from 1745 to at least 1780, and was the most prolific Venetian maker after about 1750. Deconet's violins are usually fine-sounding instruments, though not equal to those of the Venetians of the first half of the 18th century. In general the earlier ones are the best, with wood and varnish of excellent quality. Deconet also made a number of violas and cellos.

CHARLES BEARI

Decorus, Volupius. See SCHONSLEDER, WOLFGANG.

Decoust, Michel (b Paris, 19 Nov 1936) French composer and conductor. He studied at the Paris Conservatoire with Fourestier, Milhaud and Messiaen, taking prizes for harmony (1960), counterpoint (1961), orchestral conducting (1962) and composition (1964). He won the Prix de Rome in 1963. In 1965 and 1966 he attended the Cologne new music courses given by Stockhausen and Pousseur, and he was later appointed music director of the Loire département and director of the Pantin Conservatory. A member of Marićan's GERM group (1963-8), he has been influenced by Cage's work as much as by Stockhausen's.

Decsényi, János (b Budapest, 24 March 1927). Hungarian composer. He was a pupil of Sugár at the Budapest Conservatory and of Szervánszky at the Budapest Academy of Music, from which he graduated in 1957. By that time his works had already met with success at the Warsaw World Youth Festival (1955) and at the Vercelli Composers' Competition (1956). Decsényi has been active in the music section of Hungarian radio since 1951. At first strongly influenced by the music of Kodály, he later followed newer directions, his music often results from the stimulus of other art forms. The structures are clearly defined, sometimes being novel versions of classical moulds.

MELINDA BERLÁSZ KÁROLYI

Decsey, Ernst (Heinrich Franz) (b Hamburg, 13 April 1870, d Vienna 12 March 1941). Austrian critic and author. Though born in Hamburg he lived for most of his life in Vienna where he studied law (JurD, 1894) and at the same time took lessons in harmony, counterpoint and composition at the conservatory with Bruckner and Robert Fuchs. He became music critic of the *Grazer Tagespost* in 1900 and in 1908 took over the editorship of this paper. In 1920 he joined the *Neues Wiener Tagblatt* as its first critic but had to resign in 1938 on account of the political events in Austria. Decsey was a prolific and brilliant writer who combined critical acumen with felicitous expression. In addition to his work as a critic he was very active as the author of musical novels, plays and librettos. In recognition of his literary achievement the Austrian Government made him an honorary professor in 1924.

Dedekind, Constantin Christian (b Reinsdorf, Anhalt-Cöthen, 2 April 1628; d Dresden, 2 Sept 1715). German poet and composer, a grandson of Henning Dedekind. He received his early education at the famous abbey at Quedlinburg, where his teacher was the abbess, Anna Sophia, Landgravine of Hesse. At 13, influenced by the abbess, he had already begun to write poetry, and five years later he went to Dresden to study with Christoph Bernhard. In 1654 he became a bass singer in the Dresden court chapel and was still in that position in 1663, by which time he had married Bernhard's wife's sister, Maria Dorothea Weber. In 1666, two years after Bernhard left Dresden for Hamburg, Dedekind was appointed director of the Dresden court orchestra. He was one of the numerous distinguished violinists then resident in Dresden, and the prominence of string music at the court attested to Dedekind's influence. In 1675, however, he resigned in the face of mounting animosity towards him on the part of the other musicians: court music at Dresden was torn between Italian and German musicians each attempting to dominate, and despite the high level of performance the atmosphere was charged with unpleasant tensions. As a tax collector at Meissen and in the Erzgebirge, Dedekind had accrued enough wealth to survive now without a musical appointment. He tried his hand at music publishing but was unsuccessful. He had not neglected his poetry during his years in Dresden, however, and under the pseudonym 'Con Cor D' he was elected to the prominent poetic academy known as the Elbschwanenorden. During the last 40 years of his life he composed very little and devoted his artistic energies to poetry.

Dedekind's most important work is his huge collection *Aelbianische Musen-Lust* (1657). It contains 146 sacred and secular solo songs with continuo. The texts, whose authorship is clearly indicated, are by the most important lieder poets of the time, including Dach, Finkeltaus, Fleming, Gläser, Rist, Schirmer and Dedekind himself. Nearly all the songs are strophic, with generally syllabic setting of the words. Most of his other music displays much more Italian influence. Following Adam Krieger he inserted instrumental ritornellos between strophes, and in a few cases the violins accompany the solo voice. His *Musicalischer Jahrgang* contains 120 'concertos' - sacred works for two voices and bass, with the optional addition of a bass voice and two violins, or substitution of them for the continuo and the two voices respectively. The forms used include recitatives, ariosos and da capo arias, and these and other pieces in similar collections by Dedekind are thus examples of German sacred cantatas. He also wrote dance music of various types. His literary works include song texts, scriptural translations, lyric and satiric poetry, plays sacred and secular, *intermedi* and oratorio texts.

JOHN H. BARON

Dedekind, Euricius (b Neustadt am Rubenberge, Lower Saxony, Dec 1554, d Lüneburg, 30 Nov 1619) German composer and clergyman, elder brother of Henning Dedekind; his first name has sometimes been incorrectly cited as Heinrich. He was the son of the pastor and poet Friedrich Dedekind, who worked at Neustadt from 1551 to 1576, when he moved to Lüneburg, and thus he must have grown up at Neustadt and may also have moved to Lüneburg in 1576. In 1578 he matriculated at the University of Wittenberg. On 26 April 1581 he was engaged to assist Christoph Praetorius, Kantor of the Johannisschule, Lüneburg, and at the beginning of 1582, when Praetorius had been pensioned off, he was appointed his successor. On 18 December 1594 he was appointed third pastor at St Lamberti, Lüneburg, and from 1617 until his death he was principal pastor. At St Lamberti he continued the tradition whereby the Lüneburg Kantors wrote polyphonic Christmas songs ('cantilena scholasticae') every year to words supplied by the headmasters of the local schools. It is impossible to assess his achievement as a composer since of his three known published collections one is lost and the other two survive in incomplete form.

WORKS

- Neue teutsche Liedlein, aus den zwölf ersten Psalmen Davids und andern Sprüchen der Schrift genommen, 3vv (Uelzen, 1585)
 Antidota, adversus octo hominum passiones, 4vv (Uelzen, 1589)
 Periochae breves evangeliorum dominicalium et festorum praecipuorum, 4, 5vv (Uelzen, 1592), lost, cited in *Walther ML*, pt ii (Uelzen, n.d.), cited in *EitnerQ*
 9 other motets (incl 7 cantilena scholasticae, dated 1604-6), *D-Lr* (see *Welter*)

HORST WALTER

Dedekind, Henning (b Neustadt am Rübenberge, Lower Saxony, 30 Dec 1562; d Gebesee, nr. Erfurt, 28 July 1626). German theologian, writer on music, music editor and composer, younger brother of Euricius Dedekind. He grew up at Neustadt, where his father, Friedrich Dedekind, pastor and poet, was then working, and he attended schools at Hanover, Hildesheim and Lüneburg (to which his father moved in 1576). In the winter of 1582 he matriculated at the University of Erfurt. From 1586 he lived at Langensalza, first as Kantor in succession to Georg Otto, then, from 1592, as deacon, and later also as morning preacher, at St Bonifazius. In his *Lamentabilis historia tristissima incendi Salissae Thuringorum* (Erfurt, 1604) he described a fire that destroyed his home and possessions on 6 February 1602. He delivered his farewell sermon at Langensalza on 22 February 1615 and moved to Gebesee, where he was pastor until his death. His principal contributions to music date from his six-year period as Kantor. As a composer he is known only by the few pieces that he contributed to his anthology of secular tricinia (*RISM* 1588³⁰), the composers in which are identified only by their initials. One of them is Valentin Götting, to whose *Compendium musicae modulativae* (Erfurt, 1587) Dedekind supplied a preface. He himself wrote two theoretical works, both primers, the second of which, *Praecursor metricus musicae artis*, is the more advanced. Much later, in 1615, he republished as contrafacta Gregor Lange's two very popular sets of three-part *Newer deutscher Lieder*, first published in 1584 and 1586.

Dedekind had a son who was also called Henning but who was not a musician, and he must be distinguished both from him and from another Henning Dedekind, who was a pastor at Vorsfelde, near Wolfsburg, Lower Saxony, in the early 17th century.

ADAM ADRIO

Deeg, Nikolaus. See DECIUS, NIKOLAUS.

Deering, Richard. See DERING, RICHARD.

De Fabritiis, Oliviero (Carlo) (b Rome, 13 June 1902) Italian conductor and composer. He studied at the Rome Conservatory with Licinio Refice and Giacomo Setaccioli, and made his début in 1920 at the Teatro Nazionale, Rome. After engagements at Salerno and at the Adriano in Rome, from 1932 to 1943 he was

artistic secretary at the Teatro dell'Opera in Rome. There he conducted frequently, and in 1938, with Toti dal Monte and Gigli in *Lucia di Lammermoor*, he inaugurated the summer performances at the Baths of Caracalla. De Fabritius conducted many operas with Gigli in Europe and the Americas, and also Gigli's famous recordings of *Andrea Chénier*, *Tosca* and *Madama Butterfly*. He has given concerts in Europe, America and Japan, but has been mainly concerned with opera, giving the premières of operas by Mascagni, Pizzetti, Rossellini, Zafred and others, as well as conducting most of the standard Italian repertory. He first appeared in Britain at the 1963 Edinburgh Festival in *Adriana Lecouvreur* with the San Carlo company from Naples, and made his Covent Garden début two years later with *Simon Boccanegra*. A conductor of characteristic Italianate warmth of expression, he is skilled at balancing vocal consideration with instrumental detail. He has composed a number of vocal works

PIERO RATTALINO

Defauw, Désiré (b Ghent, 5 Sept 1885; d Gary, Ind., 25 July 1960) American conductor and violinist of Belgian birth. A violin pupil of Johan Smit, he gave his first London performances in 1910. In 1914, as a refugee from Belgium, he founded in London the Allied Quartet with Charles Woodhouse (second violin), Lionel Tertis and Emile Doehaerd. Returning to Belgium, he became his country's leading conductor. The tradition that the concerts of the Brussels Conservatory should be conducted by the director was broken for him, and he conducted them from 1926 to 1940. He was also a professor of conducting at the conservatory from 1926. He appeared in New York in 1938 as guest conductor with the NBC SO, and in 1940 went to Montreal as conductor of the Société des Concerts Symphoniques. In 1943 he was appointed to one of the most important conducting posts in the USA, that of the Chicago SO, but won little success and left in 1947 after four seasons. He later accepted the post of conductor of the Gary SO (1950–58), retiring through ill-health. He made a number of recordings with the Brussels Conservatory Orchestra and the Chicago SO, mainly of the standard repertory but including what appears to have been the first recording of Prokofiev's *Sylvian Suite* (with the Chicago SO).

ARTHUR JACOBS

De Feghg, Willem. See DE FESCH, WILLEM

De Ferrari, Serafino (Amedeo) (b Genoa, 1824; d Genoa, 27 March 1885). Italian composer, pianist, organist and conductor. He first studied in Genoa under Bevilacqua, Serra and Sciorati, continuing in Milan under Placido Mandanici; he then appeared in public as a pianist, organist and conductor. In 1852 he was invited to Amsterdam, where he conducted several opera seasons. On his return to Italy he became director of singing at the Teatro Carlo Felice in Genoa and later at the Teatro Carignano in Turin. In 1873 he was appointed director of the Civico Istituto di Musica in Genoa, a post he held until his death.

Except for *Il matrimonio per concorso* (1858), which was hindered by a poor libretto, all De Ferrari's operas were successful, particularly *Pipelet* (1855), usually

considered his finest, and *Il menestrello* (1859), which were performed all over Italy and sometimes abroad. However, these works, elegantly written, charming and melodious, but not highly original, did not maintain their popularity and eventually disappeared completely.

WORKS

Operas *Catilina*, 1852, not perf., Don Carlo (G. Pannachi), Genoa, Carlo Felice, 12 Feb 1854, excerpts (Turin, n.d.), rev. as *Filippo II* (R. Berninzone), Carlo Felice, carn. 1857, *Pipelet*, o il portinaio di Parigi (Berninzone, after E. Suc. *Mystères de Paris*), Venice, S. Benedetto, 25 Nov 1855, vocal score (Milan, n.d.), *Il matrimonio per concorso* (D. Bancalari, D. Chiossone), Venice, La Fenice, 7 Aug 1858, excerpts (Milan, n.d.), *Il menestrello* (Berninzone), Genoa, Doria, 17 April 1859, rev. Genoa, Paganini, 23 July 1861, vocal score (Turin, 1862), *Il cadetto di Guascogna* (Berninzone), Genoa, Carlo Felice, 9 Nov 1864, rev. Turin, Rossini, spr. 1873, vocal score (Turin, n.d.)

Other works *Delia*, ballet, collab. others, 3 cantatas; chamber music, songs, incl. *La croce della mamma*, *Fiori d'aprile* (Milan, n.d.), sacred music, incl. masses, vespers, hymns

De Ferraris, Paolo Agostino. See FERRARIO, PAOLO AGOSTINO

De Fesch [Defesch, de Veg, de Feghg, du Fèche]. **Willem** (b Alkmaar, 1687; d London, ?1757). Netherlands composer and virtuoso. He was the son of Louis de Fesch and Johanna Maasbragt; his elder brother Peter may have been *Magister musices* at Leiden: he is mentioned as such in the Album Studiosorum of Leiden University. Probably Willem completed his musical education with the violinist Karel Rosier, vice-Kapellmeister at the court of the Elector of Cologne at Bonn, whose daughter he married in 1711.

By 1710 De Fesch had established himself as a musician at Amsterdam, where he stayed until 1725. During this period he made several appearances as a concert violinist, including three at Antwerp in 1718, 1719 and 1722. In 1725 he was appointed *kapellmeister* at Antwerp Cathedral in succession to Alphonse d'Eve, a post he held until 1731, when he resigned because of repeated quarrels with the chapter and the chapel – quarrels for which his temperamental, mean and slovenly character was apparently to blame. A few years later De Fesch was with his family in London, where he remained for the rest of his life.

In Holland and Antwerp De Fesch had occasion to meet the most representative figures of musical life in the Low Countries in the 18th century. In London, one of the most important musical centres of Europe, he was able to develop his activity as a concert violinist and virtuoso to the full. He appeared frequently as a concert violinist, often performing his own compositions. His oratorio *Judith* (text by W. Higgins) was performed in 1733 and revived in 1740; the work must have appealed to the taste of his contemporaries, as William Hogarth caricatured De Fesch in a performance of this oratorio, and used this caricature as a subscription ticket for 'A Midnight Modern Conversation'. In London De Fesch was listed as 'a respectable professor on the violin'. Apparently he was not involved in the current rivalries between Handel and the Nobility Opera: it is known that he was friendly with people who were not favourably inclined to Handel (that is, people in the Prince of Wales's circle), but later (1746) he was first violin in Handel's orchestra. In 1748 and 1749 De Fesch directed the orchestra at Marylebone Gardens. In

1744 and 1745 two large-scale vocal works by De Fesch were announced: the pastoral *Love and Friendship*, and the oratorio *Joseph*, both of which had several performances in later years. After 1750 he seems to have withdrawn from public life.

If De Fesch was a good and an accepted violin virtuoso of his time, he was also an accomplished and even a pioneering composer. In his compositions, which ranged from the grandly conceived oratorio, mass and concerto to duets, solo and trio sonatas and simple songs, a clear development can be seen which largely coincides with the different stages in his career. The Amsterdam period, comprising works up to and including op 4

Willem de Fesch engraving (1751) by François Morellon le Cave after Andrea Soldi

(duets, sonatas and concertos), is typified, first, by its links with the stylistic principles of the late 17th and early 18th centuries, and second, by De Fesch's search for virtuosity and outward brilliance. During the Antwerp period (1725-31), his style underwent a noticeable change: virtuosity was replaced by simplicity and greater expressiveness as he followed the stylistic trends of the second quarter of the century, which slowly but surely made themselves felt. The outcome of this development is De Fesch's masterpiece, his op 8 sonatas, which show his new, simplified idiom and its relation to the Italian *galant* style. Finally, in the London period, apart from further sonatas and concertos, there are two oratorios and a pastoral serenade, all with English texts, as well as a large variety of songs, to Italian and English texts.

De Fesch's thematic and formal language can be described as strongly Italian, or more specifically as Vivaldian, in flavour. Vivaldi's strong, masculine *allegro* themes and his firm formal principles must have appealed strongly to a composer of De Fesch's temperament. Corellian and Handelian influences may also be noted. Nevertheless, his works, particularly those in the

smaller genres, show a distinctive personal vein. For the basic worth of his own compositions and for the influence that he exercised on his contemporaries, De Fesch may be counted one of the most important musicians of the Low Countries in the second quarter of the 18th century, and as one of the most gifted of the time, during which, among others, De Croes, the Locillets, Hamal and Van Maldere hold a prominent place.

FRANS VAN DEN BREMT

Defossez, René (b Spa, 4 Oct 1905). Belgian composer and conductor. After studies at the Liège Conservatory he was a composition pupil of Rasse; in 1935 he won the Belgian Prix de Rome with the cantata *Le vieux soldat*. He was professor of harmony at the Liège Conservatory and, from 1946 to 1973, of conducting at the Brussels Conservatory. From 1936 to 1959 he was conductor of the Théâtre Royal de la Monnaie and subsequently appeared as a guest conductor throughout Europe and the USA. He was elected to the Belgian Royal Academy in 1969 and was instrumental in establishing the Opéra de Chambre de Belgique in 1972. His earliest works, such as the *Images sous-marines*, have a distinctly impressionist quality. Later he moved towards an eclectic neo-classical style, including novel touches

within strictly conventional moulds. His orchestral works, brilliantly orchestrated, are the most successful

WORKS

(selective list)

Stage: *Le subterfuge improvisé* (comédie musicale, 1, R. Lebrun), 1938, *Florante* (ballet, 1), 1942, *Le sens du divin* (incidental music), 1947, *Le rêve de l'astronome* (ballet, 1), 1950, *Les jeux de France* (ballet), 1959, *Les surprises de l'amour* (opera, 1, Poise, after Marivaux), 1961, *A chacun son mensonge* (opéra-bouffe, after Labiche), 1964, *Le pêcheur et son âme* (oratorio-ballet, after Wilde), 1965, *Le regard* (ballet), 1970, *Thriller* (chamber opera, C. HENRI VANHULST

De' Franceschi. See FRANC'ESCHI family.

De Froment, Louis (b Toulouse, 5 Dec 1921) French conductor. He studied the flute and the violin at the Toulouse Conservatory, and then attended the Paris Conservatoire, where he won a *premier prix* for conducting in 1948. His teachers were Louis Fourester, Eugène Bigot and André Cluytens. In 1949, for the ORTF, he founded the symphony orchestra of the 'Club d'Essai' to promote the works of young musicians. Then he formed his own chamber ensemble (L'Ensemble Instrumental de Paris), which quickly won international success. Later he became director of music at the casinos of Cannes, Deauville and Vichy, at the last of which he made his début as an operatic conductor and remained until 1969. In 1958 he was appointed permanent conductor at the Nice-Côte d'Azur (ORTF) chamber orchestra, and later of the Radio-Télé-Luxembourg (RTI) orchestra.

De Froment conducts an extensive repertory, with emphasis on works by Debussy and Ravel and on 18th-century music. He conducts with unaffected elegance and enjoys an international reputation. He has often toured Europe, the USA and the USSR, and has made numerous recordings.

CHRISTIANE SPIETH-WFISSENBACHER

Defronciaco, French composer. He was active in the 14th century and was doubtless from Fronsac in the diocese of Bordeaux. His only known composition is a four-voice troped Kyrie *Jesus dulcissime* in *F-APT* 16bis (edn in CMM, xxix, 1962). The more active upper voices and the liturgical tenor of the slower lower voices suggest a motet, but the placing of the text in top voice alone gives the flavour of a discant song to the piece, especially since the initial phrase is very similar to the second phrase of Machaut's *rondeau Puis qu'en oubli*.

GILBERT REANY

De Gaetani, Jan (b Massillon, Ohio, 10 July 1933). American mezzo-soprano. She studied at the Juilliard School, making her formal New York début in 1958. In November 1970 she gave the first performance of Crumb's *Ancient Voices of Children* at the Library of Congress in Washington, DC. Her first appearance with the New York PO was in January 1973, the year she became a professor at the Eastman School, Rochester.

She performs regularly with the Contemporary Chamber Ensemble, with which she made her celebrated recording of *Pierrot lunaire* (which stresses its lyricism). In addition to the avant-garde repertory, in which she specializes, she has performed and recorded medieval music (*The Play of Herod* with the New York Pro Musica), Baroque cantatas, Wolf lieder, and songs by Ives and Stephen Foster. A singer of remarkable intelligence and expressive power, with a voice clear and true throughout its wide range, she has appeared with the Boston SO, the Scottish National Orchestra (with which she gave the première of Maxwell Davies's *A Stone Litany* in 1973), the BBC SO (with Boulez in Japan), the Berlin PO and the Waverly Consort. She was appointed artist-in-residence at the Aspen Festival, Colorado, in 1973, and frequently gives master classes and concerts at American universities.

MARTIN BERNHEIMER

Degen, Helmut (b Aglasterhausen, Baden, 14 Jan 1911). German composer. He studied composition with Maler, Jarnach and Klusmann at the Rheinische Musikschule in Cologne (1930-33) and musicology at the University of Bonn with Schiedermair and Schrade (1933-6). Degen was active as an organist and private teacher in Altenkirchen, Westerwald, before teaching theory and composition at the Duisburg Conservatory (1937-42). In 1947 he accepted an appointment as lecturer in theory and composition at the Staatliche Hochschule für Musikerziehung in Trossingen. He was made professor in 1954. Degen has written mainly instrumental music including educational chamber pieces designed to encourage the wide acceptance of new music. Under his teacher Maler, Degen fashioned a polyphonic idiom sometimes reminiscent of Hindemith. Without embracing 12-note technique he has employed similar methods of organizing pitch content, particularly in the later works.

GEORGE W. LOOMIS

Degen, Johann (b Weismann, nr. Bamberg, c1585, d Bamberg, 29 Aug 1637). German composer, organist, poet and priest. In 1613 he became chaplain, and in 1615 organist, of St Martin, Bamberg, and held both positions until his death. In 1626 he issued a songsheet about Bamberg's two founders and patron saints: *Das Leben dess H. Heinrichs . . . und seines H. Jungkfräwlichen Ehegemals Cunegundis* (Bamberg, 1626); he

wrote both the text and its four-part setting himself. In the same year he published *Hymni quinque . . . notis musicalibus per diversos tonos ac melodis quatuor vocum cum partitura illustrati* (Ingolstadt, 1626). Two years later there appeared his hymnbook for the diocese of Bamberg, *Catholisches Gesangbuch . . . von allerley Tugentgesang und Busspsalmen colligirt, welche in Processionibus, Creutzgängen Wallfahrten bey der H. Mess, Predig und Kinderlehr zu gebrauchen* (Bamberg, 1628, six in Bäumker, 1, seven in Hofmann). It is the first German Catholic hymnbook and contains 132 German and 26 Latin hymns with 96 tunes, which with one exception are harmonized in four parts: Degen was probably responsible for 22 new texts, eight new tunes and all the harmonizations. In later editions (which continued up to 5/1732) the harmonizations are replaced by a basso continuo. Degen also edited a collection of 53 Latin motets for four and five voices and continuo which are parodies of secular madrigals and concertos: *Florilegium musicum motectorum* (Bamberg, 1631). Two pieces are by Degen himself, and among the 24 other composers represented are Agazzari, Gastoldi, Hassler, Marenzio, Philippe de Monte, Palestrina, Jacob Regnart, More and Wert.

WALTHER LIPPHARDT

Degens & Rippin. English firm of organ builders, from 1963 known as GRANT, DEGENS & BRADBELL.

Deggeller [Deggeler], **Johann Caspar** (b Schaffhausen, 7 Feb 1695; d Schaffhausen, 19 Jan 1776). Swiss church musician. He came from a family from Rottweil am Neckar which had moved to Schaffhausen because of the Reformation. For 55 years (1718–73) Deggeller was preceptor of the senior class at the Gymnasium in Schaffhausen and Kantor at St Johannskirche. It speaks for the esteem he enjoyed that the city authorities summoned everyone to pray for him when he underwent an operation for the removal of two gallstones in 1748.

Deggeller is important in the history of Swiss music for his work as an arranger and editor of the most important Schaffhausen hymnbook which was used officially in churches and schools from 1729 to 1842. The first part, *Die Psalmen Davids, durch Dr. Ambrosium Lobwassern in teutsche Reimen gebracht*, appeared in 1728 and was reprinted at least 12 times before 1830; the second part, *Hymni oder Lob-Gesänge, das ist Ausserlesene alte und neue Fest-, Kirchen- und Haus-Gesänge und geistliche Lieder*, was first published in the same year and went through at least 15 further editions before 1830. The printer, J. A. Ziegler, was given the sole rights for this in 1729 on condition that the collection be moderately priced. The hymnbook, especially its second part, came into being as the private collection of a circle of friends which included besides Deggeller the theologian Konrad Ziegler (1695–1731) and the presiding priest Johann Wilhelm Meyer (1690–1767); hymn texts by both are contained in the book. Apart from the traditional Huguenot psalms in A. Lobwasser's version, the second part of the hymnbook contains a selection of

old and new four-part church songs, 52 catechisms by Meyer for which Deggeller arranged the music from the Lobwasser Psalter, and a section of communion hymns. Only four melodies are original; they may be Deggeller's own work. The hymnbook was expanded in 1742 by adding an account of the Passion. Apart from some old songs which were already in Conrad Ulmer's Schaffhausen hymnbook of 1595, new hymns of a Pietist stamp were included. One hymn, in adapted form, is to be found today in the evangelical hymnbook of the German-speaking area of Switzerland (no. 176, *Gott fährt mit Jauchzen in die Höh*).

De Giosa, Nicola (b Bari, 3 May 1819, d Bari, 7 July 1885). Italian composer and conductor. In 1834 he obtained a free place at the Naples Conservatory, where he studied the flute with Bongiorno, counterpoint with Ruggi, harmony with Zingarelli and composition with Donizetti. In 1841 he left the conservatory because of disagreements with the director Mercadante and composed the opera *buffa La casa di tre artisti* (Naples, 1842). As *L'arrivo del signor zio* it was repeated in 1846 at Genoa, where it had little success, and at Milan, where it caused a controversy between the supporters of the old Neapolitan school and the new style of Verdi, whose *I due Foscari* was also being given. This ended with the triumph of the Verdian party.

A series of works followed in the best tradition of Neapolitan opera *buffa*, culminating in *Don Checco* (Naples, 1850), his masterpiece and one of the greatest successes in the history of opera in Naples. His later comic operas declined in quality, but remained in demand by the principal Italian centres. The most successful of these was *Napoli di carnevale* (Naples, 1876). Several attempts at serious operā, in which De Giosa appeared a pale imitator of Donizetti, either had little success or were not performed.

In his middle years he reduced his activity as a composer in favour of conducting; he was particularly admired for the scrupulousness of his orchestral balance and ensemble. From 1860–61 he conducted for several seasons at S Carlo, in 1867–8 at La Fenice, in 1870 in Cairo, in 1873 at the Colón in Buenos Aires and finally, in 1876, at the Politeama in Naples. He composed church and orchestral music, but was better known for his songs which made him celebrated in Italy and abroad as a salon composer.

Degli Antoni [Antonii], **Giovanni Battista** (b Bologna, 1660, d Bologna, after 1696). Italian composer and organist, brother of PIETRO DEGLI ANTONI. He spent his life in Bologna, he studied with Giacomo Predieri and in 1684 became a member of the Accademia Filarmonica. Later appointed organist of S. Giacomo Maggiore, he held this post until his death. He was highly esteemed as an organist. He composed only organ and instrumental chamber music. His *Ricerate* op.1, played a major role in the evolution of music for solo cello. With its multilinear textures this pedagogical collection can be regarded as a forerunner of Bach's solo cello suites

NEAL W. LA MONACO

Degli Antoni [Antonii], **Pietro** (b Bologna, 1648; d Bologna, 1720). Italian composer and instrumentalist, brother of GIOVANNI BATTISTA DEGLI ANTONI. He spent his life in Bologna. He first distinguished himself as a

cornett player with Cazzati's *cappella musicale* at S. Petronio. Soon after joining the Accademia Filaschisi, he became in 1666 a charter member of the Accademia Filarmonica. He was *principe* of the latter in 1676, a distinction that he enjoyed in five subsequent years - 1684, 1696, 1700, 1705 and 1708. He was *maestro di cappella* of three churches: S. Giovanni in Monte as early as 1666 and again from 1697 until at least 1712, S. Maria Maggiore from 1680 and S. Stefano from 1686 to 1696.

Degli Antoni wrote a number of oratorios and music for two stage works, but except for the oratorio *L'innocenza depressa*, which survives in a manuscript score, the printed librettos are all that remain of them. To a lesser extent he explored other vocal forms - concerted masses, motets and chamber cantatas. He is most important for his contribution to the development of the *sonata da camera* and *sonata da chiesa*. The coupled dances of opp.1 and 3, with their frequent chromaticisms and cross-relations, are more stylized than earlier *sonate da camera*. His most innovative compositions, the solo sonatas of opp.4 and 5, best reflect his experience as a composer of vocal music. Throughout both collections there are movements bearing quasi-dramatic markings such as 'Aria grave', and 'Aria posata'. Many of the adagio movements are instrumental recitatives or ariosos: for example, in the Adagio of op.4 no.11 the violin evokes a declamatory setting through short irregular motifs which end in appoggiaturas over a sustained pedal. Another characteristic of these sonatas is the importance of the basso continuo line, which assumes a separate structural identity and often develops thematic material equally with the violin part.

D.E.G. Music Products. Firm founded in 1965 by Donald E. Getzen, who had previously worked with GETZEN CO.

Degrada, Francesco (b Milan, 23 May 1940). Italian musicologist. He studied the piano (diploma 1961), composition (diploma 1965) and conducting at the Milan Conservatory. At the same time he took an arts degree at the University of Milan (1964). He taught at the conservatories of Bolzano and of Brescia, and in 1964 he became lecturer in music history at the University of Milan and from 1966 taught concurrently at the Milan Conservatory. His research interest in Baroque music led him to form a chamber group in 1967, Complesso Barocco di Milano, of which he is harpsichordist and director. The ensemble gives concerts and records, in Italy and abroad, from many editions which Degrada himself has prepared and realized. His published editions include works by Pergolesi, Vivaldi and Durante. His research extends to Renaissance and contemporary music as well; he has contributed to several foreign and Italian publications and worked with Swiss and Italian radio. In 1966 he joined the administrative council of the Società Italiana di Musicologia; he was also consultant for the new edition of *Enciclopedia della musica* Rizzoli, and is a member of the editorial board for the critical edition of Verdi.

CAROLYN M. GIANTURCO

De Grandis, Vincenzo (i) [II Romano] (b Montalboddo [now Ostra], Marche, 6 April 1631, d Montalboddo, 4 Aug 1708) Italian composer. Ordained probably in 1599 or 1600, from August to 25 November 1605 he was *maestro di cappella* at Santo Spirito, Sassia. He then became a singer in the choir of the papal chapel, and by 1625 *maestro di cappella* of the papal choir under Pope Urban VIII. His

small output of sacred music consists of psalms and motets, the former being generally in a conservative polyphonic style, the latter in the concertato idiom, which caught on in Rome in the second decade of the 17th century. The Eastertide motet *De ore prudentis*, in Johann Donfrid's *Promptuarii musici* (Strasbourg, 1623²), shows a good sense of textural variety in its SATB scoring. The 'Alleluia' is set in triple time, though there is no musical refrain for its second appearance. The ornamented melodies involve non-syllabic word-setting and are on the whole undeveloped in style.

WORKS

- Psalmi ad Vesperas et motecta, 8vv cum Litanis BVM, liber I (Rome, 1604)
Sacri cantiones, 2 5vv, liber I (Rome, 1621⁷)
Alcuni salmi et motetti di posti in spartitura da F. Kesperle (Venice, 1625)
8 motets in 1616¹, 1618¹, 1623¹, 1 psalm in 1625¹
1 motet, 4 hymns, 2 psalms in *I-Rvat*, 1 motet in *D-Bds*

JEROME ROCHE

De Grandis, Vincenzo (ii) (b Montalboddo [now Ostra], Marche, 6 April 1631, d Montalboddo, 4 Aug 1708) Italian composer. In 1667 he entered the service of Duke Johann Friedrich of Brunswick at Hanover, and from 1674 to 1680 he was *maestro di cappella* there. Before taking up the latter appointment and while employed at Hanover, he held positions as *maestro di cappella* in Rome at the Seminario Romano and at the church of the Gesù in 1670-71 and to the Pamphili family at the Cappella S. Agnese from 1672 to 1674. From 1680 to 1682 he was probably in Venice. In 1682-3 he was *maestro di cappella* at the ducal court at Modena under Francesco II d'Este. He then returned to Montalboddo. From 1685 to 1692 he was *maestro di cappella* of the Santa Casa, Loreto. In 1692 he returned once again to Montalboddo, where he lived until his death. His first two oratorios belonged to a series of eight on the life of Moses presented at the court at Modena between 1682 and 1691. His oratorios contain stylistic features unusual for their period. For instance, *Il nascimento di Mosè* (1682) and *La caduta d'Adamo* (1689) each contains an accompanied recitative – an early use of this form. All three works contain a high percentage of both accompanied and motto arias, and they include virtually no strophic arias, which are still much in evidence in the works of contemporaries such as G. P. Colonna and A. M. Pacchioni.

WORKS

ORATORIOS

- Il nascimento di Mosè* (G. B. Giardini), Modena, 1682, *I-MOe*
Il matrimonio di Mosè (Giardini), Modena, 1684, *MOe* [lib entitled *Ritratto di Mosè*]
La caduta d'Adamo (C. Nencini), ?Modena, 1689, *MOe* [?perf. first in Loreto]

OTHER WORKS

- 4 cantatas, 1v, bc L'Armellino, Ganimede alla danza, Le lagrime d'Ero. Quando sperai goder *MOe*
3 cantatas, *Vqs*
2 canzonettas, 1670¹, 2 motets, 1672¹, 1675²
1 canzonetta, 2 motets *MOe*
Masses, *Rvat*; Confitebor, *Ad* according to *MGG*
Antonino e Pompeiano, opera, erroneously attrib. De Grandis, actually by A. Sartori

JULIA ANN GRIFFIN

Degree (Ger. *Stufe*). The position of a note with reference to a scale, sometimes called a scale-step; the referential scale is usually assumed to be diatonic (i.e. a major or minor scale or one of the church modes). Degrees may be defined in terms of their melodic or harmonic function; that is, a melody can be described as movement from one degree to another, and harmony can be analysed by the succession of degrees in the lowest voice of a polyphonic texture or by the succession of degrees that constitute the roots of the chords which make up that texture. In harmonic analysis the degrees are most often identified by roman numerals, from I to VII. In melodic analysis no system of naming the degrees has been universally accepted, though Schenker's notation with capped arabic numerals (1̂, 2̂, 3̂ etc.) has gained some currency.

Notes that do not belong to the referential scale can nevertheless be described in terms of it. In C major, for instance, F♯ is the raised fourth degree, B♭ the lower (or flattened) seventh. This method of description can be applied to the notation for harmonic and melodic degrees given above (e.g. ♯IV, b7).

Ex 1 Degrees of the C major scale

tonic	super-	mediant	sub-	dominant	sub-	leading	tonic
tonic	tonic		dominant		mediant	note	

The first degree of the scale is the tonic; this is the note by which the referential scale is named. The next most important degree is the fifth or dominant, in tonal music the tonic and dominant may often serve as mutually complementary. The fourth degree is the subdominant – the inversion of the dominant, or the note to which the tonic acts as dominant. The other degrees are as follows: second, supertonic (this is the dominant of the dominant; see APPLIED DOMINANT); third, mediant; sixth, submediant; and seventh, leading note. (See ex 1.)

WILLIAM DRABKIN

De Greef, Arthur (b Louvain, 10 Oct 1862; d Brussels, 29 Aug 1940). Belgian pianist and composer. He studied at the Brussels Conservatory with Brassin (piano), Dupont (harmony), Kufferath (fugue) and Gevaert (composition). In 1879 he won a first prize in piano at the same time as Albéniz. Following Gevaert's advice he continued his studies with Liszt in Weimar and with Saint-Saëns in Paris. In 1885 he was appointed to take charge of the piano course at the Brussels Conservatory, being named professor in 1887; from 1920 to 1930 he took a master class there. He was elected to the Belgian Royal Academy in 1925. De Greef was a virtuoso whose technique was graceful as well as brilliant. During the course of many tours throughout Europe he popularized the Piano Concerto of Grieg, who considered De Greef the best interpreter

of his works. De Greef's repertory was extensive; in 1892 he gave recitals in Paris devoted to the history of piano music. His own thoroughly romantic compositions are of somewhat uneven quality; they include a symphony, three symphonic poems, two piano concertos, other concertante piano music, short piano pieces and chamber works. Many are unpublished, but some have been issued by Chester, Heugel and Schott (Brussels).

HENRI VANHULST

Degtyaryov, Stepan Anikievich (b Borisovka, Kursk govt., 1766; d nr. Kursk, 5 May 1813). Russian composer and singer. Born into a peasant family on the estate of Count Sheremetev, Degtyaryov was admitted at the age of seven into the count's choir school. At 15 he was taking principal roles in opera, and in 1789 became Konzertmeister, with responsibility for vocal music. About 1790 he probably visited Italy with Giuseppe Sarti, from whom he had some musical training. On his return to Russia he was made Kapellmeister to Sheremetev's court. In 1803 he was liberated from his serfdom and moved to Moscow. Two years later he published in St Petersburg a translation of Vincenzo Manfredini's *Regole armoniche* (Venice, 1775).

His patriotic oratorio, the first to be written by a Russian composer, appeared in 1811. Entitled *Minin i Pozharsky, ili Osvobodzhdeniye Moskvy* ('Minin and Pozharsky, or The liberation of Moscow'), this work traces the events leading up to 1612, when the Poles were expelled from Moscow by Russian national forces. Inspired by the war of 1812, Degtyaryov considered writing a second oratorio called *Torzhество Rossii, ili Begstvo Napoleona* ('The triumph of Russia, or The rout of Napoleon'), but the score was left unfinished. Because of the war he left Moscow and returned to Kursk, where he died of consumption the following year. Little else is known of Degtyaryov's creative work, since, when he moved from Borisovka to Moscow, he could not afford to transport his manuscripts and had to burn them.

GEOFFREY NORRIS

De Héman [Hémen, Le Héman]. French family of organ builders. Valeran De Héman (b Hesdin, Pas de Calais, 1584; d Paris, 1640) was a pupil and son-in-law of Crespin Carlier; he was acquainted with Mersenne, Titelouze and Charles Racquet, organist of Notre Dame. He built new organs at St Jean-le-Marché in Troyes (1610-11), at Ste Catherine, Honfleur (1612), at Meaux Cathedral (1627), at St Martin-des-Champs (1618), at St Jean-en-Grève in Paris (1625) and at Bordeaux Cathedral (1631-3). He also carried out a large number of repairs in Paris and in the provinces, for example in Rouen at St Jean (1607), St Vivien (1608), St Maclou (1610-11) and the cathedral (1614); in Troyes at St Nicolas (1615-19) and St Jacques-aux-Nonnains (1623); in Bordeaux at St Seurin (1630-32); and in Paris at Notre Dame (1610, 1616), the

Cordeliers (1618), St Séverin (1626) and St Jacques-de-l'Hôpital (1610, 1613). Valeran was one of the greatest French organ builders of the first half of the 17th century. He taught Pierre Thierry and Pierre le Pescheur.

His nephews François De Hémán (*d* Paris, 1652), Jean De Hémán (*b* Hesdin, *d* Cherbourg, Feb 1660) and Louis De Hémán (*d* 1645) worked together. Jean restored the organs of St Maclou (probably with Valeran in 1611), St Germain at Châlons-sur-Marne (with Louis in 1630), the cathedrals of Rouen (doubtless with Valeran, in 1614), Troyes (1645-53), Le Mans (with François in 1647) and Chartres (1649), and St Jean at Soissons (1652). He also repaired the organ at St Etienne-du-Mont in Paris with Pierre Desenclos (1656). Jean built new organs at Ivry-sur-Seine (with Louis in 1641), Mitry-Mory (with Louis in 1646-51), at the convents of the Cordeliers in Vire (with François and Jean de Villiers in 1631), the Augustine in Paris (with Louis and François in 1643), at St Merry in Paris (with François in 1647-50), and at La Trinité in Cherbourg (1659).

GUY BOURLIGUFX

De Hen, Ferdinand Joseph (*b* Durne, 16 Feb 1933) Belgian ethnomusicologist. After attending the Institut Universitaire des Terroires d'Outremer, Antwerp (1951-5), he studied musicology with Fellerer and Hüschén at Cologne University (1956-60), where he took the doctorate in 1960 with a dissertation on African instruments. Concurrently he did research on African and Indian music at the School of Oriental and African Studies, London University (1961), and then a degree in African linguistics at the University of Louvain (1963). He has held posts as a research assistant at the museum of instruments in Brussels (1961-73), professor of the Chapelle Musicale Reine Elisabeth, Waterloo (from 1968), lecturer (1970-72) and professor (from 1972) in musicology at the State University, Ghent, and professor of the Hoger Institute of Drama, Antwerp (from 1971). His main interests are the history and structure of classical European and Indian and African instruments; his publications include a book (with Roger Bragard) on the history of instruments that has been translated into several languages.

Dehmel, Richard (*b* Wendisch-Hermsdorf, 18 Nov 1863, *d* Hamburg, 8 Feb 1920). German poet. His richly symbolic poems, often concentrating on a moment of transcendent spiritual awareness, attracted many composers in the decade 1895-1905, largely because his brilliant images revealed the intense inner emotional life (sexual or religious or both) that artists in all fields (and psychologists) were concerned to explore. As Schoenberg wrote to Dehmel 'your poems were what first made me try to find a new tone in the lyrical mood. Or rather, I found it even without looking, simply by reflecting in music what your poems stirred up in me'. In the same letter (of 1912) Schoenberg tentatively asked Dehmel for a text on the subject of modern man wrestling with God. Dehmel declined, and Schoenberg wrote his own words for the work that became *Die Jakobsleiter*. Apart from those to Schoenberg, Dehmel's published *Briefe* (Berlin, 1922-3) include letters to Mahler, Pfitzner, Reger and Strauss.

WORKS SET TO MUSIC

- Alles* song by Schoenberg, op 6 no 2, 1905
Am Ufer songs by Strauss, op 41 no 3, 1899, Webern, 1907

PAUL GRIFFITHS

Dehn [Dehne], **Michael** (b. Freiberg, Saxony; d. Freiberg, 15 Feb. 1656). German composer and organist. From 1626 he was an organist and teacher at Dobeln. From 1633 he tenaciously tried to secure a position in his native town. He was defeated by Hammerschmidt in the competition for the position of organist of St. Petri in 1634–5, but eventually, on 30 June 1645, he was appointed organist of St. Nikolai and remained there until his death. In 1651 he gained citizenship. He generously provided funds towards the rebuilding of the organ (by Carol Müller of Dobeln) at St. Nikolai in 1652–5. His four surviving works, all of them sacred concertos (at *D-Fb*), one dated 1635), show him to have been a competent musician.

WALTER HÜTTEL

Dehn, Siegfried (Wilhelm) (b. Altona, 24 Feb. 1799, d. Berlin, 12 April 1858). German theorist, editor, teacher and librarian. The son of a banker, he studied law in Leipzig with the intention of entering the diplomatic service, he also took music lessons with J. A. Drobbs. Moving to Berlin in 1823, he was attached to the Swedish Embassy, during his service there he developed his interest in musical research. On the failure of the family bank in 1830, he was left without means of support and decided to devote himself to music; he had been studying with Bernhard Klein, and soon made himself a widely respected theorist and teacher. On Meyerbeer's recommendation he was in 1842 appointed custodian of the music section of the royal library, and immediately set about bringing it into order, cataloguing the collection and making copious additions to it from libraries all over Prussia; among the editions he helped to bring into the library was that of Georg Polchau, which Dehn had long known and which was notable for its manuscripts of Keiser and of J. S. and C. P. E. Bach. He was editor of *Cacilia* in succession to Gottfried Weber from 1842 to 1848, and professor at the Royal Academy of the Arts from 1849.

As an editor, Dehn made a pioneering contribution to scholarship. On the death of Gnepenkerl in 1849 he took part in the editing of Bach's instrumental music for the Peters Edition (volumes xv–xxiii), being responsible for, among other works, the first publication of the Brandenburg Concertos. He also edited a large number of Lassus motets, and published a 12-volume *Sammlung alterer Musik aus dem 16. und 17. Jahrhundert*. He re-edited Marpurg's *Abhandlung von der Fuge* (Leipzig, 1858), and translated Henry Delmotte's *Notice biographique sur Roland Delattre* in 1837; he was preparing a larger work on the subject at the time of his death. He provided much material for his friend Fétis for use in the *Biographie universelle*. As a teacher, Dehn was widely respected and sought after, his pupils including Cornelius, Kullak, Anton Rubinstein, Glinka and many more. 'There is no doubt that I am more indebted to Dehn than to all my other teachers', wrote Glinka in his

autobiography. 'He . . . not only put my knowledge in order, but also my ideas on art in general.' Glinka remained friendly with Dehn, and late in life resumed studies with him, in the hope of finding a way of reconciling Italian Renaissance contrapuntal techniques with the musical style of the Russian Orthodox Church.

JOHN WARRACK

Deiber. See TI-YBFR family

Deichel. Bavarian family of musicians.

(1) **Johann Dominicus Deichel** (b. c.1656; d. after 1715). Composer and organist. Before he joined the Munich court orchestra about 1683 he was organist at St. Moritz, Ingolstadt. He became court organist in Munich on 1 April 1685. From 1689 to 1691 he studied the organ and composition with Johann Caspar Kerll. He composed a drama, *Julianus*, for the Jesuit grammar school in Augsburg, performed in September 1694. For Munich he produced two sacred allegories in German, *Maria Magdalena oder Das verlorene und wiedergefundene Schaflein* (1701) and *Ein blutiges Seelen-Bad* (1710); the music for both is lost. During the Austrian occupation of Bavaria, Deichel was appointed Kapellmeister and first organist at the Holy Chapel of Altötting on 8 June 1701, where he continued until 1715. Two of his compositions for the Jesuit college in Munich were published: *Magis et minus*, Consideratio IX in Franciscus Lang's *Theatrum solitudinis asceticæ* (Munich, 1717) and *Sacra Venatio*, Consideratio XI in Lang's *Theatrum affectuum humanorum* (Munich, 1717). They are sacred oratorios in the tradition of Kerll, and show marked Venetian operatic influence.

(2) **Anton Deichel** (b. c.1662; d. Eichstätt, 27 May 1712). Composer. He may have been a brother of (1) Johann Dominicus Deichel. In 1689 he was a 'Musicus' in Eichstätt, and in the following year he became court musician and gentleman of the chamber to the prince-bishop there. He was appointed vice-Kapellmeister in 1711; the same year he was pensioned. Between 1689 and 1711 he composed 29 comedies for the Jesuit

grammar schools in Augsburg, Eichstätt, Ingolstadt, Landshut, Neuburg an der Donau and Regensburg, but none has survived (see Schlecht). His only extant works are *Schola poenitentia*, Consideratio XVIII in Franciscus Lang's *Theatrum affectuum humanorum* (Munich, 1717), written for the Munich Jesuits, and two arias (*D-Mbs*); they are similar in style to J. D. Deichel's extant works.

(3) **Joseph Christoph Deichel** (b Eichstätt, 30 Dec 1695; d Eichstätt, 2 Aug 1753). Composer and violinist, son of (2) Anton Deichel. In 1725 he was court musician to the prince-bishop of Eichstätt, he was still a violinist at the court in 1747. None of his works has survived. Several of them were performed at Eichstätt: the opera *In funere vita* (1725), the operetta *Antonio tre volte glorioso giubileo prete infulato* (first performed 8 September 1729), written for Prince-Bishop Johann Anton II of Freiberg, and the four Jesuit dramas *Ulferus* (1725), *Punita negligentia* (1734), *Sacra lectio* (1735) and *Heylsame Betrachtung* (1745).

(4) **Joseph Anton Deichel** (b Eichstätt, 17 March 1699; d Eichstätt, 13 April 1778). Composer, younger son of (2) Anton Deichel. He devoted himself to the church, and was ordained on 22 May 1722. In 1736 he was chamber musician to the prince-bishop, he also held various ecclesiastical appointments at Eichstätt. None of his theatrical works, composed for the prince-bishop's court, has survived: *Voto musico* (4 Dec 1736), *Musicalisches Gespräch des heiligen Alexius* (1741), *Le bellezze, che sono nè tre pomi d'Antonio* (December 1752), *Celebratio Deo sacri Eustettensis Humenae* (1758) and *Il enclado ovvero Finta nuove mascerata di Carnovale* (1768). He also wrote poems dedicated to the prince-bishops of Eichstätt (see Suttner).

ROBERT MÜNSTER

Deilich, Philipp. See DULICHUUS, PHILIPP.

Deinl, Nikolaus (b Nuremberg, 16 Jan 1665; d Nuremberg, 4 May 1725). German composer and organist. He was educated at the school of St Lorenz, Nuremberg, where he reached the top class, and also received private tuition in philosophy and literary composition and in poetry too, 'since composition is impossible without the latter'. Heinrich Schwemmer was his singing teacher, and Georg Caspar Wecker, for whom he was soon able to stand in as organist at St Egidien, was his instrumental and composition teacher. On 29 June 1680 he matriculated at Altdorf. After his widowed mother's death on 17 November 1681, he earned his living as a private tutor. On 8 January 1685 at Weissenfels Johann Philipp Krieger declared in an autograph testimonial that he showed 'not only great proficiency in music' but could also compose 'a good,

competent piece of church music and has thus learnt composition from me well and shown great understanding of it'. On 28 November 1685 the Count of Wolfstein engaged him as organist at Pyrbaum, near Nuremberg. On 14 August 1689 he returned to Nuremberg. He was appointed organist of St Bartholomäi in August 1690, of the Liebfrauenkirche in 1693 and of the Spitalkirche in 1694. From 1699 he also worked as a teacher. In 1701 he became Kantor and director of music at the Spitalschule and appears to have held these positions until his death.

Deinl was a knowledgeable and respected musician and teacher. According to Fétis he left many organ and sacred compositions in manuscript, and the Nuremberg newspaper *Frag- und Anzeigen-Nachrichten* of 3 February 1758 mentions a *Historia Passionis* in three sections by him. The only pieces by him to have survived, however, are 12 well-composed arias which appeared as an appendix to *Hertz-Wallende und von heiliger Liebe erregte Funcken der Liebe Jesu* (Nuremberg, 1712), a devotional book by WOLFGANG CHRISTOPH DESSLER. According to Dessler's foreword Deinl had 'added music' to the arias, from which it may be assumed that Dessler, and not Deinl, wrote the words. The songs are for solo voice and continuo and are in six major and six minor keys. They are in the style of the early Baroque sacred aria. The melodic lines are enriched by passing notes and embellishments, but their basically hymn-like and chorale-like structure, offset by the active bass line, is clearly detectable. The few dynamic markings were probably intended as indications of registration.

LINI HÜBSCH-PI-LEGER

Deiss [Deus], Michael (b c1552; fl 1564-8). Austrian composer. He is first recorded in 1564 as a chorister in the imperial Hofkapelle at Vienna. After the death of the Emperor Ferdinand I in July that year, he joined the Kapelle of Archduke Karl at Graz, after which he is not heard of again. On Ferdinand's death he wrote a motet to the text *Quis dabit oculis fontem lacrimarum*; that this was also set, on the same occasion, by Jean de Chaynée suggests that Chaynée was his teacher. 14 motets by him (including *Quis dabit* and a political motet, in *RISM* 1568²⁻⁶) are his only extant works. Their inclusion by the editor, Pietro Giovannelli, indicates his regard for the young composer; they are of interest less for their inherent worth than for showing that a choirboy could be represented by so many pieces in an important anthology.

ALBERT DUNNING

Deiters, Hermann (Clemens Otto) (b Bonn, 27 June 1833; d Koblenz, 11 May 1907). German writer on music. He received doctorates in law (1854) and philology (1858) and then taught at Bonn (1858), Düren

(1869), Konitz (1874), Posen (1877), Bonn again (1883) and Koblenz (1885-93). He contributed to Bagge's *Deutsche Musikzeitung* (1861-2), and especially to the *Allgemeine musikalische Zeitung* (1863-82) and *Vierteljahrsschrift für Musikwissenschaft* (1888-93); among his most important essays were those on Beethoven's dramatic compositions (1865), Schumann as writer (1865), Otto Jahn (1870), the Beethoven centenary celebration in Bonn (1871) and Max Bruch's *Odysseus* (1873). He also wrote many articles on Brahms, whom he knew personally and with whom he exchanged letters; he published the first authoritative Brahms biography (1880), which is useful chiefly as a record of contemporary opinions of the composer whom Deiters declared to be 'by far the greatest composer of our time'. This opinion was part of his firm stance against Wagner and the 'new German School'. He also edited the third (1889-91) and fourth (1905-7) editions of Jahn's *W. A. Mozart*. His most important work, however, was the revision and editing of Thayer's *Life of Beethoven*, which he translated into German for its first publication. According to Henry Krehbiel's introduction to the English edition, Thayer encouraged Deiters to take considerable latitude in his handling of documentary material through his own judgment. Another work of importance was a study of Aristides Quintilian (1870)

De Judice, Caesar. See DEL GIUDICE, CESARE.

De Koven, (Henry Louis) Reginald (b. Middletown, Conn., 3 April 1859; d. Chicago, 16 Jan 1920). American composer, conductor and music critic. In 1872 he went to England. He studied the piano with W. Speidel at Stuttgart, took a degree at Oxford University (1879), studied theory with Pruckner at Stuttgart and Hauff at Frankfurt am Main, singing with Vannuccini at Florence, and light opera with Genée and Suppé at Vienna and with Delibes at Paris. In 1882 he returned to the USA, was a music critic for *Harper's Weekly*, the *New York World*, *Herald* and *Journal* and the *Chicago Evening Post* (c.1889-1912), and founded and conducted (1902-4) the Philharmonic Orchestra of Washington, DC. De Koven's output includes an orchestral suite, a piano sonata and numerous other piano works, ballets, about 400 songs, and two grand operas written at the end of his career, *The Canterbury Pilgrims* (libretto by P. Mackaye; Metropolitan Opera, New York, 8 March 1917) and *Rip Van Winkle* (Mackaye, Chicago Opera, 2 January 1920). But he is best known for his operettas, set in Europe or the Far East *Robin Hood* (1890), which began the era when American operetta dominated the musical stage in the USA, was perennially in the repertory of the Bostonians, the first important operetta troupe after the introduction of Gilbert and Sullivan to America; and a song from it, 'Oh promise me', has remained a popular wedding ballad. De Koven's music draws on both 19th-century Italian opera (in *Robin Hood* the grandiose finale of Act 2 is in the spirit of Rossini, and the Forest Song and Armorer's Song are reminiscent of Verdi) and folklike melody (*Rip Van Winkle*, and 'When a maiden marries' from *Robin Hood*).

 RONALD BYRNSIDE

De Kresz, Geza (b. Budapest, 11 June 1882; d. Toronto, 2 Oct 1959). Canadian violinist of Hungarian birth. He studied the violin with Hubay at the National Conservatory, Budapest (to 1900), with Ševčík at the Prague Conservatory (to 1902) and with Ysaÿe in Brussels (1903-5). After his solo début in Vienna in 1906 he held various posts there and in Bucharest. From 1917 to 1921 he was leader of the Berlin PO and head of the Stern Conservatory violin department. In 1923 De Kresz settled in Toronto and was head of the Hambourg Conservatory violin department until 1927. He was a founder-member of the Hart House Quartet in 1924 and its leader until 1935. He then returned to Budapest to teach at the Liszt Academy and from 1941

to 1947 was also director of the National Conservatory. In 1947 he toured in Canada again and in 1948 joined the faculty of the Toronto Conservatory. In 1918 De Kresz married the English pianist Norah Drewett, with whom he frequently gave concerts. He became a naturalized Canadian in 1930.

CARL MOREY

De la Bassée, Adam. See ADAM DE LA BASSÉE.

Delaborde, Jean-Baptiste. See LA BORDE, JEAN-BAPTISTE DE.

De la Court [La Court], **Antoine** (b Dordrecht, c1530-35; d Prague, 15 Sept 1600). Netherlands singer and composer. He was employed as a singer, first at the church of St Gudule and from 1550 in the imperial court chapel at Brussels. From 1559 to 1568 he served as an alto in the imperial Hofkapelle at Vienna, and from 1574 to 1590 as a tenor at the Archduke Ferdinand's court at Innsbruck. During his time at Innsbruck he applied at least twice to return to the Hofkapelle at Vienna, but neither petitions nor the dedication of two masses to the Emperors Maximilian II and Rudolph II achieved the desired effect. He was also refused an appointment at Munich. In 1581 he travelled to the Netherlands to recruit singers for the Innsbruck choir. He sought leave to give up his post in 1588 and petitioned for a pension which was granted two years later. He then joined the imperial chapel at Prague where he remained until his death. In 1593 his son Martin joined him at Prague after serving for 11 years as a chorister at Innsbruck. It is not known whether Antoine and Henri de la Court were related.

De la Court's only extant works are two motets for five and six voices (in *RISM* 1568^a, 1610^{1a}). The earlier of these, *Carole caesareo princeps* (ed in MAM, xxi, xxii, 1971) includes passages of effective declamation and makes imaginative use of harmonic sequences. The only surviving references to the two lost masses with which he attempted to secure his return to Vienna occur in the imperial accounts which record payments of 25 florins made to him in 1574 and 1588.

ALBERT DUNNING

De la Court [La Court], **Henri** (b 1st half of 16th century; d ? Vienna or Prague, 13 March 1577). Netherlands composer and singer, active mainly in Austria. According to Fétyb he was a singer at Soissons Cathedral in 1547. From 23 August 1563 he was employed as an alto in the imperial Hofkapelle of Ferdinand I, Maximilian II and Rudolph II at Vienna and Prague; he also taught the choristers music, for

which in 1570 he received 6 guilders monthly and a bonus of 18 guilders. He seems to have run into financial difficulties since the account books for 1574 and 1576 record payments to him of considerable sums of money in addition to his salary, and after his death his widow received help with their children's maintenance. It is not known whether he was related to Antoine De la Court. All eight of De la Court's printed motets appeared in Pietro Giovanelli's *Novus thesaurus musicus* (*RISM* 1568^a, 1568^b, 1568^c, 1568^d); one of those in the fifth book of the anthology is in honour of Giovanelli with whom he may have been on friendly terms. Six more motets for five, six, eight and ten voices survive in manuscript sources (*A-Wn*, *D-Mbs* including one in organ tablature). De la Court's motets are representative of the style of works then favoured at the Habsburg courts, the settings are predominantly syllabic and homophonic though the texture is varied by pseudo-polychoral writing for different groups of voices.

Delacroix, François. See LA CROIX, FRANÇOIS DE.

De la Farge, P. See LA FARGE, P. DE.

Delafont [De la Font, De la Fons] (fl c1545-59). French composer of 15 four-voice chansons published in Paris between 1545 and 1549. *Ung advocat dist à sa femme* a ribald anecdote about a lawyer and his wife is his most famous work. It is based on a model by Henry Fresneau, and the reprinting of it in two subsequent collections as well as arrangements for guitar and cittern later in the century attest to its popularity. His *Chasse de la perdrix* is clearly indebted to Janequin. Most of Delafont's chansons are in the syllabic, narrative style, but a few follow the courtly type of Claudin de Sermisy. The composer might be identifiable with or related to Jehan Delafon, an instrumentalist who lived in the rue des Vieilles Etuves between 1576 and 1589.

WORKS

CHANSONS

FRANK DOBBINS

Delage, Maurice (Charles) (b Paris, 13 Nov 1879; d Paris, 21 Sept 1961). French composer. He was a clerk

in a maritime agency in Paris, then worked in a fishery in Boulogne and served in the army. In his early 20s he became interested in music and learnt the cello, and later the piano, by ear. Finding that he had a remarkable musical memory helped him to assimilate complex musical textures, and he was encouraged and helped in his musical studies by, among others, Ravel, whose ardent follower he became. Debussy was another strong influence. Delage was a close friend of Stravinsky's.

Delage's output was not large, he composed slowly and aimed at a high standard in everything he did. Some of his best work is to be found in the several sets of songs with accompaniment for small groups of instruments, the style is precise and subtle in content and instrumental colouring. His travels in the orient affected his work deeply following a journey to India he wrote the four *Poemes hindous*, which reflect his impressions of four different places, Madras, Lahore, Benares and Jaipur. Exotic, sensual, suggestive, the music seems to foreshadow in effect the later *Chansons madécasses* of Ravel. The vein of exoticism was further explored in the seven *Hai-ku*, based on laconic Japanese tristichs (the work was heard at the 1929 ISCM Festival). Kipling was a strong literary influence with his wide-ranging and often exotic subject matter, and *The Jungle Book* provided material for two of Delage's vocal works. The composition of an early ballet, *Les bâtis-sens de ponts*, based on a story by Kipling, was interrupted by the outbreak of World War I and only the overture survives. On the whole Delage's music displays individuality, refinement and fastidiousness, very French characteristics. In one of his last works, the *Trois poèmes désenchantés* (1957), the faded charm of a guitar and the melancholy of past happiness are reflected in a hauntingly nostalgic musical style.

DAVID COX

Delaharpe, Jean François. See LA HARPE, JEAN FRANÇOIS DE.

De la Hèle, George. See HÉLÉ, GEORGE DE LA.

Delair, Étienne Denis (d after 1727) French theoretician. Nothing is known of his life beyond the two addresses in Paris given in the titles of the two editions of his treatise, rue St Honoré and rue des Poulies. He is said to have signed the action of 1750 taken by the 'harmonists' (organists and composers) against Guignon and the corporation of popular musicians known as the *menestrandise*, but assuming the first edition of his *Traité d'accompagnement pour le théorbe et le clavessin* (Paris, 1690) to have been published after his 20th year, this would have made him at least 80 at the time of signing. Perhaps there was a son of the same name. The title of Delair's treatise goes on to claim that it 'includes all the rules necessary for accompanying on the two instruments, with special observations on the different approaches they require. It teaches also how to accom-

pany unfigured basses'. A second edition, called *Nouveau traité ...*, was published in 1724 with a privilege promising several new works, none of which is known to have appeared. The second edition was printed mostly from the old plates with 18 or 20 new pages and a few omissions. It is in these additional pages that the *règle de l'octave* (see REGOLA DELL'OTTAVA) is discussed. Rousseau's attribution of this rule to Delair was evidently based on a confusion between the two editions; the *règle de l'octave* existed well before Delair's edition of 1724. Other topics taken up are the *accord naturel*, *supposition* and *harmonie extraordinaire*.

DAVID FULLER

Delalande, Michel (b La Flèche, 27 Aug 1739; d Chartres, 23 Dec 1812) French cathedral musician and composer. He was *maître de musique* of Soissons cathedral until 1761, then of Chartres until his retirement in 1785, after which he continued to deputize, and to sing countertenor in the choir, until 1792. Of his large output of sacred works, including 61 psalms and canticle settings, 16 masses, a *Requiem* and 58 miscellaneous compositions, only the MS *Exaudiat te Dominus* is extant (in F-Pn). This work, dating from Delalande's years at Chartres, was formerly attributed to Michel-Richard de Lalande, of whom he may have been a descendant (see Clerval). It exhibits many of the usual features of the *grands motets* of the Versailles school while strongly reflecting the influence of the *galant* style, notably in its harmonic and formal structure and florid instrumental writing. An inventory of Delalande's music is in the Archives Départementales at Chartres.

LIONEL SAWKINS

Delalande [De la Lande], **Michel-Richard.** See LALANDE, MICHEL-RICHARD DE.

Delamain [De La Main, Delamaine], **Henry** (d Cork, 19 Dec 1796) Irish composer and organist of French parentage. Both his father, Laurence, and his grandfather, Henry, were dancing-masters who settled in Cork in the middle of the 18th century, and took over the house on Hop Island, which had earned its name from the activities of the previous owner, Mr Boland, also a dancing-master. The Henry Delamaine who is noted in the *Dublin Newsletter* of 22 June 1742 as having lately arrived from the Opéra at Paris was probably the grandfather, though no relationship has been established with William Delamain, a dancing-master in Dublin in 1737-43, or with the similarly named makers of the notable 18th-century Dublin delftware.

Laurence and his wife died within five days of each other in October 1762, by which time their son had been appointed organist of Christ Church in Cork. He continued at this church until 1781 when he was appointed to St Finn Barre's Cathedral (to the acrimonious disgust of Lewis Gibson, the nominee of Smith, the previous organist). He held this post until his death. He published *Six New Psalm Tunes* (London, 1781) and a number of songs which attained great popularity and

appeared in numerous editions from five Dublin publishing houses between 1785 and 1810. Most of these songs were provided with 'a part for flute or guitar'. Eight songs published in London in 1785 had accompaniments for either piano, or horns, oboes and strings, both versions being issued together. He also composed an Ode to the Duke and Duchess of Rutland, performed in Cork in 1785.

Delaney, Robert (Mills) (b Baltimore, 24 July 1903; d Santa Barbara, Calif., 21 Sept 1956) American composer. He studied at the University of Southern California (1921–2) and with Boulanger at the Ecole Normale de Musique in Paris (1922–7), where he was also a pupil of Capet and Honegger. In 1929 he was awarded a Guggenheim Fellowship and in 1933 a Pulitzer Prize for *John Brown's Song*, a choral symphony based on 'John Brown's Body'. He taught at the Santa Barbara School, the Concord School of Music and Northwestern University.

PEGGY GLANVILLE-HICKS/R

Delange [De Lange], **Herman-François** (b Liège, 2 June 1715, d Liège, 27 Oct 1781). South Netherlands composer and violinist. From 1723 he was a chorister at the collegiate church of St Martin (Liège), where he also studied the violin; he attended the Jesuit college from 1731 to 1738. The *Capitulations* of Liège indicate that he still lived there in 1740, but his name appears from 1741 in the list of alumni of the Collège Liégeois de Rome (Fondation Darchis). On his return to Liège he resumed service at St Martin's, remaining there until at least 1759; in 1762 he was reported as a musician at St Paul's. In addition, he took part as an 'extra' in festival performances of other *maîtrises* in Liège. His activity as a composer can be traced in the announcements of new compositions which he placed in the *Gazette de Liège* from 1764.

Delange's sonatas op.1 show Tartini's influence in both technique and formal structure. The other instrumental works, probably intended for Liège amateurs, are less demanding technically but very musical. Similar pleasing melodic qualities are found in his vocal music.

JOSÉ QUITIN

De Lannis, Johannes. See HILLANIS, JOHANNES.

Delannoy, Marcel (b La Ferté-Alain, Essonne, nr Paris, 9 July 1898, d Nantes, 14 Sept 1962). French composer. He first intended to become an architect, and enrolled at the Ecole des Beaux-Arts in 1917, but then his interests turned to painting, and finally Honegger encouraged him to become a composer. He was mainly self-taught, although he took instruction in harmony from Jean Gallon, counterpoint from Gédalge and orchestration from Roland-Manuel. Delannoy's first important work, *Le poirier de misère*, attracted much attention when it was staged at the Opéra-Comique in 1927. In this work, based on a Flemish legend, he cultivated a direct and unpretentious style, echoing, although not quoting, folksong. The 'Danse macabre' from the last act displays the characteristic features of his style: constancy of rhythmic pattern (here syn-copated), polytonal polyphony of lines and chords, vivid instrumental colour and continually striking melodic spontaneity. Always attracted by the theatre, he sought to provide it with new forms. *Le fou de la dame* is a cantata-ballet based on a blues of winning charm. *Ginevra* evokes a theme of courtly love by drawing on the style of Renaissance chansons, and *Puck* uses a mobile declamation oscillating between speech and song. While slightly influenced by Honegger, he pursued an individual path and remained on the edge of contemporary currents.

ARTHUR HOÉRÉÉ

De Lantins. See LANTINS, DE.

Delany, John Albert (b London, 6 July 1852; d Paddington, NSW, 11 May 1907). Australian conductor, organist and composer. Taken to Australia as a small child by his father, who edited a newspaper in Newcastle, he was first taught music by Ellis Taylor and by the monks of Lynhurst (Benedictine) College, Sydney, before continuing his studies under William John Cordner, a minor composer and organist of St Mary's Cathedral. At the age of 16 he was second violinist of the Victoria Theatre orchestra, he became choirmaster of St Mary's in 1872 and organist in 1874. In 1877 he resigned those posts to join the W. S. Lyster Opera Company in Melbourne as chorus master and répétiteur, and assisted various touring opera companies until he returned to Sydney as musical director of the three-day festival which opened the new St Mary's Cathedral (8 September 1882), for which he composed a *Triduum March*. In 1884 he was appointed conductor of the Bijou Theatre orchestra in Melbourne, but returned to Sydney in 1885 to succeed Max Vogrich as conductor of the *Liedertafel*, a position he held until 1897. As musical director of St Mary's in 1886, he improved choral standards by introducing both unaccompanied plainchant and his own compositions, including three masses, numerous motets, sacred songs and organ works. For the Australian centenary festivities, he conducted the combined *Liedertafel* of Sydney and Melbourne at the opening concert (27 November 1888), and also composed a *Captain Cook Cantata*. In 1894 he was a founder-member of the Sydney College of Music and later became its chief examiner. He conducted the Australian première of Elgar's *Dream of Gerontius* in Sydney Town Hall (21 December 1903). A modest composer who was frustrated in his ambition to write grand opera to which his talents and experience were suited, Delany and his mostly unpublished works have fallen into obscurity.

ELIZABETH WOOD

De la Pierre, Paul. See LA PIERRE, PAUL DE.

De Lara [Tilbury], (**Lottie**) **Adelina** (b Carlisle, 23 Jan 1872, d Woking, 25 Nov 1961). English pianist. After appearances as a child prodigy she became a pupil of Clara Schumann, whose traditions she kept alive from her adult début in London in 1891 until her last Wigmore Hall recital in 1954. In 1956 she spoke at the Schumann centenary concert in the same hall. She still played Schumann with authority and spirit in old age, when she recorded and broadcast the composer's major works for the piano. Her compositions include two piano concertos and many songs. In her memoirs, *Finale* (London, 1955, in collaboration with Clare H. Abrahall), she described the hard times she knew as a child and her subsequent successful career. The book includes a discography.

Delás, José Luis (de) (b Barcelona, 28 March 1928). Spanish composer and conductor. After studying law and music in Barcelona from 1946 to 1949 he studied at the Munich Musikhochschule from 1950 to 1954 (composition and conducting under H. von Waltershausen). In 1956 he was appointed conductor of the Bilbao City Orchestra, and he was invited to conduct at a series of concerts of contemporary music held in Barcelona between 1957 and 1958. Delás left Spain for Cologne in 1958 and has worked for various German radio organizations. From 1968 to 1970 he was a member of the electronic music studio at Utrecht University. Delás's interest in polytonal and dodeca-phonic techniques is evident in his early compositions dating from 1946. He found further stimulation in the work of Falla, in painting (particularly that of Wols and Tàpies) and in surrealist literature. In 1964 Delás began to interest himself in aleatory forms, quotation and a greater insistence on timbre variation.

De Latre [Delatre, De Lattre, Laetrus, De Latere], **Petit Jean** [Jehan, Jan] (b c1510, d Utrecht, 31 Aug 1569). Netherlands composer. In 1538/9 (the records from before and after are lost) he was *maître de chant* of the collegiate church of St Jean l'Évangéliste in Liège, and 'Petit Jan succentor' appears in the account books of the collegiate church of St Martin, Liège, for November 1544 and October 1565. His pupils there included Johannes Mangon and Gerard de Villers. He was appointed *maître de chapelle* by Georg of Austria, Prince of Liège, about 1550. His obligations in this post probably caused him to neglect his duties at St Martin, whose chapter, on 23 November 1554, threatened to dismiss him. Georg of Austria's early death deprived De Latre of an excellent job and a sympathetic patron. He fell into debt and in October 1565 the St Martin chapter dismissed him. However, from December 1565 'Magister Johannes de Latre Cantor' was a member of the chapter of the church of St Jean, Utrecht. There too he contracted debts, and he was called before the tribunal on 12 December 1567. He probably became *kapelmeester* of the Buurkerk in Utrecht, where his tombstone described him as 'D.O.M. Johanni Petit de Latre, musici excellentissimi'.

De Latre had several children, including two sons who were *duodenus* at St Martin. A Petit Jean who, according to Vannes, was at Notre Dame de Bois-le-Duc in 1522 and left in 1530 to enter the service of Emperor Charles V is probably not the same man. The composer of a four-part chanson published at Paris in

1540 (*RISM* 1540¹⁴) ascribed to 'De Lattre' may be Petit Jean de Latre, but another possible composer for it is François de Lattre, singer and chaplain at the French royal chapel and a canon at Amiens Cathedral in 1553. The earlier confusion with CLAUDE: PETIT JEHAN (d 1589) has been conclusively removed by Lesure.

De Latre's works have not been properly catalogued because of the confusion of names. The pieces that can be attributed to him with most certainty appeared in two personal collections and numerous anthologies printed in the Netherlands between 1547 and 1570; a few pieces were reprinted as late as 1636. His motets are remarkable for their supple melody and careful accentuation of the text. He favoured the strict imitative style prevalent in the Netherlands after Gombert and Clemens, but was more concerned with creating an atmosphere appropriate to the words than with showing off his technical skill. The elegiac poem *De toutes Margarithes* and the penitential chanson *Resveille toy* show that De Latre could tackle austere subjects, but he excelled in the classical love-songs of the 16th century, treating them in a pleasingly restrained manner and sometimes using touches of symbolism more akin to the music of Josquin and Obrecht than to that of the madrigalists.

 JOS WOUTERS

Deldevez, Edouard [Edme] (-Marie-Ernest) (b Paris, 31 May 1817, d Paris, 6 Nov 1897) French conductor, composer, violinist and teacher. Displaying talent at an early age, he entered the Paris Conservatoire in 1825 and won the *second prix* for violin in 1831 and the *premier prix* in 1833. He studied with Reicha, Halévy and H. M. Berton and was awarded the *second prix* in counterpoint and fugue in 1837, gaining the *premier prix* the following year. He attempted the Prix de Rome for five consecutive years (1837–41) but won only the second prize in 1838. His professional career began as a violinist in various orchestras, including the Théâtre-Italien, the Opéra and the Société des Concerts du Conservatoire, but he had a longer career as a conductor. His association with the Opéra began in 1859 with his appointment as assistant conductor, he was principal conductor from 1873 to 1877. He held similar posts for the Société des Concerts (assistant conductor from 1860, principal from 1872 to 1885). He directed the orchestral class at the Conservatoire from 1873 to 1885.

Deldevez's compositions follow the tradition of Boieldieu and Auber, his only complete opera, *L'éventail* (1854), reflects their *buffo* style. He wrote much chamber music, three symphonies, a number of concert overtures, ballets and other works. His writings include the essay *L'art du chef d'orchestre*, based in part on Berlioz's treatise of the same title. He published a four-volume anthology of works by violinists (mainly of the 17th and 18th centuries) and formed a substantial collection of Haydn autographs.

WORKS

- (many works unpublished, most printed works published in Paris)
 Stage L'éventail (opéra comique, 1), 1854, unperf., other operas, inc., 5 ballets
 Sacred 2 requiems, hymns

THOMASIN LA MAY

Delerue, Georges (b Roubaix, 12 March 1925). French composer. He was a pupil of Milhaud at the Paris Conservatoire where he won a *premier prix* for composition and the Prix de Rome in 1949. The composer of several orchestral works and ballets, and of incidental music for numerous plays, Delerue is one of the most respected writers of film music. He has collaborated with Malle, Godard, Truffaut, de Broca, Berri, Zinnemann, Huston and Bertolucci. In 1970 he won Oscar nominations for his scores for *Women in Love* (directed by Ken Russell) and *Anne of a Thousand Days* (directed by Charles Jarrot).

DOMINIQUE AMY

Delfert, Charles. See HELFFER, CHARLES D.

Delgadillo, Luis (Abraham) (b Managua, 26 Aug 1887; d Managua, 1962) Nicaraguan composer. After early training in Managua he was sent by the Nicaraguan government to study at the Milan Conservatory. He spent five years in Europe and then returned to Nicaragua to teach in various schools and to conduct the band of the Supremos Poderes (1915–21), serving thereafter as director-general of music culture. In the 1920s he toured extensively in Latin America, lecturing and conducting programmes of his works, and in 1930 he presented a concert of his music at the Carnegie Hall, New York. He taught theory at the Mexican National Conservatory and composition at the Panamanian National Conservatory (1943–5). Back in Nicaragua he was appointed director of the National School of Music at Managua (1950–62) and permanent conductor of the Nicaraguan SO. His compositions include vocal and dramatic works, 16 symphonies, five masses, seven string quartets and over 50 piano pieces, as well as many songs, dances and four operettas in a popular Nicaraguan style, a list is published in *Composers of the Americas*, II (Washington, DC, 1956).

JUAN A. ORREGO-SALAS

Del Gaudio, Antonio. See GAUDIO, ANTONIO DAL.

Del Giudice, Cesare [Judice, Caesar de] (b Palermo, 28 Jan 1607, d Palermo, 13 Sept 1680). Italian composer, lawyer and scholar. He was of noble birth and was descended through his father from the Usodimare family of Genoa and through his mother from the Opezinga family of Palermo. He graduated in jurisprudence on 28 January 1632. Mongitore, who included long, detailed articles on him and on almost every member of his family, stated that 'he excelled in music . . . and especially in the composition of pathetic songs, as can be seen in a large manuscript volume filled with his compositions which is preserved by his children'. This is lost, like all his other known music: a youthful *Missa pro mortuis*, which appears to have been chosen in 1666 for the first anniversary of the death of Philip IV of Spain and Sicily and was still performed in the churches of Palermo at the beginning of the 18th century, and two publications, *Madrigali concertati a 2, 3 e 4 voci, da cantarsi col cembalo, e altre canzonette alla napolitana e alla romana per la chitarra spagnola* (Messina, 1628) and *Mottetti e madrigali* (Palermo, 1635).

PAOLO EMILIO CARAPEZZA

Delibes, (Clément Philibert) Léo (b St Germain du Val, 21 Feb 1836; d Paris, 16 Jan 1891). French composer. His father was in the postal service, while his mother, an able musician, was the daughter of an opera singer whose brother was the organist Edouard Batiste Léo, the only child, learnt music from his mother and uncle, after his father's death in 1847 the family moved to Paris, where he entered Tarnot's class at the Conservatoire. He obtained a *premier prix* in solfège in 1850 and later studied the organ with Benoist and composition with Adolphe Adam. His Conservatoire career was without distinction, and he never entered for the Prix de Rome. He was a chorister at the Madeleine and sang as a boy in the première of Meyerbeer's *Le prophète* at the Opéra in 1849. At the age of 17 he became organist of St Pierre de Chaillot and also accompanist at the Théâtre-Lyrique. Although he remained a church organist until 1871, Delibes was clearly drawn more to the theatre. For a short time around 1858 he wrote criticism for the *Gaulois hebdomadaire* under the pseudonym Eloi Delbès, but he found his métier at Hervé's highly successful Folies-Nouvelles, where in 1856 his first stage work was played *Deux sous de charbon*, an 'asphyxie lyrique' in one act, was the first of his many light operettas, appearing henceforth roughly one a year for 14 years. Many were written for the Bouffes-Parisiens, Offenbach's theatre, including his second piece, *Deux vieilles gardes*, which enjoyed enormous success, largely from his gift for witty melody and lightness of touch.

In 1863 the Théâtre-Lyrique mounted Delibes' *Le jardinier et son seigneur*, an *opéra comique* and an attempt at a less frivolous genre. As chorus master at the Théâtre-Lyrique he worked on Gounod's *Faust* (the vocal score of which was Delibes' arrangement), Bizet's *Les pêcheurs de perles* and Berlioz's *Les troyens à Carthage*. In 1864 he became chorus master at the Opéra, where new opportunities of far-reaching importance presented themselves. In 1866 he appeared for the first time as a ballet composer, sharing the composition of *La source* with Louis Minkus, the work was highly successful, especially Delibes' share of it. In 1869 he composed his last operetta, *La cour du roi Pétard*, for the Variétés.

The decisive advance in Delibes' career came with the ballet *Coppélia*, ou *La fille aux yeux d'émail*, played at the Opéra on 2 May 1870. Based on E. T. A. Hoffmann, it has remained one of the best loved of all classical ballets and shows Delibes' musical gifts at their most appealing. In 1871 he gave up his duties at the Opéra and as an organist, married Léontine Estelle Denain and devoted himself wholly to composition. He now wrote fewer works, but they were larger in scale and conception. In 1873 the Opéra-Comique staged *Le roi l'a dit*, a comedy set in the time of Louis XIV, and in 1876 his second full-scale ballet *Sylvia*, on a mythological subject, was played at the Opéra. *Jean de Nivelle*, a more serious work, was an immediate success in 1880, although it was only once revived. In 1881 Delibes succeeded Reber as composition professor at the Conservatoire, despite his own admission that he knew nothing of fugue and counterpoint. In 1882 he wrote six pieces in elegant pastiche for Hugo's play *Le roi*

s'amuse, and his opera *Lakmé* appeared at the Opéra-Comique on 14 April 1883 in a particularly splendid production. Its success was lasting, the oriental colour, the superb part for the title role, a well-constructed libretto and the real charm of the music, all contributed to a work on which, with the ballets, Delibes' fame has rested. Delibes' last years were honoured and comfortable. In 1884 he was elected to the Institute. Another opera, *Kassya*, was completed but not orchestrated at his death in 1891. The scoring was undertaken by Massenet and the first performance given at the Opéra-Comique in 1893.

Henri Maréchal described Delibes as 'restless, fidgety, slightly befuddled, correcting and excusing himself, lavishing praise, careful not to hurt anyone's feelings, shrewd, adroit, very lively, a sharp critic'. A natural spontaneity and straightforwardness in his character was leavened by a certain lack of confidence, which increased as time went on. He admired Wagner and made the pilgrimage to Bayreuth in 1882, but like many French composers he found it impossible to let extreme modernisms enter his style. He regarded Franck's music with equal caution. His early music clearly belongs to the line of Boieldieu, Herold and his teacher Adam, the last of whom provided the example of a sparkling operetta style, the more ambitious scale and elevated tone of his later works may be attributed to a determination to break out of Offenbach's milieu and prove himself as a composer of ballet and opera. His early admiration for Meyerbeer then became more evident, especially in *Jean de Nivelle*, and the contingency of Gounod, Bizet and Lalo may be observed. Delibes and Bizet had much in common and admired each other's work but were never close friends. They both contributed an act to *Malbrough s'en va-t-en guerre* in 1867, and Delibes was present at the première of *Carmen* in 1875. *Lakmé* is clearly indebted to both *Les pêcheurs de perles* and *Carmen*, and the similarities of the two composers' harmonic and orchestral nuances are often striking. Tchaikovsky's admiration for Delibes was unqualified, and even if *Swan Lake* was composed before he had heard either *Coppélia* or *Sylvia*, they were men of like minds and sympathies, and their works dominate the late 19th-century heritage of ballet.

In notices of Delibes' early music the same terms frequently recur, wit, charm, elegance, grace, colour, lightness. As an operetta composer he excelled at character numbers, such as the bolero in *Six demoiselles à marier*, the 'Romance on three notes' in *Les eaux d'Enn* or the serpent's song in *Le serpent à plumes*. *Coppélia* owes much of its success to the same gifts, with its mazurka, waltz, *csárdás* and bolero and its melodic abundance. *Sylvia* is a more sophisticated ballet score, though equally tuneful and danceable. The barcarolle is scored for alto saxophone; the ballet's most famous number, the 'Pizzicati', is traditionally played in a halting, hesitant style that appears to have been no part of Delibes' conception. *Le roi l'a dit* is a light opera in which elaborate vocal ensembles and witty pastiche play a major part. *Jean de Nivelle* combines a weightier tone after the manner of Meyerbeer and Lalo with a disconcertingly light style in such pieces as 'Moi! J'aime le bruit de bataille'. The chorus 'Nous sommes les reines d'un jour' is set to shifting time signatures and a modal melody of striking originality.

Delibes' masterpiece is *Lakmé*, which offers more than just a fine vehicle for a star soprano; the two

principal male characters, Nilakantha and G rald, are firmly drawn, and the music is melodic, picturesque and theatrically strong. Only in dramatic recitative did Delibes verge on the conventional *Kassya*, his last work, has a Galician setting with oriental inflections in the music. The vocal writing is of the highest quality, and there is a fine close to the first scene of Act 3, with snow falling on the deserted stage.

Outside the theatre (for which Delibes wrote nearly all his music), his most notable work was as a composer of choruses, now undeservedly neglected. His output of songs was relatively small and that of instrumental and church music almost negligible. His cantata *Alger* (1865) attracted much attention at the time but has lain in obscurity since. Despite his poor record at the Conservatoire his workmanship was of the highest order, he had a natural gift for harmonic dexterity and a sure sense of orchestral colour, and nothing in his music is out of place. He was a disciplined composer, and it is tempting to see in the exquisite pastiche dances that he composed in 1882 for Hugo's *Le roi s'amuse* not just a sharp ear for style but a genuine feeling for the world of 17th-century French classicism, later to be espoused with such ardour by Saint-Sa ns, d'Indy and Debussy.

HUGH MACDONALD

Delicato (It., 'delicate', 'weak'). An expression mark also used as a dynamic and performance direction. Two particularly famous uses of forms of this word appear in Beethoven. The opening *adagio sostenuto* of his 'Moonlight' Sonata is marked. 'Si deve suonare questo pezzo delicatissimamente' ('this piece must be played extremely delicately'). The fourth movement ('La malinconia') of his Quartet in B  op.18 no.6 has the annotation 'Questo pezzo si deve trattare colla pi  gran delicatezza' ('this piece must be treated with the greatest delicacy').

DAVID FALLOWS

Delipari, Michele (b. ?Gallipoli, Puglia; fl. 1630). Italian composer. He was choirmaster of the collegiate church at Pieve di Sacco in the province of Padua in 1630, when he published at Venice his only known music, *I haci. madrigali . . . libro primo*, for two to four voices and continuo; the book includes one madrigal by his uncle, Donato Antonio Cuti. Duets for tenors or

sopranos prevail. In some of these pieces the upper voices exchange small, rapid motifs over a bass moving repetitiously around part of the circle of 5ths.

KEITH A. LARSON

Delius, Frederick [Fritz] (**Theodore Albert**) (b Bradford, 29 Jan 1862; d Grez-sur-Loing, 10 June 1934). English composer of German descent.

1. LIFE. He was born into a large mercantile family headed by a stern father who did not consider music a fit profession for his children. But amateur music-making was not frowned upon: Delius played the piano from an early age and was allowed to take violin lessons. Formative experiences included an acquaintance with Chopin's Waltz in E minor op. posth. and a visit to Covent Garden when he was 13 to hear *Lohengrin*. Having failed to make academic progress at Bradford Grammar School, he was sent to the International College in Isleworth, whence he often escaped to London for concert and opera performances. On leaving school he bowed to his father's wishes and entered the family wool company. He proved headstrong and unreliable, but he was able to visit Norway and Paris on the firm's business, so forming ties which were to last throughout his life.

At last in 1884 he managed to persuade his father to lend him enough money to set up as an orange grower in Florida. This gave him longed-for freedom and enabled him to start serious composition; it was probably at this time too that he contracted syphilis. He settled at Solano Grove near Jacksonville on the St Johns River, neglected oranges and acquired a friend and music tutor in Thomas Ward, a gifted musician living in Jacksonville. For six months Ward gave him a concentrated course in musical technique, and Delius later stated that these were the only lessons from which he gained worthwhile knowledge. At the same time, his sense of solitude amid luxuriant natural surroundings and his immersion in the music of the plantation negroes were experiences decisive to his artistic development.

After further months in Danville, Virginia, where he supported himself by singing, teaching and playing the organ, Delius learnt that his father had agreed to maintain him for an 18-month course at the Leipzig Conservatory. He enrolled there in August 1886 and studied with Sitt, Reinecke and Jadassohn. Although he gained no great benefit from these studies, he composed a great deal and met Grieg, who befriended and encouraged him. It was Grieg who induced Delius's father to let his son continue composing when the Leipzig course ended, and, supported by his father, Delius went to live in Paris, where he moved in artistic circles, numbering Gauguin, Strindberg and Munch among his friends.

By the mid-1890s Delius had completed the operas *Irmelin* and *The Magic Fountain*, together with many songs and instrumental pieces, and he had started work on *Koanga*. In 1896 he met a young student painter, Jelka Rosen, who was to become his wife. During this period he was a man of bohemian habits, attracted by and attractive to women, but in 1897 – after a brief return to Florida, where he hoped to lease Solano Grove to a tobacco planter and so improve his financial position – Delius settled with Jelka at Grez-sur-Loing, a

village 65 km outside Paris. He clearly saw that a more peaceful existence was required for his work: he did not marry Jelka until 1903 and still indulged in forays into Paris, but his life now became increasingly a matter of recording his spiritual experience in music.

With the opera *A Village Romeo and Juliet* (1900–01) Delius at last found himself completely. The final version of *Appalachia* followed in 1903, *Sea Drift* was finished in 1904 and *A Mass of Life* in 1905. As yet, however, his music was almost unknown in England, apart from a concert which he himself promoted in 1899, no major work was played in his native country until performances of *Appalachia* and the Piano Concerto were given in 1907. At this time Beecham met Delius and became his most devoted interpreter, in continental Europe, Fritz Cassirer, Hans Haym and Julius Butts had already been championing his work.

Apart from the upheaval of World War I, when the Deliuses fled for a while to England and suffered greatly from the loss of German royalties, Delius's life was becoming less outwardly eventful. After returning to Grez at the end of the war, he slowly succumbed to the syphilitic infection, developing a blindness and paralysis which numerous specialists were unable to alleviate. Two events stand out from these final years. Eric Fenby, a young Yorkshireman who had heard Delius's music in 1928 and learnt of his physical disability, offered his services as amanuensis. After a taxing apprenticeship he was able to notate a series of works, including the important *Songs of Farewell*, under circumstances related by Fenby in *Delius as I knew him*. Secondly, there was Beecham's Delius Festival of 1929 which the composer attended, an emaciated, other-worldly figure in his bath-chair. This last visit to England brought him wider renown. In the same year he was created a Companion of Honour, and in 1932 received the freedom of Bradford.

Throughout his final years at Grez, Delius received visitors, among them Elgar, and heard his works over the radio and on record; but his life was generally that of a recluse, suffering severe pain with impressive fortitude. On his death he was buried temporarily in Grez cemetery, a year later his remains were removed to Limpsfield in Surrey. French law made it impossible to carry out his original wish to be interred in his garden.

2. WORKS. Delius's musical style was a long time in development. His first masterpiece, *Paris*, was not completed until he was 37, and his individual genius did not become evident until a few years later in *A Village Romeo and Juliet* and *Sea Drift*. He grew intensely aware of the transience of things – an overriding pre-occupation for the rest of his life – and this ephemerality was reflected for him particularly in love and in nature, being mitigated only by nature's 'eternal renewing'. Often the experience is ecstatically embraced, as in *A Song of the High Hills*; at other times, as in *Sea Drift*, it is poignantly accepted; but this feeling remains the burden of his total output, and it is a mark of Delius's imagination that in almost every mature work he viewed its restricted emotional area from a different perspective.

The technique which enabled Delius to articulate this highly personal vision slowly matured throughout the 1890s. It was based to a large extent on Wagner, whose endless flow and harmonic aura Delius attempted to emulate, and on Grieg, whose airy texture and non-

1 Nina and Edvard Grieg, Johan Halvorsen, Frederick Delius and Christian Sinding at a card party in Leipzig, winter 1887-8 (for a further photograph of Delius, see GRAINGER, PERCY, fig 2)

developing use of chromaticism showed him how to lighten the Wagnerian load. During this period there was a steady increase in the number of passages where the fusion of these elements sounds characteristically Delian, reaching a peak in the opera *Koanga* (1895-7) which sets a text by Charles Keary drawn from an episode in *The Grandissimes*, a novel by George Washington Cable. Its tragic story of the deep south, in which an African voodoo prince is sold into slavery, enabled Delius to draw comprehensively on his Florida experiences. Although the dramatic conception is at first stiff, the second act (which includes the well-known 'La Calinda') and the third move impressively to their climaxes. More importantly, the death of the prince *Koanga* drew from Delius the most personal music that he had yet written. The opera was not heard until the Elberfeld Stadttheater staged it in 1904 under Cassirer, by then Delius had completed *Paris* (1899), in which an almost Straussian orchestral virtuosity, never again to be found appropriate, clothes an already typical harmonic scheme. *Paris* received its première under Haym in 1901, also in Elberfeld.

With his next work, *A Village Romeo and Juliet* (1900-01), Delius approached complete maturity. The harmonic manner is quite distinctive and the characteristic themes of transitoriness, sumptuous natural beauty and romantic purity reached a new intensity. The opera is based on the novella *Romeo und Julia auf dem Dorfe* from Gottfried Keller's *Die Leute von Seldwyla* and tells of two young lovers who, unable to make a life together because of family feuds and local gossip, spend one day with each other and then end their lives. Abandoning the more conventional *verismo* manner of *Koanga*, Delius cast the work in a series of short scenes. Traditional dramatic features are not totally discarded, but each scene is more concerned with presenting a spiritual state. The close contains some of the most exquisite music written for the stage, and ends with Delius's own conception of a 'Liebestod' as the lovers float away on an old hay barge which they then scuttle. The impossibility of realizing youthful dreams of perfect emotion is ex-

pressed with a poignancy most typical of Delius. Cassirer conducted the première at the Komische Oper in Berlin in 1907, and Beecham gave the first performance in England three years later. The opera was revived with some success in 1920 and the centenary celebrations of 1962 included performances in Bradford and at Sadler's Wells Theatre in London. After the completion of this opera, Delius embarked on a further dramatic project, the one-act *Margot la rouge*, a piece of *verismo* tailored to win the International Melodrama Competition organized by Sanzogno. It failed and was never staged, but the best of the music was salvaged with Fenby's aid some 30 years later to form the *Idyll*, with words from Whitman chosen by Robert Nicholls.

During the following three years Delius completed three of his finest works for his favoured forces: soloists, chorus and orchestra. First he rewrote *Appalachia* (1903), a work originally composed in simpler form in 1896, which was another exploration of his experience of the American south. These variations on an old plantation song, first performed in 1904 under Haym, cover a wider range of styles than Delius was later willing to admit. The harmony is always recognizably his own, but there is still a considerable reliance on conventional melodic developments and counterpoints; regular phrase patterns are as much in evidence as the subtle flights of harmony which point forward to his maturity.

The second of these works, *Sea Drift* (1903-4) for baritone, chorus and orchestra, is considered by many to be his greatest achievement. Whitman's treatment of a boy's sorrow at a seabird's loss of its mate is matched by Delius with profound insight. The work's formal structure partly follows that of the text, but its expressive power transcends the poem. There is a seamless flow between the choral commentaries and the baritone narrator's recitatives, from which he breaks away only in the drama's poignant aftermath at 'O past! O happy life! . . . We two together no more'. The range of choral expression encompasses the hedonistic joy of 'Shine! shine! shine! Pour down your warmth, great sun!' and the still, sad voice of 'O rising stars!', but the various

shades of feeling are fused into one great formal arch. Traditional devices of development and recapitulation are largely missing: Delius presents a stream of spiritual experience with a flow of chromatic harmony whose intensity is never broken, and variety of colour and pace is achieved almost imperceptibly, yet with utmost directness. *Sea Drift* was first performed in Essen in 1906 and its success firmly established Delius on the Continent.

Finally Delius embarked on what was to be his grandest project, *A Mass of Life* (1904–5), which sets texts by Nietzsche and is scored for four soloists, chorus and orchestra. At his first reading of *Also sprach Zarathustra*, Delius recognized that Nietzsche spoke for him, and he later stated that reading this book was one of the most important events in his life. *A Mass of Life* embodies Delius's philosophy that each man should stand fearlessly alone in the face of ultimate death, should realize his potentialities, whatever the cost, and immerse himself wholeheartedly in life. A broad musical span relates man's spiritual development to the passing of a day, rising to the 'glorious noontide' of maturity and then progressing to the midnight bell of death's call. Delius responded to Nietzsche's rich poetry in some of his most virile and exultant music, as well as in passages of a profoundly hypnotic and static calm. Beecham conducted the first complete performance in London in 1909.

After this colossal undertaking Delius worked on smaller pieces for the next few years, in the *Songs of Sunset* (1906–7), *Brigg Fair* (1907) and *In a Summer Garden* (1908) his art reached a peak of sensuous sweetness and lyrical concentration. This phase was

followed by a development towards more sharply defined orchestral sounds (often Nordic in atmosphere), greater formal concision and a more radical juxtaposition of unrelated chords: there is a suggestion of autumn after the summer of the previous works. *An Arabesque* (1911), a setting of a Jacobsen poem for baritone, chorus and orchestra, exhibits the new manner, as does *A Song of the High Hills* (1911) for wordless chorus and orchestra. During this period Delius was able to enrich his style without compromise by assimilating ideas from others: most notable are the influences of Grainger, particularly of his *Hill Songs* and chromatic folksong arrangements, and of Debussy, whose textures had a definite, though limited, effect. The neglect of the music of this time – which includes two of his finest works in *North Country Sketches* (1913–14) and *Eventyr* (1917) – has led to an underestimation of Delius's range.

His final opera, *Fennimore and Gerda* (1909–10), initiated this later style. Based on an episode from Jacobsen's novel *Niels Lyhne*, the work is – like *A Village Romeo and Juliet* – constructed as a series of tableaux, but Delius was here attempting something new: a contemporary conversation piece. Niels, a young poet, is in love with his best friend's wife, Fennimore, who at first returns his love, but then rejects him when she learns of her husband's death. In the final two scenes, Niels, now a farmer, finds happiness with the young Gerda. Just as *Koanga* was the product of Delius's Florida impressions, so this last opera draws on his love for Scandinavia, and the drama proceeds against the backdrop of the northern seasons. The 11 short scenes present problems in staging and the piece has not found favour: its première was at Frankfurt in 1919, but it was not produced in England until the Hammersmith Municipal Opera performances of 1968. Nonetheless, the music is finely sustained and the atmosphere is evoked swiftly yet tellingly, particularly in the erotic outbursts of the central love scene. The period ushered in by this opera did not see a complete abandonment of Delius's more intimate sensuousness: his best-known orchestral tone poem, *On Hearing the First Cuckoo in Spring* (1912), epitomizes his sweet nostalgia while the softly clashing lines of its companion-piece, *Summer Night on the River* (1911), produce one of his few impressionist pieces.

A quite unpredictable phase opened in 1914 with the completion of the First Violin Sonata, which he had begun ten years previously (an earlier sonata has remained unpublished). This was followed by a succession of works which attempted, not always successfully, to come to terms with conventional forms. Their structural articulation is sometimes a little stiff, but in the finest work of the group, the Violin Concerto (1916), the beauty of individual sections offsets formal weaknesses. Delius was not the composer to organize the subtle interplay of forces essential to the concerto form, and this is even more obvious in the Double Concerto for violin, cello and orchestra. He was clearly unsure of what to do with his soloists at times, and invented some perfunctory passage-work. Cluttered solo writing also mars parts of the Cello Concerto (1921), even when the editorial improvements of the published score are used. Linear melody was not one of Delius's strong points and the concertos emphasize this deficiency, but the Cello Sonata (1916) has long, expansive lines which are exceptionally resourceful and flexible, continuing through-

2. Title-page of the first edition of the vocal score of Delius's 'Fennimore and Gerda' (1919)

out the work except for two short pauses. The String Quartet, also written in 1916, begins with three movements of a fluidity characteristic of Delius's finest music, but the work is spoilt by a repetitive and short-winded finale.

While working in these conventional genres, Delius completed the least known and least successful of his large choral works, the Requiem (1914-16) for soprano, baritone, chorus and orchestra. The text, by H. Simon, expresses Delius's long-held pantheistic beliefs, preaching courage in the sight of death and finding consolation in nature's never ending cycles. A harmonic style which is sometimes starkly dissonant, together with thicker instrumental doubling, produce music which is unique in Delius's oeuvre for its lack of vibrancy, suggesting a certain self-denial. The Requiem marks Delius's attempt to extend his expressive compass, but the results are rather dry and only in the magnificent final section does the music spring to life as chorus and soloist hymn 'Springtime, Summer, Fall and Winter, and then new Springtime'. Discreet bitonal touches in the coda - fanfares in B against a tonality of D - also show a new departure. The work was first heard in 1922 under Albert Coates in London; no performances followed until 1950 (New York) and 1965 (Liverpool, conducted by Groves).

Delius's next choral and orchestral work was written to a commission from Basil Dean in 1920 for incidental music to Flecker's *Hassan*, which was scheduled for production in the following year at His Majesty's Theatre. This was the last music that Delius was able to write in his own hand, but his creative powers remained unaffected by his disease and the atmospheric choruses and interludes contain some of his best work, including the Serenade, which quickly became a popular favourite. After postponements the play with Delius's music was staged in Darmstadt in 1923; the first English production followed in the same year.

The Second Violin Sonata was completed with the aid of Jelka as copyist, but then Delius's composing almost came to a halt. Blind and paralysed, it would have been impossible for him to write any further major work had it not been for Fenby's intervention. Fenby set in order and completed two pieces for the 1929 Delius Festival: *Cynara*, originally intended for the *Songs of Sunset*, and *A Late Lark*. As the rapport between composer and amanuensis developed, more ambitious projects became possible. *A Song of Summer* was finished by using material from *A Poem of Life and Love* (1918) and the Third Violin Sonata was composed. Then came the *Songs of Farewell*, the crowning point of the Delius-Fenby collaboration. These powerfully concentrated and exultant Whitman settings for eight-part chorus and orchestra exhibit a new freshness and clarity of style. Sargent conducted the première in 1932. There followed a sequence of smaller pieces: the Caprice and Elegy, the *Fantastic Dance*, the delightful *Irmelin Prelude* (re-worked from the opera) and the *Idyll* (1930-32) for soprano, baritone and orchestra. Delius now composed no more, but these final works were a glorious and remarkable achievement.

After Delius's death his music continued to be promoted by Beecham, most notably in the second Delius Festival of 1946 and in the centenary celebrations which Beecham helped to plan, but did not live to direct. There were fears that Delius's music would die with its most determined advocate, but other conductors

3 Frederick Delius portrait (1912) by Jelka Delius (with Paul Gauguin's painting 'Nevermore' in the background) in the University of Melbourne, Australia

have taken it up and its permanent place appears to be assured.

The strength of Delius's personality is most evident in a harmonic style which sounds quite unlike the work of any other. His chordal vocabulary never strays beyond late Romantic practice, relying on triads, secondary 7ths and dominant discords, with a comparatively narrow range of chromatic alterations and diatonic discords. But the syntax is entirely individual. The rate of harmonic change is extremely flexible, sometimes so fast as to border on atonality, at other times hypnotically slow. The more chromatic harmonies can wind sinuously downward, or they may be abruptly juxtaposed, as in his later music, without any traditional linking relationship. Forms are built from a stream of these harmonies: Fenby (1971) likened the method to a 'prose' (i.e. rhythmically pliable) melody of chords. Even when Delius employed varied harmonic supports for repetitions of a simply phrased melody, it is the irregular ebb and flow of the harmony that is the prime structural factor, belying the melodic simplicity. Indeed Delius's melodies are rarely complex and usually seem to be stitched into the texture merely to point the harmony.

Delius's structural thinking is most readily examined in those works which are based neither on texts nor on obvious variation forms, as is the case with *Brigg Fair* and the *Dance Rhapsody* no.1. In a *Summer Garden* may be taken as perhaps the most refined example of the way in which Delius seems to improvise a structure, generating a harmonic flight. Yet the word improvisation misrepresents the tautness of the form. The structural profile is etched in terms of harmonic tensions, set up by the extent to which positive key references or cadences are avoided, and the speed with which implied areas of tonality pass by. In a *Summer Garden*

respects none of the traditional formal types, although there are vestiges of sonata and ternary structures. Precedents for its freely evolving processes can be found in the *Siegfried Idyll* and the *Prélude à l'après-midi d'un faune*; but the sonata form is much stronger in the *Siegfried Idyll*, and the Debussy, although closer in incidental phraseology, is a more orthodox ternary form. In any case, the *Prélude* was unknown to Delius at the time of composing *In a Summer Garden*, according to a letter the composer wrote to Bantock.

The opening section fluctuates capriciously between drowsy, static sequences and short bursts of activity, the changes of mood and texture achieved with extraordinary speed and concentration. The texture consists of a mosaic of tiny motifs and chordal sequences which continually evolve and regroup. The next section is more settled and exposes a broad melody which constitutes the only self-contained music in the work. The mosaic particles then return but with more determination develop into a climactic melodic passage of considerable grandeur. The lyrical intensity is then gradually dispersed with the emergence of further new textural offshoots, and this process is marvellously combined with hints of recapitulation and coda. The whole structure shows Delius's remarkable ability to prolong a sensuous moment by purely harmonic means without monotony and move elliptically into subtly contrasted areas.

No better example of Delius's large-scale form exists than *A Song of the High Hills*. Gone are the sensitive fluctuations, the continuous play of light and shade and the pointillist orchestration of *In a Summer Garden*. The flood of harmony is much steadier, and the areas of tension, which sometimes passed in a bar or two in the shorter work are now vastly stretched out sometimes with the aid of long pedal points. The form is simply ternary in outline, with an expansive interlude in the first section that foreshadows the intense contemplation of the central portion of the work. There is a strongly marked point of recapitulation and more obvious repetition of material. Delius's harmonic subtlety is now exclusively employed in sustaining unwavering levels of tension for long periods. The middle section, sub-titled 'The wide far distance – the great solitude', breaks down into no more than three or four of these harmonic spans, which makes the moments of transition crucially important. Music which has become firmly entrenched in one area of contemplation has to be eased on to another static plane without disrupting the hypnotic mood. Unpredictably this is not done by imperceptible changes but by comparatively bald juxtaposition of texture. The timing, however, is judged to a nicety as is the harmonic character, and the whole episode, apparently sectional to the score-reading eye, becomes an unbroken flow in performance.

Finally the strength of Delius's character is too evident in a less purely musical way. His egotism enabled him to give an overriding value to his sensual responses, and it is perhaps this that is the secret of his vision. Delius's music deals with the pristine romance of his formative experiences – the sound of negro songs over the sull air of Solano Grove, his first knowledge of total love (an affair that came to nothing according to Fenby (1936)). Such things are obsessively relived in his music; it may be that his style matured only when he recognized the impossibility of recapturing them in reality.

WORKS

STAGE

- Zanoni (incidental music, Delius), 1888
 Irmelin (opera, 3, Delius), 1890–92, F. Graham, T. Round, RPO, cond Beecham, Oxford, New Theatre, 4 May 1953
 The Magic Fountain (lyric drama, 3, Delius), 1893–5
 Koanga (lyric drama, 3, C. F. Keary after G. W. Cable), 1895–7; C. Whitehill, cond. Cassirer, Elberfeld, Stadttheater, 30 March 1904
 Folkeraadet (incidental music, G. Heiberg), 1897, cond. Delius, Christiania, Oct 1897
 A Village Romeo and Juliet (lyric drama, C. F. Keary after G. Keller), 1900–01, cond. Cassirer, Berlin, Komische Oper, 21 Feb 1907
 Margot la rouge (lyric drama, 1, Rosenval), 1902
 Fennimore and Gerda (opera, 11 scenes, Delius after J. P. Jacobsen), 1909–10, Frankfurt am Main, Opernhaus, Oct 1919
 Hassan (incidental music, J. E. Flecker), 1920–21, Darmstadt, Hessische Landes-Theater, 1 June 1923, full version London, His Majesty's Theatre, 20 Sept 1923

ORCHESTRAL

- Florida, suite, 1887, rev. 1889, Leipzig, 1888
 2 Pieces. Schlittenfahrt, March caprice, 1887–8
 Hiawatha, tone poem, 1888
 Rhapsodic Variations, 1888, inc.
 Suite, incl. Pastorale, vn, orch, 1888
 Idylle de Printemps, 1889
 Little Suite, incl. rev. March caprice, 1889–90, March caprice, RPO, cond. Beecham, Westminster, Central Hall, 18 Nov 1946
 Sagen [Legends], pf, orch, 1890, inc.
 Suite, small orch, 1890
 3 Small Tone Poems. Summer Evening, Winter Night [from Schlittenfahrt], Spring Morning, Summer Evening, 1890, RPO cond. Beecham, London, 2 Jan 1949
 Paa Vidderne (Sur les cimes), sym. poem after Ibsen, 1890–92, Christiania Musical Society, cond. I. Holter, 10 Oct 1891
 Legende, vn, orch, 1895, red vn, pf
 Over the Hills and Far Away fantasy overture, 1895–7, cond. A. Hertz, London, St James's Hall, 30 May 1899
 Appalachia, orch, 1896, see 'Choral and Vocal'
 Piano Concerto, c. 3 movts, 1897, J. Butts, cond. Haym, Elberfeld, 1904, rev. 1 movt, 1906, T. Szanto, Queen's Hall Orch, cond. Wood, Queen's Hall, 22 Oct 1907
 La ronde de deroule, sym. poem after H. Rode, 1899, cond. Hertz, St James's Hall, 30 May 1899, rev. 1901 as Life's Dance, cond. Butts, Düsseldorf, Feb 1904, rev. 1912, cond. O. Fried, Berlin, 1912
 Paris. The Song of a Great City, 1899, cond. Haym, Elberfeld, 1901
 Brigg Fair. An English Rhapsody, 1907, cond. H. Suter, Basle, 1907
 In a Summer Garden, rhapsody spring 1908, Philharmonic Society of London, cond. Delius, Queen's Hall, 11 Dec 1909
 Dance Rhapsody no 1, 1908, LSO, cond. Delius, Shire Hall Hereford, 3 Choirs Festival, 8 Sept 1909
 2 Pieces for Small Orchestra. On Hearing the First Cuckoo in Spring, 1912, Summer Night on the River, 1911, Leipzig, 2 Oct 1913
 North Country Sketches, 1913–14, LSO, cond. Beecham, Queen's Hall, 10 May 1915
 Air and Dance, str, 1915, cond. Beecham, London, 1915
 Double Concerto, vn, vc, orch, 1915–16, M. and B. Harrison, New Queen's Hall Orch, cond. Wood, Queen's Hall, 21 Feb 1920
 Violin Concerto, 1916, Sammons, cond. Boulton, Queen's Hall, 30 Jan 1919
 Dance Rhapsody no 2, 1916
 Eventyr (Once Upon a Time), ballad after Asbjørnsen, 1917, Queen's Hall Orch, cond. Wood, Queen's Hall, 11 Jan 1919
 A Song Before Sunrise, small orch, 1918
 A Poem of Life and Love, 1918, inc., lost –
 Cello Concerto, 1921, A. Baryansky, Frankfurt, 30 Jan 1921
 A Song of Summer [from A Poem of Life and Love], 1929–30, BBC SO, cond. Wood, Queen's Hall, 17 Sept 1932
 Caprice and Elegy, vc, orch, 1930
 Irmelin Prelude, 1931
 Fantastic Dance, 1931, BBC SO, cond. Boulton, Queen's Hall, 12 Jan 1934

CHORAL AND VOCAL

- 6 German Partsongs, chorus, 1887 and earlier
 Paa Vidderne (Ibsen), reciter, orch, Oct 1888
 Sakuntala (H. Drachmann), T, orch, 1889
 Twilight Fancies (Björnson), lv, pf, 1889–90, orchd 1908
 The Birds Story (Ibsen), lv, pf, 1889–90, orchd 1908
 Maud (Tennyson), T, orch, 1891
 2 Songs (Verlaine), lv, pf, 1895, later orchd
 7 Danish Songs (Drachmann, Jacobsen), lv, orch/pf, 1897; C. Andray, cond. d'Indy, Paris, 1901
 Mitternachtslied (Zarathustra's Night-song) (Nietzsche), Bar, malt chorus, orch, 1898
 Appalachia (trad.), chorus, orch, 1898–1903, cond. Haym, Elberfeld, 1904
 The Violet (Holstein), lv, pf, 1900, orchd 1908

- Summer Landscape (Drachmann), 1v, pf, 1902, orchd 1903
 Sea Drift (Whitman), Bar, chorus, orch, 1903-4, Josef Loritz, Essen Musikverein, cond G Witte, Essen, 24 May 1906
 A Mass of Life (Nietzsche), S, A, T, Bar, chorus, orch, 1904-5; Part II, Munich, 1908, complete, C Gleeson-White, G Kerr, C W Clark, W Millar, S Adams, North Staffs Choral Soc., Beecham Orch, cond Beecham, Queen's Hall, 7 June 1909
 Songs of Sunset (Dowson), Mez, Bar, chorus, orch, 1906-7, J Culp, T Bates, E Mason Choir, Beecham Orch, cond Beecham, Queen's Hall, 16 June 1911
 Cynara (Dowson), Bar, orch, 1907, completed 1929, J Goss, BBC SO, cond Beecham, Queen's Hall, 18 Oct 1929
 On Craig Dhu (A Symons), SATTB, pl, 1907, Blackpool Midsummer Song, SSAATTBB, pf, 1908, Whitley Bay and District Choral Soc., cond W G. Whittaker, Dec 1910
 Wanderer's Song (Symons), TTBB, pf, 1908
 La lune blanche (Verlaine), 1v, orch/pl, 1910; Jean Waterston, cond Beecham, Grafton Galleries, 25 Jan 1915
 An Arabesk (Jacobsen), Bar, chorus, orch, 1911, Newport, 1920
 A Song of the High Hills (textless), chorus, orch, 1911, Philharmonic Choir, cond A Coates, Queen's Hall, 26 Feb 1920
 2 Songs for a Children's Album 'What does little birdie say' (Lennyson), unison, The streamlet's slumber song, 2-part, 1913
 Requiem (H Simon), S, Bar, chorus, orch, 1914-16, A. Evans, N Williams, Philharmonic Choir, cond Coates, Queen's Hall, 23 March 1922
 2 Songs to be sung of a Summer Night on the Water (textless), SATTB, 1917, Oriana Madrigal Soc., cond C K Scott, London, 28 June 1920
 The splendour falls on castle walls (Lennyson), chorus, 1923, Oriana Madrigal Soc., cond C K Scott, Aeolian Hall, 17 June 1924
 A Late Lark (W F Henley), 1v, orch, 1925
 Songs of Llewellyn (Whitman), chorus, orch, 1930, Philharmonic Choir, 1 SO, cond Sargent, Queen's Hall, 21 March 1932
 I'dvill Once I passed through a populous city (Whitman) [from Margot la rouge], S, Bar, orch, 1930-32, D I Abette, R Henderson, cond Wood, Queen's Hall, 3 Oct 1933

CHAMBER AND INSTRUMENTAL

- 2 Str Qts 1888, 1893
 Romance vn, pl 1889
 Sonata B vn, pl, 1892
 Romance vc, pl 1896
 Vn Sonata no 1, 1905-14, A Catterall, R J Forbes, Manchester, 1915
 Str Qt, 1916, London Str Qt, Aeolian Hall, 1 Feb 1919
 Vc Sonata, 1916, Harrison, Hart, Wigmore Hall, 11 Jan 1919
 Dance hpd, 1919
 5 Pieces pl, 1922-3
 3 Preludes, pl, 1923, E Howard-Jones, London, 4 Sept 1924
 Vn Sonata no 2, 1923, Sammons, Howard-Jones, London, 7 Oct 1924
 Vn Sonata no 3, 1930, M Harrison, A Bax, Wigmore Hall, 6 Nov 1930

SONGS

- 5 Songs from the Norwegian 'Slumber song' (Björnson), 'The Nightingale' (Wellhaven), 'Summer Love' (Paulsen), 'Longing' (Kjetulf), 'Sunset' (Munck), 1888
 7 Songs from the Norwegian 'Cradle Song' (Ibsen), 'The Homeward Journey' (A O Vinje), 'Evening Voices' (Twilight Fancies) (Björnson), 'Sweet Venev' (Björnson), 'The Minstrel' (Ibsen), 'Secret Love' (Björnson), 'The Bird's Story' (Ibsen), 1889-90
 1 English Songs (Shelley) 'Indian Love Song', 'Love's Philosophy', 'To the Queen of my Heart', 1891
 2 Songs (Verlaine) 'Il pleure dans mon cœur', 'Le ciel est pardessus le toit', 1895
 1 Danish Songs 'Summer Nights' (Drachmann), 'Thro' long, long years' (Jacobsen), 'Wine Roses' (Jacobsen), 'Let Springtime Come' (Jacobsen), 'Irmelin Rose' (Jacobsen), 'In the Seraglio Garden' (Jacobsen), 'Silken Shoes' (Jacobsen), 1897, also orchd
 4 Songs (Nietzsche) 'Nach neuen Meeren', 'Der Wanderer', 'Der Einsame', 'Der Wanderer und sein Schatten', 1898
 1m Glück wir lachend gingen (Drachmann), 1898, 'The Violet' (Holsten), 1900, 'Autumn' (Jacobsen), 1900, 'Black Roses' (Jacobsen), 1901, 'Summer Landscape' (Drachmann), 1902, 'The nightingale has a lyre of gold' (W F Henley), 1910, 'La lune blanche' (Verlaine), 1911, also orchd, 'Chanson d'automne' (Verlaine), 1911; 'I-Brasil' (F Macleod), 1913
 4 Old English Lyrics 'It was a lover and his lass' (Shakespeare), 1916, 'So sweet is she' (Jonson), March 1915, 'Spring, the sweet spring' (Nashe), Feb 1915, 'To Daffodils' (Herrick), March 1915
 Avant que tu ne t'en ailles (Verlaine), 1919
 18 unpublished songs

Principal publishers, Augener, Boosey & Hawkes, Harmonie, Leuckart, Oxford University Press, Universal

ANTHONY PAYNE

Delius Society. English organization. It was founded by Roland Gibson in 1962 to promote knowledge and appreciation of the music of Delius. It organizes lectures and concerts, and endeavours to influence broadcasting, concert promotion, recording and publishing; it publishes the quarterly *Delius Society Journal*. In 1976 under Eric Fenby it had about 400 members.

Della Bella, Domenico (fl. Treviso, c.1700–15). Italian composer and cellist, *maestro di cappella* at Treviso Cathedral. His music, even that written for instruments, appears rather austere and archaic and is often based on fugal or imitative techniques. His writing for the cello calls for a well-developed technique with particular ability in bowing.

WORKS

12 suonate da chiesa, a 3, op.1, 2 vn, vc obbl, org (Venice, 1704)
Sonata, vc, bc, *D-Bds*
7 masses, 4vv; Gloria, 4vv, Te Deum, 6vv, psalms and other sacred works *Bds, A-Wn*

BIBLIOGRAPHY

L. Forino *Il violoncello e i violoncellisti* (Milan, 1905)

GUIDO SALVETTI

Della Casa, Lisa (b. Burgdorf, nr. Bern, 2 Feb. 1919). Swiss soprano. Daughter of an Italian-Swiss doctor and his Bavarian wife, she studied with Margarete Haeser in Zurich. She made her début at Solothurn-Biel as Cio-Cio-San in 1941. She sang regularly at the City Theatre, Zurich, from 1943 to 1950 in such diverse roles as Serena in *Porgy and Bess*, Pamina and Gilda. She first appeared at the Salzburg Festival in 1947 as Zdenka in Strauss's *Arabella*, and the following summer she returned to sing Madeleine in Strauss's *Capriccio*. In 1951 she made her British début as the Countess in *Le nozze di Figaro* at Glyndebourne; later that year she was heard in Munich as Arabella, the role with which she has been most closely associated and which she sang at Covent Garden in 1953 with the Bavarian Staatsoper, and again in 1965. She became a member of the Vienna Staatsoper in 1947 and in 1952 was made an Austrian Kammersängerin. She sang at the Metropolitan Opera from 1953 to 1968.

It is in the Strauss repertory that Della Casa is best known; she graduated from Sophie through Octavian to the Marschallin; she also sings Ariadne, Chrysothemis and Salome, and is one of the finest interpreters of the *Four Last Songs*. She is able to spin out Strauss's soaring line with a smooth legato, and the limpid silvery quality of her voice makes her an admirable Mozart singer. Her beauty and natural charm enhance her vocal gifts. In the modern repertory she created the three female roles in von Einem's *Der Prozess* (Salzburg, 1953) and the Young Woman in Burkhard's *Die schwarze Spinne* (Zurich, 1949).

HAROLD ROSENTHAL

Della Ciaia [Ciaja], Azzolino Bernardino (b. Siena, 21 May 1671; d. Pisa, 15 Jan 1755). Italian composer. As a young boy he went to Pisa, becoming a member of the knights of S. Stefano. After a tour of sea duty with them (1688–1704), he was called to Pisa to take part in their governing council. He next went to Rome (1713) for 17 years as secretary to the Colonna-Barbaglia family. Returning to Pisa in 1730, again as a councillor, he proposed to the knights in 1733 a project for an organ 'containing more than 60 registers, and having four manuals, and comprising five organs, three of which can be played, when so desired, on a single manual; because

of this, and owing to the number and the size of the pipes, there is an extraordinary and majestic full sound, there being also an unusual number of reeds'. There was a fifth keyboard which controlled a harpsichord. In the execution of this design he directed many of the principal Italian organ makers of the time (Felice and Fabrizio Cimino of Naples, Lorenzo Nelli, probably of Florence, Filippo Testa of Rome, Filippo Basile, probably of Naples, Giovan Francesco detto Domenico Cacioli of Lucca, the Ravani brothers of Lucca, Filippo and Antonio Tronci of Pistoia); their work (modified at the beginning of 1839) resulted in what is still the best organ in Tuscany and one of the most beautiful in Italy. It was first played on 28 November 1737 at the funeral of Giovangastone de' Medici (for which the above description was printed). Della Ciaia became a priest in 1734 and was made prior of Urbino in 1752; it was not he but a Siennese cousin of his who became Bali of Lucca.

Although Della Ciaia composed both sacred and secular vocal music, much of it during his little free time on board ship, he is known today only for his instrumental music. His collection of keyboard music (undated, but '1727' is written on the Bologna copy) is divided into three sections: six sonatas for harpsichord, several *saggi* in counterpoint for organ and six ricercars for organ. That for harpsichord is the more important owing to the rarity of sonatas expressly for the instrument from that period. Each is a hybrid form comprising a toccata, a three-part canzona and two binary pieces: the first two movements show the application to the harpsichord of what had been primarily organ music. The toccatas, especially, exhibit a well-developed keyboard style the entire range of the instrument is employed as chordal rhythmic sections alternate with free-rhythm scalar passages reminiscent of Buxtehude.

A distant relative, Alessandro Della Ciaja (contemporary with Azzolino's grandfather), a Siennese nobleman and *accademico intronato* who studied with Desiderio Pecci, was a composer, singer, and performer on the monochord, lute and theorbo. He published a set of five-voice madrigals with continuo as his op.1 (Venice, 1636), a set of *Lamentationi sagre e motetti* for solo voice and continuo as op.2 (Venice, 1650), and *Sacri modulatus* for two to nine voices as op.3 (Bologna, 1666). His duets are firmly monodic, but the works of more parts reveal training in the contrapuntal church style.

WORKS

Salmi concertati, SSATB, 2 vn obbl., va ad lib, vle/theorbo/org, op.1 (Bologna, 1700)

Cantate da camera, 1v, bc, op.2 (Lucca, 1701)

Cantate da camera, 1v, bc, op.3 (Bologna, 1702)

[6] Sonate per cembalo con alcuni saggi ed [6] altri contrapunti di largo e grave stile ecclesiastico per grandi organi, kbd, op.4 (Rome n.d.) [?1727], 3 sonatas ed. G. Buononimi (Florence, 1912)

Missa, 4vv, concertata, org, vn ad lib, 1693, Mass, 4–5vv, org, tpi and vn ad lib, Pisa, 1710, 2 masses, 4vv, n.d., 6 ricercari in various keys, kbd, 12 ricercari a 4 in all 12 keys, kbd; sonatas, org, 4 cantate a voce sola, Pisa, 1704 and 1709: all in *D-Bds*

Lactatus sum, 5vv, 3 insts, org; Lauda Jerusalem, 5vv, 2 violettas, bc.

Nisi Dominus, 5vv, 3 insts, org: all in *D-B*

I trionfi di Giosué (oratorio, P. Berzini), 5vv, 1703, collab. others; Giosué in Gabaon (oratorio, Berzini), 5vv, collab. others: both lost

 CAROLYN M. GIANTURCO

Della Corte, Andrea (b Naples, 5 April 1883; d Turin, 12 March 1968). Italian musicologist and critic. He was self-taught in music, and studied law in Naples. He was professor of music history at the Turin Conservatory (1926–53) and at Turin University (1939–53); his main occupation, however, was journalism, and having contributed to various Neapolitan papers from 1906 he was music critic of the Turin paper *La stampa* from 1919 to 1967.

As a musicologist his chief interest was opera history, and he made valuable contributions to the knowledge of Neapolitan opera, Gluck and above all Verdi: his essays on *Aida*, *Otello* and *Falstaff* (1923–5) enlarged the awareness of the organic unity of Verdi's dramas to which Toscanini's reform of interpretation was greatly contributing. In his *Toscanini visto da un critico* (1958) Della Corte made a study of the concept of interpretation. An advocate of idealism, he produced studies in aesthetics and theory which are collected in *L'interpretazione musicale e gli interpreti* (1951) and *La critica musicale e i critici* (1961). He amassed a vast library of MSS, ancient and modern books, and valuable collections of reviews, these are now in the music department of the Civic Library, Turin, which bears his name. His greatest contributions were to journalistic criticism, to which he brought a professionalism hitherto unknown in Italy.

GIORGIO PESTELLI

Della Faya [La Faya], Aurelio (d Lanciano, nr. Pescara, c1579). Italian composer. Although he spent all of his known career in Italy, his surname suggests non-Italian origins, possibly French, but probably Castilian (from the Castilian Latin *fagea*, 'beech tree'). The title-page of *Il primo libro de madrigali a cinque voci* (Venice, 1564) indicates that he was a member of the clergy and *maestro di cappella* at Lanciano, an appointment that he held until his death. *Il secondo libro de madrigali a cinque voci* (Venice, 1579) was assembled by his pupils and published posthumously. He contributed three five-part madrigals to a collection of 1570 (*RISM* 1570²⁵). His music is conservative and rather dull; it relies heavily on imitative techniques and uses chromaticism and representational devices sparingly. (The anonymous manuscript piece copied into the *GB-Lbm* partbooks of the *Primo libro* by a 17th-century English hand is a version of Tallis's *O salutaris hostia*.)

IAIN FENLON

Del Lago, Giovanni (b c1490; d probably in Venice, after 1543). Italian theorist. He was a student of the frottolist G. B. Zesso and a priest at S. Sofia, Sestiere Canareio, Venice, from at least 1520 to after 1543; during this period he corresponded extensively with several prominent Italian musicians. His *Breve introduzione* is a condensed introduction to polyphonic music. Its content is conventional except in the last few pages, where it is striking in its great concern for careful musical setting of a text. The letters in Del Lago's MS collection of his own and other musicians' correspondence (*I-Rvat* Vat.lat 5318), apparently gathered with publication in view, touch on a wide range of theoretical issues and demonstrate an intimate side of their writers not seen in published works. Del Lago's own letters show an enquiring mind and an eagerness to puzzle his correspondents with questions on obscure or equivocal matters. He was clearly esteemed as an authority by such men as Giovanni Spataro and Pietro Aaron.

PETER BERGQUIST

Della [Dalla] Gostena, Giovanni Battista (b Genoa, c1540; d Genoa, early Dec 1598). Italian composer, uncle of Simone Molinaro. According to his own statements in his madrigal books of 1582 and 1584 he was a pupil of Philippe de Monte and found favour with the Emperor Maximilian II. On the title-pages of the same two volumes and on that of his 1589 volume he described himself as *maestro di cappella* of Genoa Cathedral; he had probably held the post for some years before 1582 – possibly from the time of his lost madrigal book of 1572 – and he held it until his death. As Giazotto showed, music flourished at the cathedral during his years there. From 1602 his post was held by Molinaro, whom he taught and who included nearly 40 pieces by him in five collections that he published be-

tween 1599 and 1610. A few pieces by him appeared in four other collections between 1585 and 1612. His madrigals are typical north Italian products of their period, and some of his sacred works display Venetian traits. His lute music is similar in technique to that of G. C. Barbetta and in style to that of other late 16th-century Italian lute composers, such as Molinaro and Terzi. The canzoni are based on chansons by such composers as Costeley and Lassus. There is more individuality in the arch-form fantasias, with their economical figuration and attenuated concluding triple-time sections.

WORKS

(published in Venice unless otherwise stated)

WALTER PASS

Dell'Aiolle [Dell'Ajolle, Dell'Aiula], **Francesco**. See LAYOLLE, FRANCESCO DE.

Della-Maria, (Pierre-Antoine-) Dominique (b. Marseilles, 14 June 1769, d. Paris, 9 March 1800) French composer. The son of an Italian artist who had settled in Marseilles, he received a good musical education, showing remarkable gifts at an early age and excelling at the mandolin and cello, an opera by him, performed at the Théâtre de Marseille when he was 18, showed undoubted talent. To complete his studies, he spent ten years in Italy, where he wrote six comic operas including *Il maestro di cappella* (performed in 1792). Paisiello, his last teacher there, was very fond of him.

Della-Maria arrived in Paris in 1796. He was fortunate enough to be helped by the dramatist Alexandre Duval, who gave him a script intended for the Théâtre-Français; he turned this into a libretto for *Le prisonnier*, an *opéra comique*, and wrote the music in one week. The finest singers of the Théâtre Favart, including Elleviou and Mme Dugazon, were engaged for its performance. From the première in 1798, the work had immense success, the airs becoming particularly popular. The public welcomed his original, brilliant and fluid melodic style in contrast to the heavier music of his contemporaries. He did not continue to write in this manner, however, and his subsequent works were less successful; *La fausse duègne* was not performed until after his death (1802).

Della-Maria's charm and talent made him a famous and cherished figure in Paris, and he was a member of the Marseilles Academy. His sudden death at the age of

30 shocked the musical world; Dalayrac delivered a funeral oration and Duval had a tomb erected on his Romainville estate near Paris.

WORKS

All printed works were published in Paris, all stage works were *opéras comiques* first performed in Paris, unless otherwise stated

Il maestro di cappella (dramma giocoso), Naples, 1792

Chi vuol non puole (dramma giocoso, 2), Vicenza, sum. 1795, *F-Pn*

PAUL ET FÉLIX LEFÈVRE

Della Porta, Francesco (b. Monza, c.1600, d. Milan, Jan 1666) Italian composer and organist. He studied at Monza with the organist G. D. Ripalta and spent the rest of his life in Milan. He competed unsuccessfully for the post of *maestro di cappella* of Milan Cathedral on no fewer than three occasions, in 1638, 1641 and 1650, when the winners were G. B. Crivelli, A. M. Turati and M. A. Grancini respectively. From documents relating to the competitions and from the title-pages of his publications it is known that in 1638 and 1641 he was organist and *maestro di cappella* of S. Ambrogio, that from at least 1645 and probably from 1642, when Turati became *maestro* of the cathedral, he was *maestro* of the chapel of S. Maria presso S. Celso and that in 1657 he held a similar position at S. Antonio. It is extremely unlikely that he is to be identified, as has sometimes been stated, with the Francesco Porta who collected the contents of Kapsberger's third book of villanellas and saw it through the press in Rome in 1696. Della Porta is known primarily as a composer of small-scale concertato works no doubt originally intended for the Milan churches at which he worked.

WORKS

Motetti, con le letanie della beata vergine, libro I, 2, 5vv, op. 2 (Venice 1645)

Motetti con un Magnificat, Litanie della beata vergine, 4, 5vv, libro II, op. 3 (Venice, 1648)

Motetti, 2-5vv, con una messa e salmi, 4, 5vv, libro III, op. 4 (Antwerp 1651)

Salmi da cappella, con altri salmi concertati, 4vv, op. 5 (Venice 1657)

Mass, *F-Pn*, Motets, *D-Bds*, *S-Uu*, *USSR-KA*

5 canzoni, org., 1639, *I-Tn*

5 ricercari, org., 1639-40, *Tn*

Ricercari a 4 (Milan, n.d.), cited in Piccinelli

SERGIO LATIUS

Della Porta, Gasparo (b ?Naples; d Naples, in or after 1613). Italian composer. His only known publication is *Il primo libro delle canzonette* (Naples, 1613) for three voices. Most of the pieces are in two sections, both of which usually cadence at the same pitch. Triple metre and chromaticism are almost completely absent. The outer voices often progress in stereotyped triadic patterns or in melodic sequences of ascending 4ths, separated by parallel 10ths and, sometimes, by inadvertent parallel 5ths and octaves. Despite the claim by the bookseller G. B. Cimmino in the dedication that Della Porta was a person of some renown in music, he seems to have had only a limited number of musical ideas, which he used again and again

KEITH A. TAYLOR

Della Porta, Giuseppe (fl 1697-8) Italian composer. He wrote the opera *L'Eurillo* (a new version of *Gli amori di Lidia e Clori*, originally given at Bologna in 1688 with music by Alessandro Melani) for performance at Rome in the house of Count Centini during Carnival 1697; he also wrote a cantata for Count Giorgio Adamo di Martinitz to a text by F. Posterla, which was performed in Rome in 1698. For both works only the published librettos survive

Dell'Arpa, Orazio. See MICHI, ORAZIO

Della Valle, Pietro ['il Pellegrino'] (b Rome, 11 April 1586; d Rome, 21 April 1652) Italian author, poet, writer on music and composer. He was one of the most important and wide-ranging figures in the cultural life of Rome in the first half of the 17th century, not least in the sphere of music. He was the son of a noble Roman family and received a cultural education worthy of his social standing: he studied dancing with Fabrizio Caroso, the harpsichord with Stefano Tavalaccio, Quinzio Solini and Paolo Quagliati, counterpoint, continuo playing and the theorbo with Solini and the viola da gamba with Marco Fraticelli. In 1606 he wrote the text for *Il carro di Fedeltà d'Amore*, set to music by Quagliati and performed during that year's Carnival (it was published in 1611). This allegorical *azione*, sung by five characters accompanied by instruments and performed on a travelling cart, testifies to his early interest in new musical ideas. He was adventurous by nature, and in 1611, after a stay in Naples, he went to Tunisia to fight pirates. On 4 March 1614 he set off on a long voyage to the East – hence his nickname ('The Wanderer') – that lasted for 12 years, during which he collected, among other things, many important manuscripts. His learned studies based on them are now mostly lost. The story of his travels was published in four volumes as *Viaggi descritti in 54 lettere famigliari* (Rome, 1650-58; ed. F. Gaeta and L. Lockhart, Rome

1972-), reprinted several times and translated into English, French, German and Dutch.

Della Valle returned to Rome on 28 March 1626 and immediately became involved again in the cultural and social life of the city, among other activities, presenting musical and theatrical performances in his house. In 1629 he wrote the text for *La valle rinverdata*, an allegorical work celebrating the birth of his daughter Romibera and described as 'an evening's dramatic entertainment [veglia] to be performed with music'. The loss of the music – even the composer's name is unknown – makes it difficult to hazard any opinion as to its style, but to judge by the stage directions in the manuscript it was probably in a similar, though much extended, form to that of *Il carro di Fedeltà d'Amore*, passages for solo voice alternating with others for several voices. A lost work 'in the form of a dialogue' between Sofonisba and and Massinissa, presumably written in madrigalian style, and described by G. B. Doni in *Annotazioni sopra il Compendio de' generi e de' modi della musica* (1640, pp. 64f), probably dates from the same period.

In 1627 Della Valle was elected a member of the Accademia degli Umoristi, founded by Andrea Capranica, and assumed the sobriquet 'Il Fantastico'; from July 1635, after Capranica's death, the academy met at Della Valle's house. His friendship with Doni (see GIOVANNI BATTISTA DONI), which probably began in 1635, exerted a great influence on his artistic and musical interests, turning them almost exclusively in the direction of ancient music and the attempts to revive in modern music the genera, modes and accents of Greek music. The relations between the two men are charted in a series of interesting letters, which give some idea of the complex problems posed by so abstruse a subject. Della Valle's first composition to follow the principles set out by Doni was probably the lost *Dialogo di Ester*, for five voices, performed at the Oratorio del Ss Crocifisso on 2 April 1640, in some letters it is referred to as an oratorio. In the same year he wrote two other such works, the *Dialogo della partenza*, also lost, and the five-part *Dialogo per la festa della santissima Purificazione*, 'in five different modes, Dorian, Phrygian, Aeolian, Lydian and Hypolydian'. The latter is his only surviving score; it was written for the Oratorio della Vallicella but was never performed. Notwithstanding its use of ancient Greek modes, it is very like a vernacular oratorio in structure and musical style. Della Valle himself sometimes called it an oratorio, his indiscriminate use of the terms 'dialogue' and 'oratorio' is of some interest in the early history of the oratorio. The work is short and consists of alternating sections for one, two, three and five voices over a continuo part played on a 'triharmonic harpsichord' and a 'panharmonic violone'. These instruments, and others, including 'violini dalle tre armonie', were specially made by Della Valle for the performance of his own compositions and used various types of tuning, depending on the mode used. Some of them are illustrated in the works of Doni and in Kircher. Della Valle's last composition was probably the lost *Dialogo di Luys Camões*, 'set to music . . . in a mixture of the diatonic, chromatic and enharmonic genera and in seven different modes, Dorian, Aeolian, Iastian, Lydian, Phrygian, Hypolydian and Mixolydian'; he sent it to King John IV of Portugal on 11 April 1649.

Della Valle is, however, important in the history of music less for his compositions than for the discourse that he addressed to Lelio Guidiccioni in 1640, *Della*

musica dell'età nostra, which is a rich, vivid and colourful source of information about Roman musical life during the first decades of the 17th century. Described as a 'short history of the musical matters of our time', it is a defence of modern music, that is, 'decorated music' ('musica ornata') by contemporary composers, who 'have added to the subtleties of counterpoint a thousand graces in the form of trills, rubato, syncopations, tremolos, the use of *piano* and *forte*, and other similar exquisite touches'. Della Valle also insisted that such music should not be 'banished by the church but should, on the contrary, be welcomed by it with open arms'. Some of his judgments are particularly interesting, for instance that Gesualdo 'perhaps set an example to everyone else in the writing of affective vocal music' and that some of Palestrina's compositions 'should not be valued as objects for use but should be kept in a museum as beautiful curiosities'. The lively historical sense and precise cultural knowledge revealed by such remarks are matched by his insistence on respect for the literary text, 'which is the spirit of song and more important to it than anything else'. His *Note nel Discorso sopra la musica antica e moderna*, written in 1641 in response to Nicolò Farfaro's *Discorso sopra la musica antica, e moderna*, is also of interest. It is followed in the manuscript by an appendix in which Della Valle discussed problems posed by the division of the octave into equal semitones and declared himself against such a practice.

AGOSTINO ZIINO

Della Viola. See DALLA VIOLA family.

Della Viola, Alessandro [Alexander]. See MERLO, ALESSANDRO.

Della [Dalla] Volpe, Lelio (fl. Bologna, 1720-49). Italian music publisher and bookseller. His firm was active in Bologna for most of the 18th century and was famous in the art of typography and for the accuracy and elegance of its editions. In 1720, as head of a society of Bolognese printers, he acquired the printing establishment of the widow of Giulio Borsaghi. His first musical publication was Angelo Bertalotti's *Regole per il canto fermo*, first published in 1720 and reprinted in 1744, 1756, 1764 and 1778. He ordered musical type characters from the Netherlands and in 1734 began his music printing activities in earnest, starting with Giovanni Battista Martini's op. 1, *Litanie e antifone a 4 voci con violini*. He was also active as a bookseller, handling the musical publications of the Bolognese printers Monti and Silvani. In 1735 he published an index of the musical editions of these two publishers which were sold by his firm (*Indice delle opere di musica stampate che si vendono alla stamperia di Lelio della Volpe in Bologna*). Other publications include instrumental and sacred music by G. A. Pertì (1737), G. B. Martini (1747, 1763), G. M. Rutini (1765), P. Pericoli (1769, 1796), A. Caroli (1766) and P. A. Pavona (1770). He also published treatises by A. G. Minelli (*Ristretto delle regole più essenziali della musica*, 1748) and G. B. Martini (*Esemplare ossia Saggio fondamentale pratico di contrappunto sopra il canto fermo*, 1774-5), as well as Martini's *Storia della musica* (1757-81). After 1744 Della Volpe's editions were no longer printed but engraved. He died on 6 October 1749, and the firm was taken over by his son Petronio, who continued to publish under the name Lelio della Volpe. The firm's usual typographical mark is the figure of a wolf ('volpe' in Italian).

 ANNE SCHNOEBELE

Delle Palle [Dalle Palle, Del Palle, Del Palla], **Scipione** (fl. mid-16th century). Italian singer and composer. He may be identifiable with Scipione de' Vecchi, called 'Delle Palle', who was a nobleman of Siena and who died in 1568. In 1612 he was referred to by a Tuscan musician as 'the foremost singer of that [i.e. the 16th] century'. When Cosimo I de' Medici brought Giulio Caccini from Rome to Florence as a youth in the mid-1560s, he supported his study with Delle Palle: in the preface to *Le nuove musiche* Caccini referred to 'my famous master Scipione Del Palla', saying he had learnt from him 'the noble manner of singing'. He is also cited

in Luigi Dentice's *Dialoghi sulla musica* as being active – but in Naples – at the time of its publication (1552). In *Aeri raccolti . . . dove si cantano sonetti, stanze, & terze rime*, a collection edited by Rocco Rodio and reprinted in Naples in 1577, there is one piece, *Dura legge d'amore*, attributed to Delle Palle.

Deller, Alfred (George) (b Margate, 31 May 1912, d Bologna, 16 July 1979). English countertenor. In 1940 he joined Canterbury Cathedral choir, where, in 1943, Tippet heard him sing; this led to his London début that year in a Morley College concert. In 1946 he sang in Purcell's *Come, ye Sons of Art*, away in the BBC Third Programme's inaugural broadcast, and in 1947 began his full-time career. His first recording (of Purcell songs) was made with Walter Bergmann in 1949; for his second (of Dowland songs, in 1950) he was accompanied by Desmond Dupré. Together, Deller and Dupré were responsible for the revival of the English lute-song in the 1950s. The Deller Consort, a small group devoted to the faithful and idiomatic performance of early music, was formed in 1950, and from 1964 Deller's son Mark (b St Leonards, 27 Sept 1938) sang countertenor with it. In 1963 Deller founded the Stour Music Festival (Kent), for annual music-making with the consort and some of the continental performers (Leonhardt, Bruggen) with whom Deller was associated. Concerts, including new works as well as music from the 16th and 17th centuries, were held in an informal atmosphere. Britten wrote the part of Oberon in *A Midsummer Night's Dream* for Deller, who sang in the first performances in 1960 and in the recording. Other composers to write for him include Fricker, Mellers, Ridout (Death, in *The Pardoner's Tale*, 1971) and Rubbra. He was made OBE in 1970.

Deller's voice was a successful blend of his falsetto range with a light baritone. At the peak of his career his voice was smoother, lighter and more lyrical than that cultivated by many of his successors; and while he sang at his best in slow and expressive music, he executed dramatic arias and florid passages with exceptional skill. He was criticized for vocal mannerisms, including his idiosyncratic 'shading' of high notes and phrases, but it is largely to his credit that the high male voice is once more in demand in concert halls and seriously taught in conservatories.

DAVID SCOTT

Deller [Teller, Döller, Töller], **Florian Johann** (b Drosendorf, baptized 2 May 1729; d Munich, 19 April 1773). Austrian violinist and composer. He probably studied in Vienna, where he met Jommelli (c1749) and may have met and even written some ballet music for the ballet-master Franz Hilverding. In 1751 he accepted a position as a ripieno violinist in the Stuttgart Hofkapelle of Duke Karl Eugen of Württemberg. In 1756 Deller asked the duke's permission to take lessons in counterpoint and composition from Jommelli, who was engaged as principal conductor at Stuttgart from 1753. Meanwhile, he also played the violin for the

dancing classes of the ballet-masters Michel dell'Agatha and François Sauvetterre, which gave him an insight into dance technique and its musical requirements. With the arrival of J. G. Noverre early in 1760 the ballet company, which had been founded two years earlier, was greatly enlarged. The next years saw ballet productions on a lavish scale featuring famous dancers. Noverre soon recognized Deller's talent for composing ballet music, and is said to have considered Deller his most able collaborator (Schubart, 1806). Perhaps the greatest of their collaborations was *Orfeo ed Euridice*, which was first performed at Stuttgart between Acts 2 and 3 of Jommelli's *Didone* in 1763; that same performance also saw the première of their ballet *Der Sieg des Neptun* (in the opera's last act), which became known for its depiction of the battle between the elements Fire and Water.

After Noverre left Stuttgart in 1767, Deller turned his hand to writing several comic operas, including *La contese per amore* and *Il maestro di cappella*. After 20 years of service in Stuttgart and many years of complaining of his low position there, Deller was finally released in the summer of 1771 and made his way to Vienna, where *Il maestro di cappella* was performed at the Burgtheater on 31 December 1771. He soon left and went to Munich, where he is reputed to have received a commission from Maria Antonia Walpurgis to write a mass for Dresden.

Although Deller wrote several instrumental works, as well as comic operas, he is best remembered as a composer of ballet music. His ballets were of the genre *danse en action*, rather than *danse simple* (i.e. the goal was a dramatic idea that could be realized by the co-operation of music with dance and pantomime). One of Deller's greatest admirers was C. F. D. Schubart, who credited him with a large part of Noverre's success at Stuttgart, and quoted Noverre's praise that Deller had no equal in writing music which gave deeper meaning to pantomime (Schubart, 1812). His music was generally in the Viennese Classical style with the addition of Italian orchestral recitative for the large pantomime scenes and folklike melodies. His fame as a ballet composer quickly spread, for a volume of scenarios by the Kassel ballet-master Etienne Lauchery entitled *Recueil des ballets exécuté sur les théâtres de Cassel* (Kassel, 1768) contains seven works with music wholly or partly by Deller. In addition to Stuttgart and Kassel, Deller's ballets were performed in Mannheim, Linz, Pressburg and Vienna (see Schlossar, Olivier). The music to Noverre's ballet *La mort d'Hercule* (performed with Jommelli's *Semiramide* in 1762) was attributed to Rodolphe by Abert (1913), but is now thought to be by Deller, who is named alone on a manuscript score (dated 1762, in CS-K) and with Toeschi on a printed scenario for Lauchery's version (1767).

WORKS

BALLETS

Music lost unless otherwise stated; extant publ scenarios are in E. Lauchery *Recueil des ballets exécuté sur les théâtres de Cassel depuis l'année 1764 jusqu'à la fin de l'année 1768* (Kassel, 1768) [L], or *Recueil de programmes de ballets de M. Noverre* (Vienna, 1776) [N], original choreographers given in parentheses.

Amore vincitore dell'indifferenza (Noverre), Stuttgart, 1761, publ scenario in *US-Wc*. Il riconoscimento inaspettato (Noverre), Stuttgart, 1761, publ scenario in *Wc* [possibly by Rodolphe]; *La mort d'Hercule* (Noverre), Stuttgart, 11 Feb 1762, also choreographed by Lauchery, 1767, with add music by Toeschi, L, music in CS-K, *D-Sl*, ed. H. Abert, DDT, xliii-xliv (1913) [wrongly attrib. Rodolphe]; *Orfeo ed Euridice* (Noverre), Stuttgart, 11 Feb 1763, choreographed by Lauchery, 1766, L, music CS-K, *D-Rit*, formerly *DS*, ed. H. Abert, DDT; *Der Sieg des Neptun* (Noverre), Stuttgart,

ber of grants and awards, and his works had regular performances. He won an Elizabeth Sprague Coolidge Award for his Piano Trio (1937), a Town Hall Composition Award for the orchestral work *Magnificat* and Guggenheim Fellowships in 1943 and 1944. In the following year he received a grant from the American Academy of Arts and Letters. His *Variations*, *Chaconne* and *Finale*, first performed by the New York PO under Walter, won the New York Music Critics' Circle Award for the best new orchestral piece of 1948; he won a second Critics' Circle Award in 1962 for the opera *The Triumph of St Joan*. The Pulitzer Prize for music was awarded to him in 1957 for *Meditations on Ecclesiastes* for string orchestra. Among several scores composed for television, his music for the NBC programme *The Louvre* won the 1965 Emmy award.

Dello Joio's teaching career began at Sarah Lawrence College, Bronxville, New York (1945–50). He was professor of composition at Mannes College of Music, New York (1956–72), and in 1959 he began a 14-year association with the Contemporary Music Project for Creativity in Music Education (supported by the Ford Foundation), through which young composers were placed in high schools throughout the USA to write new music for the school ensembles. Dello Joio conceived the project and was made chairman of the policy committee. In 1972 he accepted the positions of professor of music at Boston University and acting dean of the university's School of Fine and Applied Arts.

The relatively brief training with Hindemith was influential in shaping Dello Joio's musical thinking, though it was Hindemith's advice, rather than any technical instruction, that had most effect. He urged Dello Joio to speak naturally as a composer, without concern for models that had little relevance to his experience and temperament. The musical influences of Dello Joio's earlier life were 19th-century Italian opera, Catholic church music and the popular music and jazz of New York in the 1920s and 1930s. Dello Joio fused elements of these to form the vocabulary for his subsequent creative work; the most prominent elements are Gregorian chant and a preoccupation with religious subjects. Such works as *Magnificat*, *Meditations on Ecclesiastes* and *New York Profiles* use either literal quotations of chants or chant-like melodies. Dello Joio's treatment of the Joan of Arc story went through several revisions and transformations in operatic and symphonic form. The first was the opera *The Triumph of St Joan*, which he withdrew after its première. A second opera was written for television as *The Trial at Rouen*, with a completely new text and score; this work was revised as *The Triumph of St Joan* for the New York City Opera. A further version was *The Triumph of St Joan Symphony*, a three-movement work based on material from the first opera; it was first performed with choreography by Graham as *Seraphic Dialogue*. All of the St Joan works contain much effective music in a pseudo-liturgical style.

His affinity with and enjoyment of popular music are apparent in numerous works. The flamboyant *Fantasy* and *Variations* for piano and orchestra, in its bursts of hammered-out repeated notes and jazz syncopation, suggests the same big-city stimulants that affected Gershwin. A flair for the theatrical is also evident: there is a fondness for big contrasts in dynamics, romantic tunes, grand gestures. This flair serves particularly well in his stage and television scores (*Air Power* is a promi-

ent example). In general Dello Joio's music is extrovert, colourful and well-crafted.

WORKS

(selective list)

STAGE AND CHORAL

Operas: *The Ruby* (W. Mass), 1953, *The Trial at Rouen* (television opera, Dello Joio), 1955, rev. stage as *The Triumph of St Joan*, 1959; *Blood Moon* (G. Hoffman), 1961

Ballets: *The Duke of Sacramento*, 1942, *On Stage*, 1946, *Heloise and Abelard*, 1969

Choral: *A Psalm of David*, chorus, str, brass, perc, 1950; *Song of the Open Road* (Whitman), chorus, tpt, pf, 1952, *Song of Affirmation* (sym. cantata, S. V. Benet), S. narrator, chorus, orch, 1953, *Adieu, Mignonne, when you are gone*, female vv, pf, 1954, *To St Cecilia* (Dryden), chorus, pf/brass, 1958, *Prayers of Cardinal Newman*, chorus, org, 1960; *Mass*, chorus, brass, org, 1969, *Evocations* (R. Hillyer), chorus, orch, 1970, *Psalm of Peace*, chorus, tpt, hn, org/pf, 1972; *Come to me, my Love*, SATB, 1973

ORCHESTRAL

Pi. Concertino, 1938, Fl. Concertino, 1939, *Sinfonietta*, 1940; 2 Pf. Conc., 1941, *Magnificat*, 1941–2, *Harmonica Concertino*, 1944, *Concert Music*, 1945, *Harp Concerto*, 1945, *Ricercar*, pf, orch, 1946, *Serenade*, 1947–8, *Variations*, *Chaconne* and *Finale* (3 Sym. Dances), 1947, *New York Profiles*, 1949; *The Triumph of St Joan Sym.*, 1951

Concertante, cl., orch, 1952, *Lamentation of Saul* (after D. H. Lawrence David), Bar, 5 insts., orch, 1954, *Meditations on Ecclesiastes*, str, 1956, *Air Power*, sym. suite, 1957; *A Ballad of the Seven Lively Arts*, pf, orch, 1958, *Fantasy and Variations*, pf, orch, 1961, *Antiphonal Fantasy on a Theme of Vincenzo Albrici*, org, brass, str, 1966, *The Dancing Sergeant*, 1967, 5 Images, 1967, *Fantasies on a Theme by Haydn*, band, 1968, *Homage to Haydn*, 1968, *Songs of Abelard*, band, 1969; *Choreography*, str, 1972; *Concertante*, wind, 1971

CHAMBER AND INSTRUMENTAL

3 pf. sonatas, 1943, 1944, 1948, Trio, fl., vc., pf, 1944; *Duo concertato*, vc., pf, 1945, *Variations and Capriccio*, vn., pf, 1948, *Ana and Toccata*, 2 pf, 1952, *Colloquies*, vn., pf, 1964; *Laudation*, org, 1965; *Bagatelles*, harp, 1969, *Capriccio*, pf, 1969, 3 Essays, cl., pf, 1974, *Diversions*, pf, 1975, 5 Lyric Pieces, org, 1975

RICHARD JACKSON

Del Mar, Norman (René) (b London, 31 July 1919). English conductor, composer and writer on music. He studied the horn and composition at the RCM, also working privately with Mátyás Seiber. After war service with the RAF Central Band, he played in various London orchestras (notably in Beecham's RPO as second to Dennis Brain), did some composing and arranging and gained experience conducting an amateur orchestra; this grew into the Chelsea SO, which under Del Mar gave world or British premières of works by Dohnányi, Strauss, Hindemith and Poulenc, as well as performances of works then little known in England, including Stravinsky's early Symphony, Busoni's Piano Concerto and Mahler's Second and Ninth Symphonies. Beecham's interest in Mahler's no.2 led to Del Mar's associate conductorship with the RPO in 1947. His professional début came that year at Drury Lane in the Strauss Festival, in the composer's presence, and he conducted the Sadler's Wells Ballet and the English Opera Group in the late 1940s. At that time he also conducted many amateur orchestras, from whom he has always had a talent for obtaining excellent results. He assisted Nikolay Malko with the Yorkshire SO (1954–6), and in 1960 became conductor of the BBC Scottish Orchestra; in five years he brought it to a new pitch of excellence and broadened its programmes. In 1968 he was appointed chief conductor of the Göteborg SO, and in 1974 principal conductor of the Academy of the BBC. He was made CBE in 1975.

Del Mar's clear exposition of complex scores and his strong sympathies for late 19th- and early 20th-century music have made him an outstanding conductor of music in Romantic or post-Romantic vein, and he has been particularly successful in Mahler, he has also introduced a large number of works to English and foreign audiences. His writings include an admirably thorough, scholarly and discerning three-volume study, *Richard Strauss* (London, 1962, 1969 and 1972, rev 2/1978). His Flute Concerto was first performed by Gareth Morris in 1964, he has also composed two symphonies, a string quartet and a number of works for Dennis Brain.

JOHN WARRACK

Delmas, Marc (b St Quentin, 28 March 1885, d Paris, 30 Nov 1931) French composer. He studied at the Paris Conservatoire with Leroux (harmony), Caussade (counterpoint and fugue) and Lenepveu and Vidal (composition), winning the Prix de Rome in 1919 with *Le poète et la fée*. His music shows unusual robustness of picturesque and dramatic gesture, perhaps for this reason he had considerable success with works for the stage, of which the ballet *Cyrcé* won him the Prix de la Ville de Paris (1925). In 1931 he received the Charles Blanc Prize for his book on Bizet.

WORKS (selective list)

Operas: *Camille*, 1, Paris, Opéra-Comique, 1921, Iriam, Bordeaux, 1923, *Le masque*, 3, Nice, 1926, *La gjaour*, 4, Vichy, 1928, *Quand on conspire* (comédie lyrique, R. Escholier), c1930, *Sylvette*, operetta, collab. H. Février, Paris, Trianon Lyrique, 1932.
Ballet: *Cyrcé*, Paris, Opéra, 1927.
Incidental music: *Penthesilée*, Béziers, Arènes, 1922, *Le dieu sans couronne*, Béziers, Arènes, 1923, *Robert Catelet*, St Quentin, 1928, *Andorra* (I. Sandy, J. Camp), c1930.
Orch: *Le bateau ivre*, sym. poem after Rimbaud, pf, orch, perf. 1923, *Rapsodie sur des thèmes arégeois*, vc, orch, perf. 1927, many other pieces, incl. dramatic scenes.
Inst: *Pf Trio*, c, perf. 1921, *Sonata*, vn, pf, perf. 1928, numerous duos with pf, particularly for wind insts, pf compositions.
Vocal: *Le poète et la fée*, cantata, 1919, *Requiem*, choral pieces, songs.
Principal publishers: Choudens, Leduc, Lemoine.

PAUL GRIFFITHS

Del Matta, Mauro. See MAURO MATTI.

Del Monaco, Mario (b Florence, 27 July 1915). Italian tenor. He studied at the Pesaro Conservatory. At 13 he sang Massenet's cantata *Narcisse*. In 1935 he won first prize in a competition for a place in the Rome Opera School. He made his début at Pesaro in 1939, but regards as his 'official' début a performance as Pinkerton at the Teatro Puccini, Milan, in January 1941. The foundations of Del Monaco's international career were laid during the 1945-6 season when he sang Radamès at the Verona Arena, and Cavaradossi, Canio and Pinkerton at Covent Garden with the San Carlo company from Naples. He joined the Metropolitan in 1951 and continued to sing regularly in New York until 1959.

Del Monaco possessed a thrilling natural voice of enormous power. His declamatory style was reminiscent of Pertile's though a reluctance to sing below

Mario Del Monaco in the title role of Verdi's 'Otello'

mezzo-forte was criticized. Yet at his best he could give moving and sensitive performances. His *Othello* at Covent Garden in 1961 was praised for its sincerity and feeling, as well as for its vocal splendour.

HAROLD ROSINTHAL

Delmotte, Roger (b Roubaix, 20 Sept 1925). French trumpeter. He studied at the conservatory in Roubaix and the Paris Conservatoire, won the international contest in Geneva in 1950 and became professor of the trumpet at the Versailles music school. In 1951 he became first trumpeter of the Paris Opéra; he was a founding member of the orchestra of the Domaine Musical under Boulez. He has taught at the international summer academy in Nice and the Tibor Varga Festival in Sion, and is a consultant for Courtois. Although his preference as a soloist is for Haydn's Concerto and Baroque music, he has given first performances of many contemporary works for French radio; his recordings of Jolivet's Concertino and Rivier's Concerto for saxophone and trumpet won the Grand Prix du Disque. In 1967, with Pierre Cochereau (organist at Notre Dame in Paris), he founded the first trumpet-organ duo in France. He is a chevalier of the Légion d'honneur.

Del Palla [Del Palle], **Scipione**. See DELLE PALLE, SCIPIONE.

Del Pane, Domenico. See DAL PANE, DOMENICO.

Del Pomo [Pomius], **Francesco** (b Palermo, 1594; fl Palermo, 1604–5). Italian composer, singer and lutenist. He was a child prodigy as singer and lutenist and was a pupil of Antonio Il Verso. At the age of ten he published his *Primo libro di ricercari a due voci* (Palermo, 1604), which is lost. On 1 April 1605 the Venetian printer Amadino dedicated Il Verso's second book of three-part madrigals to him: 'your name is already known throughout Italy, your praises spread by all those who have seen and heard you play and sing from the age of five with such grace and security'. Two Latin poems (see Paruta) celebrate his marvellous singing. Mongitore latinized his name to 'Pomius' (which is wrongly printed as 'Podius') and confused him with Francesco Tumèo (Tomeus Pomeus) of *Infidi lumi* and *Le risa a vicenda*. He is otherwise not heard of again.

PAOLO EMILIO CARAPEZZA

Del Puente, Giuseppe (b Naples, 30 Jan 1841, d Philadelphia, 25 May 1900). Italian bantone. After making his début at Iași, Romania, he sang in Spain (1870) and Rome (1873). He was first heard in London at Drury Lane in 1873 and sang one performance of *Rigoletto* at La Scala in 1875. During 1878 he sang Escamillo in the first performances of *Carmen* in London (Her Majesty's Theatre, 22 June) and New York (Academy of Music, 23 October). He sang Valentine in *Faust* at the opening night of the Metropolitan (22 October 1883), also appearing in the first New York performance of *La gioconda* (20 December) and in several other roles during the inaugural season. In 1885 he sang Escamillo at the San Carlo, Assur in *Semiramide* at Covent Garden and Lescaut in the first New York performance of Massenet's *Manon* at the Academy of Music (23 December). He continued to sing in London until 1888 and in America until 1895. A stylish singer, he did not have a remarkable voice, but was admired for his forthright interpretations, especially of Mozart and of the French repertory.

Delsart [Delsaert], **Jules** (b Valenciennes, 1844; d Paris, 3 July 1900). French cellist and viol player. He studied the cello at the Valenciennes Conservatory, and then with Franchomme at the Paris Conservatoire, graduating with the *premier prix* in 1866. He made many successful tours; several appearances in London included the first performance of Popper's *Requiem* for three cellos, with Howell and the composer, at St James's Hall on 25 November 1891. After Franchomme's death in 1884, Delsart replaced him at the Conservatoire, continuing there until he died. His many distinguished pupils included Paul Bazelaire, Marcel Casadesus, Louis Feuillard, Louis Fournier and Georges Papin.

About 1887–8, Delsart started to study the bass viol. In 1889 he appeared with Louis Diémer (harpsichord) and in 1895 with Van Waefelghem (viola d'amore), Grillet (vielle) and Diémer as the Société des Instruments Anciens. The group travelled throughout Europe with great success. Delsart was eventually succeeded in the Société by Papin and Casadesus. Delsart was said to be one of the foremost French cellists of the period, with faultless technique, a precise bow and a sweet, though not large, tone. He owned the handsome 1689 'Archinto' Stradivari.

LYNDA LLOYD REES

Del Tredici, David (b Cloverdale, Calif., 16 March 1937). American composer. He studied composition at the University of California at Berkeley (1955–9) and Princeton University (1960, 1964). His numerous honours include Guggenheim and Naumburg awards, an award from the National Institute of Arts and Letters and commissions from the Fromm and Koussevitzky foundations. From 1966 to 1972 he was assistant professor at Harvard University. All of his compositions after 1964 are of major proportions, and many contain a highly virtuosic soprano part. His writing is elaborately detailed and often dense, with complex rhythmic juxtapositions and layerings of different tempos. The total effect, however, is one of freedom and broad emotional gesture.

GERALD WARFIELD

Del Turco, Giovanni (b Florence, 21 June 1577; d Florence, 20 Sept 1647). Italian composer and court administrator. He was a nobleman and belonged to the Knights of St Stephen, a religious order based in Pisa.

He was probably an associate of the circle of Florentine poets and musicians that had Jacopo Corsi as its patron from about 1592 to 1604. He received musical tuition from Marco da Gagliano, who, dedicating his second book of madrigals (1604) to him, praised his talents and compositions. Del Turco published his own first book of madrigals in 1602, and Gagliano included single pieces by him in his first four madrigal books between then and 1606; that in the second book is a lament on Corsi's death. Del Turco became secretary of Gagliano's Accademia degli Elevati, which was founded in 1607. In the same year he is mentioned in Monteverdi's *Scherzi musicali*, by the latter's brother Giulio Cesare, as one of the 'gentlemen of that heroic school' whose practice Monteverdi followed. He came to some prominence in 1614, when he published his second book of madrigals, dedicated to Grand Duke Cosimo II, and was appointed the grand duke's director of court music. As such he organized the music for Carnival 1616 and wrote the music for the mascherata in the equestrian entertainment *Guerra d'Amore*. He is described (in *RISM* 1617²⁰) as still occupying this post in 1617, but Ferdinando Saracini seems to have succeeded him by 1625. There are just over 40 pieces by him, nearly all of them five-part madrigals. Six madrigals from his first book, now incomplete, reappear in the second, which of all his music warrants the most attention. The typically epigrammatic texts, a few of which are by Guarini, are amatory or pathetic in character. The settings use an idiom of parlando declamation, made unstable by compressed and fast-moving imitation. In general they resemble Gagliano's later style, though they show an occasional awkwardness of melodic outline and harmonic movement unlike anything in Gagliano. False relations, sometimes simultaneous, are prominent, but Del Turco's chromaticism, like most Florentine composers', remains fairly innocuous.

The Lorenzo del Turco of whom three five-part madrigals are known (in *RISM* 1602⁹, 1605¹¹ and 1606¹¹, volumes by Giovanni del Turco or Gagliano) was probably Giovanni del Turco's younger brother, he too was taught music by Gagliano.

DAVID S. BUTCHART

Del Turco, Lorenzo. Italian composer, probably younger brother of GIOVANNI DEL TURCO

De Luca, Giuseppe (b Rome, 25 Dec 1876; d New York, 26 Aug 1950). Italian baritone. In 1892 he

Giuseppe de Luca with Rosina Storchio in Donizetti's 'Don Pasquale'

entered the Cecilia Academy in Rome to begin five years' vocal study with Vincenzao Persichini, and made his operatic debut at Piacenza on 6 November 1897 as Valentine in *Faust*. By 1902 he was well enough known to be offered the leading baritone role in the first performance (6 November) of Cilea's *Adriana Lecouvreur* at the Teatro Lirico, Milan, and a year later was chosen by La Scala in a similar capacity for the premières of Giordano's *Siberia* (19 December 1903) and Puccini's *Madama Butterfly* (17 February 1904). He remained at La Scala for eight seasons, winning a high reputation especially in such lighter roles as Dr Malatesta in *Don Pasquale*, but also in demand for his Alberich and Beckmesser. During this period he sang often in London (1907 and 1910) and other European capitals; but the greater part of his career lay in the USA. He first appeared at the Metropolitan in Rossini's *Il barbiere di Siviglia* on 25 November 1915, and for 20 consecutive seasons remained an invaluable and much appreciated member of the company, gradually assuming all the leading roles of the Italian repertory. Although his well-schooled baritone was less powerful than those of his close contemporaries, Pasquale Amato and Titta Ruffo, his complete mastery of the art of singing enabled him to retain his powers almost unimpaired to an advanced age. When, after an absence of 25 years, he made a single unheralded appearance at Covent Garden on 31 May 1935 as Rossini's Figaro, most of the professional singers and vocal enthusiasts in London were present to pay their respects to a great artist, and a similar phenomenon was observed five years later when he gave a few further performances at the Metropolitan in *La traviata*, *La bohème* and *Rigoletto*, taking leave of the scene of his old triumphs as Rigoletto, one of his favourite roles, on 12 March 1940. On 7 November 1947, at the age of 70, just 50 years after his debut, he gave his farewell New York recital.

His many gramophone records, made over 45 years, are of fine quality, the early Fonotipias exhibiting the

brilliance of the young singer (and his delightful sense of humour as shown in the *buffo* duet from *Don Pasquale* with Corradetti), while the Victors made between 1917 and 1930 reveal the mature classical stylist and deserve to stand as models of the bel canto tradition.

DESMOND SHAWE-TAYLOR

De Lucia, Fernando (b Naples, 11 Oct 1860; d Naples, 21 Feb 1925) Italian tenor. He studied in Naples, and made his début at the Teatro S Carlo in *Faust* on 9 March 1885. At first he was best known in the *tenore di grazia* repertory, notably as Rossini's Count Almaviva, which remained a favourite role. But in the 1890s and the early 1900s his fame was increasingly linked with the impassioned tenor heroes of the new *verismo* school, especially Turiddù, Canio and Lotus in Giordano's *Fedora*, in all of which he excelled alike as actor and singer. The title role in Mascagni's *L'amico Fritz*, in which he sang with Calvé in the Rome première of 1891 and in its first Covent Garden and Metropolitan Opera performances shortly thereafter, formed a bridge between the two parts of his repertory, and Mascagni gratefully chose him also for the premières of his *I Rantzau* (Florence, 1892), *Silvano* (Milan, 1895) and *Iris* (Rome, 1898).

Fernando de Lucia as Turiddù in Mascagni's 'Cavalleria rusticana'

At the Metropolitan he sang only for a single season (1893-4). During his first London season (Drury Lane, 1887) he had been overshadowed, like others, by the enormous success of Jean de Reszke's tenor début; his Covent Garden appearances were frequent and successful between 1892 and 1900, although there were recurrent complaints of his excessive vibrato. He was the first to sing Puccini's Rodolfo in Italian at Covent Garden (with Melba), as well as that theatre's first Cavaradossi (with Ternina). He was particularly popular in his native Naples, where he made his last stage appearance in 1917 in *L'amico Fritz*; he came out of retirement to give a memorable account of 'Pietà, Signore' (then attributed to Stradella) on the occasion of Caruso's funeral in 1921.

De Lucia's numerous records (some 400 in all) fall into three groups: about 70 sides made between 1902 and 1910 for G & T/HMV; a batch of 30 Neapolitan and popular ditties made in 1910 for Fonotopia; and some 300 sides made between 1917 and 1922 for Phonotype. Although the first of these groups is the most important, his technique and tone remained little impaired to the end, and the last group includes much valuable and previously unrecorded material, besides complete versions of *Rigoletto* and *Il barbiere di Siviglia*. This extensive recorded legacy is valuable because it represents an otherwise vanished style. De Lucia's technique and vocal control are astonishing, as are also his vivid enunciation and variety of nuance and tone-colour. His intensely personal manner defies the listener to remain indifferent, and his very free treatment of the musical text can be called historically correct, at least in his Rossini, Bellini and Donizetti roles; whether the ornamentation he sings is the composer's or his own, he delivers it with equal freshness and spontaneity.

Perhaps the best of his records (often reissued on LP) are his various excerpts from *Il barbiere di Siviglia*, *La sonnambula* and *L'elisir d'amore*, his account of Alfredo's aria in *La traviata* (a role he sang at Covent Garden at Patti's farewell) is so tender and caressing as to efface the memory of other versions. The vocal tone in his records has often suffered from the use of excessive speeds in reproduction and a resulting unnatural raising of the pitch; his upper range was never extensive, and even at the height of his career he often resorted to transposition.

DESMOND SHAWE-TAYLOR

Delusse [Deluce, Lusse]. Parisian family of woodwind instrument makers. No connection between them and the composer de Lusse is known. Jacques Lusse (fl 1752-69) was one of only five woodwind instrument makers belonging to the society of master instrument makers in Paris in 1752. Since he was received into the society 'sans qualité', the date he entered and the master to whom he was apprenticed are not known. According to Constant Pierre, Jacques Lusse was still active in 1769 on the Quai Pelletier. He may even have been the 'Delusse' who was at the Quai Pelletier from 1775 to

1779. No instruments marked with his name are known today.

From 1783 to 1788 Christophe Delusse (*fl* 1781–9) was a woodwind instrument maker at the same address on the Quai Pelletier at which Jacques Lusse (presumably his father) had worked at least until 1769 and at which the unidentified Delusse worked from 1775 to 1779. Christophe Delusse had attracted attention in 1781 when he made a contrabass oboe and a double recorder. Pierre attributed to him the invention of the former. Many instruments engraved with the name 'C DELUSSE' under a crown are extant, primarily in the collection of the Paris Conservatoire; these include a contrabass oboe, numerous oboes of standard pitch, several flutes, a bass flute and a galoubet. A soprano bassoon attributed to Delusse in the Conservatoire's catalogue is not marked with his name and is probably not his. Delusse seems particularly to have excelled in oboe making. Henri Brod, who claimed to have acquired Delusse's tools early in the 19th century, praised his oboes for their good intonation and equality and beauty of sound, and said that they were still in demand. The last contemporary reference to Christophe Delusse's activities dates from 1789.

JANE M BOWERS

Delvincourt, Claude (*b* Paris, 12 Jan 1888, *d* Orbetello, Tuscany, 5 April 1954). French administrator and composer. In addition to studying law, he was a pupil at the Paris Conservatoire of Leon Boëllmann, Büsser and Caussade, and later of Widor. In 1913 he won the Prix de Rome (jointly with Lili Boulanger) for his cantata *Faust et Hélène*. He was sent as a recruit to the front at Argonne in 1914, working with a group of sound therapists. On 31 December 1915 he was severely wounded by shell shot, and his convalescence lasted until 1920. He was appointed director of the Versailles Conservatory in 1931, and in 1941, during the German occupation, he took over the direction of the Paris Conservatoire. He proved excellently fitted to this position, running the institution with great efficiency, and establishing a close rapport with his students. His most important decisions were the founding of the Orchestre des Cadets and of a chorus (so avoiding the evacuation of his pupils to Germany), and his invitation to Messiaen, despite much comment, to teach the philosophy of music, the origin of the analysis class that was to attract young composers from all over the world.

Delvincourt's music is marked by a Cartesian control which does not preclude the depth of feeling of his *L'offrande à Civa*, the humour of his *Croquemouches* or the love of youth displayed in his *Heures juvéniles*. After Debussy and Ravel, he was one of the most ardent

of French composers in trying to recapture the spirit of the Middle Ages and the Renaissance, as in the *Danceries*. He died in a car accident while on his way to Rome to hear the première of his String Quartet.

Del Violino, Giovanni Battista. See GIACOMETTI, GIOVANNI BATTISTA.

Demachi, Giuseppe (*b* Alessandria, 7 June 1732; *d* ?London, after 1791). Italian composer and violinist. In 1763 he was first violinist in the town orchestra of Alessandria, and not a member of the Turin court orchestra, as many dictionaries state. He was in the service of Count Sannazzaro of Casale Monferrato from 1765 to 1769 (though in 1768 he is known to have been active in Saluzzo) and again from 1773 to 1776. By 1771 he had settled in Geneva, where in 1774 he was first violinist of the Concerto di Ginevra at the newly founded Société de Musique. In Geneva on 15 February 1775 he performed with the Czech clarinetist Joseph Beer. There too, he had his first works published by the editor Suzanna-Pernette Scherrer and worked with the violinists Gaspard Fritz and Friedrich Schwindel. He is listed in Casale until 1777. In 1791 he gave concerts in London, using the title of *maître-de concert* of the Princess Nassau-Weilburg. His works follow the *galant* style of Boccherini, but also employ a dramatic colouring in the manner of Tartini; his symphonies reflect the growing taste for programme music.

Demachy, Sieur. See MACHY.

Démancer (Fr.: 'to shift'). In string playing, the shift of the left hand from one position to another. The term appears at least by the early 18th century (e.g. Michel Corrette: *L'école d'Orphée*, Paris, 1738).

DAVID D. BOYDEN

Demantius [Demant], (**Johannes**) **Christoph** (b Reichenberg [now Liberec], Bohemia, 15 Dec 1567; d Freiberg, Saxony, 20 April 1643). German composer, writer on music and other subjects and poet. A prolific composer, one of the most versatile in the Germany of his day, he was also the author of the first German alphabetical musical dictionary

1 **LIFE** Demantius probably attended the Lateinschule in his native town. In the early 1590s he may have been teaching at the St Lorenz school at Bautzen, where his school textbook *Forma musice* was published in 1592. In 1593 he matriculated at the University of Wittenberg, but he had moved to Leipzig by 1594 or 1595. There he published his first collection of music in mid-1595 and may have known Sethus Calvisius. In 1597 he became Kantor at Zittau, Saxony. In 1604 he was appointed in a similar capacity to the cathedral and municipal school of Freiberg. He held this position for the 39 years until his death and produced by far the greater part of his work during this period. In 1610 he bought his own house and in 1611 was granted citizenship, both clear indications that he quickly achieved success and prosperity at Freiberg. He knew much unhappiness in his family life, particularly as a result of the Thirty Years War. He was married four times and lost most of his children during his lifetime. He published little music during the last 20 years of his life, either because conditions prevented his composing much or because they militated against publication of most of what he did write.

2 **WORKS** Demantius cultivated sacred and secular music in almost equal measure. He was an important composer of Lutheran motets during the period of transition from the Latin to the German motet. Whereas *Trias precum vespertinarum* (1602) and *Triades Sioniae* (1619) – possibly also the lost *Laudes Sioniae* (1642) – consist of polyphonic settings of the Hours and of the Proper and Ordinary of the Mass, *Corona harmonica* (1610) comprises Gospel motets, whose texts are central passages from the appointed Sunday pericopes. At the time, such 'musical readings' – a sort of musical preaching – came increasingly to be seen as the crown of liturgical music, a point Demantius undoubtedly wished to express by his use of the word 'corona'. In scoring these works for six voices he differed from the many other composers of Gospel motets, particularly Melchior Franck and Melchior Vulpinus, who were mindful of the limited resources of most choirs. He was obviously fortunate in the forces available to him at Freiberg. These were not only singers, for the possibility of performance by instruments as well as voices is mentioned in most of his collections of church music. Nevertheless his motets are notable above all for their illumination of the texts, not just through word-painting but at a deeper emotional level. He is indeed one of

Lassus's worthiest successors.

The influence of Lassus on Demantius can be seen at probably its most expressive in the *St John Passion* (1631). This fine six-part work, extended by a setting of *Isaiah* liii, is the last German motet Passion and the only one in which there is no trace of the traditional Passion tone. It is distinguished above all by cogent and dramatic treatment of the text. Demantius's sometimes bold and never merely conventional writing here and in his motets is enough to prevent his being regarded simply as a conservative composer. Yet he was an exact contemporary of Monteverdi, compared with whom some important modern forms and techniques are absent from his output. For instance he employed the basso continuo in only one extant publication, *Triades Sioniae* (1619) (and also apparently in the lost *Laudes nuptiales*, 1641); in the 1619 volume he described it as 'nova bassi et cantus generalis sive continui conjunctio'. Nor are any sacred concertos by him known. On the other hand, Protestant hymns and thus cantus firmus technique were of relatively minor importance for him, as they were for Lechner and Schütz, doubtless because he devoted himself to the formulation of a personal musical language. Only the funeral songs of the *Threnodiae* (1620), despite being scored for up to six voices, belong to the tradition of the homophonic hymn, with descant cantus firmus, established by Lucas Osiander in 1586.

The use of the words 'convivium' and 'convivialis' in the titles of two of Demantius's collections of secular songs (1608 and 1609) indicates that he intended all such pieces (though not those in the *Neue teutsche weltliche Lieder*, 1595) for choral societies and probably for his own at Freiberg in particular (A convivium was a grand annual festival, lasting several days, which was attended by choirs from central Germany to which both adults and schoolboys belonged.) Some of these pieces too were performed by instruments as well as voices, and some are purely instrumental. In general, Demantius's secular collections show the great extent to which Italian dance-song forms of one kind or another had penetrated to Germany by the beginning of the 17th century. Even in these relatively unpretentious pieces he showed a preference for larger ensembles, for the 1608 and 1609 books are mainly for six voices and those of 1614 and 1615 consist of his five-part adaptations of three-part pieces by Gregor Lange (originally published in 1584), akin to Lechner's versions (1579) of pieces by Regnart. As well as cultivating Italian dance-song forms, Demantius was, together with Valentin Haussmann, one of the first to introduce Polish folk elements into German secular music. *Tympanum militare* (1600) for six voices, which he partly expanded to ten voices in 1615, is a notably singular volume, consisting of martial songs that he was prompted to write by the recapture of the fortress of Raab (now Győr, Hungary) from the Turks. It has recently been shown that the texts of many of his secular works are probably by Demantius himself; he also published volumes of poetry.

In both of his theoretical publications Demantius worked along traditional lines. He won particular renown, however, for the supplement included in his widely disseminated and often reprinted *Isagoge artis musicae* from its eighth edition (1632) onwards. This supplement was the first alphabetical and also the most important German musical dictionary of the 17th cen-

tury. Consciously drawing on Michael Praetorius's *Syntagma musicum*, Demantius increased the number of definitions given there by more than a third. He showed marked pedagogical leanings not only in his two works of music theory but also in his references to current teaching methods in several of his other writings that are concerned with religious and philosophical questions

WALTER BLANKENBURG

Demars, Charles (fl 1735) French organist and composer for the harpsichord, known as *le cadet*. If Charles was the younger brother of JEAN ODO DEMARS, as seems likely, then he would have been born after 1696, probably in Sézanne. He (not Jean Odo) was organist of the cathedral at Vannes in Brittany, and it was he who published in Paris in 1735 a *1er Livre de pièces de clavecin*. The four suites in this collection show the strong influence of Handel, not only in their relative brevity and consistency of plan and in the absence of character titles (except for one piece), but especially in three substantial preludes.

DAVID FULLER

Demars, ²Hélène-Louise (b c1736) Composer of three *cantatilles*, *Hercule et Omphale*, *Les avantages du buveur* and *Horoscope*, published in Paris around 1751 and 1752. She appears to have been the daughter of Jean Odo Demars. In *FétisB* she is called Henriette-Louise and said to have been 15 when her *cantatilles* appeared; the inventory after death of Jean Odo lists a daughter of the right age named Hélène-Louise.

For bibliography see JEAN ODO DEMARS

DAVID FULLER

Demars [de Mars], Jean Odo (b c1696, d Paris, 7 Nov 1756) French organist and harpsichordist. He was the son of Nicolas Demars, merchant and/or organist of Sézanne, and Thérèse Tourneur, both of whom were dead at the time of his marriage to Geneviève Françoise Legris on 18 February 1734. There were seven children. In 1726 he obtained the post of organist of St Jacques-de-la-Boucherie in Paris, and later he became organist of St Nicolas-du-Chardonnet. Several *cantiques spirituels* composed for the young ladies of St Cyr are attributed to him. Jean Odo (or Odeo) has been confused with Charles Demars, probably his brother. Fétis ascribed to Jean Odo a book of organ pieces engraved in Paris in 1747. The book is now lost, if it ever existed; it could in any case have been the work of Charles. At his death Jean Odo lived in the rue St Thomas du Louvre.

DAVID FULLER

Demaunde, William. See DAMAN, WILLIAM.

Dembinski, Bolesław (b Poznań, 9 May 1833; d Poznań, 7 Aug 1914). Polish organist, conductor, teacher and composer. He belonged to a Lithuanian family of Dembińskis, descendants of the Rawicz family. His first piano and organ lessons were from his father Maciej (b Sarnowo, 24 Feb 1804; d Poznań, 1878). Between 1854 (or 1853) and 1866 he was, in succession to his father, organist of Poznań Cathedral. In 1866 he became conductor of the orchestra and choir there, directing the orchestra until its dissolution in 1875 and then the choir until 1881; he resumed in 1894, remaining until the year of his death. In 1870 he became conductor of the newly formed Polish Theatre in Poznań which he directed, with interruptions, until 1895. In the face of great difficulties, Dembiński organized a Polish symphony orchestra there, which, about 1888, replaced the German group playing in the theatre; with these players he toured other cities in the region of Poznań.

Dembinski was an indefatigable propagator of Polish songs and a pioneer of the song movement in Wielkopolska (Poznań district). He founded many singing societies (the first in 1860) and organized choral meetings; from 1892 he was the head of the Wielkopolska Association of Singing. In 1901 he was joint organizer of the Poznań Musical Society. He founded the Wielkopolska Organists' Club and a school for orchestral leaders. He taught music at schools in Poznań and was an expert in the craft of organ building; he also published articles on aesthetics, prosody and harmony in Polish and German periodicals. He wrote two operas, *Wariatka* (performed in Poznań, 1870) and *Cyganka* ('The gypsy girl', 1870, performed in Poznań, 1874), masses and cantatas, choral songs and miniatures for piano and organ. His elder brother Maciej directed the choir and orchestra in Poznań (1879-81) and was organist from 1878 to 1881.

BARBARA CHMARA-ZACZKIEWICZ

Dembolecki [Dembółcki], **Wojciech.** See DĘBOŁECKI, WOJCIECH.**De Meester, Louis.** See MEESTER, LOUIS DE.

Demelius, Christian (b Schlettau, Erzgebirge, Saxony, 1 April 1643, d Nordhausen, Thuringia, 1 Nov 1711). German composer and schoolmaster. He received his first musical education from the organist Christoph Knorr at Schlettau, after which he was for five years a chorister at the Gymnasium at Zwickau. In 1663 he became tutor in the household of Johann Christian Ernst, the mayor of Nordhausen. Ernst enabled him to go in 1666 to Jena University, where he became a member of the important collegium musicum and studied music with Adam Drese. In 1669 he became Kantor and schoolmaster at Nordhausen, where he remained until his death. In the intellectually stimulating environment of this Free Imperial Town he was able considerably to develop his musical talent, especially as a

teacher. The poem that Johann Joachim Meier wrote on his death gives an idea of the esteem in which he was held. He published the so-called Nordhäusisches Gesangbuch, the first Nordhausen songbook, entitled *Schriftmässiges Gesangbuch zu nützlichem Gebrauch ... der Kirchen-Gemeinden in Northausen* (Nordhausen, 1686), which went into several editions. With his three-volume *Deo et juventuti sacrum tirocinium musicum, exhibens musicae artis praecepta* (Nordhausen, 1669) he joined, like Demantius and J. G. Ahle before him, the movement for reform in the teaching of music. Two isolated music prints published at Nordhausen, a four-part canon, *Ruh sanfft* (1679), composed on the death of Ernst, and a five-voice funeral motet, *Die auff den Herren hoffen* (1680), were followed by the four-part *Vortrag der von Christiano Demelio gesetzten Motetten und Arien* (Sondershausen, 1700; four motets ed. E. Anger, Berlin, 1963), a collection of pieces by him apparently intended as the first of a series. Gerber saw in him 'a talent for the expression of sad feeling', which may well have been prompted by the Pietism of Drese. There are eight manuscript motets by him (seven one dated 1710 – in D-Gs, the other in D-B).

G KRAFT

Demény, János (b Budapest, 23 Sept 1915). Hungarian musicologist. He took the doctorate of laws at Budapest University (1939) and studied music at the piano faculty of the Fodor Music School, Budapest. In 1967 he took the CSc with a dissertation on Bartók's early development. His research is centred on Bartók: he has published some small-scale biographies (the first in 1946), and in 1947 became responsible for the collection and publication of Bartók's letters; his documentary biography was published in *Zenetudományi tanulmányok* between 1954 and 1962. Among his many other musicological works are studies of Székely, Seprődi and Veress. Much of his writing deals with the question of the synthesis of music and other arts. He was awarded the Erkel Prize in 1974.

 MÁRTA SZÉKERES-FARKAS

Demessieux, Jeanne (b Montpellier, 14 Feb 1921; d Paris, 11 Nov 1968). French organist and composer. She became organist of the church of the Saint Esprit, Paris, in 1933. A pupil of Magda Tagliafero, Jean and Noël Gallon, and Dupré at the Paris Conservatoire, she won *premiers prix* in harmony (1937), piano (1938), fugue and counterpoint (1940). She continued her studies in organ playing, improvisation and composition with Dupré before giving her first public recital in Paris at the Salle Pleyel in 1946. She then travelled extensively as a recitalist, often visiting England where her first London recital (1947) ended with the improvisation of a four-movement organ symphony on themes submitted by four London music critics. She toured North America in 1953, 1955 and 1958. In 1952 she became organ professor at the Liège Conservatory, and in 1962 organist of the Madeleine. The first woman invited to play in Westminster Cathedral and Westminster Abbey, she also took part in the inaugural ceremony at the Metropolitan Cathedral in Liverpool (1967). Demessieux's prodigious technique was apparent at the outset of her career. Towards its untimely end she revealed greater involvement with the music she played, suggesting that she had barely reached the zenith of her powers as an interpreter. Her published organ works are six *Etudes* (1946), *Sept méditations sur le Saint Esprit* (1947), *Triptyque* op. 7 (1949), *Poème* for organ and orchestra op. 9 (1949), 12 *Chorale Preludes* on Gregorian Themes op. 8 (1954), *Te Deum* op. 11 (1965), *Prelude and Fugue in C* op. 12 (1965) and *Répons pour le temps de Pâques* (1968; published posthumously). Other works include *La chanson de Roland* for mezzosoprano, choir and orchestra (unpublished) and *Ballade* for horn and piano op. 10 (1958).

FELIX APRAHAMIAN

DeMezzo, Pietro (b Venice, c1730; d ?Venice, after 1794). Italian singer, teacher and composer. Although he was a baritone, his ability to execute florid coloratura led him to specialize in serious operatic roles and sacred music. He was often described as Venetian (except in the 1754 libretto of Galuppi's *Antigona* where he is called 'della Bragola') and frequently appeared at the Venice theatres during the spring and autumn seasons, singing in other Italian cities (including Naples, Rome, Parma, Turin, Milan, Mantua and Verona) during Carnival. He sang in Vienna in 1756 where he created the role of Alessandro in Gluck's *Il re pastore*. Excluding a few castratos, notably Pacchierotti, DeMezzo was the highest-paid singer in the choir of St Mark's for several decades. Towards the end of his career he sang increasingly often in Venetian operas and occasional cantatas as well as in oratorios by local composers, including Bertoni and Furlanetto. During the 1770s he taught singing to the ladies of the Pietà and Incurabili, but many of his *solfeggi*, dated as late as 1794, were written for a Venetian priest, V. Bratti, who sang bass. Besides nearly 200 vocal exercises (for all vocal ranges with and without accompaniment) he composed a dozen texted *Duetti da studio* which gained considerable popularity during his lifetime.

As DeMezzo's roles were sometimes notated in the tenor clef rather than the baritone or bass, he has sometimes mistakenly been called a tenor.

SVEN HANSELL

Demian, Vilmos [Wilhelm] (b Braşov, 9 June 1910). Romanian composer of Hungarian descent. He studied at the Braşov Conservatory (1925-8) and at the Vienna Hochschule für Musik (1929-33). His career has included appointments as conductor of the Goldmark PO in Cluj (1935-40), as conductor of the Hungarian State Opera in the same city (from 1949) and as lecturer in orchestration and instrumental theory – on which he published the textbook *Teoria instrumentelor* (Bucharest, 1968) – at the conservatory there (also from 1949). He has received the Service Order (1953), the Culture Order (1969) and the prize of the Ministry of Culture (1970).

ISTVÁN LAKATOS

De Michaele, Antoninus. See DI MICHELI, ANTONINO.

Dēmioergos (Gk.: 'maker'). A term used in a musical sense for a singer of epic; see HOMER.

Demi-pause (Fr.). A minim REST.

Demisemiquaver (Fr. *triple croche*; Ger *Zweunddreissigstel-note*; It. *biscroma*; Lat. *fusella*; Sp. *fusa*). The note that is half the value of a semiquaver, hence its name, and twice that of a hemidemisemiquaver. In American usage it is called a 32nd-note. It is first found in early 16th-century instrumental music. In sources using black notation it was shown as a minim with four flags, while in 'white' or 'void' notation (post-1450) it is found as a black or coloured minim with three flags. The demisemiquaver is still in regular use, although in common with other notes it now has a round note head. Its various forms and the demisemiquaver rest are shown in ex 1a-d. The alternative term 'demiquaver' is occasionally found.

JOHN MOREHEN

Demi-soupir (Fr.). A quaver REST.

Demiton (Fr.) SEMITONE.

Demmler, Johann Michael (b Hiltensingen, Swabia, baptized 28 Sept 1748, d Augsburg, buried 6 June 1785). German organist, pianist and composer. He attended the Gymnasium in Augsburg, where he received his musical training from the cathedral Kapellmeister Giuliani. In his final year as a student he became the music instructor of the choirboys and in 1774 the organist at Augsburg cathedral. Demmler often appeared in Augsburg concerts, either with his own compositions or as a pianist and violinist; on 22 October 1777 he partnered the organ and piano maker Johann Andreas Stein and Wolfgang Amadeus Mozart in the latter's Three Piano Concerto (K242). Some of Demmler's compositions were known well beyond Augsburg, though they survive only in manuscript. He wrote piano concertos, symphonies, church music, cantatas and theatrical pieces for the school theatre. Most of his works are lost; those that are known reveal a talented composer who wrote in a pleasant style showing Italian influences. One of his pupils was the composer and Kapellmeister of Augsburg cathedral, Franz Bühler.

ADOLF LAYER

De Monte Regali Gallus. See EUSTACHIUS GALLUS

Dempsey, Gregory (b Melbourne, 20 July 1931)
Australian tenor. At first a baritone, he made his tenor
début at Melbourne and then joined the Elizabethan
Opera Company. In 1962 he moved to London and was
engaged at Sadler's Wells Opera, where he created the
role of Boconnon in Bennett's *The Mines of Sulphur*
(1965). He has also sung with Scottish Opera and the
Welsh National Opera, and made his American début in
1966 at San Francisco as Gregor in Janáček's *The
Makropulos Affair*. He first appeared at Covent
Garden in 1972, as Steva in *Jenůfa*. His wide repertoire
includes Aeneas (*Les troiens*), Don José, David (*Die
Meistersinger*) and Mime, which he sang in the English
National Opera's *Ring* cycle at the Coliseum (1973).
His roles in 20th-century operas include the Drum
Major (*Wozzeck*), Peter Grimes, Tom Rakewell,
Dionysus in Henze's *The Bassarids* and the Shepherd in
Szymanowski's *King Roger*. His voice has the strength
for dramatic music, the wide range required by modern
works and the versatility of a character tenor, while his
gifts as an actor are enhanced by excellent diction.

ELIZABETH FORBES

Dempster, Stuart (Ross) (b Berkeley, 7 July 1936)
American trombonist and composer. After his initial
training at San Francisco State College, he was ap-
pointed, between 1960 and 1966, assistant professor at
the California State College at Hayward, instructor at
the San Francisco Conservatory, and member of the
Performing Group at Mills College. He was first trom-
bonist in the Oakland SO (1962-6), Creative Associate
at the State University of New York at Buffalo under
Lukas Foss (1967-8) and Fellow at the Center for
Advanced Study at the University of Illinois (1971-2).
In 1968 he became assistant professor at the University
of Washington, Seattle.

Dempster is especially interested in new sounds and
techniques, including those obtained through the study
of non-Western instruments such as the Australian
didjeridu. He has helped to enlarge the contemporary
trombone repertoire by commissioning and performing
new works, notably Berio's *Sequenza V* (1966), and
works by Andrew Imbrie, Ernst Krenek, Robert Moran
and Pauline Oliveros.

EDWARD H. TARR

Demus, Jörg (b St Pölten, 2 Dec 1928). Austrian pian-
ist. He studied the piano and conducting at the Vienna
Academy of Music from 1940 to 1945. He was sub-
sequently a pupil at the master classes of Giesecking
(Saarbrücken, 1953) and Yves Nat (Paris, 1951-3). He
also attended courses with Michelangeli and Kempff. He
made his début in Vienna in 1953, and has become one

of the most prominent of the postwar generation of
Austrian pianists. As a soloist he has played in recitals
and orchestral concerts in many countries. Unlike most
pianists of his generation Demus cultivates a soft, flex-
ible touch and expressive line, and is consequently
regarded as a neo-Romantic interpreter; in this respect
his approach to the interpretation of Bach is uncommon
and his performances of Mozart, Beethoven, Schubert,
Schumann, Franck and especially Debussy, have been
highly praised. His adaptability has made him a much
sought-after accompanist for singers (including
Schwarzkopf and Fischer-Dieskau), violinists (Edith
Peinemann, Josef Suk) and cellists (including Antonio
Janigro). He occasionally plays piano duets in concerts
with Paul Badura-Skoda. Demus takes great interest in
historical keyboard instruments and owns a remarkable
collection including a two-manual harpsichord by
Kirckman, a Broadwood piano of 1803, a Clementi
piano of 1810 and a Conrad Graf piano of 1839. Some
of his numerous recordings are played on such histori-
cal instruments. His writings include *Abenteuer der
Interpretation* (Wiesbaden, 1967) and, with Paul
Badura-Skoda, *Die Klaviersonaten Ludwig van
Beethovens* (Wiesbaden, 1970).

RUDOLF KLEIN

Demuth, Norman (b South Croydon, 15 July 1898;
d Chichester, 21 April 1968). English composer and
writer on music. He studied briefly at the RCM with
Parratt and Dunhill (with whom he later had private
lessons) until 1915, when he joined the army. Invalided
out in the following year, he earned his living from 1917
as a church organist. As a composer he was essentially
self-taught, though he had a good deal of encouragement
from Godfrey. His first orchestral performance came in
1925, when the *Selsey Rhapsody* was given by the LSO
under Boult. Then for a number of years his music was
frequently played in the provinces, and he conducted
performances of his own and other works at various
south-coast towns (he was a regular conductor of
several choral and orchestral societies in south-east
England at this time), but almost all of the pieces written
before 1937 were later destroyed. In 1930 he was ap-
pointed professor of composition at the RAM, where he
stayed for the remainder of his career, except for army
service in World War II. He was a founder of the RAM
New Music Society and its secretary from 1936 to
1939. A corresponding member of the Institut, he was
also made an officer of the Académie (1951) and a
chevalier of the Légion d'honneur (1954).

Demuth's sympathies were with French music from
Franck to Roussel, though his music stands apart from
that of other English francophiles, avoiding the more
superficial gallicisms. Its somewhat austere melody, in
which definable tunes have little part, and its complex
but subtle harmony displays a more general affinity with
d'Indy or Roussel. His harmonic awareness was keen,
and the corresponding range broad. Certain works, such
as the *Threnody* for strings, are almost Franckian in
their intense chromaticism; others, like the *Overture for
a Joyful Occasion* have a Stravinskian brightness. In
later works the harmony is rather hard and severe, with
more bare 4ths and 5ths than 3rds, more major than
minor 2nds. Demuth's form is often cyclic, and in many
cases a large-scale work is evolved from one or two
short motifs.

WORKS
(selective list)

DRAMATIC

Operas: Conte venitien (Weterings), 1947, Le flambeau (Weterings), 1948, Volpone (I. Hauser, after Jonson), 1949; The Orcesteia (D. Clarke, after Aeschylus), 1950, Rogue Scapin (W. Grantham), 1954. COLIN MASON/R

Denck, Jeremiah (b 1725, d 1795). American Moravian composer; see MORAVIANS, AMERICAN

Deneffe, Jules (b Chimay, 1814, d Mons, 19 Aug 1877). Belgian cellist, conductor and composer. He studied the cello (with Platel and De Munck) and composition (with Fétis) at the Brussels Conservatory, winning *second prix* for the cello in 1836, he never completed his studies but left to teach the cello at the Mons Conservatory, where he later became the director. He played in the Société des Concerts in Mons and in the local theatre. In 1841 he founded the Roland de Latre Choral Society, in which he established a solid reputation as a conductor. He also conducted the choir L'Amitié de Pâturages and the Société des Concerts in Mons. He won numerous prizes for his compositions, most of which were vocal. He wrote many works for four-part male choir, songs, at least four operas (of

which *Séguille* is the best known) and some orchestral works. He was a member of several Belgian scholarly societies

De Neve. See NEPOTIS.

Den Haag (Dutch). HAGUE, THL.

Denhof Opera Company. A company formed by Ernst Denhof (d 1936), a German-born musician living in Edinburgh, to give performances of the *Ring* in English. The 1910 series under Michael Balling was so successful that Denhof decided to tour the provinces; the company visited Leeds, Manchester and Glasgow in 1911, and Hull, Leeds, Liverpool, Manchester and Glasgow in 1912. The repertoire was expanded to include the first performances in English of *Elektra*, as well as productions of *Orfeo*, *Der fliegende Holländer* and *Die Meistersinger*. In 1913 the first productions in English of *Der Rosenkavalier* and *Pelléas et Mélisande* were given, as well as performances of *Die Zauberflöte*. After two weeks in Birmingham and one in Manchester, Denhof, with losses of £4000, was unable to continue, and Beecham, one of the conductors for the 1913 season, took over the company. It formed the nucleus of what eventually became the Beecham Opera Company (see LONDON, §IV, 2).

HAROLD ROSENTHAL

Denis. French family of instrument makers. Robert Denis (i) (d Paris, 1588 or 1589) lived in Paris from 1544 as an organ and spinet builder and he associated with the greatest French organists of his time. From two marriages he had at least five children, of whom three became instrument builders. His son Claude Denis (b Paris, 27 May 1544; d Paris, 1587) almost always bore the title 'maître épinetier', but he also made violins, kits, lutes, guitars, mandoras and citterns. His trade appears to have been considerable, for an inventory drawn up at his death shows that his workshop contained more than 200 completed instruments and over

400 unfinished ones. As an organ builder he was evidently less successful; he satisfied his customers by passing his orders to one of his Parisian colleagues, Jehan Dargillières. Another son, Jehan Denis (*b* Paris, 23 March 1549; *d* Paris, after 1589), was a pupil of Gabriel Dargillières. About 1574 he demanded a fee from his teacher, but this was refused; a violent quarrel followed, in which Dargillières was wounded. As a result Jehan was imprisoned, and released only through the mediation of his father. Robert Denis (ii) (*d* Paris, Oct 1589), the third son of Robert (i), was also a pupil of Gabriel Dargillières; he engaged in trade with Padua, Lyons, Venice, Brescia and Flanders. At his death he owned about 200 instruments, chiefly lutes, violins, kits, mandoras, spinets and guitars. He seems to have been closely associated with two court instrumentalists, the lutenist Jacques de Rois and the violinist Julien Pernichon.

The relationships between various bearers of the name Denis are more difficult to establish in the 17th century. G. Denis, who in 1634 was making instruments in the rue des Amandiers, was perhaps a son of Jehan. He had two sons who were instrument builders: Thomas Denis (*d* before 1620) was active until at least 1613, and Pierre Denis worked between 1634 and at least 1642 in the rue des Arcs, where his presumed grandparents had lived. Jean Denis, organist at the church of St Barthélemy, is the best-known member of the family. Mersenne praised his excellent spinets. He became known through his *Traité de l'accord de l'espinette avec la comparaison de son clavier avec la musique vocale*, which was published by Ballard. Only the second edition (1650) has survived; it is dedicated to the Marquis of Mortemart, a singer who accompanied himself on the lute and theorbo. In his treatise Denis criticized the too 'mathematical' musicians and argued for a pitch 'qui approche le plus de la musique vocale'. His writing is that of an artist convinced of the superiority of his instrument; it is especially valuable for its remarks on the usual practices of contemporary instrumentalists, in particular the relationship between organists and singers, the position of the hands on the keys, and fugue technique. But his theoretical knowledge was rather summary, especially when compared with Mersenne's. Denis did not mention Mersenne, but instead quoted the insignificant treatise of Parran. He said that his best mentor was his teacher Florent Bienvenu, organist of the Sainte Chapelle, whom he called 'le plus excellent homme de son temps pour toucher les orgues et aussi pour la composition de la musique vocale', also acknowledging his fugue composition. In 1670 Jean Denis was organist at St Severin and asked Lebègue's advice in the restoration of his instrument.

Jean's brother Philippe Denis made a spinet (now in the Paris Conservatoire collection) with four octaves, decorated with watercolours and dating from 1672. Louis Denis is the last member of the family who can be identified with certainty; he was a harpsichord builder in 1675.

FRANÇOIS LESURE

Denis, Claude (*b* Lyons, late 17th century; *d* Paris, c1752). French singer, composer and actor. He was the head of a theatrical troupe which played in Lille between 1715 and 1722, at Brussels in 1716 and in Antwerp in 1717. The title-page of his *Nouveau système* calls him 'formerly of the Royal Academies of Music of Lyons, Rouen, Marseilles, Lille, Brussels and Antwerp, and maître de musique of the cathedrals of St Omer and Tournai'. In 1730 he was married in Paris to Marie-Marguerite Lecouvreur, younger sister of the playwright. The dedication of Denis' *Nouvelle méthode* to the ladies of St Cyr suggests that he may have been involved in the musico-theatrical training offered at that school. In the 1740s and early 1750s, and perhaps earlier, Denis ran a music school in Paris; the school continued after his death under his son-in-law Jouve.

Denis' treatises enjoyed considerable longevity, one of them remaining in publishers' catalogues until 1791, although (as the *Journal des sçavants* noted in 1747):

Mr Denis, who considers his musical treatise a *Nouveau système*, claims that there is no [other] art whose rules have been given with so little care, and so little clarity. In order to give the rules of an art which has some certain principles, one must deduce them from theory, however, we have, noticed, in the summary of rules that Mr Denis draws up, only those [rules] that are in all works of this sort, with the exception of some small changes

NEAL ZASIAW

Denis, Jean-Baptiste (*b* Lyons, c1720, *d* after 1765). French dancer and composer. He first appeared on the stage at the Académie Royale de Musique in Lyons in 1739, dancing in Montéclair's *Jephthé* and Destouches' *Omphale*. He may have been the Denis who worked in Paris at the Foire St Laurent and in the Grand Troupe Etrangère, between about 1738 and about 1742. In 1749 Denis arrived in Berlin with his wife, the ballerina Giovanna Cortini called 'La Pantalocina' (*b* Venice, 1728; *d* Venice, after 1797), and was shortly appointed *maître de ballet* to the Prussian court. He provided choreography and music for the ballets in about 50 stage works in which he and his wife danced, including Graun's operas *Coriolano* (1749), *Fetonte* (1750), *Mitridate* (1750), *Armida* (1751), *Britannico* (1751), *Orfeo* (1752), *Semiramide* (1754), *Montezuma* (1755), *Ezio* (1755) and *Merope* (1756), and Agricola's *Cleofide* (1754). (The ballet music in the DDT edition of *Montezuma* is by Denis, not Graun.) The quality of opera and ballet at the Prussian court declined after the Seven Years War, and the Denis left Berlin in 1765. If the French dance publications of the 1770s listed below can be attributed to him rather than Pierre Denis, the dancing-master Nicolas Denis or the musician Nicolas Thomas Denis, he may have finished his days in Paris.

Mme Denis' dancing and person received high praise in Berlin, although her portrait hanging in a salon at Sans-Souci and reproduced by Olivier has been described as 'plus agréable que jolie'. Casanova, who met her in Venice when she was eight, was for a time her lover in Berlin, and visited her in retirement in Florence, confirmed in his *Mémoires* her apparently considerable charms Algarotti, in a letter to Frederick the Great dated 25 Sept 1749, revealed that he too was in love with Mme Denis.

WORKS

BALLETS

Music for ballets in c50 stage works (see above), incl C H Graun's Montezuma, ed in DDT, xv (1904)

DANCE COLLECTIONS

(all published in Paris in the 1770s)

- Les délices français, contredanse
- La gaite, contredanse allemande, [les figures] par M^e Mendouze amateur
- Les plaisirs du Colisée, allemande
- Pot-pourri de la Chamboran, contredanse française, les figures par M^e [Prosper-Didier] Deshayes
- La jouissance Dartois, contredanse française
- Le rendez-vous de la jeunesse, contredanse française

NEAL ZASLAW

Denis, Martin (b ?Paris, late 17th century, d ?Paris, mid-18th century). French composer and violinist. About 1700 he joined the entourage of M Angran, *conseiller du roi et auditeur en sa chambre des comptes*, who encouraged and financed his musical education as can be learnt from the dedication of Denis' op.2. He may have been a descendant of the family of instrument makers of that name active in 17th-century Paris. Denis described his sonatas as *sonates allemandes* but, far from exhibiting German influence, they are in the French-Italian idiom cultivated then in the sonatas of Anet, Senaillé and Leclair. The influence of Corelli is frequently evident.

WORKS

NEAL ZASLAW

Denis, Pierre [Pietro] (b ?France, early 18th century; d ?Paris, after 1777). French mandolin player and composer. He was active in Paris about 1760-79; around 1774-5 he visited England. In 1776 and 1777 he was listed in Parisian directories as *maître de mandoline*, but after 1778 his name no longer appeared, suggesting that he had either moved elsewhere or died.

Denis is best known for his French translations of J J Fux's *Gradus ad Parnassum* (Paris, 1773-5, 2/1780, 3/1788) and of Tartini's *Traité des agréments de la musique* (Paris, 1771, 2/1775); the latter may have been carried out under the aegis of Tartini's student La Houssaye, although in the preface Denis claimed friendship with Tartini and La Houssaye's name

does not appear in the volume. (For published dances which may be Pierre Denis' work, see DENIS, JEAN-BAPTISTE.)

WORKS

(published in Paris in the 1760s unless otherwise stated)

- Recueil de 12 petits airs de chants connus
- 2e recueil de petits airs de chanter et les folies d'Espagne, avec des variations faciles, 1v, mand
- 3e recueil de petits airs, 1v, mand
- 4e recueil de petits airs (c1770), lost
- Les 4 saisons européennes, 1v, harp/gut/mand/vn/fl (c1774)
- Méthode pour apprendre à jouer de la mandoline sans maître, 1 (1768), ii (1769), iii (n.d.), i-iii (2/1788) [also includes music]
- 3 books, each of 6 sonatas and duos, mand, vn

NEAL ZASLAW

Denis, Valentin (Emile Julien Ernest) (b Louvain, 18 Sept 1916). Belgian art historian and musicologist. He studied music at Louvain Conservatory and in 1945 he took a doctorate in art history and archaeology at the University of Louvain with a dissertation on musical instruments in 15th-century Flemish and Italian art. He became successively lecturer (1945), reader (1948) and professor (1952) at the University of Louvain and held professorships at several other institutions. An honorary founder-member of the International Association of Music Libraries (1950), he is an executive member of many associations and foundations in Belgium and elsewhere. He accomplished various official missions in Italy, Canada and the Belgian Congo (now Zaïre) and assisted in editing encyclopedias such as *Kunst aller tijden* (Amsterdam, 1962-3) and *Winkler Prins van de kunst* (Amsterdam, 1958-9). Essentially an art historian, he has an encyclopedic knowledge of his field and specializes in the age of the Flemish Primitives, he has published books on Bruegel, Jan van Eyck, Hugo van der Goes and Dieric Bouts. His approach to the history of music usually has an art historian's bias, with particular attention to iconographical source material. His study of musical instruments in 15th-century art may be considered a standard work.

GODFIVE SPIESSFNS

Denison, John (Law) (b Reigate, 21 Jan 1911). English administrator and horn player. He was educated at Brighton College and studied law before entering the Royal College of Music in 1932. Between 1933 and 1939 he played the horn in various major orchestras in London and Birmingham. After serving in the army during the war, he became assistant director of the British Council's music department, and in 1948 music director of the Arts Council. He remained in that post until he was appointed general manager of the Royal Festival Hall in 1965 and, 1971-6, director of South Bank Concert Halls. His administration has been distinguished by its quiet efficiency and by a broadening of range of the events presented. He was made CBE in 1960.

ALAN BLYTH

Denisov, Edison (Vasil'yevich) (b Tomsk, 6 April 1929). Soviet composer and theorist. As a child he taught himself to play various folk instruments. He studied the piano at the Tomsk Music College (1946-50) and mechanics and mathematics at Tomsk University (1946-51). From 1951 to 1956 he was a pupil of Shebalin and Peiko (composition), Tsukkerman (analysis), Bogatiryov (counterpoint) and Belov (piano) at the Moscow Conservatory. He was appointed in 1960 to the staff of that institution, where he has taught analysis, counterpoint and instrumentation, and he worked at the Experimental Studio of Electronic Music in Moscow during the period 1968-70.

Denisov's works make use of the newest developments in composition. Some important characteristics of his music can already be detected in the pieces of his early period (up to 1960), principally the employment of Russian folk material and a preference for vocal music. Journeys to the Altay and to Siberia, undertaken for folklore research, contributed to the development of the former trait. In his mature compositions he has exploited serial procedures, aleatory writing, unconventional instrumental techniques (e.g. plucking the strings of the piano and percussive effects on wind and strings), electronic means and microtones. One of his principal works is the cantata *Solntse inkov* ('Sun of the Incas'), which uses the 12-note serial system but emphasizes diatonicism. *Ital'yanskiye pesni* ('Italian songs') is an elegant, pointillist chamber piece treating themes of time, life and death. In *Plachi* ('Laments') Denisov pursued the direction of Stravinsky's *The Wedding*, but with peasant funeral texts; the work is a typical Soviet example of the development of Russian popular harmonies, reflecting the new musical modes of expression of the 1960s. The chromaticism of the music conveys the character of the *plach* (an old Russian form of dirge) and at the same time deploys 12-note serial principles. In the instrumental compositions of the 1950s and 1960s a concertante style predominates, reaching a dramatic quality in the *Oda* for clarinet, piano and percussion and in *Romanticheskaya muzika* for oboe, harp and string trio. *Peinture*, for large orchestra, is particularly remarkable for the clear and meaningful effect of its complex polyphony, sometimes in 52 parts. Denisov's achievements in chamber music reached a fine culmination in the Piano Trio of 1971.

I. Art music. II. Folk music

I. Art music

1. To 1500 2. 1500-1700 3. 18th century 4. 19th century 5. 20th century

1. To 1500. Danish art music in the Middle Ages was largely restricted to the church, the court and the aristocracy. After the first, only partially successful, attempts to convert Denmark to Christianity (9th century) the power of Church and king increased from the 11th century. The bishoprics of Schleswig, Ribe and Århus were established before 948 and those of Roskilde and Lund in the 11th century. Lund in particular seems to have played an important role in the development of church music (see MALMÖ). Links with the archbishopric of Hamburg-Bremen were strong, and cultural contacts with France and Italy developed dur-

ing the 12th and 13th centuries; fragments of Offices also indicate a link with England.

Gregorian chant in the monasteries and churches was the responsibility of cantors. Little source material survives: sequences in the *Liber daticus lundensis* (S-L, late 12th century), sequences and mass movements in the 14th-century *Liber scolae virginis* (S-L); and the complete Office for the Saint-King Knud Lavard in a late 13th-century copy (DK-Ku SH 8 A 8') of the *Ordinale S. Kunutis ducts et martyris* of 1170 (in *Musik-mindesmaerker fra Middelalderen i Danmark*, ed. A. Hammerich, Leipzig, 1912), which includes the hymn *Gaudet mater ecclesia* in two-part canon, the earliest evidence of polyphony in Denmark. Further evidence does not appear before a late 15th-century manuscript (DK-Ku AM 76 8") containing organum corresponding to English and Notre Dame practice of about 1200.

Few sources of secular music survive, however the large number of texts contained in 16th- and 17th-century manuscripts indicates a rich flowering of the courtly ballad, apparently imported from France around 1200. Subsequently the ballade developed into an important national genre. A few fragments of texts and melodies survive from the Middle Ages, it was not until the 19th century that the systematic collection and publication of the ballads started (*Danmarks gamle folkeviser*, begun by Svend Grundtvig in 1853). By that time the original aristocratic songs had been handed down orally and had become folk ballads. There is no direct evidence of courtly romances in the style of the French troubadour lyrics, nor is there any trace of native troubadours or Minnesingers, however, German Minnesingers visited the Danish court.

2 1500-1700. With the Reformation, introduced during the reign of Christian III (1534-59), the Danish church was reorganized on Lutheran principles. In *Ordnatio ecclesiastica regnorum Daniae et Norwegiae* (1537) the rules for the new church were set down, and with the publication of Hans Thomissøn's congregational hymnbook *Den danske psalmebog* (1569, repr. 1933, 1968) and Niels Jespersøn's *Gradual* (1573, repr. 1935) containing music for the entire liturgical year, music became firmly established in the Danish Lutheran service. Only with the introduction of *Danmarks og Norges kirke-ritual* (1685) were these collections superseded, subsequent collections were Thomas Kingo's *Gradual* (1699/R1967) and the new official hymnbook *Den forordnede nye kirke-psalme-bog* (1699), which completed the transition to a mass in which hymns replaced the chant. Important sources of melodies from the first two centuries of Protestant church music in Denmark are Anders Arrebo's *K. Davids psalter, sang-vises udsat* (2/1627) and the devotional melodies with continuo in Kingo's *Aandelige siunge-koor*, II, 1-11 (1674/81, in Kingo's *Samlede skrifter*, vii, Copenhagen, 1945), which show the influence of the secular aria, as does Johan Brunsmand's *Aandelige siunge-lyst* (1676).

Good Friday Passion performances are exemplified by the *Roskilde passionen* modelled on Johann Walter (i), in a manuscript of 1673; it was performed until Pietism forbade it in 1736. The main source of polyphonic church music is Mogens Pedersen's *Pratum spirituale* (1620), which contains the most important choral music of the period preceding Buxtehude, who was born in Denmark around 1637 and worked there until leaving for Lübeck in 1668. Church music, particularly

organ music, seems to have reached a high level in the 17th century. Many composers and organists in Copenhagen developed organ music in a style apparently closely allied to that of north Germany. Truid Aagesen, Thomas Schattenberg, Johann Lorentz (ii), Lorentz Schröder, J. R. Radeck and Christian Geist. The weekly organ concerts given by Lorentz in the Nikolai Kirke in Copenhagen are the earliest evidence of public concert activity in Denmark.

After the Reformation higher education was also reorganized, a *lector musices* was appointed at the University of Copenhagen in 1539 and school plays with music bear witness to the growing musical activity in the humanistic spirit. Teachers at the university and the grammar schools produced treatises on music theory, such as Hans Kraft's *Musicae practicae rudimenta* (1607), H. M. Ravn's *Heptachordum danicum* (1646) and M. H. Schacht's *Musicus danicus*.

After the unsettled years of the Civil War and the Reformation, court music flourished in the 1520s and 1530s and under Christian III and Frederik II (1559-88), and became a vital element in Danish musical life. The Kantoret (royal choir) at that time consisted of about 20 singers; during the reign of Frederik II instrumentalists from the royal trumpet corps were combined with the choir to form the Kongelige Kapel. During this period the first important court musicians and composers were active (Jørgen Heyde, David Ebell, Jørgen Presten, Johan Paston, Franciscus Amfortius and Arnold de Fine), most were from the Netherlands, England and Germany, and the repertory of court music was on a par with the best European traditions. The international character of court music continued under Christian IV (1588-1648), Frederik III (1648-70) and Christian V (1670-99). During the 17th century instrumental music, song and ballet were joined in a series of court festivals, from *intermedi* in the Italian style under Christian IV to ballet and opera in Italian and French Baroque style under Frederik III and Christian V. Composers of European repute were attached to the Copenhagen court and during the 1630s and 1640s to that of Prince Christian in Nykøbing (Falster): Dowland (1598-1606), Brade (various times between 1594 and 1622), Johann Schop (1615-19), Schildt (1626-9, 1634), Schütz (1633-5, 1642-4), Kaspar Forster (1652-5, 1661-8), Weckmann (1642-7) and Voigtländer (1639-43). Foreign ensembles occasionally supplemented the Kongelige Kapel, including English instrumentalists in the late 16th century and French court violists under Frederik III and Christian V.

3 18TH CENTURY. During the first half of the century hymn singing was mainly under Pietistic influence, exemplified by Enk Pontoppidan's *Den nye psalme-bog* (1740) and F. C. Breitendich's *Fuldstaendig choral-bog* (1764/R1970), which includes melodies in *galant* style. With Niels Schiørning's *Kirke-melodierne for claveer* (1781) and O. H. Guldberg's *Psalme-bog* (1778) hymn-writing moved towards secularism and rationalism. 18th-century polyphonic church music seems to have been dominated by secular influences. Pietism gave rise to a variety of Passion cantatas and oratorios which, during the reign of Christian VI (1730-46), replaced the prohibited opera; subsequently sacred music was prominent at royal birthdays, weddings and funerals. The most important composer was the German J. A. Scheibe, whose mourning cantatas for the funeral of

Frederik V (1766) and Passion cantata of 1768 are among the finest Danish compositions of the period. At the end of the 18th century typical works were *Forløserens død, opstandelse og himmelfart* by J. E. Hartmann, J. A. P. Schulz's *Maria og Johannes* and *Christi død* and F. L. A. Kunzen's *Skabningens hal-leluia*, in which the influence of Graun and C. P. E. Bach can be traced.

During the reigns of Frederik IV (1699-1730) and Christian VI the Kongelige Kapel continued to function under the guidance of Bartolomeo Bernardi (1703-32) and others. With the accession of Frederik V in 1746 and the end of Pietism interest in opera was reawakened. An opera house had been built in 1702 and guest performances of German opera were given (including operas by Keiser) in the 1720s, however, in 1748 a new theatre was built in Copenhagen (later named the Royal Theatre) and dramatic music became public, resulting in a breakthrough for Danish opera in the late 18th century. Italian opera troupes visited the court from 1747, directed by Paolo Scalabrini and Giuseppe Sarti, however, French opera was more influential than Italian. *Opéra comique* was introduced to the court at the beginning of Christian VII's reign (1766-1808) and continued at Kongens Nytorv in the early 1770s. With this background and influenced by Gluck, J. E. Hartmann initiated a national Singspiel tradition with *Balders død* (1779) and *Fiskerne* (1780), subsequently developed in the works of Schulz and Kunzen.

In the 1740s collegia musica became centres of public concert activity. Court and state musicians joined with amateurs in creating music societies where the introduction of European orchestral works and improved opportunities for performance contributed to the establishment of a Danish symphonic tradition in the late 18th century; early Classical Viennese influence is evident in the works of Hartmann, Kunzen and the young C. E. F. Weyse. The first important Danish music publisher, Søren Sønnichsen (from 1783), printed works that indicate the increased cultivation of domestic

telig psalmebog (1853) and Christian Barnekow's hymnbook (1878) with tunes by A. P. Berggreen, J. P. E. Hartmann, Niels Gade and others. Romantic influences are also noticeable in the first official hymnbook of the 20th century, V. Bielefeldt's *Melodier til psalmebog for kirke og hjem* (1900), although it also contains traces of the reforms of T. Laub (*Om kirkesangen*, 1887). Religious polyphony and organ music were overshadowed by secular music; only Weyse's cantatas and works by J. P. E. Hartmann are outstanding. Romantic influence, however, was increased by Berggreen, Hartmann and Gade. Renowned composers of organ music at the end of the 19th century were Gottfried Matthison-Hansen and Otto Malling.

After the decline of public concerts in the early 19th century the Musikforeningen, founded in Copenhagen in 1836, was important in the revival of concert life and had a decisive influence on musical life for nearly a century. With its choir and orchestra it remained the centre of large-scale concert-giving and under the conductorship of Gade (1849-90) became the arbiter of contemporary taste. As a prolific composer and as director and teacher at the Copenhagen Conservatory from 1867 Gade had considerable influence. Symphonic music made great progress at this time in the works of J. H. Fröhlich, J. P. E. Hartmann, Peter Heise, Emil Hartmann and others, although not until the end of the century did a reaction set in against orchestral music in the Classical style. Further music societies were formed: Euterpe (1864-7), the Koncertforeningen (1874-93) and Symfonia (1889-95). There were also the Philharmonic concerts and those of the Kongelige Kapel, which broadened the European repertory and included Danish works by Victor Bendix, P. E. Lange-Müller and others.

Similar influences determined the development of chamber music from the compositions in Viennese style by Friedrich Kuhlau in the early 19th century through the Romantic Classicism of Gade, J. P. E. Hartmann, Heise and C. E. Horneman to the French- and Slav-influenced works of Lange-Müller and Bendix. With the formation of the Kammermusikforeningen in Copenhagen (1868) a forum was created for chamber music comparable to that of the Musikforeningen for orchestral music.

Songs with piano accompaniment developed from the simple strophic compositions of Weyse to the Romantic art songs of the two most important Danish lyric composers, Heise and Lange-Müller. The founding of the Cæciliaforeningen by Henrik Rung in 1851 stimulated the development of choral singing; the society based its repertory on 16th- and 17th-century polyphony. Male choral singing was cultivated by the Studenter-Sangforeningen (1839). A leading exponent of light music was H. C. Lumbye, conductor of the orchestra in the Copenhagen Tivoli Gardens, who introduced the style of Lanner and the Strausses in an individual manner. This varied repertory became available to the public through the growing number of music publishers in Copenhagen: J. Cohen (1846-73), Wilhelm Hansen (founded 1853), C. E. Horneman (1861-74), Horneman & Erslev (1846-79) and C. C. Lose (1793-1879, under various names).

At the beginning of the 19th century Danish opera was still influenced by *opéra comique* and the Singspiel; Rossini's operas were introduced from about 1820. The Singspiel tradition had its most important representative

4. 19TH CENTURY. During the first decades of the 19th century there was a decline in musical activity. The Napoleonic Wars and the state bankruptcy of 1813 dealt a blow to the progress of concert life, although church and stage music survived and performances of Weyse's church cantatas and the operas given by the Kongelige Kapel became famous throughout Europe in the years before 1830. However, a revival of instrumental music took place around 1850; as elsewhere, the symphony developed into a national genre, and chamber music won favour in the concert hall. In addition the secular cantatas became a feature of Danish musical life and the fashionable *romance* a form of song composition comparable to the lied in other parts of Europe. Danish music education expanded during the 19th century; singing became a compulsory subject in schools after 1814, and with Angul Hammerich's lectures at Copenhagen University at the end of the century music history became an established academic discipline.

The official hymnbooks of the first half of the 19th century, H. O. C. Zinck's *Koral-melodier* (1801) and Weyse's *Choral-melodier* (1839), continue the tradition of Schiørring's hymnbook; gradually, however, hymn singing was influenced by secular music, as can be seen in A. P. Berggreen's *Melodier til ... evangelisk-chris-*

in Weyse, while the Romantic style is exemplified by Kuhlau's *Lulu* (1824) and J. P. E. Hartmann's *Ravnen* (1832). The influence of Weber and Marschner is evident in Hartmann's *Liden Kirsten* (1846) and especially in Heise's *Drot og marsk* (1878), with which Danish opera took a decisive step away from Singspiel towards a more European form, through-composed and owing something to Verdi and Meyerbeer. The influence of Wagner was at first felt only sporadically on the Danish stage, but is apparent in August Enna's *Heksen* (1892) and Lange-Müller's *Vikingehlod* (1900). The Royal Theatre also founded a ballet tradition of enduring importance with the ballets of Vincenzo Galeotti, some with music by Schall, at the end of the 18th century, ballet music flourished during the directorship of August Bournonville (1830–77).

5 20TH CENTURY 20th-century Danish music presents a much more varied picture than that of earlier periods. Musical activities became decentralized, democratic and more numerous, increased state control is reflected in such institutions as the Musikkrådet (1935), Musikkommissionen (1957) and Statens Musikkråd (1971) and in the proposals for laws concerning music (1973). Copenhagen ceased to be the dominant musical centre and provincial orchestras were formed in Århus (1935), Ålborg (1942) and Odense (1946), while South Jutland and Zealand had symphony orchestras from 1963 and 1965. There are opera performances in Århus and Odense, and provincial conservatories in Århus (1927), Odense (1929), Ålborg (1932) and Esbjerg (1946). A growing number of associations of composers and performers has been formed: Koda (1926), to protect copyright, the Dansk Tonekunstner Forening (1903), Dansk Musiker Forbund (1911), Dansk Komponistforening (1913), Dansk Solist-forbund (1918), Solistforeningen af 1921, Dansk Kapelmesteforening (1937), and Fællesrådet for udø vende Kunstnere (1949).

From the beginning of the century liturgical music was influenced by Thomas Laub's reform work, formulated in his *Musik og kirke* (1920) and demonstrated in his collection *Dansk kirkesang* (1918). In 1922 Samfundet Dansk Kirkesang was established to propagate Laub's ideas of restoring hymn tunes on the basis of 16th- and 17th-century practice; among the supporters of the reforms were Mogens Wöldike, J. P. Larsen, Finn Viderø and Povl Hamburger. To accompany the authorized Danish hymnbook *Den danske salmebog* (1953), Larsen and Wöldike published *Den danske Koraltbog* (1954), containing 450 melodies of which 74 are by Laub. A purist trend also characterizes the organ and choral music of the period, as can be seen in the few works of Nielsen in those genres. Later polyphonic church music has been written by Leif Kayser, Leif Thybo and Bernhard Lewkovitch.

It is significant that the two societies most central to the established Danish musical world in the 19th century – the Musikforeningen and the Caeciliaforeningen – were both disbanded in the 1930s. At the beginning of the 20th century new institutions were formed to promote contemporary music: the Dansk Koncertforening (1902–30) under such conductors as Bendix and Peder Gram, the Tivoli Concerts under the direction of F. Schnedler-Petersen (1909–35) and the Dansk Filharmonisk Selskab (1920–35) founded by Paul von Klenau. Of far-reaching importance was the formation

of the Unge Tonekunstners Selskab (1920) and the Ny Musik society (1921, the Danish section of ISCM from 1923); in 1930 the two societies amalgamated to form Det Unge Tonekunstnerselskab (DuT) which has become, through its international approach to contemporary music, its concert performances and the publication of *Dansk musikudskrift* (1925–), the main platform for new music.

Before World War II Danish music was strongly influenced by Carl Nielsen, who composed in most genres, however, for a time after his death (1931) his works had a stifling effect on composers, who felt unable to free themselves from his influence. At first strongly influenced by the late Romantic style – represented in Denmark by Horneman and Johan Svendsen – Nielsen's composition was soon affected by the powerful anti-Romantic tendencies which later dominated music between the wars, he opened the way for developing modern Danish music with his experimental works of the late 1920s. Stravinsky, Prokofiev, Bartók, Hindemith, Les Six and Roussel were also dominant influences on young Danish composers between the wars (Schoenberg and the Second Viennese School aroused interest for a short while in the early 1920s but did not play a significant role until after 1950). Composers who made their names around 1920 included Poul Schierbeck, Jørgen Bentzon, Knudåge Rüsager, Ebbe Hamerik, Flemming Weis and Finn Hoffding, the next generation included Franz Syberg, S. E. Tarp, Otto Mortensen, S. S. Schultz, H. D. Koppel and Vagn Holmboe. Most of these wrote some symphonic works – notably Ebbe Hamerik's five cantus firmus symphonies (1937–49) – but chamber music was predominant. Vocal music also showed strong anti-Romantic tendencies at the time. Interest in folk music brought an extensive production of popular songs and school operas (Høffding and others). The influence of jazz is typified by Koppel's *Musik for jazzorkester* (1932).

At the end of World War II the most notable composers were Koppel, Holmboe and N. V. Bentzon. The tradition of the 1930s was continued by the younger generation of composers at the beginning of the 1950s: P. R. Olsen, Thybo, Svend Westergaard, Lewkovitch, Ib Nørholm, Per Nørgård and Pelle Gudmundsen-Holmgreen. However, during the 1950s most of these composers began to turn away from the Nordic tradition; dodecaphony was introduced in DuT, notably by Jan Maegaard. The Darmstadt school and serial music, formerly represented in Danish music only by Gunnar Berg, attracted attention and in the 1960s resulted in an avant-garde breakthrough in such works as Nørholm's Piano Trio (1960) and *Fluctuationer* (1961–2), Nørgård's *Fragmenter I–VI* (1960–61) and Gudmundsen-Holmgreen's *Chronos* (1962). Most young composers adopted an independent attitude to serialism and during the 1960s individual styles and experiments appeared, such as Nørgård's integral serialism, Nørholm's lyrical expressive style, the 'new simplicity' and experiments with open form, 'fluxus' techniques and 'happenings' in the works of Henning Christiansen and others. Electronic music was introduced in Denmark during the 1950s and was cultivated by E. M. Pade and Jørgen Plaetner. Several composers, including Nørgård, have experimented with partly electronic compositions, while Bent Lorentzen and G. M. Pedersen have concentrated on entirely electronic music.

In opera Nielsen was again the leading figure at the

beginning of the 20th century, with *Saul og David* (1902) and *Maskerade* (1906). Hakon Børresen had success with the short 'conversation' opera *Den kongelige gæst* (1919), followed by Schierbeck in his charming *Fête galante* (1931). The most interesting exponent of large-scale opera in the interwar years was Ebbe Hamerik. After 1950 the writing of large operas became sporadic, but some works have appeared by Olsen, Nørgård and others. Important contributions are Nørholm's television opera *Invitation til skafottet* (1965) and Nørgård's *Gilgamesh* (1973). Chamber opera, partly in the neo-classical vein, has been produced by Schultz, Nørholm and Christensen. Many of their operas represent the pluralistic style of the 1960s making use of a combination of different styles to express dramatic conflicts. The strongest exponent of ballet music of the 1940s and 1950s was Knudåge Riisager; however, since the 1960s, works by Mogens Winkel Holm have become prominent at the Royal Theatre, and the television ballet of Nørgård, *Den unge mand skal gifte sig* (1965), is noteworthy.

II. Folk music

1. Medieval ballads and songs. 2. Popular song of the 16th to 18th centuries. 3. Instrumental music. 4. Collection and research. 5. 20th-century trends and the *Folkemusikhus*.

1. MEDIEVAL BALLADS AND SONGS. This repertory was perhaps originally intended to accompany dance. Both epic and lyric songs occur, in a strophic form once common throughout Scandinavia. Two types of strophe predominate: the first is a couplet with four stressed syllables to each line and middle and end refrains (sometimes end refrains only); the second is a quatrain, usually with an end refrain. These songs deal with a wide range of subjects, covering every facet of human life. In their characteristic phraseology they express with wonderful vividness both heathen superstition and Christian faith; duplicity as well as magnanimity. Countless variants of about 500 different song types can be categorized as follows: chivalrous songs (mostly of Danish-Swedish origin) concerned with all aspects of knighthood, historic songs about famous figures in Nordic history (though they are rarely of value as genuine historical sources); songs of giants, of warfare and of combats between giants (mainly of Norwegian and Faeroese origin), legendary and magic songs expressing the medieval belief in myths and miracles; and, towards the close of the Middle Ages, long romantic songs and facetious poems.

The texts have survived in a number of forms. A small group of song fragments was recorded in medieval times as a sample of penmanship. A much larger group is found in manuscripts dating from about the middle of the 16th century to the early 18th century; it resulted from the strong desire of the Danish nobility to preserve a repertory which, although an already outmoded part of a declining song tradition, had acquired a collector's interest among the upper classes. This literary heritage appeared during the following 150 years in the form of printed songbooks containing edited versions of aristocratic songs; an example is A. S. Vedel: *Et hundrede*

danke viser ('100 Danish songs') published in Copenhagen in 1591. The largest group was not collected or notated until the 19th and 20th centuries: these songs had lived on in the oral tradition of the common people and though quite unconnected with the songs of the nobility may have survived through the descendants of the gentry who had been reduced to poverty by the upheavals in Denmark around 1530.

Great efforts have been made to establish the origin and age of the medieval Danish ballad. Some of the most outstanding ballads tell of events of the first half of the 13th century and scholars used to date the origins of the ballad to this period or slightly later. It is also possible that the medieval French lyric came to Denmark with young Danes who studied in Paris at that time. A recent and more likely theory is that the ballad was introduced from England following the marriage of Princess Philippa, daughter of Henry IV of England, to Erik VII of Pomerania, King of Denmark, Norway and Sweden.

The tunes of the medieval Danish folksongs are an even more uncertain subject: one fragment, preserved by chance in a legal manuscript dating from about 1350 (ex 1), is the only notated melody surviving from

(a) *Codex Runicus* c1350 (bracketed notes are the answering refrain in later melodic variants)

medieval times. A few tunes are recorded in 16th-century manuscripts and others were printed during the 17th century, but on the whole that sector of 16th-century Danish society which was concerned to record the texts of the ballads was apparently not interested in the tunes. Thus our knowledge of medieval ballad

melodies is a result of collecting that began with the work of such 19th-century scholars as Abrahamson, Nyerup and Rahbek, and continued into modern times.

Surviving melodies pose insoluble problems. In contrast with later songs of the 16th and 18th centuries, where musical settings of the same texts hardly vary from one source to another, the tunes to which any one medieval text was set vary greatly and give little indication of their nature during medieval times. One characteristic, however, is that they are generally based on the C and F modes or A and D modes: that is, something approaching major or minor tonalities. A small number of tunes in Kristensen's late 19th-century collection from central Jutland contains pronounced pentatonic features. All these qualities tempted T. Laub (in Laub and Olrik) to rework some of the melodies into a form he suggested might be close to the original.

Changes in the melodies may have occurred more than once, perhaps during the Middle Ages and again during the 16th and 17th centuries. An enlargement of the strophic form from couplet into quatrain, seems to have occurred during medieval times, for some ballads exist in both two-line and four-line form, the latter often containing turns of phrase which are derived from the two-line form in a way that proves their later origin. This development may have brought about melodic changes or, alternatively, the more attractive structure of a four-line melody may have inspired the changes in the text. A second period of modification may have occurred during the 16th and 17th centuries, when there was a decline in the ballad tradition proper, followed by a revival, particularly in the towns; this revival coincided with the adoption of the modern major and minor tonal system in church and art music and may have tended to produce newer, different tunes. On the other hand the similarity, sometimes quite marked, between tunes of older date and those not committed to paper until the 19th and 20th centuries could be seen as evidence against a second period of change.

The issue is further clouded by the fact that 19th-century ballad collecting work was undertaken under difficult conditions and often by people with insufficient musical training. Furthermore, the collectors with more professional knowledge often edited the tunes in a spirit of musical romanticism. The indispensable requirements of strict accuracy were not understood and observed until scholars such as E. T. Kristensen and H. Grüner-Nielsen began their collecting work at the end of the 19th century. In 1907 these two scholars pioneered the use of phonograph cylinders.

Ample evidence exists of the type of dance associated with the ballad tradition, both in the ballad texts themselves and in medieval frescoes in Danish churches: they were circle-dances and group dances similar to those still performed in the Faeroe islands, where some of the ballads which are still sung to accompany the dancing are of Danish-Norwegian origin (see FAEROES).

2. POPULAR SONG OF THE 16TH TO 18TH CENTURIES.

Folksong of this period is better preserved than the earlier repertory and in many cases words and tunes have survived together. New lyric song forms appeared in this period, mainly through the influence of German song-poetry. In many variants the epic element was subordinate to lyricism. The strophic forms are many and varied, but are generally composed of a set number of stressed syllables, freely filled out with unstressed

ones. There are many love-songs as well as secular, religious and moralizing songs, ditties about natural phenomena, crimes, etc. and there are biblical and historical songs in later verse styles than those found in medieval times.

After the invention of printing large numbers of songs circulated in broadsheets - this was very different from the medieval practice of transmitting songs orally. Tunes prescribed (usually only by title) were often the foursquare hymn tunes of the Lutheran Church, which were disseminated orally at first and only later in printed form. At the same time, the use of Protestant songs at family prayer helped considerably in maintaining a tradition of secular tunes, mainly of German origin, which became detached from the names of poets and composers and survived independently into the 20th century in oral tradition in a folksong-like form, sung in many variants much as the medieval songs were sung. Where it is possible to compare the music written down in modern times with types preserved from the 16th and 17th centuries one can appreciate the power of a strong tradition to preserve oral characteristics for an indefinite period. Some of the melodies of this period are of interest not only to the history of Danish song, but to that of Europe as a whole. An example is the Tannhäuser song (ex.2) preserved in H. Thomissen's psalm book of 1569; it was widely known across Europe during the 15th to 17th centuries, and it appears as no.15 in J Meier's *Deutsche Volkslieder* (Berlin, 1935).

Ex.2 Psalm tune from H. Thomissen's *Den danske psalmebog* (Copenhagen, 1569)

Men - ne - ske vil du mig ho jeg vil dit
[Vel - an jeg her be - gynde om en Da]

un - der - vise
- ny - ser at kvaede,]

3. INSTRUMENTAL MUSIC. Wandering minstrels, playing fiddle and pipe, appeared in competition with the Nordic SKALD in about 1150; in Denmark, as elsewhere, they were very important in the cultural life of the Middle Ages. They sang and played at the festivities of all social classes and accompanied dancing with string instruments, flutes and drums. In the 16th century the performers of popular music came to enjoy a socially more secure position in the towns. 'Town musicians' with their boys obtained privileges to perform on feast days, and in the villages the local fiddler became a well-known figure. However, none of the popular music played by these fiddlers in Denmark before the second half of the 17th century remains, although after this time, and especially from the 18th and 19th centuries, books have survived containing dances such as the *polskdans* (which evolved during the 16th century), 17th-century minuets and 18th-century quadrilles. These dances became extremely popular in both town and country. Ex.3 shows the 'Engelsk Polskdans', which became widely known throughout Scandinavia in a vocal setting by C. M. Bellman (no.42 in *Fredmans*

epistel, Stockholm, 1790). *Polskas*, minuets, quadrilles and similar dance forms survived into the 19th century in rural Denmark as a remnant of the social dances of the towns. The *tospring* ('two-jump'), a circle-dance or line-dance of Jutland, is a possible exception for it is apparently connected with the medieval dance-song. The

Ex.3 'Engelsk Polskdans' from Erik Jensen's notebook, 1790, in E. T. Kristensen's collection, Danish Folklore Archives, Copenhagen

popular dances of the 19th century, such as the mazurka and the polka, are now being revived by folkdance societies whose purpose is to keep alive dances which are threatened with extinction. These are performed in national costume

4. COLLECTION AND RESEARCH. All important manuscript collections and other materials for scientific research (e.g. cylinder, disc and tape recordings) are kept at the Dansk Folkemindesamling (Danish Folklore Archives, founded in 1904) in Copenhagen or at its Jutland branch in Holstebro. The archives include the important and extensive unpublished material of the two pioneer researchers E. T. Kristensen and H. Gruner-Nielsen as well as the results of recent collecting work by T. and A. Knudsen, who have included in their research the study of newer trends in both vocal and instrumental folk music. Since 1901 the Foreningen til Folkedansens Fremme (Danish Folk Dance Society) has published numerous volumes of dance-tunes with instructions for the dances themselves. Volume XI of *Danmarks gamle folkeviser*, edited jointly by H. Thuren, H. Gruner-Nielsen, E. Abrahamsen, N. Schiering, T. Knudsen and S. Nielsen, completes a work of ballad scholarship begun more than a century earlier, by publishing all the melodies of all known Danish ballad variants.

5. 20TH-CENTURY TRENDS AND THE FOLKEMUSIKHUS. The Industrial Revolution transformed Danish society during the late 19th century from a principally agrarian society of farmers and smallholders to an industrialized society composed mainly of landless employees. It was generally considered that traditional folk culture vanished along with the earlier economic patterns and that folk music could not survive in the face of universal (institutional) education, with its emphasis on written music and commercial mass culture. Interest in folk music reached its lowest level during the period between the two world wars and folk music research remained a purely historical and academic discipline.

In the 1950s the music department of the Dansk Folkemindesamling (Danish Folklore Archives) in Copenhagen began a collecting programme, hoping if

possible to supplement its historical manuscript material with sound recordings. It soon became clear that such a pessimistic view of the future of folk music in Denmark was quite wrong. The collectors (working in collaboration with the Danish Broadcasting Company) met with traditional singers and instrumentalists wherever they travelled and recorded thousands of items, including ballads, elegies, dance-songs and fiddle tunes. A significant number of songs were of medieval origin, others were 20th-century compositions; the majority of fiddle tunes dated from the 19th century. Further investigation into the attitudes of singers and fiddlers towards their texts and tunes, followed by similar analysis of their performance styles in different social situations, showed that songs and dances were still felt to be a vital and natural part of contemporary life. Simultaneous research into the social background of all known musicians from the beginning of the 19th century showed that they normally belonged to the lower, underprivileged classes and played only a minor part in the new economic system, most of the singers were women. Clearly Danish folk music was a contemporary as well as a historical phenomenon.

In 1971 the Ministry of Culture, recognizing that traditional music could survive as the music of special social groups within modern industrial society, appointed a woman singer (a smallholder) and a fiddler (a former boilerman) to the staff of the Folklore Archives and with the support of the local municipality established a branch of the Folklore Archives at Hogager in Jutland – the Folkemusikhus. Here traditional folk musicians make music together while others interested in folk music meet them and learn from them: forgotten songs and dances are taken from the archives and tried out experimentally in the context of modern tradition. Regular open-house gatherings allow people from the area to take part in singing and dancing, and folklorists are able to record in a 'live' situation, for the folk music house serves as a community hall for the district.

The success of the folk music house in Hogager has inspired the establishment of others. Mostly these are organized by people of mixed age groups and serve as a local centre for folk music activity. Some are developed as part of existing institutions such as young people's hostels. Thus in the 1970s Danish folk music has three aspects: the first is that of the folkdance societies concerned mainly with the preservation of historical dances, the second, a new and commercially based 'folk scene', and the third, the folk music houses, building on a living tradition in a natural social milieu.

Denner. German family of woodwind instrument makers. Johann Christoph Denner (b. Leipzig, 13 Aug 1655; d. Nuremberg, 20 April 1707) was the son of Heinrich Denner, a turner of game whistles and hunting horns, at that time a common trade for Nuremberg craftsmen. In 1666 Denner's parents returned with him to their native Nuremberg, where he began to learn his father's profession. He gained considerable skill in playing and making various woodwind instruments, and in 1680 was able to establish his own shop and marry Sabina Götz, the daughter of a gold-spinner, by whom he had seven children.

About 1684, as Denner later acknowledged, new-style woodwind instruments were brought into Germany from France. Denner quickly realized the advantage to be gained from adopting the new fashion. One-piece Renaissance-type woodwind were abandoned in favour of instruments in three pieces with tuning-joints and 'Baroque' exterior, while a change in the shape of the bore and location of note holes permitted an increase in range. Indeed, most of Denner's instruments exhibit craftsmanship and playing properties superior to surviving contemporary French woodwinds, gaining him fame far beyond his own country.

In 1696 Denner and Schell, his colleague, petitioned the Nuremberg City Council for recognition as master craftsmen for the making of woodwind instruments, a trade not then officially recognized. The petition was granted, and three years later he received the title of *Gassenhauptmann*. In 1703 Denner was asked to join

the larger city council, and the same year he married Jacobina Öder, his previous wife having died

Most of Denner's surviving instruments were listed by Young. They include 27 recorders, one pommer, three oboes, two alto oboes, one tenor oboe, one oboe da caccia, one racket, one chalumeau, one fagottino, three bassoons and four chorist-fagotts. Since the publication of this list, more instruments have been discovered, notably a clarinet now at the University of California, Berkeley. This clarinet is especially interesting because Doppelmayr had credited Denner with the invention of the instrument. In contrast to the surviving chalumeau, with a cylindrical bore throughout and only two keys, this instrument has the bell of a typical Baroque clarinet and is fitted with three keys for bridging the gap between registers. In 1710 the word 'clarinet' appears for the first time in the Nuremberg archives. Denner's recorders give a good indication of German Baroque pitch standards, sounding either at *Hochkammerton* ($a' = 415$ Hz) or *Chorton* ($a' = 466$ Hz).

Denner is also credited with the introduction of the Baroque racket or *Wurst Fagott*, a condensed version of the bassoon with a conical bore fitted with a crook, while the Renaissance racket had a cylindrical bore with a short staple and pirouette. It is surprising that no transverse flutes with Denner's mark have so far been found; this suggests that he may never have made such instruments. The vogue for transverse flutes flourished in Germany shortly after his death, and his son Jacob made flutes which were much in demand.

Jacob Denner (*b* Nuremberg, 1681, *d* Nuremberg, 1735) and his younger brother, Johann David (*b* 1691), continued the work of their father. No instrument with a distinct mark for Johann David has survived. Jacob's instruments show that he concentrated on fewer of the Baroque woodwind instruments, with a noticeable trend towards greater refinement and elegance typical of late Baroque styling. A good example is a recorder in ivory (now in *GB-Lcm*) delicately turned and decorated with carvings of classical ornaments. It is possible that Bach and Telemann wrote their demanding recorder parts with Jacob's instruments in mind, for these are particularly suitable for the high tessitura passages frequently called for.

Young's list of Jacob Denner's surviving instruments includes six recorders (all of them alto), three flutes, one Deutsche schalmey, eight oboes, one oboe d'amore, one oboe da caccia and three clarinets. During the time of J. C. Denner and his son, Nuremberg was the most important European centre for woodwind making. Among several lesser masters were Gahn, Oberlender, Schell, Staub and Zick.

FRIEDRICH VON HUENE

Dennis, Brian (Jonathan Charles) (*b* Marples, 24 May 1941). English composer and educationist. He studied composition at the RCM with John White (1961–5) and for some months attended the Cologne Course for New Music, working under Stockhausen, Berio and Brown. His compositions since 1964 have been based on

analogies drawn from mathematical and visual ideas. Thus *To Pounding Silk Floss* is written according to a system of 'structure condensation' in which time-spans, rhythms and pulse rates are closely interrelated, and indeed all microstructural details are derivations from the total structure. Rigorously organized and 'free' material may, however, be used in the same work, as in *Abstract*, which combines a fully-notated score with tape recordings of natural sounds. Dennis's work in schools and training colleges has been concerned with introducing ideas and processes from the most recent music, and devising teaching methods and notations which enable children to be immediately involved in performance, composition and group improvisation without acquiring conventional skills. He has composed many works for children, there is no clear division in style or intention between these and his concert pieces.

WORKS

(selective list)

HUGO COLE

Dennison, Peter (John) (*b* Wollongong, 18 Aug 1942). British musicologist. He studied at the University of Sydney (BMus 1964), then went as organ scholar to Magdalen College, Oxford, where he was a pupil of Egon Wellesz and Jack Westrup (DPhil 1970). He was appointed lecturer at Glasgow University (1968–71), then at Cambridge, where he was a Fellow of Clare College (1971–5) and conductor of the Cambridge PO. In 1975 he was appointed professor of music at the University of Melbourne. He joined the committee of the Purcell Society in 1972 and in 1977 he became president of the Musicological Society of Victoria. His musical interests are divided between late Romantic music (especially Elgar) and the church music of the Restoration, to which area his research and editing have chiefly been directed.

De Nobel, Felix (*b* Haarlem, 27 May 1907). Dutch conductor and pianist. He was taught by Hendrik Andriessen and Martha Autengruber at the Amsterdam Conservatory, and in 1930 began to appear regularly as a soloist, chamber player and accompanist for such artists as Schwarzkopf, Elisabeth Schumann, Patzak and Bernac. In 1937 he became conductor of a choir formed originally to take part in a series of radio broadcasts of Bach's cantatas, which remained together and

became the Netherlands Chamber Choir. Until he gave up the conductorship in 1972 De Nobel did much with the choir to promote composers like Monteverdi and Schutz in the Netherlands; he also introduced many new works, often written especially for them, including those by Frank Martin, Poulenc, Badings and other Dutch composers. European and American tours, appearances at leading festivals and numerous gramophone records, gave the conductor and choir an international reputation. De Nobel has written many choral arrangements of folksongs and he has taught accompaniment and song interpretation at a number of Dutch conservatories.

TRUUS DE LEUR

Densmore, Frances (b Red Wing, Minn., 21 May 1867, d Red Wing, 5 June 1957). American ethnomusicologist. She received her early musical education at the Oberlin Conservatory of Music, Ohio, where she studied the piano, organ and harmony, later she was a piano pupil of Carl Baermann in Boston and of Leopold Godowsky, and studied counterpoint with John K. Paine at Harvard University. A pioneer in the study of American Indian music, she became interested in the subject in 1893 after reading reports of Alice C. Fletcher's work, she pursued this highly specialized field of study with unflagging energy until her death. In 1901 she wrote down for the first time songs from a Sioux woman near Red Wing. In 1904 she studied Filipino music at the St Louis Exposition, and notated the song of Geronimo, the famous Apache chief. In 1905 she visited the White Earth Reservation in Minnesota to observe the Chippewa, and made her first field trip at Grand Portage on the north shore of Lake Superior. In 1907 her work was recognized by the Bureau of American Ethnology of the Smithsonian Institution and she was made a Collaborator, a title which she held for the next 50 years. During this period the Bureau published 13 of her monographs on Indian music, five anthropological studies and one paper in the Annual Report series.

From her first book, *Chippewa Music* (1910/13), she displayed her ability as an observant ethnographer and a conscientious analyst of music. In addition to tribal monographs she contributed articles to many journals as a means of interpreting Indian culture to a larger public. *The American Indians and their Music* (1926) was written as an introduction for the lay reader. From her recordings kept in the Library of Congress seven LP records have been issued.

WILLARD RHODES

Denson, Seaborn M. (b Arbacoochee, Alabama, 9 April 1854; d Helicon district, Winston County, Alabama, 18 April 1936). American composer and tune book compiler (see SHAPE-NOTE HYMNODY, §2). He was music editor for J. S. James's *The Original Sacred Harp* (Atlanta, 1911/R1965), a revision of B. F. White's *The Sacred Harp* (1844), which added also parts to the original three-part harmonizations and included newly composed four-part pieces as well. A later edition, *The Original Sacred Harp, Denson Revision* (Haleyville, Alabama, 1936, rev. 2/1960, 4/1971), is one of the two revisions of *The Sacred Harp* still widely used.

HARRY ESKEW

Denss, Adrian (fl late 16th century). ?Netherlands lutenist and composer. It is possible that he spent some time in Antwerp, going to Cologne shortly before his anthology of music for seven-course solo lute in French tablature, *Florilegium*, was published there in 1594, though there is no trace of his having been there or of his subsequent career. He must have been involved in musical activity centring on the household of Arnold of Manderscheidt and Blankenheim, to whom his book is dedicated.

Klöckner argued that the 84 tabulations of vocal works in the *Florilegium* are to be regarded exclusively as instrumental pieces rather than as accompaniments. On this basis, he suggested that the music had been reduced to either two or three voices from the original vocal works and that the intabulations were not intended for simultaneous performance with voices, but rather for alternate performance of successive stanzas. He further suggested that Denss may have remained unknown to many of his contemporaries because of his manner of representing polyphony in a complex way by means of melodic and rhythmic intensification of the inner voices, and because of the serious tone of his own pieces, which look forward to those of the French 17th-century lute school.

His own pieces in the collection show Denss to have been a fine composer, his melodic and harmonic gifts perhaps being at their height in the 10 eloquent and song-like galliards. He also included in *Florilegium* 11 fantasias, 8 passamezzo-galliard suites, a 'Gagliarda di Ferrabosco' (which Ferrabosco is not known), 19 allemandes (three being present in two versions), five courantes, two voltas, four branles, one ronde and one 'Pauern Tantz'. Among the fantasias, nine of which are motet-like and apparently by Denss himself, two are monothematic ones by G. Huet. Popular melodies served as a basis for a number of the dance pieces, and concordances indicate that Denss knew well the cittern literature and other sources published in the Netherlands and elsewhere.

H. B. LOBAUGH

Dent, Edward J(oseph) (b Ribston, Yorks., 16 July 1876; d London, 22 Aug 1957). English musicologist, teacher, translator and critic. He was educated at Eton, where he studied music with C. H. Lloyd, and Cambridge, where his teachers were Charles Wood and Stanford. He was elected a Fellow of King's College, Cambridge, in 1902, began lecturing on the history of music that year and also taught harmony, counterpoint and composition. In 1918 he left for London, where he worked as a music critic. He returned to Cambridge as professor of music in 1926, when he was again elected to a fellowship at King's. He occupied the Cambridge chair for 15 years. From his retirement until his death he lived in London.

At Cambridge, Dent completely reorganized the teaching for the MusB degree. He realized that this degree would no longer be taken mainly by church organists but that a Cambridge education in music would produce members of other branches of the musical profession – school and university teachers, composers, critics, BBC staff and so on – and he consistently aimed at giving the curriculum greater breadth as a sound foundation, stressing particularly the study of music history and encouraging the performance of pre-19th-century, especially Baroque, music. He exercised a profound influence on several generations of young musicians, whose subsequent success as composers, teachers, performers or scholars owed much to his teaching and example. He himself composed a small amount of music, mainly of a conservative cast.

Dent opened up wide areas of the repertory that were then little known. An insistence on performance as the ultimate goal lay behind his approach to scholarship. He worked especially on Italian Baroque opera, and the fruits of his study appeared in a long series of articles and most notably in his books on Alessandro Scarlatti and Mozart's operas, both of which show that he possessed to a rare degree the power to form keen critical judgments based on close, accurate scholarship. He contributed an edition of *Caput and Death* to Musica Britannica in the hope that it would stimulate stage productions. His broad, catholic outlook prevented him – and through him his research students – from becoming so absorbed in the detail of a particular project as to lose sight of its wider musical and social context.

Given his research interests, it is not surprising that operatic activity in Britain owes Dent a special debt. He was involved in the historic production of Mozart's *Die Zauberflöte* at Cambridge in 1911, when the work was still practically unknown to the British musical public. His translation of it initiated a long series of fine translations that did much to bring opera to a wider audience. He wanted opera – indeed all music – to be enjoyed, and he felt that the barrier of a foreign language prevented many people from enjoying it as much as they ought. He was very well equipped for his task, for he was an excellent linguist, had an easy literary style and was constantly preoccupied with the needs of the theatre and the voice. His success was great, and several generations of opera audiences have had the benefit, almost for the first time, of translations that are worthy of the originals and convey the course of the drama stylishly and idiomatically. Language, however, is in a constant state of flux, and Dent's translations are of necessity being modified or superseded by the passing years. Yet this does not diminish his achievement in bringing a new

dimension into British operatic experience which, moreover, to the benefit of his successors, immeasurably raised the status of the translator. He was a director and later governor of Sadler's Wells Opera and a director of Covent Garden Opera Trust.

When Dent was a young man British musical life was in many respects insular, and one of his most important achievements was to broaden horizons and establish wider contacts. His linguistic ability and catholic tastes again helped him here; so too did his extensive knowledge of European culture, his international standing as a scholar and his relaxed and adaptable manner – witty and urbane in exposition, subtle and persuasive in diplomacy. After World War I he devoted much effort to the restoring of artistic links between the combatant countries. One outcome of this activity was the establishment in 1923 of the ISCM, of which he was elected the first president; he held the position until 1938. It is a measure of the breadth of his interests and of the esteem in which he was held that he was also, from 1931 to 1949, president of the International Musicological Society, a combination of the two offices in one person which has not been (and is unlikely to be) repeated. He was subsequently made honorary president of both bodies. Yet he had a strong mischievous and irreverent streak and delighted in uttering outrageous opinions about music that he felt had been accepted with unthinking reverence. His delight would increase if he knew that he thereby shocked the respectable – especially if they were clergymen or women. He rebelled against the conventions of the society of his day and was a radical dissenter and an enemy of smugness and snobbery. His attitudes were in many ways paradoxical: for instance, he was an agnostic who yet composed a group of moving and wholly sincere motets; and he could express left-wing sympathies but always maintained that many of the main achievements of music had been fostered by aristocratic societies.

In 1961, in recognition of his services to international scholarship, the Royal Musical Association, of which he was president from 1928 to 1935, instituted the Dent Medal, which is awarded annually to recipients selected for their outstanding contributions to musicology by the council of the association. In 1953 Dent was one of the first two musicians to be elected a Fellow of the British Academy. He was an honorary doctor of music at Oxford (1932), Harvard (1936) and Cambridge (1947) universities.

ANTHONY LEWIS, NIGEL FORTUNE

Dentice. Italian family of composers and instrumentalists, active chiefly in Naples.

(1) **Luigi Dentice** (b Naples, ?1510-20; d Naples, not after 1566). Composer and theorist. He was one of the group of Neapolitan nobles who performed in 1545 and 1547 the comedies *Gl'ingannati* and *Philenia* in the Neapolitan palace of Ferrante Sanseverino, Prince of Salerno, and who founded on 14 March 1546 the Accademia dei Sereni. In a letter to Lord Robert Dudley, Sir Thomas Challoner reported that Henry VIII had wanted Luigi Dentice in his service. His *Duo dialoghi* (Naples, 1552), dedicated to Giulio Cesare Brancaccio, benefited from Dentice's long conversations with Angelo di Costanzo (an MS copy, possibly an autograph, with four anonymous textless, four-part compositions appended, is in I-Fc). In the first dialogue he discussed Greek music theory and in the second the technique of counterpoint and a few aspects of performing practice. One four-part madrigal, *I' piango ed ella il volto*, is printed in *RISM* 1562; another work is attributed to him by Gennaro Grossi.

(2) **Fabrizio Dentice** (b ?Naples, ?1525-35; d Parma, before 1601). Instrumentalist and composer, son of (1) Luigi Dentice. In 1545 he played the part of Pasquella in *Gl'ingannati*, a comedy performed in the Neapolitan palace of Ferrante Sanseverino, Prince of Salerno. In a letter to Lord Robert Dudley, Sir Thomas Challoner reported that in March 1564 he had heard Fabrizio Dentice play the lute and sing in Barcelona, and recommended him as worth an annual salary of 400 crowns. Vincenzo Galilei, in his *Dialogo* (1568), referred to him as an excellent lute player and improviser. At some time Dentice entered the Duke of Parma's service, where he assumed teaching duties. His renown as a lutenist eclipsed his fame as a composer. His *Lamentationi* and the *falsobordone Miserere* are notably adventurous in their use of augmented triads and melodic diminished 4ths.

(3) **Scipione Dentice** (b Naples, 19 Jan 1560; d

Naples, on or before 21 April 1635). Composer. He was not a nephew of (2) Fabrizio Dentice as claimed by Prota-Giurleo, but was of a different branch of the family from both (1) Luigi Dentice and (2) Fabrizio Dentice. He may have studied music with Stefano Felis, for a madrigal and a motet of his were printed in two of Felis's publications of 1591. In May 1593 Raval mentioned that Dentice, with Stella, Marenzio and others, performed Raval's madrigals in Cardinal Montalto's palace in Rome. He may have been in the service of Cardinal Montalto, for he dedicated his five-part motets to him on 25 March 1594. He is often supposed to have been a member of Gesualdo's *Camerata di propaganda per l'affinamento del gusto musicale*, but there is doubt as to whether this organization ever existed. The dedications of his second, third and fifth books of madrigals reveal his connection with the Peretti and Gesualdo families and with Cardinal Acquaviva, Archbishop of Naples. In 1609 Dentice was a canon of Naples Cathedral. Later, either in about 1610 or, more probably, in 1622, he entered the congregation of the Oratorio Filippino in Naples, where he died.

Dentice's madrigals, apart from an unimpressive first book, are melodically interesting and rather melismatic and chromatic, but rarely adopt the flexible rhythms and free dissonances characteristic of the Neapolitan *seconda prattica* madrigal. An important new feature of the spiritual madrigals of 1629 is the rhythmic liveliness of the contrapuntal lines. His motets, though written in a conservative imitative style, are highlighted by chromaticism and contrasting chordal sections, they show greater contrasts than Stella's motets but fewer than Gesualdo's. The antiphons combine the features of Dentice's madrigal style with the square, repetitive rhythms of chordal hymns, called frottoles in Naples.

KEITH A. LARSON

Denver. American city in the state of Colorado with a population of 1,228,000. Denver was founded in 1858, and the immense wealth that soon flowed from the Rocky Mountain gold and silver mines made possible the creation of a musical oasis in the isolated American west.

The church and theatre soon became the centres of early musical interest. A local builder, Charles Anderson, placed a one-manual pipe organ in the H Street Presbyterian church in 1872. The Rev. H.

Martyn Hart, dean of St John's Episcopal Cathedral, brought to Denver a series of English organists whose influence was lasting: the first was Arthur W. Marchant, who arrived in 1880 and installed a Hook & Hastings organ in the cathedral; he was followed by Walter E. Hall in 1882, John H. Gower in 1887 and Henry Houseley in 1892. Houseley, an organist, teacher, composer and choral and orchestral conductor, led and developed many areas of Denver music during the next 30 years. In 1888 the musician and philanthropist Isaac E. Blake gave an 82-rank Roosevelt organ to Trinity Methodist Church, where Wilberforce Whiteman produced oratorio performances at the turn of the century.

The erection in 1881 of a Grand Opera House by H. A. W. Tabor did much to attract opera to Denver. Emma Abbott opened the house with Wallace's *Maritana*. Up to 1900 the Tabor and the Broadway Theatre were hosts to such opera personalities as Patti, Gerster, Nordica, Tamagno, Melba, Juch and Gadske. The Rev. Joseph J. Bosetti produced opera locally from 1915. Productions of his Denver Grand Opera Company continued until 1951. The Greater Denver Opera Company (1955-8) and the Denver Lyric Theatre (founded in 1958) have continued a sporadic opera programme. Summer musicals were sponsored by the *Denver Post* from 1933 to 1972.

Mary Elitch Long's desire for good music in her summer gardens generated orchestral interest in the 1890s and in 1900 the Denver SO was founded by Henry Houseley. Raffaello Cavallo became conductor in 1903 and Horace Tureman in 1911. With his own orchestra, Cavallo offered competition, and the Denver SO faltered during World War I. Tureman reorganized it as the Denver Civic SO in 1921 and conducted it until 1944 (The name Denver SO was revived in 1934). Other conductors have been Saul Caston (1945-64), Vladimir Golschmann (1964-70) and Brian Priestman (from 1970).

Denver's choral societies began with a Musical Union, formed in 1867, just nine years after the first crude cabins were built, a German 'Maennerchor' appeared in 1870. Frank Damsch, Denver's first public school music supervisor, organized a highly successful choral society in 1882 but returned to New York three years later. I. E. Blake started the Denver Choral Society in 1890; in 1894 its directorship went to Henry Houseley, who gained for the ensemble a national reputation, winning awards at the Salt Lake City Welsh Eisteddfod in 1895 and the St Louis World's Fair in 1905. David McK. Williams, later organist at St Bartholomew's, New York (1920-47), accompanied.

Through the efforts of Fritz Thies, chamber music interest developed in the 1880s. The Lehman Quartet with violist Paul Stoëving followed in 1892 and the Baker Quartet in 1901. Henry Ginsburg's Denver String Quartet (formed 1921) was the city's most popular and lasting chamber ensemble, playing for over 20 years.

Important private music schools in Denver have included the Denver University School of Music (founded 1879), the Denver Conservatory (1887), the Liszt School (founded by James M. Tracey, 1906), Blanche Dingley Matthews School (1911), the Wolcott Conservatory (1920) and its offshoot under Edwin J. Stringham, the Denver College of Music (1925), and the Lamont School, now part of Denver University, founded in 1922 by Florence Lamont Hinman.

Denver's geographical isolation created a strong need for musical societies. Outstanding musicians were brought there in the early 1900s for the Tuesday Musical Club concerts. A chapter of Pro Musica, founded by Mrs Thomas Paterson Campbell in 1923, brought mostly French artists. Jean Chappell Cranmer has long been associated with the Allied Arts Society (founded 1920), which sponsors young local musicians and for many years held chamber concerts at Chappell House.

SANFORD A. LINSCOME

Denza, Luigi (b Castellammare di Stabia, 24 Feb 1846, d London, 26 Jan 1922). Italian composer and conductor. From 1862 he studied composition under Mercadante and Serrao at the Naples Conservatory. In 1876 his opera *Wallenstein*, after Schiller's trilogy, was produced in Naples. He spent the 1884 season in London and three years later settled there. He became a director of the London Academy of Music and, in 1898, professor of singing at the RAM. He composed many popular drawing-room songs and ballads. His total of more than 500 songs, partsongs and cantatas are written to Italian, French and English texts. It is as composer of the Neapolitan song *Funiculi funiculà* that he is best remembered. Strauss adapted it, believing the melody to be a genuine folksong, in his symphonic fantasy *Aus Italien*, and Rimsky-Korsakov orchestrated it.

KATH HORNER

Denzler, Robert (b Zurich, 19 March 1892, d Zurich, 25 Aug 1972). Swiss conductor. He studied the piano and the violin at Zurich Conservatory and theory and composition privately with V. Andreac. From 1911 to 1912 he continued to study the piano in Cologne, working as a répétiteur at the opera house and the Bayreuth Festival. From this time he started appearing as a conductor. In 1912 he became director of music at Lucerne, and in 1915 conductor of the Zurich Opera. He was guest conductor of the Orchestre de la Suisse Romande (1920-30), and chief conductor of the Berlin Stadtische Oper (1927-32). In 1934 he returned to Zurich where, among other works, he conducted the first performances of Hindemith's *Mathis der Maler* and Berg's *Lulu*. After 1947 he only conducted concerts. As a composer Denzler was thoroughly committed to late Romanticism; as a conductor, however, he was renowned as an interpreter of classical opera, contemporary music and, above all, Wagner.

JÜRGEN STENZEL

Depansis. French composer. He was active in the 14th century, but is now known only by a three-voice Gloria from the Avignon repertory (edn. in CMM, xxix, 30). The piece divides into 11 short sections, mainly ending on D (the final) or E. The two upper voices move together for much of the time, introducing parallel 5ths and 4ths at cadences, with occasional 3rds. Stäblein-Harder pointed to a similarity between the topmost

voices of this and an anonymous troped Gloria (edn. in CMM, xxix, 32), and suggested that Depansis might be the composer of both or that one is modelled on the other.

GILBERT REANEY

De Peyer, Gervase (Alan) (b London, 11 April 1926). English clarinetist. He studied under Frederick Thurston at the RCM and Louis Cahuzac in Paris. He became first clarinet of the LSO in 1955 and joined the staff of the RAM in 1959. He is a founder-member of the Melos Ensemble, director of the London Symphony Wind Ensemble, and an associate conductor of the Haydn Orchestra. He has given first performances of concertos by Arnold Cooke, Sebastian Forbes, Alun Hoddinott, Joseph Horowitz and Thea Musgrave, and has made notable recordings. His style is suave and confident, and he has made a feature of playing solos from memory.

PAMELA WESTON

De' Pietri, Antonio. See TONELLI, ANTONIO.

Déploration (Fr.). A poem lamenting someone's death, and by extension, any musical setting of it. However, the term is now normally confined to late medieval and early Renaissance compositions inspired by a composer's death. The earliest is the only surviving composition by F. Andrieu, a setting of Eustache Deschamps' double ballade *Armes, amours/O flour de flours* commemorating Machaut's death.

Many *déplorations* centre around Ockeghem and Josquin. Ockeghem lamented Binchois' death in *Mort, tu as navré* (with *Miserere* in the tenor), and in his turn inspired various laments, notably the long poem by Guillaume Crétin, *Déploration sur le trépas de Jean Ockeghem*, which names many musicians and reproaches the poet Jean Molinet for not yet having lamented Ockeghem, since (in Crétin's phrase, which sums up the emotional impetus behind all such works) 'the loss is great, and worthy of being recorded'. Erasmus's Latin verse *Ergone contuit* (set by Johannes Lupi) laments Ockeghem's death, as do Molinet's two replies to Crétin's rebuke, *Qui dulces modulando* (apparently not set to music) and *Nymphes des bois*. Josquin's setting of the latter text (with *Requiem aeternam* in the tenor) appears both in the Medici Codex and Susato's *Le septiesme livre... avecq troix epitaphes d'ict Josquin (RISM 1545¹⁵)* without clefs and entirely in black notation in all voices. The unusual appearance of this funereal eye music justifies Burney's pride at scoring it for his *General History*.

Despite its late date, Susato's volume is a memorial to Josquin himself, closing with three laments for him: Hieronimus Vinders's *O mors inevitabilis* (with *Requiem aeternam* in the tenor) and *Musae Jovis*, set in full by Gombert and in part by Benedictus Appenzeller. Gombert's magnificent setting continues the tradition of an independent religious text in the tenor which incorporates the Sarum melody *Circumdede runt me gemitus mortis dolores inferni* and is isorhythmic. Regnart's *Defunctorum charitates*, commemorating Jacobus Vaet, is also noteworthy. Byrd's elegy for Tallis, the consort

song *Ye sacred muses* and Andrea Gabrieli's *greghesca* for Willaert Sassi, *Palae, Sabbion, del Adrian lio* (RISM 1564¹⁸) are parallel products.

The texts of several *dépurations* refer to Parnassus, asking the Muses or Apollo to welcome the dead; this does not prevent the inclusion of traditional Christian prayers for the soul. The music is commonly in the Phrygian mode, traditionally associated with mourning. The word *dépuration* was rarely used as a title; of the four laments in Susato's *Le septiesme livre*, the seven voice-parts are variously marked *dépuration*, *epitaphium*, *monodia*, *lamentatio* or *naenia*.

DAVITT MORONEY

Deppe, Ludwig (b Alverdisen, Lippe, 7 Nov 1828; d Bad Pyrmont, 5 Sept 1890). German pianist, teacher, conductor and composer. Having studied with Marxsen in Hamburg (1849) and Lobe in Leipzig, in 1857 he settled in Hamburg, where he founded a musical society and conducted it until 1868. He was Kapellmeister of the Royal Opera in Berlin (1874–86), and also conducted concerts. In 1876 he conducted the Silesian musical society founded in Breslau by Count Hochberg. A detailed description of his teaching methods is given by his pupils (see bibliography), especially by Amy Fay. These methods included avoiding lifting the fingers high, careful attention to muscular movement, special study of pedalling and the use of a low piano stool, all designed to cultivate a very soft, even, but penetrating tone. Among Deppe's most distinguished pupils was Emil Sauer, and he also gave help and advice to Tovey. Deppe's system was developed further by Adolf Mikeš, who became an influential exponent of it in Prague, and some of his principles were adopted by Leschetizky. His compositions include a symphony, overtures and songs, and he wrote an essay 'Armleiden der Klavierspieler' (in *Der Klavierlehrer*, vii, 1885).

JOHN WARRACK

DePreist, James (Anderson) (b Philadelphia, 21 Nov 1936). Black American conductor. He studied at the University of Pennsylvania, and at the Philadelphia Conservatory of Music (1959–61) with Vincent Persichetti. In 1962 while on tour in the Far East he had poliomyelitis and became paralysed in both legs. While convalescing he studied scores assiduously, and by late 1963 he was conducting in Bangkok. He was one of the first prizewinners in the 1964 Dimitri Mitropoulos International Competition in New York, and Bernstein selected him as assistant conductor of the New York PO for the ensuing year. In 1967 he settled in Europe, and the next season made his continental début conducting the Rotterdam PO. He has conducted the Cleveland Orchestra and the Los Angeles PO, and he was associate conductor of the National Symphony Orchestra of Washington, 1971–4, becoming its principal guest conductor in 1975.

GEORGE GELLES

De Reszke. Polish family of singers

(1) **Jean de Reszke** (b Warsaw, 14 Jan 1850; d Nice, 3 April 1935). Tenor. He studied with his mother, a talented amateur singer, and later with Ciaffei and Cotogni, as a baritone. Under the name of Giovanni di Reschi he made his début at La Fenice, Venice, in January 1874 as Alfonso in Donizetti's *La favorite*. Later in the same year he appeared in London at Drury Lane, again as Alfonso. He also sang Valentine in *Faust* and took the title role in *Don Giovanni*. After the London season, he went to Dublin where he took the part of Richard Coeur-de-Lion in Balfe's *The Talisman*. In 1876, now as Jean de Reszke, he made his Paris début as Fra Melitone in *La forza del destino*. In December of that year he sang for the last time as a baritone, as Figaro in *Il barbiere di Siviglia*, producing a ringing top B \flat in the cadenza to his aria.

Persuaded that he was really a tenor, De Reszke now retired from the stage and studied with Sbriglia. In November 1879 he accompanied his sister Joséphine to Madrid, where she was engaged to sing, and appeared for the first time as a tenor in the title role of *Robert le diable*, with Joséphine as Alice. His performance was not very successful, and it was over four years before he sang in a theatre again. Then on 1 February 1884 he made a triumphant reappearance as John the Baptist in the first Paris performance of Massenet's *Hérodiade*, given in Italian at the Théâtre-Italien. The following year he created the part of Rodrigue in *Le Cid* at the

1. Jean de Reszke as Romeo in Gounod's 'Roméo et Juliette'

Opéra, where he was engaged for the next five seasons, singing Radamès in *Aida*, Vasco da Gama in *L'africaine* and the title roles in *Le prophète* and *Faust*.

He appeared in London as a tenor for the first time on 13 June 1887 as Radamès at Drury Lane, and nine days later sang his first Wagner part, Lohengrin (in Italian). He made his Covent Garden début the following season as Vasco da Gama, later singing Raoul in *Les Huguenots*, Faust, Lohengrin, Riccardo in *Un ballo in maschera* and Radamès. On 28 November 1888 Gounod's *Roméo et Juliette* was given its first performance at the Paris Opéra, rehearsed and conducted by the composer, and with a cast that included Jean de Reszke, his brother Edouard and Patti. The de Reszkes repeated the work at Covent Garden with Melba the following June, and a month later Jean sang Walther in *Die Meistersinger* for the first time. In 1890 he appeared as Don José in *Carmen* and the following year sang the title role in *Otello*.

He made his American début in Chicago on 9 November 1891 as Lohengrin and appeared for the first time in New York as Roméo, five weeks later. During 1894 he sang the title role of *Werther* in Chicago, New York and London. He then tackled the heavier Wagner roles, singing Tristan in New York on 27 November 1895, the young Siegfried in New York on 30 December 1896, and Siegfried in *Götterdämmerung* in London on 2 July 1898. He took part in the command performance of *Lohengrin* given for Queen Victoria's 80th birthday at Windsor on 24 May 1899. His last appearance at Covent Garden was in 1900, his final performance in New York in the following year, and his last new role, Canio in *Pagliacci*, he sang in Paris at the end of 1902. After his retirement he taught for many years, first in Paris and then in Nice, including among his pupils Louise Edvina and Maggie Teyte. His beautiful voice, fine musicianship and handsome appearance made him one of the most popular singers of his time. The final years of his career were marred by ill-health and vocal trouble, but at his best he was unsurpassed in the French repertoire, as well as in the Wagner parts he sang with such distinction.

(2) **Edouard de Reszke** (b Warsaw, 22 Dec 1853; d Garnek, Poland, 25 May 1917). Bass, younger brother of (1) Jean de Reszke. He studied with Steller and Coletti, and made his début as the King in the first Paris performance of *Aida* at the Opéra on 22 May 1876. He was then engaged for two seasons at the Théâtre-Italien. He sang Indra in Massenet's *Le roi de Lahore* at Milan in 1879, and in the following year made his London début at Covent Garden in the same role. He also sang St Bris in *Les Huguenots*, Rodolfo in *La sonnambula* and Basilio in *Il barbiere di Siviglia*. On 24 March 1881 he sang Fiesco in the first performance of the revised version of *Simon Boccanegra* at La Scala, Milan, where he also appeared as Silva in *Ernani*. He sang Alvisé in the first London performance of *La Gioconda* in 1883, and in the next year appeared for the first time as Mephistopheles in *Faust*.

He sang in the Paris performances of *Hérodiade* and *Le Cid* with Jean, and thereafter his career closely followed that of his brother, in London, Chicago and New York. His vast repertory included Friar Laurence in *Roméo et Juliette*, Don Pedro in *L'africaine*, Rocco in *Fidelio* and Leporello, which he sang at a special centenary performance of *Don Giovanni* at the Opéra in 1887,

2 Edouard de Reszke as Mephistopheles in Gounod's 'Faust'

with Jean as Don Ottavio. Edouard's huge voice and giant stature also made him a magnificent exponent of Wagner roles, and he sang Daland in *Der fliegende Holländer*, King Henry in *Lohengrin*, Hans Sachs in *Die Meistersinger*, King Mark in *Tristan und Isolde*, the Wanderer in *Siegfried* and Hagen in *Götterdämmerung*. He retired in 1903, soon after his brother.

(3) **Joséphine de Reszke** (b Warsaw, 4 June 1855; d Warsaw, 22 Feb 1891). Soprano, sister of (1) Jean and (2) Edouard de Reszke. After a year's study at the St Petersburg Conservatory, she sang in Venice under the name of Giuseppina di Reschi, appearing as Marguerite in *Faust* with her brother Jean as Valentine. She made her Paris début at the Opéra as Ophelia in Thomas' *Hamlet* on 22 June 1875 and sang there for a decade in such roles as Marguerite, Malilde in Rossini's *Guillaume Tell*, Valentine in *Les Huguenots*, Rachel in Halévy's *La juive* and both Isabelle and Alice in *Robert le diable*. She created the part of Sita in *Le roi de Lahore* on 27 April 1877. In 1881 she sang Aida at Covent Garden, but was not a success and cancelled her contract. She sang Salome at some of the performances of *Hérodiade* in 1884, so that all three de Reszkes were on the stage together. In the following year she married Baron Leopold de Kronenberg and retired to live in Poland.

ELIZABETH FORBES

Derey, Blañzej (b Siewierz, nr. Katowice, c1585; d Kraków, 12 May 1666). Polish composer and musician. He was a member of the Dominican order from 1616 and was active at Sieradz and Kraków. He produced stylized Gregorian arrangements for the use of his

order, compiled liturgical MSS (which survive at the monastery at Kraków) and edited songs.

De Rhoda, Paulus. Late 15th-century composer, possibly identifiable with PAULUS DE BRODA.

Dering, Lady. See HARVEY, MARY.

Dering [Deering, Dearing, Diringus etc], **Richard** (b c1580; d London, buried 22 March 1630). English composer and organist. He was the illegitimate son of Henry Dering of Liss, Hampshire. According to a pedigree (in *GB-Lbm* Add.5534), his mother was Elizabeth, sister of Henry, Lord Grey of Ruthin and 6th Earl of Kent, but she is mentioned in no other record of the Grey family (who were related to the Derings by marriage). The usual account of his career is that he was a Catholic brought up and trained in Italy, but the styles of his music and what is known of his family make it more likely that he was trained in England and was converted to Catholicism later. The first contemporary document about him is his supplication for the degree of BMus from Christ Church, Oxford, in 1610; in it he stated that he had been engaged in the study and practice of music for ten years. In 1612 Sir Dudley Carleton, the English envoy in Venice, reported in a letter (*GB-Lpro* SP 99, x, 62) to Sir John Harrington (heir to John, first Lord Harrington of Exton) that a servant of Harrington's, a Mr Dearing, had recently spent some time in Venice, was now in Rome and was, he feared, about to become a Catholic. It seems likely that this Mr Dearing is the composer, who certainly seems to have lived at one time in Rome (see below).

Like many English Catholic musicians of the period Dering decided to live abroad. By 1617 he was organist of the convent of English nuns in Brussels and was still there in 1620; at this time he must have been in touch with Bull and Peter Philips, but there are no records of this. In 1625 he was appointed organist to Queen Henrietta Maria soon after her marriage to Charles I, and in the same year he is recorded as a 'musician for the lutes and voices' to the king; he also appears in court accounts of 1626, 1628 and 1629.

Dering's music may be divided into two categories, English and Italianate. The English music, none of which was published during his lifetime, comprises Anglican church music, fantasias and dances for viols, two madrigals and the *City Cries* and *Country Cries*, which are quodlibets for voices and viols. The Italianate music was nearly all published and always includes a continuo part: it consists of Catholic church music and Italian canzonettas and madrigals. Dering was no doubt a minor composer, but he wrote in a wide variety of manners. The English works are comparable in style to those of his contemporaries Gibbons, Weelkes and – especially in the fantasias and the six-part madrigal, *If sorrow might* – John Ward. The verse anthems are prolix and the full anthem restricted in modulation: these features suggest that they are early works. The dances are charming and tend to be elaborate. The fantasias are serene and melodious, and Hughes called attention to their consistency of structure; those in six parts are particularly impressive. The *City Cries*, like similar works by Weelkes and Gibbons, incorporates many London street cries; it also includes many trades-

men's songs. The *Country Cries*, which exists in several MSS, is a vivid succession of country scenes, including hunts for hare and pheasant, as well as a town crier and a sow gelder, harvest songs and much dialect. A reference within it to 'the king's cart taker' suggests that it was written after 1603, the date of James I's accession.

Dering's Latin church music and Italian canzonettas and continuo madrigals are strongly influenced by contemporary Italian practice (though he nowhere used solo instruments or recitative). The 1617 motets, which he said were written in the 'first city of the world' – presumably Rome – are passionate in expression, not unlike Schütz's *Cantiones sacrae* of 1625; the 1618 set (sub-titled 'ad melodiam madrigalium elaborata') are less intense and suggest more the style of Philips or Sweelinck. The motets for two and three voices were specially popular in England after 1625: they were no doubt performed in Henrietta Maria's chapel, and Wood said they were Cromwell's favourite music. The popularity of John Playford's 1662 publication led him to venture on the second set, of 1674 Both Henry Peacham (*The Compleat Gentleman*, 1622) and Thomas Mace (*Musick's Monument*, 1676) include Dering in their lists of excellent composers.

PETER PLATT

Dermota, Anton (b Kropa, Slovenia, 4 June 1910). Yugoslav tenor. He studied the organ and composition at Laibach and singing with Elisabeth Rado in Vienna, where he made his début as the First Armed Man in *Die Zauberflöte* in 1936; the same year he sang Zorn in *Die Meistersinger* at Salzburg under Toscanini. By 1938 he was singing Belmonte and Don Ottavio at Salzburg. Although as a Mozart tenor he won most renown, Dermota has also appeared in the Italian and German repertory, and was accorded the honour of singing Florestan in *Fidelio* at the reopening of the Vienna Staatsoper in November 1955. His large repertory includes the title role in Pfitzner's *Palestrina* and Lensky in *Eugene Onegin*. He has made guest appearances in most leading European opera houses, and sung in concert and lieder recitals generally accompanied by his wife, Hilde Berger-Weyerald. He was made a *Kammersänger* in 1946.

HAROLD ROSENTHAL

Dernes, Helga (b Vienna, 3 Feb 1939). Austrian soprano. After studying at the Vienna Conservatory from 1957 to 1961 she was engaged by the Berne

Opera, making her début as Marina (*Boris Godunov*). Engagements followed at Wiesbaden (1963-5) and Cologne (1965-8). At Bayreuth, where she first appeared in 1965 as Wellgunde and a Flower Maiden, she has played Freia, Guttrune and Eva. Two particularly important links have been forged with Scottish Opera, for whom she first sang Guttrune (1968) and subsequently her first *Fidelio* Leonore (1970), Brünnhilde, Isolde, and, in admirably clear English, the Marschallin and Cassandra (*Les troysens*); and with the Salzburg Easter Festivals under Karajan, for whom from 1969 (her first *Siegfried* Brünnhilde) she undertook major roles (Leonore, the *Götterdämmerung* Brünnhilde, Isolde) on stage and in recordings. At Covent Garden (début role, Sieglinde, 1970) she has appeared as Chrysothemis, Leonore, the Dyer's Wife (*Die Frau ohne Schatten*) and the Marschallin; her Chicago (November 1971) and Vienna Staatsoper (September 1972) débuts were in *Fidelio*. She created the title role of Fortner's *Elisabeth Tudor* (Berlin, 1972). Essentially a full-voiced lyric soprano, she chose to undertake the heaviest Wagnerian dramatic roles, with the result that her voice lost some of its earlier freshness and easy, ample beauty of tone. Her strikingly handsome stage appearance and intense acting make her a compelling performer

HAROLD ROSENTHAL

Derosier [Derozier], **Nicolas** (fl late 17th century). Guitarist and composer, probably French. Derosier probably lived in Holland and France since his works were published in these two countries. About 1699 he held the position of *ordinaire de la musique* to the prince palatine. His suite for two treble instruments and continuo was written to commemorate the flight of James II of England to the court of Louis XIV in 1688. His two brief tutors for five-course Baroque guitar contain instructions about the interpretation of the tablature, tuning, ornamentation, arpeggiation of chords and continuo accompaniment.

Derrick (fl ?1620). English composer. A Short Service (*Te Deum, Benedictus*), a *Jubilate*, two Kyries and a Creed are in MSS (*GB-Cp* and *DRc*).

Dervaux, Pierre (b Juvisy-sur-Orge, Seine-et-Oise, 3 Jan 1917). French conductor. At the Paris Conservatoire he studied the piano under Isidore Philipp and Yves Nat, and harmony and counterpoint under Jean and Noel Gallon and Marcel Samuel-Rousseau. He made his début as a conductor with the Padeloup Orchestra in 1947, and that year became principal conductor of the Paris Opéra, where he remained until 1970. From 1949 to 1955 he was also vice-president of the Concerts Padeloup. He was appointed musical director of the Quebec SO in 1964 and of the Orchestre Philharmonique des Pays de la Loire at its foundation in 1971. He has conducted as a guest elsewhere in Europe, in the USA, and in the Middle and Far East. His repertory is confined almost exclusively to Classical and Romantic music.

Dervaux directed courses in conducting at the conservatory in Montreal (1965-72) and in 1964 was appointed to teach conducting at the Ecole Normale in Paris. He has composed orchestral and chamber music, including two symphonies, a piano concerto, a cello concerto, a divertimento for string orchestra, a string quartet and a trio.

Derzhinskaya, Xeniya Georgiyevna (b Kiev, 6 Feb 1889, d Moscow, 9 June 1951) Soviet soprano. She studied singing with F. Pash and Mathilde Marchesi in Kiev, where she made her début in a concert of Rakhmaninov works, at which she was praised by the composer. From 1913 to 1915 she sang at the Moscow opera house Narodnyi Dom. She was a soloist at the Bol'shoy Theatre from 1915 to 1948, her creative development during these years being greatly influenced by Stanislavsky and the conductor Václav Suk. Under the latter she created her best roles: Lisa (*The Queen of Spades*), Nastasya in Tchaikovsky's *Sorcerer*, Fevroniya (Rimsky-Korsakov's *The Legend of the City of Kitezh*) and Ortrud. She was one of the outstanding Russian singers of her time, whose vocal and dramatic art was distinguished by the wide range and beautiful timbre of her strong voice, the completeness of her interpretations and her gift for freshly transforming her roles, her portrayals of Russian women being particularly successful. Other roles included Mariya (Tchaikovsky's *Mazeppa*), the Snow Maiden and Gounod's Marguerite. On 6 July 1926 she sang in a concert performance of *Kitezh* at the Paris Opéra, with great success. She appeared widely in concert and recital, and from 1947 to 1951 taught singing at the Moscow Conservatory. In 1937 she was made a People's Artist of the USSR.

I. M. YAMPOL'SKY

Des (Ger.). D♭; see PITCH NAMES.

De Sabata, Victor (b Trieste, 10 April 1892; d Santa Margherita Ligure, 11 Dec 1967). Italian conductor and composer. The son of a chorus master, he studied at

the Milan Conservatory, taking counterpoint and fugue with Michele Saladino and composition with Giacomo Orefice; he also played the piano and the violin. After obtaining his diploma in 1910 with a Suite for orchestra, he concentrated for several years on composition, winning considerable success with his opera *Il macigno* (La Scala, 1917) and his symphonic poem *Juventus*, regularly played by several of the great conductors including Strauss and Toscanini. In 1918 he began to conduct, giving symphony concerts in Italy and becoming conductor at the Monte Carlo Opera, where he conducted the première of Ravel's *L'enfant et les sortilèges* and the first French performance of Puccini's *La rondine*. In 1929 he spent a few months with the Cincinnati SO and then became permanently attached to La Scala, where he made his début in February 1930 conducting *La fanciulla del West*, and where in December that year he scored a great success with *Tristan und Isolde*, of which he came to be considered an outstanding interpreter. Until World War II he conducted mostly in Italy, but in 1937 he visited Berlin and Munich with a company from La Scala, and made guest appearances at other theatres including Bayreuth (1939). Immediately after the war he started to travel again, conducting the Scala Company in London and Edinburgh in 1950 and other orchestras in Berlin, Vienna, London, Chicago, New York, Philadelphia and Boston. From 1953 to 1957 he was artistic director of La Scala. Because of poor health he rarely conducted after 1953, in 1957 he retired from musical life altogether but remained artistic consultant to La Scala.

Blessed with a fabulously exact and critical ear, De Sabata was a gifted, original and fascinating conductor.

Victor de Sabata

whose often incandescent performances resembled Toscanini's. His repertory ranged from Mozart to Stravinsky, with an emphasis on Wagner, Strauss, Debussy, Ravel, Sibelius and Puccini and his Italian contemporaries (Giordano, Montemezzi, Respighi, Wolf-Ferrari and Tommasini). He preferred Verdi's later works and liked Boito's *Mefistofele* and, in Italian translation, Saint-Saëns' *Samson et Dalila*. He was a typical product of the Italian culture that, after Wagner, had absorbed Strauss and the French impressionists and that had witnessed the rise of the Italian *verismo* school and, with Respighi, of an internationally acknowledged symphonic style. De Sabata's few recordings include *Tosca* (with Callas, Di Stefano and Gobbi) and the Prelude and Liebestod from *Tristan und Isolde*. Among his compositions the choreographic tale *Mille e una notte* (1931), performed at La Scala, and two symphonic poems, *La notte di Platon* (1923) and *Gethsemani* (1925), deserve notice, he is thought to have composed other works during the last decade of his life.

Desaides, Nicholas. See DEZÉDL, NICHOLAS

De Santi, Angelo (b. Trieste, 12 July 1847, d. Rome, 28 Jan 1922) Italian music scholar and administrator. He became a Jesuit when he was 16 and studied in Italy, France and Austria, taking his degree at Innsbruck University (ordained 1877). After teaching music at the Zara Episcopal Seminary he was summoned to Rome in 1887 by Leo XIII to assist in the reform of church music. Appointed to teach music at the Vatican Seminary he founded a schola cantorum, but encountered such opposition from conservative elements that he left Rome six years later. However, in 1903 the implications of his work were ratified by the encyclical *Motu proprio* of Pius X. He founded the Scuola Superiore di Musica Sacra, Rome (1910), which later became the Pontificio Istituto di Musica Sacra (1931), and, with C. Respighi, the *Rassegna gregoriana* (1902). For about 35 years he worked on *Civiltà cattolica*, and he also served as president of the Italian S. Cecilia Society (1909–22). His chief endeavours were the propagation of the reformed plainchant and the polyphonic music of Anerio and Palestrina.

De Santis. Italian firm of music publishers. Pietro Giovanni De Santis (b. Isola Liri, 1822, d. Rome, 1914) founded the firm on returning from exile in 1852, and began by alternating publishing (harp music) with the manufacture and sale of string instruments and pianos, activities in which he had specialized with the renowned Alessandrini at the S. Michele institute. His son Alberto (b. Rome, 1876; d. Rome, 1968), associated with the firm from 1902, enlarged the publishing programme with works by contemporary composers, including Setaccioli, Tirindelli, Bustini and Tebaldini.

Renato De Santis (b. Rome, 1901; d. Rome, 1974) began to take part in the business in 1916 and directed the firm until his death. Under him the firm expanded the educational and musicological sections with specialized and collected editions as well as numerous instrumental, orchestral and vocal compositions. His friendship with musicians such as Malipiero, Casella, Poulenc, Respighi, Rieti, Toscanini, Mascagni, Puccini, Cilea, Giordano, Pizzetti and Alfano led him to an interest in the new avant garde; his catalogue, besides works by some of those composers, also includes works by Porrino, Allegra, Mannino, Liviabella, Lupi, Pizzini, Turchi and Savagnone. However, the firm's most important activity has been in publishing new editions of works by earlier and often unjustly neglected composers. Under the artistic direction first of Bonaventura Somma and then of Lino Bianchi, De Santis published *Capolavori polifonici del secolo XVI* and *Polifonia vocale sacra e profana del secolo XVI*. The firm also published the 40-volume *Musiche vocali e strumentali sacre e profane dal XVII al XIX secolo*, the complete keyboard works of Pasquini, Galuppi and Rutini, and a number of important series of early music, including *Gli oratori di A. Scarlatti*, *Musiche rinascimentali siciliane*, *Polifonia napoletana del rinascimento*, *Musiche per sonare con ogni sorta di stromenti* and *Composizioni vocali e strumentali dal XIV al XVI secolo*; De Santis also publish *Contributi di musicologia*.

STEFANO AJANI

De Saram, Rohan (b. Sheffield, 9 March 1939) Sri Lankan cellist. He spent his childhood in Ceylon, learning the piano and the cello. For several years he studied in Florence with Gaspar Cassadó and was awarded the Suggia Scholarship, which enabled him to study further with Casals in Puerto Rico and also to work with Barbirolli. Meanwhile he gave recitals and concerts in Europe and made his American début in 1960 with the New York PO at Carnegie Hall. Since then he has played in Canada, Asia, Australia and the USSR. In 1972 he became resident in London, where he teaches at Trinity College of Music. De Saram has a wide repertory, ranging from Bach's unaccompanied suites, Beethoven's sonatas and concertos by Haydn, Schumann and Dvořák to works by 20th-century composers including Prokofiev, Kodály, Hindemith, Dallapiccola, Rubbra, Shostakovich, Britten and Xenakis. He allies impressive technique with an acutely sensitive power of interpretation; the rich, colourful warmth of tone he uses in Romantic music is balanced by the keen intelligence of his playing in modern works. In recital he is frequently partnered by his brother Druvi (b. Ceylon, 24 Jan 1946), a talented pianist, and he also plays in the De Saram Trio with Angela Malsbury (clarinet) and David Pettit (piano).

ELIZABETH FORBES

Désargus, Xavier (b Amiens, c1768; d Paris, 1832). French harpist, tenor and composer. He was a chorister at Amiens Cathedral, but in 1789, when the cathedral was closed in the wake of the Revolution, he went to Paris, where he joined the chorus of the Opéra. Finding he had no taste for the stage, he taught himself the harp and rapidly developed as one of the most sought-after Parisian harp teachers. His *Traité général sur l'art de jouer la harpe* (Paris, 1809) he completely revised in 1816 as *Cours complet de harpe, rédigée sur le plan de la méthode de piano du Conservatoire*, and included exercises with fingerings for both four- and five-finger technique. A third, further enlarged edition was published in 1820. Désargus composed about 70 works for the harp including sonatas, potpourris, transcriptions, duets with piano and 24 études sur les Folies d'Espagne op.6.

Désargus' son, Xavier Désargus (b Paris, 1807, d ?Paris, after 1848), studied with his father and became solo harpist at the Opéra-Comique. In 1822 Spontini engaged him for the royal chapel in Berlin, but he returned to Paris in 1832 and in the same year moved to Brussels as solo harpist at the Monnaie and teacher at the newly founded conservatory. In 1848 he left the music profession and returned to Paris

ALICE LAWSON ABER

Desarzens, Victor (b Château-d'Oex, 27 Oct 1908) Swiss conductor and violinist. He studied the violin and theory in Lausanne with Denéréaz, Gagnebin and Fornerod, took further studies with Enescu, and then became a violinist in the Orchestre de la Suisse Romande, which he left to give concerts with various chamber music ensembles, and as a soloist. In 1940 he founded the Lausanne Chamber Orchestra for Lausanne radio (it gave its first public performance on 10 November 1942), and became its conductor until 1953. In 1949 he was also given a post in Winterthur by W. Reinhart; in 1950 he took over from H. Scherchen as conductor of the Winterthur Musikkollegium. He has also, often with the Lausanne Chamber Orchestra, appeared at festivals and has made many recordings. On his 60th birthday in 1968 the University of Lausanne awarded him an honorary doctorate.

Like Paul Sacher, Desarzens combines contemporary with pre-Classical music in his programmes, and is continually looking for unknown works, particularly by well-known composers, of all periods. He himself has edited and had performed numerous works from Machaut to Rameau. His interpretations are distinguished by transparency and clarity; he understands conducting to be 'describing a region beyond one's material existence'. He has conducted first performances of numerous contemporary works, particularly by Swiss composers among them many by Martin.

JÜRGEN STENZL

Désaugiers, Marc-Antoine (b Fréjus, 1742; d Paris, 10 Sept 1793). French composer. After some indifferent musical studies he settled in Paris in 1774 and first

attracted attention by his translation of G. B. Mancini's *Pensieri e riflessioni pratiche sopra il canto figurato* (1774) under the title *L'art du chant figuré de J. B. Mancini* (Paris, 1776) and by his *Lettres sur la musique des grecs*. The first of his works to be performed in Paris was a motet presented at the Concert Spirituel in 1777. He then wrote several stage works which were performed at the Comédie-Italienne and the Opéra; among these *Les deux sylphes* (1781) and, above all, *Les deux jumeaux de Bergame* (1782, to a text by Florian) became popular. On 1 December 1784 his *Buffon* cantata was performed at the unveiling of the bust of Buffon at the museum of Pilatre de Rozier.

Désaugiers was a friend of Gluck and Sacchini and in memory of the latter wrote a Requiem (1786) which was well received. He was quick to support the ideas of the Revolution and, at the request of the National Assembly, wrote a cantata for choir and orchestra, *La prise de la Bastille, hiérodrame tiré des livres saints*, in which he arranged fragments of verses from the Scriptures in a sequence depicting the events surrounding the fall of the Bastille. The work was enthusiastically received at Notre Dame on 13 July 1790, it was later performed several times and revised slightly in 1794. Désaugiers left many comic operas, a symphony, airs, romances and the opera *Bélisaire*, with a libretto by his elder son Auguste Félix Désaugiers. Marc-Antoine suffered from the inadequacy of his musical technique but his charming style and sense of drama as well as his generous nature account for the reputation he enjoyed in his day.

Désaugiers' younger son, Marc-Antoine Madeleine Désaugiers (b Fréjus, 17 Nov 1772, d Paris, 9 Aug 1827), was a songwriter and librettist. He wrote many vaudevilles and adapted *Le médecin malgré lui* (1792), for which his father wrote the music. He was director of the Théâtre du Vaudeville under the Restoration and left a large number of songs, some of which have remained well known. Auguste Félix Désaugiers, a secretary at the French legation in Denmark, revised Salieri's *Danaïdes* (1817) and *Tarare* (1819) and wrote the libretto for Berton's *Virginie* (1823).

De Saxe, Chrétien-Charles. See HARTMANN, CHRISTIAN KARL.

Des Bordes. French 16th-century composer. He wrote *La guerre marine*, an onomatopoeic piece depicting a naval battle which in style follows the example of Janequin's *Bataille* [de Marignan]. It was first published in Le Roy & Ballard's 11th book (1555) and went on to be reprinted five times between 1559 and 1578. Two contrafacta (*O Seigneur Dieu* and *Cessez mes yeux de pleurer*) are also ascribed to Des Bordes in the *Premier livre des cantiques et chansons spirituelles* (La Rochelle, 1578)

Descant. See DISCANT

Descartes, René (b La Haye, Indre-et-Loire, 31 March 1596; d Stockholm, 11 Feb 1650). French philosopher and mathematician. He studied at the Jesuit school at La Flèche from 1606 to 1612, and after a stay in Paris he completed work in law at Poitiers in 1616. Tired of formal training and seeking an opportunity for travel, he enlisted in the army of Prince Maurice of Nassau in 1617. It was while he was stationed near Breda during his military service that he met and befriended the mathematician Isaac Beeckman, to whom he dedicated his principal contribution to music theory, *Compendium musicae*, written in 1618. During the following years he formed the bases for his new philosophical method, the development of which occupied him for the rest of his life. In 1622 he withdrew to Paris and after some years spent in travel made his home in Holland from 1629 to 1649. He then accepted an invitation to join the court of Queen Christina of Sweden in Stockholm, where he became ill and died shortly after his arrival.

The *Compendium* is both a treatise on music and a study in methodology. In it Descartes shows himself to be a link between the musical humanists of the 16th century - he was influenced particularly by Zarlino, whom he cited - and the scientists of the 17th. The work is noteworthy as an early experiment in the application of an empirical, deductive, scientific approach to the study of sensory perception and as being among the earliest attempts to define the dual relationship between the physical and psychological phenomena in music.

Descartes divided music into three basic component parts, each of which can be isolated for study: the mathematical-physical aspect of sound, the nature of sensory perception and the ultimate effect of such perception on the individual listener. He considered the first of these to lend itself to pure scientific investigation,

since it is independent of personal interpretation. He characterized the process of sensory perception as being autonomous, self-regulating and measurable. This is the realm where practical aspects of music are dealt with (e.g. rules for counterpoint) and to which the great bulk of the *Compendium* is devoted. To Descartes the impact of sound on a listener's emotions or 'soul' is a subjective, irrational element and therefore incapable of being scientifically measured. He described it as a psychological-physiological phenomenon that clearly belongs to the areas of aesthetics and metaphysics (of which he was to develop the principles later in his philosophical writings).

Descartes was not to return to music as a topic for concentrated investigation after completion of his *Compendium*. However, that he continued to develop his ideas on musical subjects throughout his life is evident from his surviving correspondence, particularly that with his old friend in Paris, Marin Mersenne (where mutual influence is evident), and with the Dutch humanist Constantijn Huygens. Among his specific contributions to music theory the following are of note: an early concern with definition of period structure in musical form; an expression of the later theory of a conditioned reflex in animals; a hint at the theory of harmonic inversion; and a detailed review of the physical nature of sound.

ALBERT COHEN

Descaunt [descaunte]. See DISCANT.

Descamps, Emile (b Bourges, 20 Feb 1791, d Versailles, April 1871). French poet and dramatist. At a time when it was almost impossible to separate music from the art of singing, his services as a librettist were in constant demand. He produced singable texts for operas, *opéras comiques*, cantatas, romances, songs, tributes for festive occasions and translations from English, German and Italian; he even successfully rearranged *Don Giovanni* for performance at the Académie Royale de Musique (10 March 1834) after several failures by others. Girard claimed that Descamps was responsible in part for the introduction of Romanticism, in the form of dramatic and picturesque poetry, into French opera.

Descamps turned into verse Berlioz's prose for the dramatic symphony *Roméo et Juliette* (1826, published Paris, 1844). He helped Meyerbeer with the librettos of

his operas and provided the words of a special aria in *Robert le diable* for Mario's French début. When Scribe refused to rewrite the duet which concludes Act 4 of *Les Huguenots*, Meyerbeer begged Deschamps to collaborate with the tenor Nourrit in producing a more singable version. Ultimately this led to a retouching of practically the whole opera. At the première Scribe gleefully took credit for the opera's success, but as Alexandre Soumet wrote in a letter to Deschamps the next morning 'Scribe's glory was noisily proclaimed at the Opéra last night, dear friend, but yours was whispered knowingly from loge to loge like a lover's secret'. Deschamps prepared librettos for Niedermeyer's *Stradella* and de Beauplan's *Le mari au bal*, and wrote verses for innumerable songs and cantatas. He also translated about 50 of Schubert's lieder into French.

As a critic, Deschamps was totally dedicated to the preservation of the Italian bel canto style fostered by Rossini. He was acutely aware that the shortage of good singing voices in France was subtly transforming the Italian melody opera into the Romantic French grand opera, thus forcing Rossini into early retirement. His attempt to create the pastiche *Ivanhoe* out of fragments of four Rossini operas showed his regret at this change. Ironically, his creation was viewed in some quarters as the first attempt at a grand spectacle in the style of Meyerbeer. But he did not cease to contribute to its development with his librettos and poems, and he gave a most perceptive definition of this new operatic style. However, he steadfastly objected to the profusion of ballets and elaborate stage sets which he felt were detracting from the real purpose of opera by turning it into a spectacle. His famous dictum 'Exclusiveness is the curse of the arts' serves to confirm his catholic taste in music; he saw no reason not to appreciate the differing musical styles of Cimarosa, Schubert, Donizetti, Berlioz, Rossini and Meyerbeer. He was a regular visitor to Mme d'Agoult's salon where Liszt, Chopin, Hiller and Marie Pleyel provided keyboard entertainment, and at the soirées of Robert de La Sizeranne in which more modest performers, among them Amédée de Beauplan, Louis Niedermeyer and Pacini, took part.

Deschant [deschaunt, deschaunte]. See DISCANT

Discordato. See SCORDATURA

Descort. The standard Provençal term for 'lai'; see LAI, §1(i).

(Ger.). D \ddot{u} b; see PITCH NAMES.

Deshayes. The name of several French musicians and dancers of the 17th and 18th centuries, who may have been related to PROSPER-DIDIER DESHAYES.

Deshayes, André Jean-Jacques. Son of PROSPER-DIDIER DESHAYES.

Deshayes, Pierre Louis [*le fils*]. Son of PROSPER-DIDIER DESHAYES.

Deshayes [Des Hayes, des Hayes, Deshays], **Prosper-Didier** (b. mid-18th century; d. Paris, 1815). French composer, dancer and teacher. He first acquired fame as a dancer. He danced at least once at the Comédie-Française in 1762 and was ballet-master there by 1764; he was an *adjoin*t at the Opéra in 1774. In 1777 he made his début as a composer at the Concert Spirituel and during the following ten years his compositions were performed there 25 times – the fourth-largest number of presentations of works by a native composer in that period. He was dismayed by the foreign domination of French musical life and, in response to an unfavourable review of his oratorio *Les macchabées* (1780), wrote 'It is unfortunate for a French musician to have been born in his own country'. He was master of dance at the Ecole Royale de Chant from its establishment in 1784. After the Revolution he was employed by the National Treasury and, according to Duval, joined the National Guard, he was active again at the Opéra from 1801. His greatest work is *Zéla* (1791) on a libretto by Dubuisson based on Goethe's *Stella*; the *Almanach des spectacles* reported that 'In *Zéla* he has shown genius'. Duval said of him: 'Esteemed for his abilities and his character, he left few works and many friends'.

Deshayes' son, Pierre Louis Deshayes *le fils* (b. Paris, April 1771; d. Paris, 18 June 1791), was a student at the Ecole Royale de Danse et de Musique and a member of the Bataillon des Elèves de la Place de Louis XIV. Another son, André Jean-Jacques Deshayes (b. Paris, 24 Jan 1777; d. Batignolles, Paris, 19 Dec 1846) was a dancer and choreographer at the Opéra and a professor of *maintien théâtral* at the Paris Conservatoire from 1817. He wrote *Idées générales sur l'Académie royale de musique, et plus spécialement sur la danse* (Paris, 1822).

Several other musicians and dancers were named Deshayes, but no relationship has been established among them or with Prosper-Didier Deshayes. The first occurrence of the name in a musical context is a reference to Toussaint Deshayes, *trompette du roi* in the early 17th century. Campardon identified Jacques Deshayes with Joseph Dezaïs (fl. 1710–22), a choreographer at the Opéra who taught dancing and published collections of dances, but his claim has never been proved. A singer, dancer and choreographer named Des Hayes associated with the Comédie-Italienne has been traced by Briquet from the early 18th century to 1768. Claude Des Hayes, possibly his brother, was one of the 24 Violons du Roi from 1720 to 1746 and published sonatas for two flutes. A Mlle Deshayes, possibly his sister, was an actress at the Théâtre-Italien; L'Affichard's verse portraits of her appeared in the *Mercur de France* in 1743. Thérèse Boutinon des Hayes became the first wife of La Pouplinière in 1737. Jean-François Deshayes (or De Hesse) was an actor and later a choreographer active at the Comédie-Italienne and the court. Jean-Baptiste Deshayes-Saloman made string instruments in Paris about 1740–80 and was probably the *maître de harpe* who became a freemason in 1788. Pierre-Edme Deshays, 'professeur de musique', is listed among the freemasons in 1789. Lyonnet listed several 19th-century actors named Deshayes.

MICHAEL BARNARD, MARY HUNTER

Deshevov, Vladimir Mikhaylovich (b St Petersburg, 11 Feb 1889, d Leningrad, 27 Oct 1955). Russian composer and teacher. He studied the piano and composition at the St Petersburg Conservatory under Winkler, Nikolayev, Lyadov, Kalafati and Shteynberg (1908–14). After war service he was secretary of the people's music education committee in Elizavetgrad (1917–19), founder of the Sevastopol Conservatory (1920) and director of the Ukrainian music college network (1922). In Leningrad from 1923 to 1933 he worked as a teacher at technical music schools and as a theatre music director. Music for the theatre was Deshevov's central concern as a composer; the opera *Lyod i stal* ('Ice and steel') was compared with Shostakovich's *The Nose* and Knipper's *The North Wind*, but it met with no initial success. His compositions range from linear, diatonic pieces in the manner of Honegger and Prokofiev to mechanistic chromatic constructions and machine-like music, such as *Relsi* ('Rails') for piano.

WORKS

Desideri, Girolamo (b Bologna, c1635; fl 1671). Italian philosopher and mathematician. He was a Doctor of Laws and a member of several academies. *Prose di Signori Accademici Gelati di Bologna* (Bologna, 1671) contains (pp 321–56) a discourse by him, *Della musica* in which he discussed musical instruments and their inventors. Three letters from him to Pertti are extant (in I–Bc).

De Silva [Sylva], Andreas (b c1475–80) ?Spanish singer and composer. He should not be confused with Andreas Sylvanus. It seems probable, on stylistic grounds, that he received his early musical training in the circle of the French court and later in northern Italy. In 1513 he wrote the motet *Gaude felix Florentia* on the occasion of the election of Pope Leo X. De Silva joined the large circle of musicians retained by Leo in Rome: in 1519 and 1520 he was recorded as 'cantor et compositor' of the papal chapel and as 'cantor secretus' of the pope's private chapel. He probably stayed in Rome until shortly before the recorded payment from the Duke of Mantua in December 1522; extant sources suggest that he was still alive and in Italy at the end of the decade.

De Silva was held in extremely high regard, particularly while under the patronage of Leo and the Medici family. As late as 1567 Cosimo Bartoli, in his *Ragionamenti accademici*, described the composer as one of Josquin's successors 'who taught the world how music should be written'. De Silva's main creative period appears to lie between 1510 and 1530. With Carpentras, Verdelot, Divitis, Févin, Costanzo Festa and Stoltzer, he belongs to the generation which formed the historical link between the French development of the late 15th-century Netherlands style typified by Josquin and Mouton, and the more modern school around Willaert, Morales and Gombert. Within this intervening group de Silva emerges as an original composer who adapted many local stylistic influences. In his compositions the technical aspect is concealed by a notable sense of sonorosity and expressive treatment of the text. His compositional style is characterized by a

relatively simple technical structure: a straightforward, strongly expressive melody which tends towards declamation, an expressive harmonic sense, and an overall formal design which is always clear. With his decidedly individual, extrovert style, de Silva was a musician who understood the signs of the new era; in some pieces such as *Omnis pulchritudo*, his sense of new developments leads towards an adventurous exploratory style. In a relatively small output, he left behind at least a few pieces (e.g. *Omnis pulchritudo*, *Illumina oculos meos* and *Ave regina caelorum, ave domina angelorum*) which can be numbered among the best works in the corpus of early 16th-century religious vocal music.

WINFRIED KIRSCH

Deslins [Deslius], **Joannes** [Johann] (fl mid-16th century). Composer. According to Eitner, he may have been active in Germany, possibly in Dresden, an offertory is to be found in *D-Dkh*. Deslins's published works, two four-voice motets, appear in Pietro Joaneli's *Novi thesauri musici*, books 1 and 3 (Venice, 1568). Most of

the composers in this collection were singers in the emperor's chapel, although a few were attached to the court of Duke Albert of Bavaria; many of their works, like those of Deslins, are unique to the collection. (One of the motets is also found in *PL-WRu*.) Mendel, who used the spelling Deslius, suggested that the composer was known in France as Deslougues, and that he may have been confused with Philippe Deslougues (Verdelot).

Deslougues, Philippe. See VERDELLOT, PHILIPPE.

Des Marais, Paul (b Menominee, Mich., 23 June 1920) American composer and teacher. He studied composition with Leo Sowerby in Chicago and attended Harvard University (BA 1949, MA 1953), where he continued his studies with Nadia Boulanger and Walter Piston. From 1960 he taught at the University of California at Los Angeles, later becoming professor of music. His awards include a Thorne Award from 1970 to 1973, and a grant from the Institute for Creative Arts.

The neo-classical language of his early music tended later towards a quasi-diatonic serialism in which ostinatos play a major role in the delineation of pitch centres. In both his opera *Epiphanies* (1964-8), and his setting of excerpts from *Le cimetière marin* (1971), whose set is derived from a passage in Monteverdi's *Orfeo*, clear textures and simple pitch contexts are deliberately cultivated to permit full play in the setting of the texts. Des Marais's later works include *Reflections on Faure* for solo voice and piano, on poems by E. E. Cummings, *Organum* for mixed voices, organ and percussion, *Two Movements* for two pianos and four percussion (1972), *Mass for the Seminarians* for voices, organ and percussion and *Four Drawings* for soprano and piano or celesta (1973).

RICHARD SWIFT

Desmarets [Desmarest, Desmarestz, Desmarais], **Henry** (b Paris, Feb 1661, d Lunéville, 7 Sept 1741) French composer.

1. LIFE. Although Titon du Tillet mentioned his precocity ('never has genius given more prompt evidence of its presence'), we know little of Desmarets' early musical training. In his dedication of *Circé* (1694), he wrote that he had served his monarch 'from my earliest youth'. This referred to his career until 1678 as boy soprano in the Paris royal chapel where he became a disciple and perhaps a student of Lully. In 1683 Louis XIV ordered two new and two vacated positions as *sous-maître* at his chapel to be filled by competition. Du Mont and Robert had just retired. Desmarets was one of 15 finalists. His composition (now lost) was 'one of the most beautiful . . . but the King thought him too young to hold one of the appointments . . . and gave him a 900 *livre* pension instead' (Titon du Tillet).

Desmarets maintained close association with the court. He composed an *Idylle* (lost) for the birth of the Duke of Burgundy. His first opera, *Endymion* (also lost), was performed at Versailles in February and

March 1682. His work was heard at the royal chapel for over a decade through his *sub rosa* composition of motets for Nicolas Goupillet to offer as his own. Goupillet, a mediocre composer from Senlis who had been one of the 1683 winners, possibly due to the influence of Robert and Bossuet, was dismissed when the ruse was discovered in 1693. About 1692 Desmarests taught music to the Duke of Chartres, the future regent, and with *Didon* he made a successful début in 1693 at the Paris Opéra. Perhaps through Charpentier, he was appointed *maître de chapelle* at the Jesuit college of Louis-le-Grand where he contributed to the composition of *intermèdes* for Latin tragedies.

After his first wife's death in 1696, Desmarests became involved in an amorous imbroglio with his student, Marie-Marguerite de Saint-Gobert. She was a daughter of the director of taxation for the district of Senlis, who did not approve of Desmarests' attentions. In a cloak-and-dagger affair that yielded such literary conceits as banishment to a convent, disguises and a long and involved trial, Desmarests, under pain of death, escaped on 5 August 1699 with Mlle de Saint-Gobert to Brussels, to begin his long years of exile.

He had hoped to serve Maximilian-Emmanuel of Bavaria, governor-general of the Low Countries for Charles II of Spain, but Maximilian left Brussels soon after Charles's death in November 1700. Jean-Baptiste Matho, with whom Desmarests had served in the royal chapel, succeeded in obtaining a recommendation for Desmarests from the Duke of Burgundy to his brother, Philip V, the new King of Spain. In June 1701 Desmarests became *maître de musique de la chambre* in Madrid, and on 5 September that year he married Mlle de Saint-Gobert. An almost continuous state of war, the growing popularity of Italian music in Spain and, according to Brossard (*Catalogue*), the jealousy of the Spanish contributed to Desmarests' readiness to become *surintendant de la musique* for Leopold I, Duke of Lorraine. The Count of Brionne, who had known Desmarests in France, recommended him for this post, which paid him 2000 livres annually.

Desmarests arrived in Lunéville, seat of the ducal court, in April 1707 and immediately expanded the musical activities there. He was responsible for the music of the court theatre, chapel and chamber, a situation which stimulated him to compose both sacred and secular music.

Desmarests' name was kept alive in France by Matho, the Count of Brionne and others. His airs appeared in Ballard's collections; his *Iphigénie en Tauride* was performed at the Paris Opéra in 1704, and Philidor published his *grand motet*, *Cum invocarem*, in 1714. Campra and his librettist, Danchet, completed this *tragédie lyrique* which Desmarests had left unfinished when he fled, and it enjoyed many revivals up to 1762. In October 1720 the regent, a brother of the Duchess of Lorraine, pardoned Desmarests. Two years later, Louis XV restored the pension originally given to the composer by Louis XIV.

Desmarests wanted to end his professional life at the royal chapel, where he had begun it almost 60 years earlier, and tried to obtain an appointment as *sous-maître* after Lalande's death in 1726. He was however disappointed, and returned to Lunéville where, after his second wife's death in 1727, his last years were spent with Elisabeth-Madeleine, the daughter of his first marriage.

2. WORKS. *Airs sérieux* and *airs à boire*, divertissements, stage ballets, *pièces d'occasion* and *tragédies lyriques* constitute the bulk of Desmarests' secular music. Like most *tragédies lyriques* before Rameau, those of Desmarests suffer from poor librettos and too great a subordination of the drama to the totally decorative divertissements of songs and dances; yet, in common with similar works by Campra and Destouches, extracts, such as the 'Tempeste' from *Iphigénie* and 'Tremble, tremble', an accompanied bass recitative from the same work, reveal a more expanded harmonic language, more sophisticated orchestration and more flexible, singing recitative than is found in Lully's operas.

By training and, it seems, by inclination, Desmarests would have been ideally suited to work with Lalande at the royal chapel. Of all Lalande's contemporaries, he was best able to fill the large dimensions of the *grand motet* with convincing music. The influence of Lalande may be clearly seen in such a work as the *De profundis*. The four psalm settings written about 1707 for the chapel of the Duke of Lorraine are massive works, each averaging over 100 pages. They contain elaborate solo arias and 'operatic' trios for two sopranos and counter-tenor alongside weighty homophonic choruses in the style of Lully and choruses (or ensembles) of finely-wrought polyphony closer in spirit to the later motets of Lalande.

WORKS

(all printed works published in Paris unless otherwise stated)

TRAGÉDIES LYRIQUES

(all in prologue and 5 acts)

- Indymon, Versailles, 16 March 1682, lost
 Didon (de Saintonge), Paris Opéra, 11 Sept 1693, Symphonies de la Didon (1693)
 Circé (de Saintonge), Paris Opéra, score (1693), symphonies (1693), Oct 1694, score (1694)
 Theagène et Cariclé (Duché de Vancy), Paris Opéra, 3 Feb 1695, score (1695)
 Vénus et Adonis (J. B. Rousseau), Paris Opéra, 17 March 1697, score (1697)
 Iphigénie en Tauride (Duché de Vancy, Danchet), addns by Campra, Paris Opéra, 6 May 1704, extracts (1704), complete (1711)
 Prologue for Lully's *Armide*, Lunéville, 15 Nov 1710, only lib extant
 Diane et Indymon (de Saintonge), Nancy Opéra, Jan 1711, music lost, attrib. Desmarests
 Renaud, ou La suite d'*Armide* (Pellegri), Paris Opéra, 5 March 1722, score (1722)

JAMES R. ANTHONY

Desmazures [Desmasures], **Laurent** (b. Marseilles, 10 Nov 1714, d. Marseilles, 29 April 1778). French organist and composer. He was organist of the abbey in Moissac in 1737 and organist of the Cathedral of St Lazare d'Autun from 1750 to 1752 but not, as is generally thought, organist at Albi Cathedral. He may be identifiable with the Desmazures who was organist at the church of St André, Bordeaux, from 1752 to 1755. In 1758 he succeeded François Dagincour as organist of Notre Dame Cathedral, Rouen, and from 1777 was organist at the church of St Ferréol in Marseilles. Desmazures was famous for his great memory and his virtuosity at the organ despite the loss of three fingers of his left hand in a hunting accident, he was able to use false fingers which served as well as his own. Desmazures' *opéra-ballet* in one act with a prologue, *Les fêtes de Grenade*, was performed at the Dijon Academy of Music on 12 January 1752. He died of an apopleptic fit while playing the organ at St Ferréol.

His father, Charles Desmazures (b. 1670; d. Marseilles, 13 Feb 1736), was organist at Marseilles Cathedral when he published a collection of *Pièces de symphonies à quatre parties pour les violons, flûtes et hautbois rangées en suites sur tous les tons* (1702); these were composed on the occasion of a visit to Marseilles by Marie-Louise of Savoy, Queen of Spain, and are dedicated to her. Each of the seven suites opens with an overture followed by dances and character-pieces.

GUY BOURLIGUEUX

Desmond, Astra (b. Torquay, 10 April 1893; d. Faversham, 16 Aug 1973). English contralto. She studied singing in London (at the RAM, under Blanche Marchesi) and Berlin, and gave her first recital in London in 1915. Although she made some operatic appearances with the Carl Rosa Company, at Covent Garden and at Glastonbury, where she was the first to sing the title role in Rutland Boughton's *Alkestis*, she made her career mainly as a concert and oratorio singer. From 1920 she was closely associated with Elgar's choral works at the Three Choirs festivals and elsewhere; her rich and flexible voice, coupled with rare qualities of restraint and intelligence, made her an outstanding interpreter of the part of the Angel in *The Dream of Gerontius*. The same virtues distinguished her intelligently planned song recitals and British music lovers owe her a debt of gratitude for her serious studies of Scandinavian song, in recognition of which she was awarded the Norwegian medal of St Olav. She was the first to introduce the songs of Kilpinen to English audiences, and gave numerous recitals of Grieg's songs in the original Norwegian, besides recording several of them (and much Purcell). To symposium volumes on Dvořák (1942), Sibelius (1947) and Grieg (1948) she contributed valuable studies of the songs of these composers, and to the BBC Music Guide series a short monograph, *Schumann Songs* (London, 1972). In 1920 she married Sir Thomas Neame. She was made a CBE in 1949.

DESMOND SHAW-TAYLOR

Desmond [Breitenfeld], **Paul** (b. San Francisco, 25 Nov 1924, d. New York, 30 May 1977). American jazz alto saxophonist. He studied the clarinet at San Francisco State University and played in various groups before joining the Dave Brubeck Quartet in 1951. Because his career was almost solely with this group until its dissolution in 1967 he shared its success without receiving the recognition that was his due. Desmond was one of the most capable representatives of the 'cool' tendency in alto saxophone jazz, of which Lee Konitz was the chief exponent, and that Lester Young, Benny Carter and others had foreshadowed in the late 1930s. His tone had a luminous quality, consistent over the instrument's whole range, that was particularly reminiscent of Carter, but his most notable gift as an improviser was his power of sustained melodic invention, which depended in part on an unusually imaginative use of sequence. Desmond's independent recordings, with Gerry Mulligan or Jim Hall for example, do him more justice than his numerous ones with Brubeck, for whom he composed the popular *Take Five* in 5/4 time.

Desolre. The pitch *d* in the HEXACHORD system.

Desormery [Desormerie], **Léopold-Bastien** (b. Bayon, Lorraine, c.1740; d. nr. Beauvais, c.1810). French opera composer, singer and actor. According to Fétis he studied music at the archiepiscopal school of Nancy. By 1762 he was active as a singer and composer in Lyons.

where his pastoral *La bergère des Alpes* was performed in the following year. By 1764 he was a *pensionnaire* of the Lyons opera; in 1765 he served on the staff of a small music school there. He was also a musician at Lyons Cathedral and sang comic parts in Mâcon. By 1770 he had become a *comédien* in Strasbourg, and that year a motet by him performed at the Parisian Concert Spirituel brought him its annual prize for 'musique latine', which he shared with Hautemur. He then moved to Paris and was an actor at the Théâtre-Italien from about 1774 to 1778. During these years he also sang in and wrote sacred works for the Concert Spirituel, and in quick succession composed several stage works, including *Euthyme et Lyrus* (1776, 22 performances) and the highly successful *Myrtil et Lycoris* (1777, 63 performances) for the Opéra. Unable to repeat his former successes he abandoned his artistic career and devoted himself to teaching, retiring to the vicinity of Beauvais. Shortly before his death he attempted another theatrical work, but it was not performed.

Desormery's son Jean-Baptiste (-Léopold-Bastien) Desormery (b Nancy, 1772; d after 1813) was a successful pianist (a student of Hüllmandel) and also published virtuosic and didactic works for the piano, including several sonatas and a set of 24 studies op 19

ROGER COTTE

Desormière, Roger (b Vichy, 13 Sept 1898; d Paris, 25 Oct 1963). French conductor and composer. He studied at the Paris Conservatoire and with Koehlin; he made his conducting début at the Concerts Pleyel in 1921 while working as a flautist in Paris orchestras. An associate of Sauguet and others in the Ecole d'Arcueil, and of Les Six, he conducted the premières of Milhaud's *Salade* and Satie's *Mercury* for ballets by Massine given in 1924 at the Soirées de Paris, arranged an anthology of Johann Strauss for Massine's *Le beau Danube* the same year, and composed incidental music for Cocteau's very abridged production of *Romeo and Juliet*. He became conductor for the Paris-based Ballets Suédois, 1924-5,

and for Dyagilev's Ballets Russes from 1925, appearing with the company in London, Milan, Vienna and elsewhere, and conducting a varied repertory including works by Auric, Poulenc, Prokofiev and Stravinsky. The company disbanded after Dyagilev's death in 1929 and Desormière toured as a guest conductor in Europe and the USSR, acquiring a wide reputation for his perceptive and persuasive performances of both contemporary and pre-Classical music. As director of the Société de Musique d'Autrefois from 1930 he edited and performed many lesser-known works by Campra, Lalande, Rameau and others, and collections of Renaissance music, some of which were later published and recorded. A resident conductor at the Opéra-Comique from 1937 (where he added works by Chabrier, Ravel and Richard Strauss to the repertory), he served as the theatre's director, 1944-6, and additionally as associate director at the Opéra, 1945-6. He conducted the première of Poulenc's *Les animaux modèles* for Lifar's ballet in 1942, and was much admired for his sensitive performances of Debussy's *Pelléas et Mélisande*, which he also conducted at Covent Garden in 1949 during a visit by the Opéra-Comique company. In the postwar period Desormière was one of the founders of the Association des Musiciens Progressistes, and helped to chart newer trends in music with performances of works by Messiaen and Boulez, including the first version of the latter's *Le soleil des eaux* (1950). With Denise Mayer he organized concerts of 17th- and 18th-century music at Versailles, and he composed a quantity of music for films. He had been a frequent participant in festivals of the ISCM, but the onset of an aphasic disorder in 1950 forced his premature retirement.

NOËL GOODWIN

De Sousa, Filipe (b Lourenço Marques, Mozambique, 15 Feb 1927). Portuguese musicologist and conductor. He took a degree in classical philology at Lisbon University and studied the piano (diploma 1947), conducting (diploma 1952) with Jorge Croner de Vasconcelos at the Lisbon Conservatory; he also studied conducting with Fritz Lehmann in Munich (1954-5), Hans Swarowsky in Vienna (1957) and Albert Wolff in Hilversum (1957). During his ten years as director of Portuguese television music department (1959-69) he also taught composition at Lisbon Conservatory (1963-7). Besides conducting concerts and operas in Portugal and abroad (Brazil 1966 and 1971, USSR 1969), he has done much research, discovering several 18th- and 19th-century Portuguese manuscripts which he has reconstructed and revised. These include *As variedades de Proteu* (1737) and *Guerras de Alecrim e Mangerona* (1737) by António Teixeira (the earliest known operas in Portuguese), João Pedro de Almeida Mota's *Passion*, the overture to João de Sousa Carvalho's opera *L'amore industrioso* and Domingos Bontempo's First Symphony. De Sousa's *Dicionário da música portuguesa* is in preparation.

ASTA-ROSE ALCAIDE

Dešpalj, Pavle (b Blato, Korčula, 18 March 1934). Yugoslav conductor and composer. In 1960 he completed his studies in composition with Šulek at the Zagreb Academy of Music. He was chief conductor of the Zagreb RSO from 1962 until 1967, when he moved to the USA, first as a violinist and later as principal conductor of the Florida SO, Orlando. Dešpalj founded the summer festival in Zadar in 1961 and the Belgrade Chamber Orchestra in 1966, directing it until 1972. In that year he was appointed permanent guest conductor of the Chicago Grant Park summer concerts. His music bears witness to the breadth of his interests and to his particular affinity with the Baroque. His finest piece is the Saxophone Concerto, but the development of his conducting career left him less time for composition in the later 1960s.

KREŠIMIR KOVAČEVIĆ

Desplanes, Jean-Antoine. See PIANI, GIOVANNI ANTONIO.

Desportes, Philippe (b Chartres, April or May 1546, d 5 Oct 1606). French poet. From 1562 he was described as 'clerc au diocèse de Chartres'. He may have gone to Italy and in 1567 he was in Paris. At the end of 1573 he went with Henry of Valois, Duke of Anjou, to Poland. After Henry was made King of France in 1574 he gave Desportes several benefices, and for the rest of the king's life Desportes enjoyed his favour. Desportes was a follower of the Pléiade but was also a fervent admirer of Italian literature, borrowing freely not only from Petrarch but from 16th-century poets including Tasso, Tebaldeo, Sannazaro, Bembo and Ariosto. At Henry's court he satisfied the prevailing taste for simpler strophic forms and a more refined, mellifluous style. His *Premières oeuvres* appeared between 1573 and 1583, but as the religious wars intensified he forsook secular poetry to follow the path of Clément Marot and Baif in making verse translations of the psalms, which were published between 1591 and 1603.

Desportes' lyrical work abounds in musical imagery like that of the Pléiade, usually using conventional metaphors. He wrote an epitaph for the castrato Brevet, but his surviving poetry mentions no other contemporary musicians, though he knew the composer Denis Caignet, a protégé of the Villeroy family, who were closely acquainted with the poet. According to a Latin poem by Nicolas Rapin, Desportes' funeral was attended by ten musicians, including Robert Ballard, Eustache Du Caurroy, Jacques Le Fevre, Mauduit and Guédrón.

In the *air* and chanson collections published during the last quarter of the 16th century Desportes' poetry was set more frequently than that of any of his contemporaries, although it never rivalled Ronsard's popularity among the musicians of the previous generation. Verchaly has identified 74 texts set by more than 40 composers between 1579 and 1650. Three settings by Nicolas de La Grotte (1569), one by Costeley (1570) and one by Goudimel (before 1573) antedate the first published edition of Desportes' verse, and his name is particularly mentioned on the title-page of Didier Le Blanc's first book of *airs* (1579). A few composers (Caeitain, Le Jeune, Sweelinck and others) set Desportes'

sonnets, usually in stanzas rather than as continuous through-composed chansons. However, as the sonnet declined in favour at the end of the century, composers turned to the simpler forms. They were usually set either as four- or five-part homophonic pieces (e.g. by Beaulieu, Du Caurroy, Le Jeune and Guillaume Tessier) or as solo *airs* to the lute (e.g. by Ballard, Baraille, Besard and others). His translations of the psalms were set monophonically by Caignet (1624), who also composed 50 polyphonic settings (1607) and 50 for voice and lute (1625). A similar group of 50 polyphonic settings by Signac was published in 1630. The fashion for Desportes' verse continued until about 1635, by which time Malherbe's clear language had affected not only the *air de cour* but the psalm, so that new translations by Antoine Godeau supplanted Desportes'. A few odd settings survive from the late 17th and the 18th centuries, including three different versions of the chanson *O bien-heureux qui peut passer sa vie* by Jean-Jacques Rousseau (*Les consolations des misères de ma vie*, Paris, 1781, pp 25ff). 19th-century settings are rare: Victor Massé's *Chants d'autrefois* (1849–50) include *Icare* and *Une fontaine* set as *scènes*.

FRANK DOBBINS

Desportes, Yvonne (Berthe Melitta) (b Coburg, Germany, 18 July 1907). French composer. She studied under the Gallons and Dukas at the Paris Conservatoire, winning the Prix de Rome in 1932. In 1943 she returned to the Conservatoire to teach solfège, and in 1959 she was appointed to teach counterpoint and fugue there. Large-scale choral and orchestral pieces form a large part of her output, much of which (particularly the concerto *Le tambourneur*) makes notable use of the percussion.

ALAIN LOUVIER

Despotikon. A Byzantine hymn in which the Lord is praised and invoked.

Desprésaux, Jean-Etienne (b Paris, 31 Aug 1748; d Paris, 26 March 1820). French dancer, composer and administrator, brother of Louis Félix Desprésaux. His father, Jean-François Desprésaux (b c1693; d Paris, 1768), was an oboist and possibly a flautist, active at the Opéra and the Concert Spirituel; a brother, Claude-Jean-François Desprésaux *l'aîné* (b mid-18th century; d Paris, 11 Aug 1794), was a violinist who, according to Fétis, composed sonatas for the violin and harpsichord. Jean-Etienne was a dancer at the Opéra from 1764 until 1781, when he retired with a pension; he returned briefly as a *directeur de la scène* in 1792. His major

works are parodies of popular operas by F.-A. Philidor, Piccini, Rameau, Boieldieu and others. Despréaux and the dancer Marie-Madeleine La Guimard performed together in these pieces and were married in 1789. He was later an inspector at the Opéra and taught *mantien* and dancing at the Conservatoire from 1807 to 1815. During this time he invented a chronometer 'which is able to fix precisely the time of each measure'; in explanation he published a *Nouveau chronomètre musical établi sur des bases astronomiques* (Paris, 1813). He may have been the Despréaux who, on attending an opera at Versailles, asked for a seat where he could hear the music but not the words, because 'I greatly esteem the music of Lully, but have contempt for the verses of Quinault' (*Almanach des spectacles*, 1772).

WORKS

(all printed works published in Paris)

- Parodies (libris by the composer) Romans, after Piccini; Roland, Versailles, 30 May 1778 (?1778), Mome, after Gluck; Iphigénie en Aulide, Choisy, Aug 1778 (1778), Berlingue, after F.-A. Philidor; Ernelinde, Choisy, 13 Sept 1778 (1778), Christophe et Pierre-Luc, after Rameau; Castor et Pollux, Versailles, 1780 (1780), Syncope, reine de mic-mac, after Piccini; Pénélope, Versailles, 31 Jan 1786 (1786), Jenesaiki, ou Les exaltés de Charenton, after Boieldieu; Bemowski, Paris, Vaudeville, 21 June 1800, collab. R. A. de Chazet, M. Dieulafoy, P.-Y. Barré, La tragédie au vaudeville, after J.-F. Ducis; Otello, and other plays, Paris, 18 March 1801, collab. 7 others.
- Other vocal Prologue pour l'ouverture du Théâtre de Trionon (Despréaux), 1780, Mes passe temps, chansons suivies de l'art de la danse (1806), others.

MICHAEL BARNARD

Despréaux, Louis Félix, *le cadet* (b. Paris, 17 April 1746, d. Paris, 1813). French violist, keyboard player and composer, brother of Jean-Etienne Despréaux. He joined the Opéra orchestra as a violist in 1765, played the viola and keyboard at the Concert Spirituel in 1768 and was accompanist to the royal singing school in the same year. His *Cours d'éducation de clavecin ou piano-forte*, published in five parts (Paris, c.1785), is one of the earliest piano methods; it includes his own compositions, as well as works by Gluck, Exaudet and Grétry, and was published in many editions. His other compositions comprise several sonatas for the harpsichord or piano (some with violin or flute accompaniment), *La bataille de Fleurus* for piano and violin, and piano arrangements of *airs*, *ariettes*, overtures and dances.

MICHAEL BARNARD

Desprez, Josquin. See JOSQUIN DESPREZ.

Desprez, Louis-Jean (b. Auxerre, 9 Jan 1742; d. Stockholm, 17 March 1804). French stage designer, architect and engraver. He studied in Paris with J.-F. Blondel and Pierre Desmaisons and from 1771 taught at the Ecole Militaire. He won the Académie's Grand Prix de Rome in 1776 and lived from 1777 in Italy, where he made many drawings from nature for Richard de Saint-Non's *Voyage pittoresque de Naples et de Sicile* (1781–

5); he was in Rome from 1779, and often worked as a scene painter at the Teatro Aliberti. In 1784 he was summoned to Stockholm by Gustav III as scenic director at the Royal Opera House; as a stage designer, artistic director of court festivals, an authority on architecture and a member of the Swedish Academy, he exerted a powerful influence on Sweden's cultural development until the death of his employer in 1792. During a stay in London (1789) he sketched plans for the rebuilding of the Italian opera house, the King's Theatre, which had been destroyed by fire.

Desprez' work on the *Voyage pittoresque* had aroused his interest in the history and cultural traditions of antiquity and the Middle Ages and had revealed his mastery of the depiction of effect-laden romantic landscapes. This was reflected in his designs for more than 15 opera productions: they rejected the academic classicism of his French teachers, admitted the influence of contemporary Italian stage design and supported Gustav III's endeavours to establish a Swedish National Opera. His designs for J. G. Naumann's national historical opera *Gustaf Wasa* (1786) show him to have been an important innovator for the operatic stage: his atmospheric landscapes and architectural compositions, his effective tableaux and his emotionally expressive crowd scenes anticipated principles of stage design that were to be a feature of Romantic opera (see illustration overleaf).

MANFRED BOETZKES

Despuig, Guillermo. See PODIO, GUILLERMO DE.

Desquesnes, Jean (fl. 2nd half of the 16th century). Flemish singer and composer. He was in service at the court of Margaret of Parma, Governess of the Netherlands. Thanks to her mediation, he obtained a prebend at Turnhout in 1580 after the death of Gérard de Turnhout. A Jean Dequesne is mentioned in the accounts of Duke Ernest, Governor of the Netherlands, but in view of the date (1630) he is unlikely to have been the same person. Of Desquesnes' two books of madrigals, only one now survives: *Madrigali ... il primo libro a cinque voci* (Antwerp, 1594). The other (also for five voices) was published in 1603.

P. ANDRIESSEN

Dessau. Town in the German Democratic Republic, formerly capital of the state of Anhalt. Documents

Design by Louis-Jean Desprez for J. G. Naumann's opera *'Gustaf Wasa'* (1786), in the National Museum, Stockholm

indicate that sacred music was cultivated there between the 12th and 16th centuries, subsequently, however, religious quarrels between Lutherans and Calvinists inhibited musical culture, both in the church and in schools. However, a tradition of choral singing grew up, until the choristers were disbanded in 1809. During the 19th century the town churches were served by the ducal choir, which was formed by the combination of the choral union of 'Operists' with members of the theatre choir and schoolboys.

Court music did not flourish until the late 18th century, under Prince Leopold Friedrich Franz (1751-1817). In 1766 a court chapel was founded, under the direction of Friedrich Wilhelm Rust, who also taught music at the 'Philanthropin' institute of education, founded in 1774. With his colleagues there, members of the court and citizens, Rust performed the first opera in Dessau, Anton Schweitzer's *Elysium*, in 1775. In 1794 an opera company conducted by F. W. Bossann began mounting regular performances, held after 1798 in the new theatre, designed by Erdmannsdorf, which rivalled the court theatres at Berlin and Munich in splendour. The 30 members of the chapel and its chorus built up an excellent reputation. In 1821 Heinrich Schneider became Kapellmeister and further raised the artistic standards of the chapel and the theatre. He founded a Singakademie and was also active as an organist and conductor of a male-voice choir.

Up to the mid-19th century, when nearby Leipzig developed as a musical centre, Dessau was considered one of the main musical centres of Germany. Schneider's successor was Eduard Thiele, Wagner's predecessor as Kapellmeister in Magdeburg, who became Kapellmeister in Dessau in 1865 and in 1869 produced *Die Meistersinger*, soon after its première in

Munich. This earned him the good will of Wagner, who, after attending a performance of Gluck's *Orfeo* in Dessau in 1872, wrote that he 'had never experienced a more noble or more perfect whole performance'. A lasting Wagner tradition grew up, and singers from Bayreuth performed as guests at the 'Bayreuth of the North', as Dessau was often called. Franz Mikorey, a pupil of Hermann Levi, followed August Klughardt (1882-1902) as Kapellmeister and continued this tradition in collaboration with the drama critic Artur Seidl, with the enthusiastic support of Duke Friedrich II until 1919. During the period 1918-22 Knappertsbusch conducted in Dessau and was followed by other capable conductors.

From 1952 music in Dessau was under the direction of Ernst Rottger and was centred on the restored Landestheater (capacity 1250). Amateur choirs and other ensembles are active in the town, which is increasingly merging with the industrial districts of Halle and Bitterfeld, with which it maintains cultural contacts.

HORST SEEGER

Dessau, Paul (b Hamburg, 10 Dec 1894; d East Berlin, 28 June 1979). German composer and conductor.

1. LIFE. The grandson of the synagogue cantor Moses B. Dessau, he began violin lessons at the age of six and appeared as a soloist when he was 11. He studied the violin under Zajic at the Klindworth-Scharwenka Conservatory, Berlin (1910-12), but then opted for a conducting career, studying privately with Eduard

Behm (piano and score reading) and Max Loewengard (composition) in Hamburg, where in 1912 he took a post as coach at the Stadttheater. In Hamburg he was able to study the art of the great interpreters of the period: Nikisch and Weingartner were particularly important to him. He conducted operettas at the Bremen Tivoli Theatre in 1914; then he served in the army for three years during the war, after which he was appointed music director and composer at the Hamburg Kammerspiele Theatre. In 1919 Klemperer engaged him as a coach and conductor at the Cologne Opera, in 1923 he moved to a similar position in Mainz, and in 1925 Walter appointed him principal conductor at the Städtische Oper, Berlin.

During the 1920s Dessau began to work as a music director and composer for the cinema, and at the same time his concert music became better known: the Concertino was played at Donaueschingen in 1925, and the Symphony no. 1 had its first performance under Steinberg in Prague in 1927. Dessau moved to Paris in 1933, and there he gained the political insight that was to shape his thinking; there too he met Leibowitz and made a study of 12-note music. He moved to the USA in 1939, working for a time as a music teacher in a New York children's home. In 1942 came the meeting with Brecht, which marked the beginning of a long collaboration (Dessau had already composed the songs for the Paris première of *Furcht und Elend des Dritten Reiches* in 1938). Their first joint efforts were songs and choral pieces (such as the *Deutsches Miserere*) on issues of the day. In order to remain in close contact with Brecht, who lived in Santa Monica, Dessau settled in Hollywood, also composing for films. There he wrote the music for *Mutter Courage und ihre Kinder*, the most popular of the Brecht-Dessau works. In 1948 Brecht and Dessau returned to Germany and settled in East Berlin, the partnership continued with songs, choruses, theatre music and the opera *Die Verurteilung des Lukullus*, first performed at the Deutsche Staatsoper, Berlin, under Scherchen in 1951. Dessau was appointed in the next year to the German Academy of Arts, where he was made vice-president and professor in 1959; he resigned from the West Berlin Academy of Arts in 1968. Living in Zeuthen, near Berlin, he directed a music class in the upper school there from 1960. Among his honours were four awards of the DDR National Prize (1953, 1956, 1965, 1974) and the National Order of Merit of the DDR (1964).

2. **WORKS.** Although he had already won recognition with the Concertino (1924), which won a Schott Prize, and with songs, cantatas, children's pieces and film scores, Dessau's work acquired an unmistakable definition and a conscious political slant only from the time of his collaboration with Brecht. Even before this his social views had been progressive, and he had been striving in his music for a genuine expressiveness and clear, coherent construction; the expressionist influences of his early works had given place to explorations of 12-note technique and to a preoccupation with Jewish folk music. Dessau himself, however, described his contact with Brecht and with Brecht's ideas as decisive, as the start of an artistic alliance which continued beyond Brecht's death in 1956.

The encounter altered Dessau's ideological conceptions, in that he came to use Marxist dialectics as a working method. This involved not only colouring

events but emphasizing social background factors through contrived contradictions that must be resolved by the listener, provoking him into concern and generating a political awareness. The music was not to override the text, nor to be merely subservient or illustrative: its function was to interpret and to take a clear stand. Dessau's works – the stage music, the major operas, the songs, cantatas and oratorios – are related to their texts in a manner that follows these principles and derives also from Brecht's alienation technique. An avowed socialist, passionately involved in current issues, he sought always to intervene, change, improve and inform, applying his methods with a forceful mastery – not least in the field of opera, which he regarded as 'the most powerfully expressive genre with which to highlight artistically the social problems of our time'. In particular the two Brecht operas show the highly idiosyncratic quality of his work, at once naive and cryptic, complicated and straightforward, critical and pleasing, aggressive and approachable. Each is quite individual: the richly inventive *Lukullus* is probably more typical of his dramatic music than the technically polished *Puntilla*. It has also been his most successful opera internationally, having been given in more than 15 productions, and its challenging realism makes it a very effective piece both dramatically and musically.

Dessau's continuing artistic advance in old age is demonstrated by the vitality and imagination of the opera *Einstein* (1971–3), which concerns the scientist's responsibility for the consequences of his inventions. The score follows no particular trend, but blends with great craftsmanship whatever is required for the philosophical exigency of the moment, whether 12-note procedures, aleatory passages, clusters, jazz elements, pop music, tape sections of shrill abrasiveness or explosive power, or abundant quotations from the keyboard works and cantatas of Bach; all are utilized in a thoroughly individual manner. The qualities of Dessau's operas – their caustic trenchancy, their dynamic narrative style and their political commitment – are equally characteristic of the songs (such as the celebrated song for Spain, *Die Thälmannkolonne*), the rousing melodrama *Lilo Herrmann*, the film scores (e.g. *Du und mancher Kamerad* and *Das russische Wunder*), the spirited chamber music (notably *Quattrodramma*, 1965) and the orchestral works. These last have won a place in the forefront of the concert life of the DDR as a result of their dramatic expressiveness and infectious delight, their clarity and intellectual concentration. Among them *In memoriam Bertolt Brecht* is a fitting testimony to the achievement of Dessau's collaborator and friend.

When he was asked to contribute to the celebrations of the tenth anniversary of the DDR, Dessau drew up a list of the works he had composed in the previous decade, writing at the foot: 'All these works are dedicated to the DDR, for without her they would have been quite unthinkable. It is a mutual gift'.

Dessauer, Josef [Joseph] (b Prague, 28 May 1798; d Mödling, 8 July 1876). Bohemian composer. He studied with V. J. Tomašek and Diviš Weber in Prague. Frequently in Vienna from 1825, he also visited Italy, England and France (he was in Paris 1831–2 and

1842-3); he settled in Vienna in 1835, but his tours took him to Prague, Dresden, Ischl and Carlsbad. Dessauer was popular in his day as a songwriter; *Lockung* was once a favourite in England, and was one of three songs transcribed by Liszt. Ferdinand Hiller described him as 'one of the best of the Viennese lieder composers'; Berlioz called him 'a man of talent' (letter to Hiller, 13 May 1832), and also wrote that 'Dessauer's predilection is exclusively for the elegiac. He feels at ease only with a melancholy soul; tears are his greatest happiness and the woes of the heart his chief joy' (*Mémoires*). He was a friend of many of the leading composers, artists and writers of the day (including George Sand, who named him 'Maître Favilla'), and tried to impress the importance of Bellini on his contemporaries. Chopin's *Polonaises* op.26 were dedicated to him. He was also a successful opera composer, making use of some of the conventional ingredients of Romantic opera, including the polonaise. His works in this genre include *Ladwina* (1836), *Ein Besuch in St Cyr* (1838), *Paquita* (1851) and *Dominga* (1860), a further opera, *Oberon*, was not performed. In Paris in 1842 he persuaded Wagner to draft him a libretto on Hoffmann's *Die Bergwerke von Falun*, but the project was turned down by Pillet at the Opéra as being too hard to stage. Dessauer then asked Wagner for a text for an oratorio, *Mary Magdalene*; Wagner agreed but stalled for time indefinitely, reluctant to distress a man he described as 'a hypochondriacal eccentric' (letter to Schumann, who struck out these words, 5 January 1842). In addition to a considerable number of songs, Dessauer's instrumental works consist of overtures, a cello sonata, and numerous single pieces (fantasias, rondos etc) for both violin and keyboard.

JOHN WARRACK

Dessin (Fr.) Term used by A. Reicha and others to denote the smallest unit of melodic construction; see ANALYSIS, §II, 2

Dessler, Wolfgang Christoph (b Nuremberg, baptized 11 Feb 1660; d Nuremberg, buried 16 March 1722). German writer, schoolmaster and theologian. He began to study theology and philosophy at the University of Altdorf, near Nuremberg, in 1677. His health prevented his taking on a parish, so he worked as a proof-corrector for various printers in Nuremberg. In 1705 he was appointed deputy headmaster of the Heiligegeist School there, a post he held until 1720, when a stroke put an end to his reading career. His writings combine the influences of Spener's Pietism and the spiritual tendencies of the philological society known as the Pegnesische Blumenorden. He added sacred verses of his own to his collections of pious reflections and prayers, and some of them were taken into general liturgical use. The best of them, *Wie wohl ist mir, o Freund der Seelen und Mein Jesu, den die Seraphinen*, disappeared from hymnbooks only during the 20th century. Dessler did not compose

the melodies of his hymns. In *Gott-geheiliger Christen ... Seelen-Lust* his collaborator was Benedikt Schultheiss, who wrote not only the 11 arias signed 'B. S.' but also very probably the songs with continuo prefacing each of the 25 devotions. Nikolaus Deinl, a school colleague of Dessler's and a pupil of J. P. Krieger, contributed an appendix of 12 continuo songs to the 1712 collection (Dessler had used Krieger's aria *Die Tugend hat den Ehrentempel* in 1696 for a wedding hymn for J. W. Neubauer with the text *Gottlob das Band ist fest gebunden*). In *Himmliche Seelen-Lust*, a devotional guidebook, Dessler gave an evaluation of different kinds of music which is close to Spener's Pietist views. The hymn – the 'song of praise, love and thanks' – resting on the foundation of faith came highest in his estimation. He ascribed pedagogic and therapeutic virtues to instrumental music 'as long as it remains within the bounds of decorum'; it serves 'to alert the soul, to lull watchful care, to calm temptation and to dispel the spirit of sorrow'. The church can make use of the effects of music on the congregation, for hymns will 'inspire devotion, encourage readiness in the service of God' and bring patience in suffering and 'joy in the Lord'.

LINI HÜBSCH-PFLEGER

Dessoff Choirs. New York choral society formed in 1930, see NEW YORK, §7

Dessus (Fr.). The highest part in an ensemble ('premier dessus', 'second dessus', etc); the high instruments in a consort ('dessus de hautbois', or even 'dessus de symphonie'). In the 17th and 18th centuries 'dessus' alone sometimes meant VIOLIN, more properly called 'dessus de violon'. The word corresponds to the English 'treble'.

Instruments even higher in pitch than trebles are called PARDESSUS, corresponding to the English 'descant'.

Destinn [Kittl], **Emmy** [Destinnová, Ema] (b Prague, 26 Feb 1878; d České Budějovice, 28 Jan 1930). Czech dramatic soprano. She studied singing under Marie Loewe-Destinn, adopting the latter's name in gratitude, in later life she used exclusively the Czech form of her stage name, of which the spellings 'Emma' and 'Destinnová' are also found. On 19 July 1898 she made a highly successful début as Santuzza at the Berlin Kroll Opera, appearing two months later in the same role at the Royal Opera. She became a great favourite in Berlin, where her wide repertory included Carmen, Mignon, Valentine, Gounod's Marguerite and Strauss's Salome, and remained there until 1908. Her international career began after a much acclaimed Senta at Bayreuth in 1901; on 2 May 1904 she made her London début as Donna Anna at Covent Garden. She returned to London

every season until 1914, and was particularly admired there for her Cio-cio-san (of which she was the first English exponent) and Aida. From 1908 to 1916 she also sang regularly at the Metropolitan, creating there (on 10 December 1910) the part of Minnie in the première of *La fanciulla del West*, and extending her Verdi roles to include *Il trovatore*, *Un ballo in maschera* and Alice in *Falstaff*.

Emmy Destinn in the title role of Thomas' 'Mignon'

Her return to her native Bohemia during World War I led to her being interned by the Austrian government, as a declared sympathizer with the Czech national movement, in her own castle of Stráž nad Nežárkou, which she had bought in 1914. After the war, her powers having by then begun to show signs of decline, she found it difficult to resume her former international position. She returned to Covent Garden, however, for the peace season of 1919, in *Aida* and *Un ballo in maschera*, and she sang again at the Metropolitan during the seasons of 1919–20 and 1920–21. Among the most emotional occasions of her career were her appearances in Prague, just before and just after World War I, as the heroine of Smetana's patriotic opera, *Liběš*. At one of her last London concert appearances, in October 1928, she sang arias from this and other Czech operas with Henry Wood and his orchestra at the Queen's Hall.

Destinn wrote a drama, *Rahel*, as well as poems and novels, and she also attempted composition. In 1923 she married Joseph Halsbach, a young officer of the Czechoslovak Air Force. She was one of the greatest artists of her generation, equally gifted as singer and actress, with a voice of markedly individual timbre and emotional warmth, and of great flexibility; her trill, for example, was unusually distinct and even for so full a voice. She made over 200 records for several com-

panies; although hers was really the type of voice that demands the advantages of electric recording, the best of these are impressive.

DESMOND SHAW-TAYLOR

Destouches, André Cardinal (b Paris, baptized 6 April 1672; d Paris, 7 Feb 1749). French composer

LIFE. André Cardinal, whose father Etienne Cardinal, Seigneur des Touches et de Guilleville, was a wealthy Parisian merchant, did not take the patronym Destouches until his father's death in 1694. From 1681 to 1686 he was schooled by the Jesuits of the rue St Jacques. Imbued with a sense of adventure, he left France in January 1687 with Father Gui Tachard, who was making a second voyage to Siam. He returned in July 1688 and four years later joined the 2nd Company of the King's Musketeers (the 'Mousquetaires Noirs') with whom he took part in the siege of Namur. He apparently discovered his musical gifts in camp bivouacs. He learned to play the guitar and composed some *airs sérieux et à boire*. Encouraged by his success, he left the army in 1694 'in order to devote himself to music' (Titon du Tillet). André Campra seems to have been his only teacher, in 1697 he permitted Destouches to contribute three *airs* to his *opéra ballet*, *L'Europe galante*.

Because of his social position (Le Cerf de la Viéville always wrote of him as 'Mr. des Touches'), Destouches moved with ease in aristocratic circles. He was a friend of the Prince of Conti and the Prince of Vendôme; his most important friend was Antoine Grimaldi, the future Prince of Monaco, a man of cultivated taste and himself an amateur musician. Through Grimaldi's efforts, Destouches was brought to the attention of Louis XIV. The *pastorale-héroïque* *Issé* was first performed at a concert at Fontainebleau directed by Grimaldi on 7 October 1697 before an illustrious audience that included the King and Queen of England. It was an immediate success and Destouches' future was secured. Louis XIV gave him 200 louis with the comment that 'since Lully no music had given him so much pleasure' (Titon du Tillet). Destouches' friendship with the Prince of Monaco resulted in a correspondence that began in 1709 and lasted until the prince's death in 1731. These letters give much valuable information about the Académie Royale de Musique (its performers and its financial state after years of mismanagement) and about Destouches' own stage music (for example, the initial failure of *Les éléments* is blamed on the dancing of the '*petits seigneurs* of little talent').

On 8 January 1713, Destouches became inspector general of the Académie Royale de Musique. For 'maintaining order and discipline' he received a 4000 livre

pension. At the request of Lalande, and thanks to the influence of the regent (whom he had known in military service), Destouches was appointed *surintendant de la musique de la chambre* (8 February 1718). On 15 January 1724 he married Anne-Antoinette de Reynold de la Ferrière. On 28 September 1727, after the death of Lalande, he became *maître de musique de la chambre*. When Nicolas de Francine retired from the directorship of the Académie Royale de Musique, Destouches took over this important post (8 February 1728), only to abandon it along with that of inspector general on 1 June 1730.

Beginning in 1725, Destouches organized and directed concerts for Queen Maria Leszcynska who wanted him to initiate a series of *concerts spirituels* modelled on the popular Paris concerts of the same name. This placed the composer in the enviable position of being able to draw upon the best voices of the opera to perform his own secular and sacred works. The accounts of the *menus plaisirs* for the single year 1727 show that 46 concerts took place under his direction at Versailles in the queen's apartments.

Destouches remained active musically even in his last years. At 70, he conducted the orchestra for a masked ball given by the daughters of Louis XV, and he kept control of the queen's concerts until 1745. He died in his elegant home next to the church of St Roch (today, 4 rue St Roch), and was buried in the crypt of the Chapel of the Virgin in that church.

2. WORKS Controversy surrounds the early career of Destouches as an opera composer. He was considered an amateur. It is uncertain how much technical assistance he received in the composition of *Issé*. It is also possible that his cousin, Houdar de La Motte, presented him with the libretto to *L'Europe galante* only to have it appropriated by Campora, for whom he was also librettist. Destouches' originality should not readily be attributed to his ignorance of 'rules'. Sir John Hawkins claimed that, after *Issé*, the composer 'set himself to study the rules of his art' which only served to 'check the flights of his genius and had a bad effect upon his future compositions'. Yet a comparison of the first edition of *Issé* (1697) with the radically revised edition of 1708 shows that with increased knowledge the expressive power of his music deepened without sacrificing spontaneity. The reply of the oracle (Act 2 scene v), for example, rather than proceeding in the same key with no break, as in the earlier edition (ex.1), is rendered

Ex 1 (after 1697 edn)

more dramatic through use of rests and shifts in harmony and texture (ex.2).

Destouches was no harbinger of musical impressionism. Efforts to make him so show unfamiliarity with other composers before Rameau in whose music 'forbidden' intervals, unprepared dissonances and parallel 7th chords may also be found. Their experimentation (partly under the stimulus of Italian music) did much to break Lully's stranglehold, particularly in the domain of harmony and orchestral colour. They helped prepare the

Ex 2 (after 1708 edn)

way for Rameau. The mediant 9-7-#5 chord in bar three of the extract from *Les éléments* (ex.3) was described by La Laurencie as 'altogether extraordinary for the period', yet this same chord is found in such works as the motets of Charpentier and Lalande, the instrumental music of Couperin and the cantatas of Clérambault.

Ex 3 *Les éléments* Act 2 scene ii (after 1725 edn)

Although hampered by poor librettos, Destouches had a fine sense of musical theatre. Zoroaster's monologues from Act 3 of *Sémiramis*, with their dramatic pauses and orchestral interpolations, are akin to Rameau's *Zoroastre*, composed 30 years later. Taking the accompanied recitatives from Lully's late operas as a model, Destouches fashioned a highly flexible, 'singing' type of musical declamation which included many extended passages in *arioso* style (see, for example, 'Que ne puis-je encor fuir', *Issé*, I, iv). These recitatives occasionally bristle with 'affective' intervals rare in the music of the period such as ascending diminished 7ths ('Quoy, je vivrois', *Omphale*, 5, iv) and augmented octaves ('Je ne veux rien de vous', *Amadis de Grèce*, 3, ii). Even Grimm in his polemic against Destouches' *Omphale* (*Lettre sur Omphale*, 1752) acknowledged that the composer's scenes in recitative were 'still esteemed'.

Operatic techniques also served Destouches for his cantatas. The brilliant *air* 'Volez grands Dieux' (*Oenone*)

is interrupted by a poignant recitative over a chromatic descending bass line. In *Sémélé*, a sudden change of key from A minor to F major lends dramatic import to the 'Bruit de tonnerre' and following recitative.

Destouches and his librettists dealt with the conventional genres of their time in an original manner. *Issé* is a pastoral but has heroic characters; *Le carnaval et la folie* is one of the first examples of a lyric comedy in France; *Les éléments*, an *opéra-ballet*, is clearly a prototype for the later *ballet-héroïque*, and *Les stratagèmes de l'amour* is perhaps the only *ballet-héroïque* with a comic intrigue although we are assured that it is a 'noble Comedy and one that has the character of Antiquity' (libretto).

WORKS

(all printed works published in Paris unless otherwise stated)

VOCAL

Airs in: Recueil d'airs sérieux et à boire (1698, 1703, 1712), Recueil d'airs sérieux augmentés (Amsterdam, 1717), Recueil de danses (1704), Duo choisis de brunettes, de menuets et d'autres airs propres pour la flûte et le hautbois (1728-30), Nouveau recueil de chansons choisies (The Hague, 1729), Nouveau recueil de danse de bal (1712), Nouvelles poésies spirituelles et morales (1730, 1732-3, 1737), Recueil de pièces, petits airs, brunettes, menuets (c1755), Second recueil des nouvelles poésies spirituelles (1731), Recueil de vaudevilles, menuets, contredanses et autres airs choisis pour la musette (1737), Tendresses bachiques en duo et trio (1712) Cantatas Oenone (1716), *Sémélé* (1719)

STAGE MUSIC

(all in prologue and 5 acts unless otherwise stated)

Issé (pastorale-héroïque, 3, La Motte), Fontainebleau, 7 Oct 1697 (1697, revised and augmented by 2 acts, 1708, full score, 1724) *Amadis de Grèce* (tragédie lyrique, La Motte), Fontainebleau, 1699, Paris Opéra, 22 March 1699 (1699, 3/1712/R1967) *Marthésie, reine des Amazones* (tragédie lyrique, La Motte), Fontainebleau, Oct 1699, Paris Opéra, 29 Nov 1699 (1699) *Omphale* (tragédie lyrique, La Motte), Paris Opéra, 10 Nov 1701 (1701) *Le carnaval et la folie* (comédie-ballet, La Motte), Paris Opéra, 27 Dec 1703 (c1703 supplements, changements et additions, 1748) *Le professeur de folie* (divertissement, Act 3 of *Le carnaval et la folie*) (1711) *Callirhoé* (tragédie lyrique, Roy), 27 Dec 1712 (1712) *Télémaque et Calypso* (tragédie lyrique, Pellegrin), Paris Opéra, 15 Nov 1714 (1714) *Semiramis* (tragédie lyrique, Roy) (1718) *Les éléments* (opéra-ballet, Roy), prol and 4 entrees. L'Air, L'Eau, Le Feu, La Terre, Tuileries, 22 Dec 1721, Paris Opéra, 29 May 1725, Pn, selections (Paris, 1725) *Les stratagèmes de l'amour* (ballet-héroïque, Roy), prol and 3 entrees. Scamandre, Les Abderites, La feste de Philotes, Paris Opéra, 19 March 1726 (1726)

MOTETS

O dulcis Jesu (1717), Te Deum (1732), Diligam te Deus, Deus meus (1736), O Jesu (1738), De profundis (1735), Cantate Domino, none survives

JAMES R. ANTHONY

Destouches, Franz Seraph von (b Munich, 21 Jan 1772; d Munich, 9 Dec 1844). German composer. In 1787 he had some lessons from Haydn in Vienna. His first opera, *Die Thomasnacht*, was produced at Munich on 31 August 1792 (score now at D-DS with several other Destouches MSS). In 1797 Destouches was appointed music director at Erlangen, and shortly afterwards he joined the orchestra of the Weimar theatre (then under Goethe's direction) as second leader. There he wrote the incidental music for Schiller's version of Gozzi's *Turandot* (1802, score published), for his *Die Braut von Messina*, *Die Jungfrau von Orleans* (both 1803) and *Wilhelm Tell* (1804). The music for Schiller's *Wallensteins Lager* (1798) and for his version of *Macbeth* (1800) has also been attributed to Destouches; the former, however, was chiefly by Kranz, the latter by Reichardt. He also wrote the music for Kotzebue's *Die Hussiten vor Naumburg* (1804) and for Zacharias Werner's *Wanda, Königin der Sarmaten* (1808). A second opera of his, *Das Missverständnis*, was given at Weimar on 27 April 1805; a third, *Der Teufel und der Schneider*, was not performed.

Destouches succeeded J. F. Kranz as first leader in 1804, but left Weimar in 1810 to become professor of music at Landshut. From 1826 to 1842 he was conductor at Homburg in Hesse and then retired to his native town. Besides his works for the stage he wrote some piano sonatas and other pieces, piano concertos and a clarinet concerto, a mass and an oratorio, *Die Anbetung am Grabe Jesu Christi* (text by Herder, c1805).

ALFRED LOEWENBERG/R

Destranges, Louis (Augustin Etienne Rouillé) (b Nantes, 29 March 1863; d Nantes, 31 May 1915). French critic. He edited (1890-1910) *L'ouest-artiste*, an important French musical review. He was a contributor to the *Guide musical* and to the *Monde artiste*, in the latter of which he gave an account of an interview with Verdi at Genoa in 1890, when that composer expressed his opinions of certain French musicians in a way that made a sensation in French musical circles. Destranges lived out of Paris and devoted himself to an effort to make his native town a musical centre. He also did much for the advancement of Wagner's cause in France and for the development of French opera at the turn of the century.

GUSTAVE FERRARI/R

Deszczyński, Józef (b Vilnius, 1781; d Horodyszcze, 1844). Polish composer and conductor. He worked in Vilnius as a music master, and his operas were produced there in 1810. Later he became conductor of a private orchestra in Horodyszcze on the estate of Count Ludwik Rokicki, who was himself a musician and a pupil of Viotti. During this time Deszczyński staged operas by Salieri, Boieldieu and others in the neighbouring town of Mińsk. He was a prolific composer but although many of his works were published both in Poland and abroad, most of them are lost.

ALINA NOWAK-ROMANOWICZ

Deszner, Salomea (b Białystok, 1759; d Grodno, 20 March 1806) Polish actress and singer. She was brought up at Prince Jan Klemens Branicki's court in Białystok. In 1777 she made her début in comedies and dramas in the National Theatre in Warsaw, and on 11 July 1778 she sang in the opera *Nędza uszczęśliwiona* ('Misery contented') by Maciej Kamiński. Thereafter she appeared in many Polish and foreign operas in Warsaw and other Polish towns. In 1802 she established a permanent theatre and opera company in Grodno, where she directed the theatre till her death.

Detoni, Dubravko (b Krizevci, 22 Feb 1937). Yugoslav composer and pianist. Having studied the piano under Staničić at the Zagreb Academy of Music until 1960 and under Agosti and Cortot at the Accademia Chigiana (1960-61), he then turned to composition with studies in Zagreb (1961-5) under Stjepan Šulek. Advanced work followed in Warsaw (1966-7) under Lutosławski

and Bacewicz in the experimental studio of Polish radio. He has also worked at Darmstadt with Stockhausen and Ligeti, and is the founder-director of the contemporary music ensemble Acezantec.

Detoni's early works show the thorough neo-classical influence of Šulek, with its reliance on traditional procedures and forms such as the passacaglia. Some later use of 12-note techniques led to his interest in the work of the Polish avant garde. The change of style to accommodate ideas suggested by his Polish studies is notable in *Sifre* ('Codes') and later works. From this time he also showed considerable interest in *musique concrète* and electronic music, especially in combination with live instrumental performance. Two of his later works are particularly noteworthy: the serially organized *Likovi i plohe* ('Figures and planes') with its constant oscillation between pitched sounds and noise, and striking use of textural manipulation; and *Elucubracije*, in which dynamic contrasts of widely differing textural situations are developed extensively under the leadership of the solo piano.

De Torices, Benito Bello. See BELLO DE TORICES, BENITO

De Troffels, Ruggier. See TROFEO, RUGGIER.

Detroit. American city with a population of 4,200,000. Founded in 1701, this largest city of the state of Michigan had little significant musical life before 1850. The opening of the Erie Canal in 1824 brought settlers from the east, but almost 25 years passed before a sustained civic interest in music became evident. This interest grew during the decade of the 1850s, subsided during the Civil War, then re-emerged with new vigour. Although older than many mid-western cities, Detroit lagged behind in musical activities. Perhaps the years of greatest development were the 1850s and late 1860s, and the era from 1919 to 1935 when the Detroit SO flourished under Ossip Gabrilovich (Gabrilowitsch).

1 Opera houses, theatres 2 Concert halls 3 Orchestras 4 Choral societies 5 Broadcasting stations 6 Educational institutions, libraries 7 Publishers, instrument manufacturers

1. OPERA HOUSES, THEATRES. The first local attempts at opera were unstaged Italian works presented by the Detroit Philharmonic Society in 1855. Lortzing's *Zar und Zimmermann*, given by the Harmonie Society in 1866, was the first opera staged by local performers. In 1869 the Detroit Opera House was built; with a seating

capacity of over 2000, it was the largest hall the city had known. It was demolished on 4 May 1966. In recent years, theatres and the Masonic Auditorium have been used for operatic performances. In 1928, Thaddeus Wronski organized the Detroit Civic Opera Company, later associated with the Detroit SO in productions that were also presented in New York and Chicago. This association continued until 1937. The Piccolo Opera Company was organized in 1961 for the purpose of performing operas in English for schools and other organizations.

2. CONCERT HALLS. Detroit's first concert hall was an upstairs room of the fire station, Firemen's Hall, built in 1851 and seating 1000. The city's most famous concert hall, Orchestra Hall, known for its fine acoustics, was built in 1919 as a home for the Detroit SO. Lack of funds forced its abandonment in 1939. The Masonic Auditorium, built in 1928, is used for many musical events including the annual visit of the Metropolitan Opera. Since 1956, the Henry and Edsel Ford Auditorium has been the home of the Detroit SO.

3. ORCHESTRAS. Among the early instrumental ensembles was the Stein and Buchheister Orchestra (1855-65), organized by two members of the well-known Germania Society orchestra who settled in Detroit in 1854 when the Germania disbanded. As early as 1875, musical groups calling themselves the Detroit Symphony Orchestra appeared. The present Detroit SO was founded in February 1914 when Weston Gales organized 65 Detroit musicians for an experimental symphony concert. Gabrilovich, a Russian pianist who had been guest soloist with the orchestra, was made permanent conductor in 1919. After Gabrilovich's death, Franco Ghione served as conductor from 1937 to 1940. The following season was shortened, and the orchestra ceased operation during the 1942-3 season. In 1943, it was reorganized under a new name, the Detroit Orchestra, with Karl Krueger as conductor, but within six years it lapsed again. The Detroit SO was reformed in 1951 and Paul Paray became permanent conductor. He retired in 1962, and was succeeded by Sixten Ehrling; Aldo Ceccato was named principal conductor in 1973. Since its founding, the orchestra has been a pioneer in presenting young people's concerts. It serves as the official orchestra for the annual autumn music festival at Worcester, Massachusetts, and at the summer Meadow Brook Music Festival at Oakland University in Rochester, Michigan. It gained recognition for summer concerts inaugurated at Belle Isle in 1922 and at the Michigan State Fair Grounds in 1945. In 1970, the orchestra instituted the Detroit Symphony Youth Orchestra to provide a training ensemble for talented young musicians. The Detroit Women's Symphony, a separate organization founded in 1947, is still active.

4. CHORAL SOCIETIES. The first significant choral society was the Detroit Philharmonic Society (1855-9), directed by an Italian immigrant, Pietro Centemeri. Among Detroit's many choral societies, four are worthy of note: the Harmonie, founded in 1849 and still in existence, the Detroit Symphony Choir founded by Gabrilovich (1921-40), the Rackham Symphony Choir which was formed by Maynard Klein during Paray's conductorship of the Detroit SO, and the Kenneth Jewell Chorale, a chamber choir which often performs with the Detroit SO.

5. BROADCASTING STATIONS. Detroit has three major radio stations. WWJ broadcast the first complete radio symphony concert in the world when it presented a concert by the Detroit SO directed by Gabrilovich on 10 February 1922. Of further importance was a series of concerts known as the Ford Sunday Evening Hour begun in 1934 and broadcast from 1936 to 1942. In recent years, Karl Haas's programme 'Adventures in Good Music' has achieved national recognition.

6. EDUCATIONAL INSTITUTIONS, LIBRARIES. Attempts were made in 1818 to establish music schools, but lack of support doomed these to a short existence. However, in 1874 Jacob H. Hahn founded the Detroit Conservatory of Music, which lasted almost a century (until 1967). Among its directors was Francis L. York, who later became dean of the Detroit Institute of Musical Arts, founded in 1914 and still in existence. Since 1 January 1972 the facilities of the Institute have been shared by the Detroit Community Music School, which began in 1926 as the Music Settlement School. The music department of Wayne State University has been active in all phases of music education for many years. Since 1943 the Detroit Public Library has housed the E. Azalia Hackley Collection, the largest collection in the USA devoted to black musicians and performing artists, the library also sponsors annual concerts of music by black composers.

7. PUBLISHERS, INSTRUMENT MANUFACTURERS. In 1851 Adam Couse, a friend of Stephen Foster's, issued the first music published in Detroit. Other important publishers of the period were Stein & Buchheister, J. Henry Whittemore and Clark J. Whitney. Detroit was known in the 1890s for a vast output of ragtime hits from the publishers Whitney Warner, Belcher & Davis, and others. In the early years of the 20th century, Jerome H. Remick was one of the world's leading publishers of popular music. The Clough & Warren Organ Co., which had its beginnings in a melodeon factory established in 1850, achieved world fame in the early 1880s when it built an organ for Liszt, to his specifications. In the 20th century, the name of Grinnell Brothers, a leading music shop, has also been associated with the manufacture of pianos. The Motown Record Corporation, begun in the early 1960s, has promoted a large number of performing artists and has dominated the field of black American popular music.

MARY TEAL

Dett, Robert Nathaniel (b Drummondsville [now Niagara Falls], Ont., 11 Oct 1882; d Battle Creek, Mich., 2 Oct 1943). Black American composer, pianist and conductor. He was born into a musical family and given piano lessons as a child. He began the serious study of music at the Oliver Willis Halstead conservatory in Lockport, New York. In 1908 he graduated from Oberlin Conservatory; he continued his music studies intermittently over the years at Columbia University, the University of Pennsylvania, the American Conservatory of Music and Harvard. His honours included the Bowdoin Literary Prize and the Francis Boott Music Award, both from Harvard, the Palm and Ribbon Award from the Royal Belgian Band.

the Harmon Foundation Award, an honorary master's degree from the Eastman School of Music and two honorary doctorates in music from Howard and Oberlin. He studied in France with Nadia Boulanger in 1929. He taught at two small colleges before accepting the long-term position as director of music at Hampton Institute (1913-31). In addition to teaching, he was active as a concert pianist and composer, publishing his first work in 1900. He developed the Hampton Institute Choir into a superior organization that won critical acclaim on tours in the USA and Europe. His last position was as a musical director for the United Service Organizations in Battle Creek, Michigan.

Dett wrote in a neo-Romantic style and a nationalist vein. He spoke on many occasions of the importance of Negro folk music and urged that 'musical architects take the loose timber of Negro themes and fashion from it music . . . in choral form, in lyric and operatic works, in concertos and suites and salon music'.

WORKS

(all printed works published in New York)

- 3 works for chorus, orch (based on traditional Negro songs, biblical texts arr. Dett) *MUSIC IN THE MINE* (1916), *The Chariot Jubilee* (1921), *The Ordering of Moses* (1937)
- 5 suites, pf. *Magnolia* (1911), *In the Bottoms* (1913), *Enchantment* (1922), *The Cinnamon Grove* (1927), *Tropic Winter* (1938)
- 2 collections of spirituals arrs. *Religious Folksongs of the Negro* (1926) *The Dett Collection of Negro Spirituals*, i-iv (1936)
- Numerous motets, works for chorus, lv, pf, vn, orch
- Complete edn. of pf music published by Summy-Birchard (1973)
- Principal publishers: Summy (Chicago), J. Fischer

WRITINGS

FIFTEEN SOUTHERN

Det Unge Tonekunstnerselskab (DuT, Dan.: 'Young composers' society') Danish society for contemporary music formed in 1930 by the union of the Unge Tonekunstneres Selskab (1920) and the Ny Musik society (1921); see DENMARK, §1, 5.

Deulich, Philipp. See DULICHUS, PHILIPP.

Deus, Filipe da Madre de. See MADRE DE DEUS, FILIPE DA

Deus, Michael. See DEISS, MICHAEL.

Deutekom, Cristina [Engel, Stuentje] (b Amsterdam, 28 Aug 1932). Dutch soprano. She studied with Johan Thomas and later Coby Riemersma at the Amsterdam Conservatory, where she also attended the opera class. She made her Amsterdam début in 1962 as the Queen of Night, a role which brought her fame in a short time, at the Metropolitan Opera, La Scala, Covent Garden (where she made her début in October 1968), Hamburg and throughout Italy (where she has won particularly wide acclaim), as well as in the Solti recording. Her repertoire includes the roles of Fiordiligi, Constanze, Marzelline, Rossini's Armida, Norma, Elvira (*I puritani*), Tatyana and, among Verdi heroines, Odabella (*Attila*) and Giselda (*I lombardi*), both recorded. Although her voice sometimes seems hard and ungratifying in quality, its flexibility and virtuosity in

dramatic coloratura passages can make a brilliant and exciting effect. She is a Knight of the Order of Oranje Nassau.

TRUUS DE LEUR

Deutlich (Ger.. 'clearly'). A direction found particularly in Mahler's scores over figures that might otherwise be thought mere orchestral padding.

Deutlich, Jeremias. Pseudonym of MAX KALBECK

Deutsch, Max (b Vienna, 17 Nov 1892). French composer, teacher and conductor of Austrian origin. He studied at the University of Vienna (1910-15) and with Schoenberg (1913-20), also serving in World War I. During the 1920s he worked as a theatre conductor in several European countries and composed large orchestral scores for Pabst's *Die freudlose Strasse* and *Der Schatz*. He moved to Paris in 1924, and there gave the French premières of works by Schoenberg, Webern and Berg (including the Chamber Concerto in 1927). In 1934 he took up a chair at the University of Madrid, but the civil war forced his return to Paris the next year. He then worked as a pianist and revue composer before volunteering for service in World War II. After the war he returned to teaching, notably as professor of composition at the Ecole Normale de Musique, his pupils including Bussotti. In 1960 he founded the Grands Concerts de la Sorbonne.

PAUL GRIFFITHS

Deutsch, Otto Erich (b Vienna, 5 Sept 1883; d Vienna, 23 Nov 1967). Austrian biographer and bibliographer. Having studied the history of literature and art at the universities of Vienna and Graz, he worked as art critic for *Die Zeit* (1908-9) and as assistant at the Kunsthistorisches Institut in Vienna University (1909-12). Deutsch's later special study of the Biedermeier period had perhaps been foreshadowed by his previous work on Schubert, who was the subject of the earliest of all his writings: a book and three articles in 1905. His unique biography (1913-14) established him as the leading authority on this composer, although its publication was never completed in German. It was for his distinguished services to the Schubert centenary of 1928 that Deutsch received the title of professor.

After a career of some six years in bookselling, he became music librarian to the collector Anthony van Hoboken from 1926 to 1935. The annexation of Austria in 1939 compelled Deutsch to leave Vienna for England, where he lived, in Cambridge, until 1951, he became a British citizen in 1947. During this period, he brought his work on Schubert to fruition and began to collect material for a life of Handel. He also proposed a plan for a union-catalogue of all music printed before 1800 in British libraries; he became editor of this catalogue in 1946, resigning the post in 1950.

After returning to Vienna, Deutsch completed his monumental documentary biography of Handel and brought out a similar volume for Mozart, whom he served as well as he had Schubert. With W. A. Bauer, he established the text of *Mozart. Briefe und*

Aufzeichnungen (1962–3), and began work on the commentary. Finally, using some material originally amassed by Maximilian Zenger, Deutsch completed the sumptuous *Mozart und seine Welt in zeitgenössischen Bildern*. Here, perhaps, is to be found the finest and most vivid expression of his training as an art historian wedded to his unique knowledge of the background to musical history in his chosen period. His long services were recognized in 1959 when he received the Ehrenkreuz for scholarship and art conferred by the Austrian republic, and again in 1960 when the University of Tübingen created him an honorary doctor of philosophy. An unexpected product of this period was his witty German translation of Gilbert's *The Mikado* (1959).

Deutsch's work was dominated by his passionate concern for fact and visual illustration as a basis of truth in musical history. Musical criticism and the aesthetic aspect of music had little attraction for him. Believing that facts speak for themselves through the original documents, he amplified his conviction by such masterly presentation and annotation, that in his hands the documentary biography of musicians took on a new dimension and became a literary form in its own right. On Schubert, Mozart and Handel, Deutsch lavished infinite pains allied to a keen sense of proportion. The thematic catalogue which rounds off his documentation of Schubert is a model of concise relevance.

His tireless search for documents led him into some strange byways which are represented in his very numerous articles (148 concerned Schubert, 79 Mozart, 22 Haydn and 30 Beethoven). His early study of the first editions of Schubert's music induced him to explore those of other composers, notably Mozart, on which he did pioneer work with C. B. Oldman. He became absorbed in the delicate problems of the bibliographical description of printed music, the transcription of engraved title-pages, the use of plate numbers as evidence for dating and cognate matters in which his acute thinking, though sometimes inconclusive, broke new ground. All branches of Deutsch's work are memorable for their meticulous standards of scholarship and lucidity of expression. His influence, on both sides of the Atlantic, was wide and enduring.

Deutscher Verlag für Musik. German firm of music publishers. The German Democratic Republic state music publishing house, it was founded in Leipzig on 1 January 1954; Günter Hempel became director in 1974. By the mid-1970s it had published about 160 book titles and 600 music titles, including complete critical editions, practical editions and publications of single works and music literature (specialized musicological works, Festschriften, yearbooks, biographies, facsimile editions, reprints and children's books with music). An orchestral and theatrical agency is attached to the firm. The Deutscher Verlag für Musik supports contemporary music; it has brought out numerous works by composers from the German Democratic Republic including Fritz Geissler, Peter Herrmann, Siegfried Köhler, Rainer Kunad, Siegfried Matthus and Udo Zimmermann. The firm is also responsible for the publication of music by Hanns Eisler and the Leipzig edition of Mendelssohn's works; with other firms (notably Bärenreiter) it has produced several collected editions. Experts from 80 countries are contributing to the firm's series *Musikgeschichte in Bildern* (started by Heinrich Besseler and Max Schneider).

In 1966 the firm published the Marxist-based two-volume *Musiklexikon*, edited by Horst Seeger.

Deux temps (Fr.). TWO-STEP

Devan, William Carrolle. See VAN, GUILLAUME DE.

Devčić, Natko (b Glina, 30 June 1914). Yugoslav composer. At the Zagreb Academy he completed piano studies with Geiger-Eichhorn in 1937 and composition studies with Dugan in 1939. He then studied the piano with Stančić in Zagreb and composition with Marx in Vienna, he worked on electronic music under Davidovsky at Columbia University, New York (1967-8). He returned to the Zagreb Academy as professor and head of the department of composition and conducting.

After an early nationalist phase, Devčić came more and more to use novel techniques, though still retaining some contact with the features of Istrian folk music, most directly in the *Istarska suita* – his most popular composition, the opera *Lahinska vještica* ('The witch of Labin') and the Violin Concertino *Fibula* for two orchestras is based on 12-note material derived from the intervallic and rhythmic structure of music for the *mis-nice*, the folk instrument characteristic of the Croatian coast. Devčić's use of Croatian materials in an avant-garde context is again apparent in *Igra riječi* ('Play on words'), where, in his own words, he set himself the task of 'transforming specific sound characteristics of the Croatian language into qualities of pure sound, organizing them in structures and joining them in a unity'. *Non nova* excellently illustrates its title in plays of contrasts – between different orchestral groups, between measured and aleatory sections, and so on; the final passage, for four percussionists, is among the finest contemporary Croatian pieces.

Development (Ger. *Durchführung*). The procedure, particularly in a SONATA FORM movement, by which some or all of the thematic material from the first section (the exposition) is reshaped motivically, harmonically or contrapuntally, or in any combination of those ways; hence the term 'development' is also applied to the section itself. It is usually followed by a harmonically more

stable passage preparing for the last section (the recapitulation) by emphasizing the dominant of the tonality of the movement.

Devienne, François (b Joinville, Haute-Marne, 31 Jan 1759; d Paris, 5 Sept 1803). French flautist, bassoonist, composer and teacher. He was the seventh of eight children born to Pierre Devienne and his second wife Marie Petit. Two obituaries published in 1803, which have since been proved apocryphal, claimed that when he was ten he wrote a mass which was performed by the musicians of the Royal Cravate cavalry regiment. He probably received his earliest training from the organist Morizot in Joinville, and continued his education with his elder brother and godfather, François Memme, in Deux Ponts (now Zweibrücken) from 1776 to 1778. He left Deux Ponts on 15 May 1778 and may have spent some time with the Royal Cravate regiment during the following year. He joined the Paris Opéra orchestra as last chair bassoonist in autumn 1779 for one season, and studied the flute with the orchestra's principal flautist, Félix Rault. It is likely that Devienne entered the service of Cardinal de Rohan as a chamber musician in spring 1780 and remained there until mid-1785. In 1781 he joined the freemasons; he presumably became a member of the famous masonic orchestra, the Loge Olympique, during the 1780s. The first performance in Paris of a work by him was on 24 March 1780, when Ozé performed 'a new Bassoon Concerto composed by de Vienne' at the Concert Spirituel. Devienne first appeared in Paris as a soloist on 24 December 1782 at the Concert Spirituel when he performed 'a new flute concerto', probably his Flute Concerto no.1; his first appearance as a bassoon soloist at the Concert Spirituel was on 25 March 1784 when he played his Bassoon Concerto no.1. From 1782 to 1785 he performed at the Concert Spirituel as a soloist at least 18 times, but after 3 April 1785 he did not appear there for four years. From 1785 to 1789 his place of employment is uncertain; he may have been a member of the Swiss Guards Band in Versailles.

Devienne probably returned to Paris in autumn or winter 1788. *Les spectacles de Paris 1790* lists him as the second bassoonist of the Théâtre de Monsieur (later the Théâtre Feydeau) when it opened in January 1789 and by autumn 1790 he had advanced to principal bassoonist, a position he held until April 1801, although in 1792 he still received the meagre annual salary of 200 livres (the average salary of a bassoon player in the Opéra orchestra in 1789 was 1080 livres). Devienne's first known solo appearance after his return to Paris was at the Concert Spirituel on 7 April 1789, when he played the flute part in the première of his Sinfonie concertante no.4. In autumn 1790 he joined the military band of the Paris National Guard where his duties included teaching music to the children of French soldiers and participation in the musical events of the numerous festivals in Paris. This organization officially became the Free School of Music of the National Guard in 1792, and Devienne was one of the three sergeants in its administration with an annual salary of 1100 livres (the Free School became the National Institute of Music in 1793 and the Paris Conservatoire in 1795). The marriage of Devienne to a Mlle Maillard presumably took place between 1789 and 1792; they had five children.

The Théâtre Montansier, which devoted most of its

productions to original French *opéras comiques*, opened on 12 April 1790 and Devienne's *Le mariage clandestin* was staged there the following November. Two more of his operas were staged before his most popular opera, *Les visitandines* (1792), was performed at the Théâtre Feydeau. This opera was among the most successful of the Revolutionary period; it had over 200 performances in Paris between 1792 and 1797. Devienne's royalties for its 20 performances in July and August 1792 alone totalled 684 livres. At the height of this success a handsome portrait of Devienne, now in the Musées Royaux in Brussels, was painted. It was formerly attributed to J.-L. David but is now thought to have been painted by Laneuville or some other student of David (see illustration).

François Devienne: portrait (early 1790s) by a pupil (possibly Laneuville) of Jacques Louis David in the Musées Royaux des Beaux-Arts, Brussels

Devienne's famous method for the one-key flute was published in 1794. It contains information on flute techniques and performing practice (particularly late 18th-century articulation) as well as flute duets of elementary and intermediate difficulty. The following year the Paris Conservatoire was established, and Devienne was appointed one of its nine elected administrators and professor of flute (first class) with an annual salary of 5000 livres. After 1795 three more of his operas were staged, and he occupied himself with his duties in the Théâtre Feydeau orchestra and at the Conservatoire. Five of his students won prizes at the Conservatoire between 1797 and 1801, and one (Joseph Guillou) was appointed professor of flute there in 1816.

On 12 April 1801 the Théâtre Feydeau abruptly closed. Its orchestra and that of the Théâtre Favart merged the following September to form the new Opéra-Comique orchestra, but it is not known if Devienne was a member of this orchestra. In May 1803 he entered Charenton, a Parisian home for the mentally ill, where

he died the following September after a long illness which ended by impairing his reason.

Devienne's compositions did much to raise the musical level of works written for wind instruments in France in the late 18th century. His greatest contributions are in the areas of the concerto, the *sinfonie concertante* and opera, although he also wrote 25 quartets, 46 trios, 147 duos and 67 sonatas. The texture of Devienne's compositions is primarily that of a single melodic line with a subordinate accompaniment. The melodies are elegant and graceful, and the instrumental works are frequently interspersed with sections written to display the performer's technique. There is little contrapuntal orientation or thematic development in any of the works. The most common structural forms are the binary, theme and variations, rondo and early sonata forms (with a second exposition in place of the development). There is an astonishing lack of manuscripts of Devienne's compositions, even though most of his works seem to have been published.

WORKS

(most printed works published in Paris)

STAGE

All are *opéras comiques* unless otherwise stated, all were first performed in Paris

Le mariage clandestin (1, Viscount de Ségur), Montansier, 11 Nov 1790, 1 air pubd

Les précieuses ridicules (1, [? P L] Moline, after Molière), Montansier, 9 Aug 1791

Encore des Savoyards, ou *L'école des parvenus* (1, J.-B. Pujoux), Favart, 8 Feb 1792, 1 air pubd

Les visitandines (2, L. B. Picard), Feydeau, 7 July 1792, rev. in 3 acts, 1793 (1793), excerpts, arrs. pubd separately

L'enlèvement des Sabines (vaudeville comedy, 2, Picard), Feydeau, 31 Oct 1792, doubtful

Les quiproquos espagnols (2, J.-E. Dejaure), Feydeau, 10 Dec 1792

Le congrès des rois (Revolutionary opera, 3, Desmaillets [A. F. Eve]), Opéra-Comique, 26 Feb 1794, collab. 11 others

Rose et Aurèle (1, Picard), Feydeau, 8 Aug 1794 (n.d.), excerpts pubd

Agnès et Félix, ou *Les deux espions* (3, C.-A. Demoustier), Feydeau, 22 Aug 1795

Volécour, ou *Un tour de page* (1, F. Favière), Favart, 22 March 1797

Les comédiens ambulans (2, Picard), 28 Dec 1798 (1799)

Le valet de deux maîtres (1, J.-F. Roger), Feydeau, 2 Nov 1799 (1800)

VOCAL

49 romances in 7 collections, most for 1v, pf [some pf/harp], fl/vn ad lib (1783-97)

7 patriotic songs, most for 1v, bc, some acc. wind band (c1797), some acc. orch (1794), listed in Pierre, 1904

ORCHESTRAL

Sinfonies concertantes (thematic catalogue in Brook, 1962, only solo insts listed) no 1, F, hn, bn (1785), no 2, C, ob/cl, bn (c1786), 1 in F, fl, cl, bn, op 22 (c1788), 1 in B♭, 2 cl, op 25 (c1788), arr. ?Ducieux for 2 fl, no 4, F, fl, ob, hn, bn (c1791), 1 in F, fl, ob, hn, bn (c1797), 1 in G, 2 fl, op 76 (1799 or 1801)

Fl cones. Concertino 'd'airs connus' and 4 cones. [nos. 2-5] 'd'airs connus' (1782), 12 pubd separately [also arr. fl, vn, vc, by P. Vaillaro (c1811), and cl solo] no 1, D (1782), no 2, D (1783), no 3, G (1784), no 4, G (n.d.), no 5, G (before 1792), no 6, D (1794), no 7, c (c1787), no 8, G (c1794), no 9, c (1793), no 10, D (1802), no 11, b (c1806), no 12, A and a (c1806), T in D (after 1803)

Bn cones. no 1, C (1785); no 2 (c1794), no 3, F (1790), no 4, C (1793)

Hn cones. no 1, C, 1785, ed. E. Leloir (Amsterdam, 1974), no 2, 1 in F (c1788), collab. F. Duvernoy

Other orch. *La bataille de Gemmapp*, programmatic ov., D (1794), arr. kbd, vn, vc (1794), and pf solo (c1796), *Ouverture*, wind band, F (1794)

CHAMBER

Qts. 21 for fl, vn, va, vc, incl. 6 as bk 1 (1783), 6 as bk 2, op 16 (c1786), 3 as bk 3, op 62 (c1791), 6 as bk 4, op 66 [? and op. 67] (c1794),

Sonate en quatuor, fl, va, hn/vc, pf/hpd (1789); 3 for bn, vn, va, vc, op 73 (c1800), arr. cl, vn, va, vc, as op. 75

Trios. 6 for fl, va, vc (1784), 6 for bn, vn, vc, op 17 (c1782); 6 for 2 fl, vc, op 19 [also as op 60] (c1787), 1 for fl, bn/vc, pf/hpd (1787); 6 for 2 cl, bn, op 27 (1790); 6 for fl, cl, bn, opp. 61-2 [also as op 6] (c1795), also pubd for fl, vn, vc; 6 for fl, vn, vc, 7op. 66 [also as op 19] (c1798), also pubd for 3 fl; 3 for fl, vn, vc, 7op. 66 (c1795); 3 for 2 cl, bn, op 75 (c1801), also pubd for 2 fl, bn/vc as op. 77, 3 for cl, hn, bn (c1805)

Duos: 108 in 18 sets for 2 fl (1782-1820); 15 in 3 sets for fl, vn (c1796-), 6 arr. 2 cl: 6 for fl, va (1784), arr. 2 fl, and cl, va, 12 in 2 sets, cl, bn (c1788-c1803), 6 for 2 bn (c1782)
 Sonatas 7 in 3 sets, hpd/pf, fl obbl (1784-9), 48 in 8 sets for fl, b (1786-?1809), 12 arr. cl, b, 6 arr. vn, b, 6 arr. 2 fl, 6 arr. ob, b, 6 for bn, b (?1788), 6 for pf, vn ad lib (c1800), 2 adagios, hpd (1783)
 Arrs: Excerpts from operas by Gaveaux and Cherubini, arr. wind band, Playel. 3 qnts, arr fl, vn, 2 va, vc, Playel 27 qts, arr fl, vn, va, vc, Playel: 3 trios, arr fl, vn, vc; Playel: 6 duos, arr 2 fl, Playel. 6 sonatas, arr fl, vc; P. Kreutzer 6 sonatas, arr fl, vc

WILLIAM MONTGOMERY

De Vigne [Devigna, de Vinca, de Wyngaerde], **Antoine** (d Antwerp, 1498 or 1499). Flemish composer. An Antoine de Wyngaerde was appointed chaplain at the Vrouwekerk, Antwerp, in 1483, on taking up the post he adopted the name form 'de Vinca'. He is probably identifiable with a student at Louvain University from the diocese of Cambrai, although Glarean described the

composer as being from Utrecht. He appears to have retained the post in Antwerp until his death.

Two compositions by de Vigne are extant. Glarean remarked on the expressive power of the four-voice *Ego dormio* (CH-SGs 463): 'the entire song has an inherent grace in all voices, so that one may see the sleeper actually awakened'. *Franch cor quastu* [Franc coeur, qu'as tul] *Fortuna* (RISM 1502², ed. in MRM, II, 1967) is a remarkable five-voice chanson. According to Lowinsky, it is one of the best examples of the *Fortuna* tradition in music. Not only does it employ the *Fortuna* melody in two voices at two speeds, but also uses its inversion in two other voices, at two different speeds; the superius sings the French melody. Both pieces are chordal in conception with simple and straightforward harmonic bass lines

STANLEY BOORMAN

Devisenarie (Ger.). A term invented by Hugo Riemann for which there is no immediately intelligible English translation. *Devise* means 'device', in the sense of Longfellow's 'a banner with the strange device'. Riemann used the term to describe a common characteristic of Baroque arias: the singer begins with the opening of his first phrase, followed by an instrumental ritornello, and then sings it complete (see ex. 1, below).

JACK WESTRUP

De Vito, Gioconda (b Martina Franca, Lecce, 22 June 1907). British violinist of Italian birth. She studied the violin at Pesaro and later in Rome. In 1932 she won an international violin competition in Vienna, which led to notable concert appearances and to her appointment as principal professor of violin at the Accademia di S Cecilia, Rome. She devoted much of her time to teaching until after 1945, and first came to London in 1947 to make gramophone records. Her London concert début was in 1948 with the LPO; in 1949 she married

Ex 1 Bach *Was mir behagt*, BWV 208, no 14

Ihr Fel - der und Au - en lasst
 gru - nend euch schau - en, ihr Fel - der und Au - en, lasst gru - nend euch
 schau - en, ruft Vi - vat, ruft Vi - vat, ruft Vi - vat! tzt zu

and settled in England.

Until she retired in 1961 she was widely praised for her consistent achievement of an almost ideal blend of expert technique and poetic imagination in the major works of the standard violin repertoire, particularly in Bach, Mendelssohn and Brahms. An outward serenity of style disciplined an inward spirit of passionate feeling. She had the professional use of a Stradivari violin (the 'Tuscan') on loan from the Accademia di S Cecilia, from which she drew an exceptionally clear, rich tone, as some of her gramophone records testify.

NOËL GOODWIN

Devoto, Daniel (b Buenos Aires, 25 Dec 1916). Argentine musicologist, writer and composer. He was taught the piano and interpretation by Jacqueline Ibels (Buenos Aires 1947–51) and Jane Bathori (Buenos Aires 1942–6, Paris 1952–9), and composition by Jules Perceval (Buenos Aires 1935–9), Juan Carlos Paz (Buenos Aires 1947–51) and René Leibowitz (Paris 1952–3). He took doctorates at the universities of Buenos Aires (1951, in literature and philosophy) and Paris (1955, in music and literature) and a doctorat ès lettres at the University of Paris in 1970 with a dissertation on the contribution of folklore and musicology to literary criticism. Between 1940 and 1952 he gave many lectures and concerts at several Argentine universities, notably at Cuyo, as professor of music history and aesthetics (1944–5). In 1953 he joined the CNRS, where he was appointed directeur de recherche in 1966. Concurrently he lectured in France and abroad (England 1963, Pittsburgh 1967), as reader at the musicological institute in Poitiers (1968) and as lecturer in medieval Spanish literature at the Ecole Normale Supérieure (appointed 1973). A member of several learned musical and literary societies, he was one of the founders of the Agrupación Nueva Música de Buenos Aires (1944).

Devoto's work is varied and extensive; while his main interests are literary, including folklore, his considerable musicological research has focussed on Spain and Latin America, contemporary music and current musical events, subjects which he has frequently related to literary topics. He has produced numerous reviews, translations, and annotated editions. His published compositions include works for solo flute and for voice and piano.

CHRISTIANE SPIETH-WFISSENBACHER

Devreese, Frederic (b Amsterdam, 2 June 1929). Belgian conductor and composer. The son of Godfried Devreese, he studied at the conservatories of Mechelen and Brussels, and later at the Accademia di S Cecilia (1952–5) and the Vienna State Music Academy (1955–6). Subsequently he took an appointment as a producer for Belgian Television, and much of his work, as conductor and composer, has been with this medium. He has conducted the symphony and chamber orchestras of Belgian Radio, in addition to appearing as a guest conductor abroad. His early works, notably the First Piano Concerto, were influenced by jazz and by the music of Gershwin; while he has remained an eclectic composer, a certain Flemish expressionism is evident in his later music. In 1964 he received the Italia Prize jointly with Mark Liebrecht for the television opera *Willem van Saeftinge*, which was adapted for the stage in the same year.

WORKS

(selective list)

- Dramatic: *Maskerade*, ballet, 1956, *Willem van Saeftinge* (television opera, J. Francis), 1964, *Le cavalier bizarre* (television opera, M. de Ghelderode), 1967, *De liefde van Don Juan* (ballet, A. Leclair), 1974
- Documentary films by Paul Haesaerts: *Een vreemde reis* (Les clés des chants surréalistes), 1966, *Bruegel*, 1968, *Evencpoel, schilder van de tederheid*, 1970, *James Ensor*, 1972
- Feature films by André Delvaux: *De man die zijn haar kort liet knippen* [The man who had his hair cut short], 1965, *Un soir, un train*, 1968, *Rendez-vous à Bray*, 1971
- Orch. Pt Concs: no 1, 1949, no 2, 1952, no 3, 1958, Vn Conc., 1951, Sym., 1953, Tpt Conc., 1957, *Mouvements*, str., 1962, *Evocations*, suite, 1965, *Divertimento*, str., 1971, *Don Juan*, suite, 1974, *Maskerade*, brass, 1976, *Ouverture*, 1976
- Chamber music, songs

CORNEL MERTENS

Devreese, Godfried (b Kortrijk, 22 Jan 1893; d Brussels, 4 June 1972). Belgian violinist, conductor and composer. At the Brussels Conservatory he studied violin under Ysaÿe and Thomson and composition under Gilson and Rasse, then became leader of the Kurhaus Orchestra in The Hague and a member of the Concertgebouw Orchestra in Amsterdam. For some time he was conductor at the Lyric Theatre, Antwerp.

and in 1924 at the Park Theatre Vauxhall, Brussels. Later he worked in Monaco, and in 1930 he became director of the Mechelen Conservatory until he retired in 1959. During this period he conducted the orchestras of the Belgian Radio and was also a guest conductor in Holland, France and Poland.

His compositions remained Romantic in style, occasionally influenced by impressionism.

CORNEEL MERTENS

Devrient, Eduard (Philipp) (b Berlin, 11 Aug 1801, d Karlsruhe, 4 Oct 1877). German theatre historian, librettist and baritone. Eduard Devrient, nephew of the actor Ludwig Devrient, had two brothers who became actors Karl (first husband of Wilhelmine Schröder-Devrient) and Emil. At the age of 17 he entered the Berlin Singakademie and studied singing and thoroughbass with Zelter. He gave his first solo public performance in 1819 in Berlin in C. H. Graun's *Der Tod Jesu* and on 18 April 1819 he sang the part of Thanatos in Gluck's *Alceste*, after his performance as Masetto in *Don Giovanni*, he was engaged as a baritone at the Royal Opera.

In 1822, Devrient went on a tour to Dresden, Leipzig, Kassel and Frankfurt (where he was influenced by J. N. Schelble). Later he visited Vienna to hear the Italian opera in which Lablache and other famous singers were performing under Barbaia's direction. He met Mendelssohn in July 1822 and they became close friends. They first heard some of the numbers of Bach's *St Matthew Passion* at the Friday practices at which Zelter rehearsed works which he considered the public would not appreciate. Devrient became determined to have the work performed in Berlin under Mendelssohn's direction. Through his efforts, Zelter cooperated, and the famous performance which started the Bach revival took place under Mendelssohn on 11 March 1829. Devrient himself gave a much praised performance of the part of Christ.

A major setback came when he lost his voice through overwork after his performance of the Templar in Marschner's *Der Templer und die Jüdin* in 1831. He was forced to concentrate on acting, although he sang occasionally, from 1834 he appeared exclusively in spoken roles. In 1844 he became chief producer and actor at the Dresden Court Theatre. After his resignation in 1846, he worked as a writer until his appointment as director of the Karlsruhe Court Theatre in 1852; he retired in 1870. He married a singer, Therese Schlesinger, when he was 23; of their children only one, Otto, had a successful theatrical career.

Devrient was successful as opera singer (in works by Gluck, Mozart, Beethoven, Spohr, Weber, Marschner, Rossini and Auber), actor and playwright; yet his major contribution lies in his work as theatre reformer, historian and librettist, and in his efforts towards the Bach revival. His libretto *Hans Heiling*, originally written for Mendelssohn (1827), was later revised for Marschner; Devrient sang the title role at the first performance (Berlin, 1833). Settings by W. Taubert of *Die Kirmess* (1831) and *Der Zigeuner* (1832) by Devrient were also first performed at Berlin (1832 and

1834 respectively). Among his writings, *Das Nationaltheater des neuen Deutschlands: eine Reformschrift* (1849) and *Geschichte der deutschen Schauspielkunst* (1848–74) are particularly important. Devrient advocated the formation of a national theatre; he raised the standard of performances in Karlsruhe, paying careful attention to details in the belief that everything must contribute to the total drama. He deplored anything careless or unplanned and sought to eliminate virtuosity; he also recognized the importance of historical costumes.

GAYNOR G. JONES

Devroye, Théodore Joseph [Vroye, Théodore Joseph de] (b Villers-la-Ville, Brabant, 19 Aug 1804, d Liège, 29 July 1873). Belgian music scholar. He studied for the priesthood at the seminaries in Mechelen and Liège and was ordained in Munster in 1828. He served at the church of St Christophe in Liège from 1830 until 1835, when he was appointed to the cathedral as canon and precentor for the diocese of Liège. His many activities within diocesan administration included the restoration of churches which had suffered from recent wars in Europe, the construction of organs and the rejuvenation of religious music. Between 1842 and 1862 he attempted to reform the faulty plainsong melodies which were being used in the Catholic church services throughout the diocese by editing a series of revised liturgical books based on the Medicean editions of Plantin and of Plomteux. Devroye's editions demonstrate his theory promoting precise correspondence between melodic and prosodic accents. He was president of the church music congresses held in Mechelen in 1863 and 1864, and was a member of several scholarly musical and archaeological societies in Belgium and Italy.

JOHN A. EMERSON

De Waart, Edo (b Amsterdam, 1 June 1941). Dutch conductor. The son of a choral singer, he studied the oboe with Haakon Stoltijn at the Amsterdam Conservatory, and became co-principal oboe with the Amsterdam PO in 1961, and with the Concertgebouw Orchestra in 1963. During this time he was studying conducting, and a course at Hilversum in 1964 under Franco Ferrara brought about his début with the Netherlands Radio PO; later that year he won a prize in the Dimitri Mitropoulos conductors' competition at New York, the year's engagement as assistant conductor with the New York PO, 1965–6, however, proved to have less practical value than he had hoped. He was engaged at the 1965 Spoleto Festival, conducting a double bill of *The Soldier's Tale* and Tosatti's *Partita a pugni*. His career took firmer root in 1966 with his appointment as musical director of the Netherlands Wind Ensemble (with whom he made some excellent recordings, particularly of Mozart) and as assistant conductor with the Concertgebouw Orchestra. In the following year he became co-conductor of the Rotterdam PO with Jean Fournet, and succeeded him as musical director in 1973. He made his British début in 1969 with the RPO at Folkestone (1970 in London), and broadened his operatic experience with the Netherlands Opera from 1970, in the USA at the 1971 Santa Fe festival, and elsewhere, in addition to making concert tours. He was appointed principal guest conductor of the San Francisco SO from 1975. In 1976 he made his Covent Garden début with *Aradine auf Naxos*.

NOËL GOODWIN

De Yllanes, Johannes. See HILIANIS, JOHANNES.

Dezais, Joseph. French choreographer and dancing teacher, possibly related to PROSPER-DIDIER DESHAYES.

Dezède [D.Z., Dezèdes, Desardes, De Zaidcs], **Nicolas** [?Alexandre] (b ?1740–45; d Paris, 11 Sept 1792). Composer, resident in Paris. He is variously thought to have been born in Turin, Lyons, in Germany or in Slavonia, and there is some evidence that he may have been the illegitimate son of a German prince (perhaps even Frederick II of Prussia). Of his family background he himself knew only that his name contained the letters 'd' and 'z', with which he signed his scores. He received an education befitting a high birth, and was placed under the direction of an abbé to learn the fundamentals of music and the harp. He then went to Paris to perfect his music education and to study composition.

During these years he received an annual allowance of 25,000 francs, which was to be doubled when he came of age provided he did not investigate his ancestry. He persisted in doing so, however, and the allowance was withdrawn. To support himself he turned his musical talents to advantage, and began a fruitful association with the librettist Monvel. In 1772 his first opera, *Julie*, received its première with much success at the Théâtre-Italien; this initiated a long series of widely acclaimed theatrical works over the next two decades. *Blaise et Babet* (1783), his most successful work, maintained its popularity at the Théâtre-Italien for over two years. The role of Blaise was sung by Mme Dugazon, and with it she began the most brilliant episode of her career. In 1785 Duke Maximilian of Zweibrücken, later King of Bavaria, gave Dezède a captain's brevets and a stipend of 100 louis on condition that he spent a month each year in Zweibrücken. This grant made him no more wealthy, for he dissipated it and alienated his benefactor. According to early biographies his prodigalities ruined his mistress, Mme Belcour of the Comédie-Française, who, though no longer young, was infatuated with him. Dezède was survived by Mme Belcour and a daughter Florine (b ?1766, d by 1792), whose one-act comedy *Lucette et Lucas, ou La paysanne curieuse*, in imitation of her father's style, was performed with little success at the Théâtre-Italien in 1781 and the score published. A portrait by Greuze shows Dezède in richly embroidered dress. He is said to have affected a brusque manner and grand tone, which contradicted his natural benevolence.

Dezède, called 'the Orpheus of the Fields', specialized in the pastoral, and in this genre he had no imitators or rivals. His operas were translated into several languages and widely performed throughout Europe, some being revived more than two decades after his death. At least five of them were performed in Russia, sometimes in Russian translation. *Blaise et Babet* was well known in the USA and even had a performance on the island of Mauritius. His music was characterized by a freshness and innocence to which he added taste, elegance and directness of expression and sentiment. *Blaise et Babet*, which attracted audiences by the moving pastoral tone of its score, is his masterpiece. Its overture, which has been favourably compared with those of Grétry, and its airs, were extracted and published separately in numerous arrangements throughout Europe and the USA. Generous with advice to young playwrights, Dezède thoroughly understood the art of dramatic construction: *Auguste et Théodore* (1789), on a subject from German theatre, demonstrated his skill in setting what remained essentially a play. The success of *Les trois noces* (1790) – a quasi-pastoral featuring military defiles, a happy nobility, and a simple and loving king surrounded by child-like subjects – helped to reassert the position of the Comédie in the political struggles raging in Paris at the time. *Paulin et Clairette* (1792), a light opera given at the Théâtre de la Nation (Théâtre-Française), threatened the former prerogatives of the Théâtre-Italien to all comic opera.

Despite their popularity Dezède's works did not survive the Napoleonic era. An air from *Julie*, 'Lison dormait dans un bocage', served as the theme of a set of nine variations for piano (K264) by Mozart, who may have known Dezède personally. The well-known air *Ah, vous dirais-je, Maman?*, used by Mozart in another set of variations (K265) and famous in English as *Twinkle, twinkle little star*, is attributed to Dezède.

WORKS

(all printed works published in Paris)

OPÉRAS

(performed in Paris unless otherwise stated)

- Julie (opéra comique, 3, J. M. B. de Monvel), Comédie-Italienne, 28 Sept 1772, score (c1772)

LELAND FOX

Dezet (Fr. *dixtuor*; Ger. *Dezett*). A composition for ten solo instruments, usually a mixed ensemble of wind and strings. Poulenc's *Mouvements perpétuels* are scored for flute, oboe, english horn, clarinet, horn, bassoon and four strings; H. C. Praag's *Dezett* is scored similarly but omits the english horn in favour of an additional string instrument. Both Boris Blacher's *Neun estnische Tänze* and Enescu's *Dixtuor* op.14 are for wind ensembles. In the 18th century such ensembles were often built up by using wind instruments in pairs as in Stamitz's *Sieben Partien* for two flutes, two oboes, two clarinets, two horns and two bassoons.

Constant Lambert's Concerto for piano and nine instruments is a dezett that continues the tradition of writing in a concertante style for the piano when it is used in a large chamber ensemble. Ravel's *Trois poèmes*

de Stéphane Mallarmé for voice, piano, string quartet, two flutes and two clarinets ought also to be included in the category of dezets. In a chamber orchestral style is Britten's inventive *Sinfonietta* op.1, for ten instruments.

MICHAEL TILMOUTH

Dezime (Ger.). TENTH.

D'Harcourt, Eugène (b Paris, 2 May 1859; d Locarno, 4 March 1918). French composer and writer on music. In 1882 he entered the Paris Conservatoire and studied with Savard, Durand and Massenet, simultaneously following a course in law. From 1886 to 1890 he attended the Berlin Hochschule für Musik, where his teachers included Woldemar Bargiel; at this time he became an enthusiastic admirer of Wagner and of the music of the German Romantic school, especially Schumann. On his return to Paris, he built a concert room and instituted a series of popular concerts in order to make music available to a wider public. After three years the project was forced to close down, and in 1900 d'Harcourt founded an oratorio society, Les Grands Oratorios, at the church of St Eustache. He travelled widely in connection with his work, especially in German-speaking countries and Scandinavia, and his activities as a result did much to spread contemporary German music and culture in France. He translated into French the librettos of Schumann's *Genoveva* and Weber's *Der Freischütz* (with Charles Grandmougn), and supported, against considerable opposition, the performances of Wagner's operas in Paris. Among his writings are reports on the musical activities of other countries (*La musique actuelle en Italie*, 1906, ... *en Allemagne*, 1908, ... *dans les états scandinaves*, 1910), and analytical studies of Beethoven's symphonies (Paris, 1895-8). His compositions, which include a mass, two ballets, an opera, *Le Tasse* (1903), three symphonies and smaller vocal and instrumental works, have been largely forgotten.

D'Hooghe, Clement (Vital Ferdinand) (b Temse, 21 April 1899; d Wilrijk, nr. Antwerp, 1 April 1951). Belgian organist and composer. He studied classics at the Episcopal College of St Nikolaas (1913-17) and music at the Antwerp Conservatory (1918-27) with Wambach, De Boeck, Mortelmans (harmony and composition), Paepen (organ) and Gilson (orchestration). In 1927 he won the Albert de Vleeshouwer composition prize and took Dupré's course for organ improvisation in Paris. He served as organist at several Antwerp churches, notably St Paul (1926-51), was artistic director of the Empire and Roxy theatres in the city, directed the Berchem Music Academy, and taught at the Antwerp Conservatory as professor of transposition (1942-51). A brilliant organ virtuoso, he gave recitals in Belgium and abroad. His compositions show facility

and, within a style of Classical form and rich harmony, an attempt to express his personal feelings in a manner that is direct, joyful and often humorous.

WORKS

(selective list)

Orch. Preludium, 1928, Variations on a Swedish Song, 1936, Pf Conc., 1949

Diabelli, Anton (b Mattsee, nr Salzburg, 6 Sept 1781, d Vienna, 7 April 1858). Austrian publisher and composer. He studied music in Michaelbeuren and Salzburg and in 1800 entered the Raitenhaslach Monastery. After the dissolution of the Bavarian monasteries (1803) he went to Vienna, where he taught the piano and guitar, and soon became known for his arrangements and compositions (six masses by him had been published in Augsburg in 1799), many of his works were published in Vienna. His job as a proofreader for S. A. Steiner & Co. (as detailed in Beethoven's letters) gave him an increasing interest in music publishing, and in the *Wiener Zeitung* (15 September 1817) he advertised a subscription for some of his sacred compositions, which were to appear from his newly established publishing house in the Schulergerasse. On 29 September he moved to no. 351 Am Hof. The first notice of publications (*Wiener Zeitung*, 11 February 1818) announced the appearance of further works, which were soon being distributed by most music retailers; the works in the subscription series were available on 27 April 1818.

Wishing to acquire business premises of his own, Diabelli made contact with Pietro Cappi, who had been practising as a licensed art dealer in the Spiegelgasse since 30 July 1816. After Cappi's shop passed to Daniel Sprenger on 8 August 1818, the firm Cappi & Diabelli was established in the Kohlmarkt, and advertised in the *Wiener Zeitung* (10 December 1818). From its beginning the new firm was remarkably active in publishing current operatic and dance music, anthologies such as *Philomele für die Gitarre* and *Philomele für das Pianoforte und Euterpe* for piano (solo and duet) were popular for decades. Similar series appeared for other types of music; the popular *Neueste Sammlung komischer Theatergesänge* reached 429 volumes. A series of light, pleasant melodies for guitar was given the title *Apollo am Damentoilette*.

As an experienced musician, Diabelli knew how to respond to the musical fashions of the time; and the connection he formed with Schubert established the company's widespread fame. Financed on commission,

he published Schubert's first printed works; on 2 April 1821 *Erlkönig* appeared as op. 1 and on 30 April *Gretchen am Spinnrade* as op. 2. Opp. 1-7 and 12-14 later became the property of Cappi & Diabelli. Diabelli's long-established acquaintance with Beethoven, however, led to only a few publications: the reissues Beethoven wanted of the sonatas opp. 109-11, and a few first editions of the smaller works. The firm also published the *Vaterländischer Künstlerverein*, including Beethoven's *Diabelli Variations*, op. 120.

Diabelli's intention in 1819 in sending his waltz theme to every composer he considered important in Austria was ostensibly to form a 'patriotic anthology', but this altruism was mixed with sound practical sense, as in an age of domestic music-making he could be sure that a collection of short pieces by the best composers would catch public attention and purse. Not every composer responded, but by 1824 the inclusion of the German composer Kalkbrenner, visiting on a Vienna concert tour, brought the total to about 50, and a coda by Czerny concluded the set. Many of the variations are similar in method, since the composers were working in ignorance of one another and since piano virtuosity and variation techniques were widely taught according to familiar principles. Many composers contented themselves with a running figure decorating the theme, as, for instance, Czapek, Dietrichstein, Payer, Plachy, Ignaz Umlauf and Winkler. A number fastened on an idea developed with great power by Beethoven, such as Beethoven's pupil the Archduke Rudolph, in an excellent piece. Some produced contrapuntal treatment, among them Simon Sechter and Joachim Hoffmann, others applied chromatic harmony to the diatonic theme, including Rieger, Vorišek, Kerzkowsky and Hořalka. The variations by the famous piano virtuosos, especially Kalkbrenner, Czerny, Pixis, Moscheles, Gelinek and Stadler, are on the whole brilliant but shallow, for Liszt, then only 11, it was his first publication, and his piece is vigorous but hardly characteristic. Schubert's circle contributed some of the better pieces, including those by Assmayer and Huttenbrenner, though Schubert's own C minor variation is greatly superior. The variations by Drechsler, Freystädler, Gänsbacher and Schenk are also striking.

In June 1824, following Cappi's retirement, the firm (renamed Anton Diabelli & Cie) entered its most productive period. Cappi's place was filled by Anton Spina (b Brno, 1790; d Vienna, 8 Sept 1857), who handled the business side while Diabelli was responsible for its artistic direction. This favourable division of responsibility led to considerable success and the firm could claim to compete successfully even with Tobias Haslinger. Lesser firms were taken over: Thadé Weigl on 19 November 1832, Mathias Artaria on 26 June 1833 and M. J. Leidesdorf (Anton Berka) on 4 September 1835.

Diabelli's programme shows that he recognized the need to finance the publication of serious or advanced music by producing popular pieces: the firm's output included a rich variety of fashionable music for entertainment and dancing. But his reputation rests on his championship of Schubert, whose principal publisher he became until 1823 when (probably through a fault of Cappi's) Schubert broke off relations with the firm and turned to other publishers. After Schubert's death Diabelli was able to obtain a large part of the estate from his brother Ferdinand; this became the property

of his firm. Works owned by Leidesdorf, Pennauer, Artaria and Weigl automatically became Diabelli's property as he purchased these firms. The publication of this unexpectedly rich body of compositions extended beyond Diabelli's death to his successors, so that 'new' works by Schubert were still appearing in Paris in the 1850s.

On 3 November 1851 Spina's son Carl Anton (b 23 Jan 1827; d 5 July 1906) became a partner of the firm; on 23 January 1851 Diabelli retired, dissolving the company contract. Anton Spina continued to direct the firm until the end of the year, when he retired, passing the directorship to his son. An advertisement in the *Wiener Zeitung* (11 January 1852) announced the change of the firm's name to 'C. A. Spina, vormals Diabelli'. The firm purchased the former Mechetti publishing house in 1856. Carl Anton Spina continued the tradition of Diabelli, from May 1864 the firm published works by Johann Strauss (II) and his brother Josef.

The firm's enormous productivity is most clearly reflected in the plate numbers of the published works. At the end of the period of Cappi & Diabelli (1824) the number 1558 had been reached; A. Diabelli & Cie closed at about number 9100. Spina afterwards extended the series to 10,900, then continued from about 16,000. The intermediate numbers may have been omitted to accommodate the works purchased with the Mechetti firm, these, however, never entered the enumeration. By the time the firm ceased activity the series of plate numbers had reached 24,670.

In 1872 Spina bought the catalogue of Adolf Bösendorfer, but later in the year the firm passed to Friedrich Schreiber. It remained in his possession only a few years, for in 1876 Schreiber merged with August Cranz in Hamburg, and in 1879 the name of the company became August Cranz by purchase.

Dialogue (It. *dialogo*; Sp. *diálogo*, Ger. *Dialog*; Lat. *dialogus*). As applied to music, the term is used in two general senses: to denote the setting of a text involving conversational exchanges between two or more characters, and to describe a musical work (or part of a work) which uses devices such as alternation, echo or contrast in a way that seems analogous to spoken dialogue.

1 Introduction. 2 Early dialogues. 3 Secular: 16th century. 4 Secular 17th century. 5 Sacred.

1 INTRODUCTION. In the second sense defined above 'dialogue' has been used as a title for certain instrumental works (particularly for organ) that exploit contrasts in tone colour. Couperin's 'Dialogue sur les trompettes, clarion et tierce du grand [clavier] et le bourdon avec le langot du positif' (*Messe des paroisses*, 1690), in

which the 'dialogue' is between two organ manuals, is one example; another, in the sphere of orchestral music, is provided by Debussy's 'Dialogue du vent et de la mer' (the third movement of *La mer*). Since the Renaissance the term 'dialogue' has also been loosely used as a designation for antiphonal vocal music, regardless of text form (e.g. Portinaro's setting of Petrarch's *Dolci ire, dolci sdegni e dolci paci*, 1557); in fact more than half of the dialogues in Gardane's anthology *Dialoghi musicali* (RISM 1590¹¹) are echo or polychoral pieces rather than textual dialogues.

Used in its first sense, the term 'dialogue' is now most frequently encountered in connection with the dialogue of opera and other stage works. During the 16th and 17th centuries, however, with which this article is mainly concerned, the term was also used more specifically to denote the independent dialogue settings included in collections of madrigals, motets and cantatas, and it was for this type of setting that in the early 17th century G. B. Doni coined the phrase 'dialoghi fuor di scena'. This usage of the term can still be found in the 18th century, though by then it had largely been superseded by the more general designations CANTATA and ORATORIO.

2 EARLY DIALOGUES. The history of dialogue texts in musical setting can be traced to the late Middle Ages. Early examples include the dialogue tropes of the 10th and 11th centuries (e.g. *Quem queritis* and *Hodie cantandus est*, see MEDIEVAL DRAMA, §II and fig.1); the debates and competitions on amatory or political topics during the reunions of troubadour and trouvère guilds in 13th-century France (*tenso, partimen, jeu parti*); and some monophonic ballades in dialogue form such as the anonymous *Douce dame debonnaire* (HAM, i, 16), a humorous altercation between the suitor and his lady. The central problem of setting a textual dialogue in polyphony was to distinguish musically between the speakers. Although poems cast as dialogues are common in literary sources from Virgil's *Eclogues* onwards, few musical settings survive from before the advent of through composition in the 16th century, perhaps because the *formes fixes* of the Middle Ages and early Renaissance lacked sufficient elasticity to cope with the irregular word patterns and rapid shifts of speaker typical of most dialogues. Donato da Cascia's ballata *Senti tu d'amor, donna?* (ed. in PMFC, vii, 62), for example, presents the words of both speakers simultaneously, following the form rather than the content of the text. A more realistic approach in which the suitor's lines are assigned to the upper voice and the lady's to the lower (an anomaly that may be an intentional caricature) is found in Niccolò da Perugia's ballata *Donna, posso io sperare* (ed. in PMFC, viii, 128). Many later dialogues differentiated the conversational exchanges by contrasting high and low pairs of voices, as in Busnois' *Terrible dame*, which also sets both parts of the conversation in first-inversion chords, or 'faux-bourdon', perhaps a punning (*faux*: 'false') commentary on the artificiality of courtly love.

3. SECULAR: 16TH CENTURY. A number of dialogue *capitoli*, *barzellette*, *strambotti* and sonnets survive among the works of the frottolists. In the *capitolo*, because only the upper voice was sung, the dialogue could be divided between the singers by an alternation scheme: the insertion of bar-lines marking off each change of speaker in the 1509 print of Tromboncino's

Acqua, aiuto, al foco!, and the addition of superscript letters above the singers' respective parts in a 1510 print of his *Amor! che vuoi?* suggest that two singers were intended. Another dialogue technique, used for *barzellette*, *strambotti* and sonnets, was to divide four fully texted voices into pairs representing now one, now the other speaker. Examples include Ruffino d'Assisi's *Hayme Amor* (RISM 1521*), fra Pietro da Hostia's *O Morte* (RISM 1531*), and Bernardo Pisano's several settings of Lorenzo Strozzi's ballata dialogue *Son io donna* (1520).

Verdelot appears to have been the first to write dialogues for five and six voices. His five-voice dialogues generally use varied textures to create an illusion of textual discourse (e.g. *Pur troppo donna* and *Quant'ahi lasso*), but in the six-voice dialogues *Quando nascesti Amor?* (text by Sasso, ed in Slim) and *Chi hussa?* (ed in Harrán, 1968) the two upper voices are systematically contrasted with the lower four, producing a musical division that exactly follows that of the text. Willaert's seven-voice setting of *Quando nascesti, Amor?* (*Musica nova*, 1559), probably composed in the late 1530s, shows an expansion of Verdelot's dialogue methods in several ways. By adding a voice to Verdelot's two-versus-four scoring, Willaert could exploit contrasting ensembles of three high and four low voices to differentiate between the speakers of the dialogue. However, a rigid disposition of the voice groupings is never strictly maintained, as one of the voices from the lower choir is frequently added to the upper choir, producing a sham double-choir effect. If his portrayal of the speakers' gender by contrasting high and low voices was an orthodox imitation of nature, Willaert's innovatory use of varied textures, his immaculate word-setting and his perfectly controlled formal design set a standard that was truly new, a standard, furthermore, that was clearly discernible in the dialogues of his pupils Perissone Cambio, Baldassare Donato, Rore and Vicentino. Moreover, Willaert was the first to set for seven voices the three sonnet dialogues from Petrarch's *Canzoniere* (*Liete e pensose, Che fai, alma?* and *Occhi, piangete*), thus establishing a musical as well as a textual precedent of far-reaching and lasting importance. In these dialogues the continual voice interchange between choirs is even more pronounced, to the extent that usually only the two highest voices of each group carry the complete words of the dialogue. This arrangement suggests that only two of the voices need be sung while the remainder could be played on instruments, a suggestion consistent with what is known of performing practice in Venetian academies, for whose use *Musica nova* is considered on firm evidence to have been composed.

In spite of an apparent similarity in style to sacred music for *cori spezzati*, early 16th-century dialogues for eight-part double choir can be shown to be a natural outgrowth in style and method of the seven-voice dialogue. In 1550 Cambio published several eight-voice dialogues in which one of the four-part choirs is often supported by a fifth voice drawn from the other choir, in the tutti sections only one of the bass parts actually supports the harmony, indicating that spatial separation of the choirs in performance was not intended (as it was in true *cori spezzati* music). Moreover, Vicentino distinguished between dialogues and other multiple-choir works, stating that because the dialogue was sung 'in a circle' (i.e. with the performers close together) it was permissible to use intervals between the bass parts that

would be prohibited in double-choir style (*L'antica musica ridotta alla moderna prattica*, 1555, iv, chap.28, ff.85f).

The subject matter of dialogues gradually changed from semi-obscene and humorous 'He-She' altercations (e.g. Verdelot's *Chi hussa?*, Janequin's *Ouvrez moy l'huy*, Encina's *Pedro, i bien te quiero*) to refined Petrarchistic texts as advocated by Bembo (e.g. the introspective sonnet dialogue between Cupid and the poet, *Amor, se così dolce*, set by Rore in 1557). The humanistic revival of texts and themes from classical antiquity is evident in Rore's eight-part setting in recitatorial style of Horace's ode *Donec gratus eram tibi*, also set by Portinaro in an Italian translation (*Mentre m'havesti caro*, 1554). Donato's seven-voice dialogue between shepherds and nymphs relating the rape of Proserpine, *Ahi miserelle* (1553), shows a fusion of pastoral and classical literary motifs. Infernal dialogues, usually depicting an encounter between Charon and the fiery soul of the rejected suitor, achieved lasting popularity. In particular, Serafino de' Ciminelli dall'Aquila's *strambotto* dialogue *Crudo Caronte* (and its variants, *Caron, Caronte and Ferma, Caronte*) enjoyed a remarkably widespread international vogue, first in Italy with settings by Portinaro (1560), Boyleau (1564), Alcarotto (1569), Sabino (1582) and Scaletta (1590), and later in France and England (see below). Similar in subject is Striggio's nine-voice dialogue *O fer aspro dolore* (RISM 1584*), which exploits an exceptionally low tessitura suggestive of the depths of the underworld (sub-bass, bass, tenor and alto clefs). As the century progressed, the brooding melancholy of the Petrarchistic, introspective dialogue (in which the poet converses with his own eyes, heart or soul) gradually lost ground in favour of the joyfully extrovert but superficial pastorale like Gastoldi's 'baccanale' *Tutti lieti honoriamo* (1589) and Vecchi's 'boscareccia pastorale' *Ecco rident'a noi* (RISM 1590**), or scenes of imagined seduction in which the poet wreaks vicarious revenge on a formerly unobtainable lady, such as Alessandro Orologio's setting of *Lucilla, io vo morire* (1586).

As secular music on a grand scale the dialogue was eminently suited to court festivities requiring music that could convey, by reason of its volume of sound, its clear harmonic structure and its contrasting ensembles of voices, a sense of pomp and grandeur. The texts for these spectacles generally are emblematic dialogues between allegorical or mythological deities designed to flatter the princely patrons whose virtues they extol. Examples include Sperindio Bertoldo's eight-voice dialogue between the Muses, *Chi è questo Alphonso, o muse* (1562), written for Alfonso II d'Este's accession as Duke of Ferrara in 1559, Wert's brilliant virtuoso display piece for seven voices, *In qual parte si ratto i vani* (1581) for Vincenzo Gonzaga's marriage to Margherita Farnese in 1581, and several dialogues by Vecchi for the 1587 nuptials of Marco Pio of Savoy and Clelia Farnese, one of which is a massive 'Battaglia d'Amor e Dispetto' for ten voices in four sections (*Selva di varia ricreatione*, 1590). Outside Italy H. L. Hassler set a pastoral dialogue for the wedding at Augsburg in 1589 of Christoph Fugger and Maria, Countess of Schwarzenburg, *Donna de miei pensieri* (ed. in DTB, xx, Jg.xi/1, no.30), in which the newly wedded couple are represented in the improbable guise of shepherds; and Schütz wrote an eight-voice dialogue, *Vasto mar* (1611), in praise of his patron, Moritz, Landgrave of Hesse. At

Venice polychoral works in dialogue form were often commissioned for state occasions. Andrea Gabrieli's eight-voice *Felice d'Adria* (1570), written for the visit to Venice in 1565 of Archduke Karl of Carinthia, his 12-voice *Ecco Vineggia bella* (RISM 1587¹¹) and Vincenzo Bellavere's 12-voice *Questo re glorioso* (RISM 1584*), composed for Henri III of France's visit in 1574, exemplify the grand Venetian manner; this style culminated with Giovanni Gabrieli's *Udite, chiari e generosi figli*, a dialogue between tritons and sirens welcoming the 17th century, scored for 15 voices and *basso seguente*.

From the 1560s Florentine *intermedi* made increasing use of textual dialogue between onstage singers to extend the episodes and to lend a degree of continuity to the action, which was otherwise nearly static (see INTERMEDIO). *Intermedio* dialogues usually take the form of two or more separate compositions, performed successively as solo or ensemble pieces rather than in the rapid choral exchanges typical of the polychoral medium. An early example occurs in Striggio's music for the first *intermedio* performed with *La cofanaria* at Florence in 1565, which consisted of an eight-voice madrigal sung by Venus and her attendants, *A me, che fatta son negletta e sola* (1584*, ed. in Osthoff, II, 122), answered by a five-voice madrigal performed by Cupid and his companions, *Ecco, madre, andian noi*. Structurally this dialogue is of the *proposta risposta* type, containing only the barest elements of discourse, but it served as a prologue to the remaining five *intermedi*. An increasing trend towards multipartite episodes linked by dialogue is evident in later Florentine *intermedi*, most notably those performed with *La vedova* in 1569 and with *L'amico fido* in 1585, in which the alternation of stanzas between solo and chorus dominates the structure of each *intermedio*. The more traditional polychoral dialogue madrigal, with the possibility of separating the performers spatially (vertically or horizontally) on stage, was used occasionally to accommodate large groups of performers and to provide contrast and interplay enhanced by raising or lowering the performers with stage machinery. Notable examples include a 'bellissima canzone in modo di dialogo', *Scendi, leggiadra schiera*, performed by two vertically separated groups of deities who come together in a musical as well as a spatial sense to sing the final stanza in the sixth *intermedio* from *La vedova*, and Malvezza's six-voice *Doleissime sirene*, a triple-choir dialogue sung by the Fates and sirens during the first *intermedio* from *La pellegrina*, performed at Florence in 1589. Other entertainments in which dialogue madrigals were performed include several for eight voices: one by Ascanio Marri was performed at Siena before 1575 with the anonymous *Cantata pastorale*; Vecchi's eight-voice *Ecco nuntio di gioia* (1590) was pressed into service as the concluding item for the fourth *intermedio* performed with Illuminato Perazzoli's *pastorale Filleno*, given at Lugo (near Ferrara) in 1594 (with Gesualdo in the audience); and Vecchi's allegorical ten-voice 'Mascherata della Melanconia et Allegrezza' (*Dialoghi*, 1608) was performed by costumed singers and dancers in the streets of Modena in 1604.

In the second half of the 16th century an increasing interest in sonority for its own sake is apparent in the many dialogue madrigals composed for multiple choirs of contrasting ranges and asymmetrical voice groupings. The intent in these works was to furnish an essentially

decorative setting of the text with little concern for its dramatic potential. This purely formal, constructive aspect of musical dialogue is epitomized in a number of Giovanni Gabrieli's dialogue madrigals, several of which, marked 'aria da sonar', take the form of the instrumental *canzona francese*. Of more seminal importance were settings of the newly fashionable erotic *pastorale*, mixing dialogue and narrative in the epigrammatic style popularized by Tasso, Guarini and Marino. By far the best known was Guarini's *Tirsi morir volea*, which received fine settings by Wert (1581) and Andrea Gabrieli (1587). Apart from distinguishing between the words of the nymph and Thyrsis in the usual double-choir manner, and setting the opening narrative in the rhythms of the anecdotal French chanson, Wert's largely homophonic setting assigns both the narrative and the role of Thyrsis to the lower choir. The problem of realistically distinguishing between narrative and dialogue was solved only in the early 17th century, when, with the addition of continuo to the polyphonic madrigal, it became possible to extract solo voices from the choir for the dialogue portions, leaving the narrative to be performed by the entire choir. Monteverdi's splendid seven-voice setting of Marino's *Presso un fume tranquillo* (1614), constructed in this manner, is only one of a number of pieces that mark at once the end of the polyphonic tradition and the first step towards the sectionalized, highly dramatic style of the cantata.

4 SECULAR 17TH CENTURY. The adoption of the basso continuo as the basis of accompanied solo song provided 17th-century composers with the technical means to bring greater realism and expressive flexibility to their dialogue settings; and many of the volumes of monodies and concertato madrigals published in Italy during the first half of the century contain dialogues in which the roles are assigned to accompanied solo voices. In the main, these settings are for voices with continuo only. Some, however, such as Stefano Bernardi's *Bellezze amanti'oumè* (1619) and Biagio Marini's *Ninfa, non m'ami?* (1649), include obligatory instrumental parts. The musical forms of early 17th-century settings parallel those of contemporary solo song. Most are through-composed madrigalian settings resembling short operatic scenes. Strophic dialogues are also found, however, such as Antonio Brunelli's *Bella Licori, i tuoi dolori* (1616) in which the two characters Drusilla and Licoris complain of the hardness of their lovers, singing two arias in alternation before joining in a final duet. A few settings, such as Nicolò Fontana's *Luccellatrice* (*Bizzarie poetiche poste in musica*, 1635), a dialogue between three wildfowling, are cast in the form of strophic variations.

The earliest recitative-dialogues were published in Italy by D. M. Melli, who included two - *Cura e vezzosa Filii* (Thyrsis and Phyllis) and *E quando cessarai?* (Daphnis and Eurilla) - in his *Le seconde musiche* of 1602 (both represent amorous encounters between nymph and shepherd). Melli's settings, written in a style closer to Caccini's solo madrigals than to Peri's operatic recitative, comprise a series of alternating solos culminating in a short ensemble, a closed musical form characteristic of many early recitative-dialogues. His later setting of Marino's popular dialogue text *Poich' a haciar n'invita* (1609) exemplifies a different type, in which there is no ensemble writing. Such differences in musical approach were largely dictated by the form of

the text, but occasionally a single text can be found set in both ways. Chiabrera's *scherzo*, *Chi nudisce tua speme, cor mio?* (also incorporated into his libretto *Polifemo geloso*, 1615), for example, was set by Piero Benedetti (1611) as a series of alternating solos, but both Marco da Gagliano (1615) and d'India (1615) set the conclusion of the text as a duet. On a larger scale, Giovanni Valentini published in 1622 a setting of Act 2 scene vi, lines 1–136, of Guarini's *Il pastor fido*, in which he set lines 133–6 for six-part chorus, providing also an alternative two-part setting. Tarquinio Merula's rival setting of lines 1–169 (*Satiro e Corisca: dialogo musicale*, 1626), however, contains no ensembles.

During the first two decades of the 17th century, recitative-dialogues were published mainly by composers – among them Barbarino, Ghizzolo and Alessandro Grandi (i) – who worked outside Florence. The first volume devoted entirely to dialogues was, however, published by a Tuscan composer, Francesco Rasi, who issued his *Dialoghi rappresentativi* in 1620. The volume comprises four extended settings, all to texts by the composer himself and each involving three pastoral characters. For Rasi the 'representative style' did not simply mean declamatory recitative. His settings are varied by the introduction of duets (in dialogues nos 2 and 4) and passages of melodious *arioso* writing. Indeed, in the first and third dialogues he linked the opening speeches by *arioso* refrains. Each setting concludes with a strophic ensemble, that of the first dialogue being marked 'aria alla francese'.

The 1620s may be regarded as a watershed in the stylistic development of Italian dialogue settings, for while dialogues in a mainly declamatory style continued to appear (e.g. the two large-scale settings of texts from Virgil's *Aeneid* in Domenico Mazzocchi's *Dialoghi, e sonetti*, 1638), many of the settings written during the mid-17th century include extended passages of *arioso* writing. This stylistic development can be traced in the work of composers such as Luigi Rossi, Carissimi, Caproli and Cesti, whose dialogues are found in manuscript sources, but it is also evident in the through-composed dialogues published from 1629 by composers working at or near Venice. These Venetian dialogues are of particular interest since their composers – Rovetta, Sances, Fontei, Benedetto Ferrari and Filiberto Laurenzi – were among those who also contributed to the literature of early Venetian opera. For the most part these composers introduced *arioso* passages either for purposes of word-painting or as a response to more introspective passages in the text; and they drew for the style of their *arioso* writing on the new triple-time arias popularized at Venice by Grandi and Berti. In his dialogues *Oh Dio*, *Tirsi* and *Lilla, se amor non fugga* (both 1639) Fontei also used *arioso* passages to build rondo structures; and in the latter he also incorporated two independent canzonettas in duple time. Rovetta's large-scale pastoral dialogue *La Gelosia placata* (1629), to a text by Giulio Strozzi depicting a lovers' quarrel, provides perhaps the most fascinating stylistic study of this group of settings. In addition to triple-time *arioso*, Rovetta drew on the 'walking-bass' idiom of the strophic-bass cantata; and his lively and varied recitative includes several passages in the *stile concitato*.

The problem of narration in dialogues received a variety of solutions in the 17th century. Like Monteverdi, Rovetta combined recitative dialogue with the traditions of the polyphonic madrigal, using a three-

voice chorus for the narration at the opening and conclusion of *La Gelosia placata*. Fontei, on the other hand, set the opening narration of his *Dicea Clori a Fileno* (1636) as a duet for the two singers who then take the roles of Chloris and Filenus. The latter solution was favoured by Carissimi, who used it in his most famous dialogue, *I due filosofi* (written before 1650; ed. in L. Landshoff, *Alte Meister des Bel Canto*, i–ii, 1912), in which the contrast between laughter and weeping in a debate between the philosophers Democritus and Heraclitus is depicted by major and minor modes. Yet another solution was to use a third singer as narrator, as in Sances's setting of *Tirsi morir volea* (1633), where the narrator is given the name Festaurus. Use of a solo narrator was the usual approach adopted for settings of texts from epic verse. Mazzocchi called the narrator of his dialogue *Poi ch'è il crudo Alandin* (1638, from *La Gerusalemme liberata*) Tasso, thus acknowledging the author of the text. Monteverdi, however, in *Il combattimento di Tancredi e Clorinda* (1624) and Sances in his dialogue between Angelica and Ruggiero, *Già dell'horrido mostro* (1649), chose the more neutral designation *testo* from the contemporary usage in sacred dialogues. This designation is also found in other secular dialogues, for example in Marazzoli's *Nel più fiorito April* (in *I-Rvat* Q VIII 179), for Lascivia, Virtù, Ercole and *testo*.

Most dialogue texts set during the early and mid-17th century were pastoral love-lyrics, but they also embraced subjects as diverse as reflective debates between a man and his soul (e.g. G. P. Bucchianti's *Alma, che fai?* *Giosco*) and topical matters – for example, Rossi's *Rugge quasi leon* (I-Bc, Q.50), for Mustafâ, Baiazet and *testo*, appears to deal with the murder in 1635 of Orchan and Baiazet, the brothers of Amurath IV of Turkey. Mythological characters also feature in a few settings: the infernal boatman Charon appears in Barbarino's *Ferma, ferma, Caronte* (1611), Grandi's *O dolcissima morte* (1615) is an amorous dialogue between Venus and Adonis with a shepherd as onlooker and commentator, Merula's *La Tognada* (1642) is a parody of the judgment of Paris.

The dialogues of Carissimi and Stradella seem to be among the last settings of Italian texts to be designated 'dialogo' in musical sources, for by the late 17th century the term had largely been displaced by the all-embracing designation 'cantata'. Nevertheless, a continuing tradition of Italian dialogue settings can be traced during the late 17th and early 18th centuries in the work of composers such as Pertù and Alessandro Scarlatti, and it includes Handel's pastoral and mythological dialogue-cantatas, of which *La terra è liberata* (Apollo and Daphne) is perhaps the finest example.

In France and England, the dialogue was an important vehicle of stylistic change during the early 17th century. Guédron's polyphonic setting of *Berger, que pensez vous faire?* (1617), for example, contains the earliest evidence of continuo writing in France, while in their *airs de cour* composers such as Antoine Boësset and François Richard (probably the elder) adopted a quasi-operatic manner for dialogue settings. Richard's *Cloris, attends un peu* (1637), for example, is a short series of exchanges culminating in a duet. In England, similar examples can be found in the *Ayres* (1609) of Alfonso Ferrabosco (ii) (EL, xvi, nos.26–8). Although the accompaniment is in tablature and not yet a genuine continuo, the declamatory nature of the vocal line and

the irregular alternation of the voices give the effect of recitative.

The later development of dialogue settings in France can be traced in the work of composers such as Michel de La Barre, Michel Lambert and Charpentier (e.g. *Orphée descendant aux enfers*) and in the collections of *airs sérieux* and cantatas that survive from the late 17th and early 18th centuries. Montéclair's *Adieu de Tircis à Climène* (RISM 1695³) already shows the clear division between recitative and *air* typical of the dialogue-cantata, while his *Pyrème et Thisbé*, published in his second book of cantatas (before 1728), is one of the most extended early 18th-century French dialogues. It is scored for soprano, countertenor, baritone (the 'historien', or narrator), violin and continuo and comprises four *airs*, two *ariettes*, ten recitatives and three duets. Among other subjects treated by French composers, the contrast of temperaments in *Héracite et Démocrite* (1711) by the Italian-born composer J.-B. Stuck is worthy of note for its affinities with Carissimi's *I due filosofi*. A similar subject, but with pastoral characters, was treated by Rameau in his cantata *Les amants trahis* (1721).

In England, composers such as Nicholas Lanier (ii), John Jenkins and Henry Lawes (see MB, xxxiii, nos 11, 19, 60) established a tradition of dialogue composition in the new recitative style which flourished until the death of Purcell. For the most part they chose texts that explore the conventional amorous exchanges between nymph and shepherd, but their settings lack the expressive flexibility of Italian recitative. The tradition of English pastoral dialogues, however, also includes such fine examples as Locke's setting of Marvell's *When death shall part us* (RISM 1679⁷). Two composers who worked outside court circles in the early 17th century, Robert Ramsey and John Hilton (ii), chose a more ambitious range of subjects. Ramsey's *How! not, you ghosts* (MB, xxxiii, no.15), for example, depicts Orpheus's plea to Pluto and Proserpine for the release of Eurydice, Hilton's *Rise, princely shepherd* treats the judgment of Paris.

A popular subject in 17th-century England was the dialogue in which Charon (invariably a bass) is asked to ferry a soul across the Styx. Examples include William Lawes's *Charon, O Charon, hear a wretch oppressed* (MB, xxxiii, no.86); Hilton's *Charon, come hither, Charon (GB-Oh Don.c 57)*, a dialogue between Charon and Hobson, the Cambridge carrier who died in 1631, and Purcell's *Haste, gentle Charon* (*Works*, xxii), in which the soul is characterized as Orpheus. Purcell's output of independent dialogues includes some six other settings (all in *Works*, xxii), all scored for soprano and bass. They range in style from the declamatory, as in *Hence, fond deceiver* (Despair and Love) and *While you for me alone had charms* (a dialogue between the poet and Lydia, based on the ninth ode of Horace), to the purely tuneful, as in *Sit down, my dear Sylvia* (Alexis and Sylvia). Purcell also wrote a number of dialogues intended as incidental music for plays, for example 'Behold the man' (*Works*, xxi) for Act 2 of *The Richmond Heiress*.

In Germany, a number of dialogues were printed in 17th-century song publications such as Heinrich Albert's *Arien* (1638; see GMB, no.193b). These are often simple strophic settings in which two singers perform alternate stanzas. Adam Krieger's posthumous *Neue Arien* (1667, enlarged 2/1676) includes a number

of pastoral dialogues with interspersed ritornellos (DDT, xiv, pp.35, 45, 89,105).

Although the mainstream of Baroque dialogues involved dramatized settings for two or more voices, several examples survive from the 17th century of dialogue texts set for a solo voice with continuo. Two such are Giacomo Fornaci's *Tirsi morir volea* (1617) and Barbara Strozzi's *Timore, e che sarà godremo?* (1651), the latter actually being called 'dialogo a voce sola'. The tradition of setting dialogue texts for a solo singer can be traced down to the present day and includes such works as Schubert's *Erkönig*, Brahms's *Vergebliches Standchen* and, in the sphere of sacred music, Stravinsky's *Abraham and Isaac*.

5. SACRED. Dialogue texts drawn from biblical sources or representing dramatized spiritual discourses were also set to music during the 16th, 17th and 18th centuries, using techniques similar to those of secular dialogues. Indeed, a few sacred dialogues are contrafacta of secular models: for instance Stefano Bernardi's *O quam suavis* (1621) is modelled on his own dialogue *Bellezze amanti'omè* (1619). In Italy, the settings of both Latin and vernacular texts included in collections of motets, *laude spirituali* and spiritual madrigals played an important part in the early history of the oratorio as a musical form. Among the comparatively few intended for performance at oratories are the dialogues in Animuccia's first and second books of *laude* (1563 and 1570), in the five collections of *laude* all apparently edited by Francisco Soto de Langa (1577 to 1598) and in the *Tempio armonico* of Giovenale Ancina (RISM 1599⁶ and 1600³). (The text of *Anima mia, che pensi?* in Soto's first collection was later incorporated into Act I scene iv of the libretto of Cavaliere's *Rappresentazione di Anima, et di Corpo*, 1600.) The dramatic and narrative-dramatic *laude* in these early volumes are simple strophic settings in three or four parts in which no attempt is made to differentiate musically between the characters of the dialogue. During the 17th century, however, vernacular settings using the new monodic styles were issued in volumes of spiritual madrigals intended for private devotions and in publications, such as G. F. Anerio's *Teatro armonico spirituale* (1619), intended for use in oratories. Anerio's imposing volume includes dialogues that treat the stories of Adam and Eve, the prodigal son (ed. in Alaleona, pp.270-88) and the conversion of St Paul. This last is an extended setting calling for four soloists (including a *testo*) as well as an eight-part chorus and instrumentalists.

The Latin recitative-dialogues included in early 17th-century collections of motets and other liturgical music represent a different, though not wholly independent, line of development, leading to Carissimi's oratorios. The earliest setting of this kind was published in 1602, when Viadana included a dialogue for three voices, *Fili, quid fecistis?*, depicting the finding of Jesus in the temple (Luke ii.48-9) in his *Cento concerti ecclesiastici*. Later examples include G. F. Capello's *Abraham* (1615; GMB, no.180), with sinfonias and ritornellos scored for four unspecified instruments. In this dialogue, the solo sections for Abraham (bass), an angel (tenor) and Isaac (soprano) are rounded off by a chorus, a device commonly used in dramatic and narrative-dramatic Latin dialogues. Like Viadana's dialogue, Capello's is based on a biblical text (*Genesis* xxii.1-13); in common with most early 17th-century Latin dialogues, neither has a

narrator.

There is no evidence to suggest that Latin dialogues of the early 17th century were intended for performance at oratories. Although the dialogues present biblical and reflective texts in a dramatized form, they are essentially the descendants of Renaissance motets treating similar subjects; some, indeed, are settings of texts that had long been used for motets. In 1609, for example, Severo Bonini published a setting for two soloists and five-part chorus of *Missus est Gabriel angelus* (*Il primo libro de motetti a 3 voci*), a paraphrase of the Annunciation scene (Luke 1.26–38). In its original form this text, which includes narrative, and dialogue between Mary and the Angel Gabriel, had been set twice by Josquin (*Werke Motetten*, i, 82, and ii, 89), with no particular attempt to depict the dialogue, and as a six-part motet by Lassus (*Samtliche Werke*, vii, 16). Lassus's setting, while not attempting character differentiation, separates passages of narrative from direct speech by clear cadences. Like the motets from which they were descended, most early 17th-century Latin dialogues probably had a semi-liturgical function in church services, although only Lorenzo Ratti's four dialogues published in *Sacrae modulationes* (1628) are known to have served a specific function, as offertory substitutes.

Latin dialogues, then, were the forerunners in form, though not in function, of Carissimi's Latin oratorios, and Carissimi's *Jephte* was itself described as a dialogue by Kircher (1650). Carissimi in turn influenced the development of the sacred dialogue in the second half of the 17th century, not only in Italy but also in France and Germany. Among the works of his pupil Charpentier are six dialogues for two characters, represented either by groups of voices or, as in the case of the *Dialogus inter Magdalenam et Jesum* (HAM, ii, no.226), by soloists. The expressive, yet rather stiff recitative of this setting is reminiscent of Carissimi's style.

In Germany, sacred dialogues were an important element in the development of the church cantata before Bach, and they served a similar liturgical function. There are numerous sacred dialogues by Schutz, Schein and Scheidt, including a setting by Scheidt of *Kommt her, ihr Gesegneten* (1634, *Werke*, ix, 20), a dialogue between Christ (bass), the Elect (soprano and bass) and the Damned (tenor and bass), in which the composer adopted a *falsobordone* style of declamation in his recitative writing. Bach used the term *dialogus* for several of his cantatas (e.g. BWV49, 57, 58, 60) and used dialogue techniques in many more. The tradition of sacred dialogue settings in German-speaking countries can be traced in the mid-17th century through works such as Hammerschmidt's *Dialogi, oder Gespräche zwischen Gott und einer gläubigen Seelen*, i (1645), J. R. Ahle's *Geistliche Dialoge*, i (1648) and Christoph Bernhard's *Geistliche Harmonien*, i (1665). Most of Hammerschmidt's settings are reflective rather than dramatic in their presentation (see DÖ, xvi, Jg.viii/1, and HAM, ii, no.213). Among the dialogues in Ahle's collection (DDT, v) is one (no.3) between Christ (bass) and Doubting Thomas (tenor), showing, as yet, no division of the music into the clearcut sections found in later works such as Bernhard's Easter dialogue between the Virgin Mary (soprano) and Christ (bass) (see EDM, 1st ser., lxx, no.15) or Matthias Weckmann's Annunciation dialogue *Gegrüßet seist du, holdselige* (DDT, vi, no.5).

Some sacred dialogues from the first half of the 17th

century by English composers survive in manuscript, among them *The Judgment of Solomon* by John Hilton (ii) and *Saul and the Witch of Endor* by Robert Ramsey (see EECM, vii, no.10). The text of the latter dialogue ('In guilty night') was later set by Purcell; his work was published by Henry Playford in *Harmonia sacra*, ii (1693). Following a narrative three-voice 'chorus' to introduce the work, Saul (alto), the Witch (soprano) and the Ghost of Samuel (bass) vividly enact the biblical scene, singing in recitative throughout. There is also a moving envoi, in which, in contrast to the opening of the work, the three singers sustain their dramatic roles.

DAVID NUTTIER (1-3), JOHN WHENHAM (1, 4-5)

Diamond, Peter (b Charlottenburg, Berlin, 8 June 1913) Austrian, naturalized Dutch administrator. He was born of Austro-Romanian parents. After attending the Schiller Realgymnasium in Berlin, he studied law at Berlin University until forced to leave by the Nazis. From 1934 to 1938 he was Artur Schnabel's secretary, he spent the war years in Holland, first in hiding and then in a concentration camp. From 1946 to 1948 he was assistant to the director of the Netherlands Opera and began to organize tours for young Dutch artists. In 1947 he was appointed secretary to the Holland Festival, which was launched the following summer; he continued to hold this post until 1965, when he succeeded the Earl of Harewood as director of the Edinburgh Festival. During his tenure of office in Holland he was also artistic adviser of the Netherlands Opera, making it a basis for most of the Holland Festival operatic performances. In Edinburgh he pursued the same kind of policy, inviting Scottish Opera to participate regularly. In 1978 he was appointed general manager of the RPO. Peter Diamond has been honoured by the Dutch and Austrian governments, and in 1972 was made an honorary CBE.

HAROLD ROSENTHAL

Diamond, David (Leo) (b Rochester, NY, 9 July 1915). American composer. He studied at the Cleveland Institute, at the Eastman School with Rogers and at the Dalcroze Institute in New York with Boepple and Sessions. After further study under Sessions, he went to France for lessons with Boulanger. He has received three Guggenheim Fellowships and many other awards and commissions from major institutions. In 1936 he began work on the full-length ballet *Tom* to a scenario by Cummings and was sent to Paris by a private patron to complete the score in association with Massine. Diamond's first successful orchestral piece, *Psalm*, was written there that summer; it won the Juilliard

Publication Award in the following year. The contacts he made in Paris with Gide, Ravel, Roussel and Stravinsky broadened his artistic and philosophical ideas. From this period on his music was performed by leading conductors, including Scherchen, Koussevitzky and Mitropoulos, the last of whom directed the New York PO in the first performances of the Symphony no. 1 and of *Rounds* (New York Critics' Circle Award, 1944). Diamond was appointed Fulbright Professor at the University of Rome in 1951; in 1953 he settled in Florence, where he remained until his return to the USA for his 50th birthday celebrations, during which he conducted the New York PO, the Rochester PO and other ensembles. He has taught at Salzburg, at the Harvard Seminar in American Studies, at the Manhattan School of Music (chairman of the composition department) and at Buffalo (Slee Professor). Diamond is a member of ASCAP and was appointed vice-president of the National Institute of Arts and Letters.

The symphonies, quartets and songs are the core of a very large and varied output. Clear structures, often evolved from contrapuntal or sonata-allegro procedures, are frequently fashioned into unusual one- or two-movement forms, among the later works are many masterful fugues and sets of variations. Diamond's writing for the orchestra is brilliant, and his work shows an intensely individual lyricism, occasionally austere but more often romantically tinged. His harmony has developed gradually from a diatonic-modal to a more chromatic style without losing a strong personal character. Diamond's meticulous craftsmanship and his sensibility have assured his position as a 20th-century classicist.

WORKS (selective list)

DRAMATIC

Tom, ballet, Cummings, 1936, Icaro, dance drama, 1937, *The Dream of Audubon*, ballet, 1941, *A Place to Live*, film score, 1941, *The Man behind the Gun*, radio score, 1942, *Hear it now*, radio score, 1942, *Dreams that Money can Buy*, film score, 1943, *The Tempest* (incidental music, Shakespeare), 1944, *Labyrinth*, ballet, 1946, *Romeo and Juliet* (incidental music, Shakespeare), 1947, *Strange Victory*, film score, 1948, *Anna Lucasta*, film score, 1949, *The Rose Tattoo* (incidental music, T. Williams), 1950-51, *Mirandolina*, musical comedy, 4, 1958, *The Golden Slippers*, musical folk play, 2, 1965, *The Sun*, film score, 1965, *Life in the Balance*, film score, 1966.

FRANCIS THORNE

Dianda, Hilda (b Córdoba, Argentina, 13 April 1925). Argentine composer, conductor and musicologist. She studied composition with Honorio Siccardi in Buenos Aires (1942-8) and then a scholarship took her to Venice (1949-50) for further training with Malipiero (composition) and Scherchen (conducting). At the invitation of the French government she worked with the Groupe de Recherches Musicales (1958-62), and she also worked in the Milan radio electronic studios (1959). She attended the Darmstadt summer courses of 1960 and 1961, and in 1964 the Italian government awarded her the Cultural Merit Medal for her researches, lectures and broadcasts on contemporary Italian music. In 1966 she worked in the electronic music laboratory at San Fernando Valley College, Northridge, California, where she prepared a 7 for cello and five tapes. She has attended many festivals and conferences throughout Europe and the Americas, notably the 1969 Donaueschingen Festival, for which *Ludus 1* was commissioned. From 1967 to 1970 she was a professor at Córdoba University, holding, successively, the chairs of composition, orchestration and orchestral technique and conducting; at the same time she was an honorary conductor of the fine arts school chamber orchestra. Her musicological work has been in the area of contemporary music: she has made lecture tours of Latin America and Europe, and published *La música argentina de hoy* (Buenos Aires, 1966).

A keen interest in new technical developments is evident in her compositions after the *Estructuras* for cello and piano (1960); the *Cancones* (1962) have a subtlety of sonority reminiscent of Webern, although their ideas have a definite individual quality. With the *Concertante* for cello and ensemble (1952), she had already initiated a tendency to press performers and instruments to the limits of their capacities: the piece was described by her teacher Siccardi as 'Samson against the Philistines'. Such virtuoso writing was pursued in the *Ludus* series (1968-9), where a feeling of play pervades the structure and instrumental handling.

SUSANA SALGADO

Diapason. (1) A term used by Greek theorists to designate an octave, either the interval or the scale. The English usage of 'diapason' to denote the range or compass of a voice or instrument derives from this.

(2) In French the term has many meanings. It may refer to the scaling of a string or organ pipe, to the distance between the finger-holes of a wind instrument, it can mean simply pitch ('diapason normal' was established in 1858 as $a' = 435$ at 59°F), by extension it can mean an A tuning-fork.

(3) In organ terminology, the name given to foundation stops (see ORGAN STOP).

(4) A piece of wood, also called 'rack', at the back of a keyboard in a clavichord or a harpsichord containing a vertical slot for each of the instrument's keys. A metal pin or a slip of wood or whalebone driven into the end of each key fits into the appropriate slot, guiding the key and preventing lateral motion as it moves up and down.

EDWIN M. RIPIN

Diapente [dioxean] (from Gk. *dia pente* 'through five'). The ancient Greek and medieval name for the interval of a FIFTH. In medieval treatises and manuscripts are found the terms *epidiapente* ('5th above') to designate a canon at the upper 5th, and *subdiapente* (*hypodiapente*, '5th below') for a canon at the lower 5th

Diaphone. An ORGAN STOP

Diaphonia. In ancient Greek theory, dissonance, as opposed to *symphonia* or consonance, hence any interval other than an octave or perfect 5th or 4th. Medieval writers regularly used 'diaphonia' to mean two-part ORGANUM. In the 13th century 'discantus' replaced it in this sense, though Jehan des Murs (*Ars novae musicae*, 1321) still used 'diaphonia' for organum, particularly the expression 'diaphonia basilica' for organum duplum with long-held tenor notes.

ANSELM HUGHES/R

Diastematic (from Gk. *diastēma*, 'interval'). An adjective describing notation which indicates the pitch of notes by their vertical placing on the page. Although the Latin adjective 'diastematicus' was used in the Middle Ages (meaning 'separated by an interval', usually of time) it does not seem to have been used then to describe notation. The term is usually applied to neumatic notations written in *campo aperto* (in a space without ruled horizontal lines) although, from its etymology, it could also be used to describe notation on dry-point, black or coloured lines. Many Western chant notations were imprecisely diastematic, that is, they indicated pitch in the above manner only vaguely; others, such as Aquitanian notation, were very precisely diastematic, and did not adopt the four-line staff until a relatively late date. A distinction is usually made here between accent-neumes, which indicate the direction in which a melody moves but are not 'heighted' vertically on the page, and

point-neumes which are easily placed diastematically on the page (see NEUMATIC NOTATIONS, §§1-IV).

Días Velasco, Nicolao. See DOIZI DE VELASCO, NICOLÁS.

Diatessaron (from Gk. *dia tessarōn*: 'through four'). The ancient Greek and medieval name for the interval of a FOURTH. In medieval treatises and manuscripts are found the terms *epidiatessaron* ('4th above') to designate a canon at the upper 4th, and *subdiatessaron* (*hypodiatessaron*, '4th below') for a canon at the lower 4th.

Diatonic (from Gk. *dia tonos*: 'proceeding by whole tones'). Based on an octave species consisting of five tones (T) and two semitones (S), in which the semitones are maximally separated, for example T-T-S-T T-T-S. The major and natural minor scales are diatonic, as are the church modes. An interval is said to be diatonic if it can be constructed within the diatonic octave species: minor 2nd (S), major 2nd (T), minor 3rd (T + S), major 3rd (T + T), perfect 4th (S + T + T), perfect 5th (S + T + T + T), minor 6th (S + T + T + T + S), major 6th (T + S + T + T + T), minor 7th (T + S + T + T + T + S), major 7th (T + T + S + T + T + T), octave (T + T + S + T + T + T + T + S). The TRITONE, either an augmented 4th (T + T + T) or a diminished 5th (S + T + T + T + S), in theory is diatonic, but has been traditionally regarded as an alteration of a perfect interval, the sum of a perfect 4th and a chromatic semitone or the difference of a perfect 5th and a chromatic semitone; for this reason it is reckoned as a chromatic interval. Strictly diatonic tone systems need not be based on an octave species so long as the basic sequence of tones and semitones remains the same as given above. The ancient Greek system is based on a series of alternately conjunct and disjunct tetrachords (see TETRACHORD), the diatonic 'genus' of which contains a semitone and two tones. The first modern diatonic system as codified by Guido of Arezzo is based on a series of overlapping hexachords (see HEXACHORD), each of which corresponds to the first six notes of the major scale. Nor does a diatonic piece strictly have to be in one key: it is possible for the individual polyphonic parts to be based on different scales, for example the traditional realizations of William Byrd's canon *Non nobis Domine* and many 14th- and 15th-century motets with partial key signatures.

WILLIAM DRABKIN

Díaz, Alirio (b La Candelaria, Carora, Venezuela, 12 Nov 1923). Venezuelan guitarist. He learnt the native cuatro, then the guitar with Raúl Borges and Clement Pimentel in Caracas, then, on a government grant, he studied with Regina Sainz de la Maza in Madrid, and from 1951 to 1958 with Segovia at the Accademia Chigiana, Siena, becoming his assistant in 1954 and succeeding him as professor in 1965. He made his débuts in Spain and Italy in 1952, Paris in 1954 and North America in 1959, toured Germany with the Orquesta Nacional of Spain under Frühbeck de Burgos in 1967, and played under Stokowski and Iturbi in the USA in 1968. He has given master classes in Europe and America, and edits much early music for publica-

tion. Experience in his youth as a popular musician is an asset in his interpretation of folk-inspired music by composers like Barrios, Lauro, Ponce and Villa-Lobos. His brilliant style and technique tend at times to overshadow his sensibility, but more often than not his performances are illumined by warmth and grace. He was awarded the Orden de Andrés Bello in 1963.

Díaz, Félix Guerrero. See GUERRERO DÍAZ, FÉLIX.

Díaz, Gaspar. 17th-century singer, sometimes confused with GABRIEL DÍAZ BESSÓN.

Díaz, Justino (b San Juan, Puerto Rico, 29 Jan 1940). American bass. His studies at the University of Puerto Rico and the New England Conservatory were followed by training with Friedrich Jagel. He first appeared with the New England Opera Theater in 1961, and made his Metropolitan Opera début in 1963 as a winner of the Auditions of the Air Appearances for the American Opera Society. Casals Festival (Puerto Rico) and Spoleto Festival followed. In 1966 his career was firmly established by his performances at the opening night of the new Metropolitan Opera at Lincoln Center as Antony in Barber's *Antony and Cleopatra*, and under Karajan at the Salzburg Festival as Escamillo. Subsequent appearances have included La Scala and the Hamburg and Vienna Staatsoper. He sang in the performance of Ginastera's *Beatriz Cenci* that inaugurated the Kennedy Center Opera House in Washington (1971), and made his Covent Garden début as Escamillo in 1976. Díaz has established himself as one of the leading basses of the Metropolitan, where his evenly produced, warm basso cantante has been heard in a wide range of Italian roles. His recordings include roles in *Medea*, *La Wally*, *Lucia di Lammermoor* and oratorios by Handel.

RICHARD BERNAS

Díaz Bessón, Gabriel (b Alcalá de Henares, before 1590; d Madrid, 6 Nov 1638). Spanish composer. A certain Gaspar Díaz was received as a choirboy at the Flemish chapel of Philip III. He has been identified, probably wrongly, with the Gabriel Díaz who became a singer in the same chapel in 1606 and who was *vice-maestro de capilla* from 1607 until at least 1612; in 1611 the latter composed a Requiem (now lost) for Marguerite of Austria. In 1616 he was *maestro de capilla* at the collegiate church at Lerma and was at Granada Cathedral in 1621, though details of his position are not known; at some time too he was *maestro de capilla* at the collegiate church of the Incarnation, Madrid. He held a similar position at Córdoba Cathedral from 16 November 1624 to May 1631 and spent his last years as *maestro de capilla* at the Monasterio de las Descalzas Reales, Madrid, and probably also as chamber singer to Philip IV. In 1627 Lope de Vega prefaced his comedy *Carlos quinto en España* with a dedication to Díaz.

Díaz was one of the most notable Spanish composers of the early 17th century and certainly one of the most prolific: works no longer extant included 536 villancicos, 114 motets, 15 masses, 60 psalms, 16 canticles, 24 antiphons, 14 hymns and a theoretical treatise,

Compendio de música, many of which were in the library of John IV of Portugal destroyed by an earthquake in 1755.

BARTON HUDSON

Dibdin, Charles (b Southampton, baptized 15 March 1745; d London, 25 July 1814) English composer, dramatist, poet, novelist, actor, singer and entertainer. Dibdin was the 12th child of a parish clerk and a sorely-tried mother who produced at least 14 children. His own claim to have been educated at Winchester College is not supported by the school records, though he did have lessons from James Kent and Peter Fussell, successive cathedral organists there. As a composer he was self-taught; he himself thought that he had learnt to compose by scoring Corelli's concertos from the separate parts and from reading Rameau's *Traité de l'harmonie* in English, but he must have learnt mainly from his practical experience in the theatre. By the age of 15 he was singing occasionally in such Covent Garden operas as required a chorus, supplementing his income by working for the music publisher John Johnson. The variety of his talents was already astonishing. He was only 18 when he published, more or less in full score, *A Collection of English Songs and Cantatas*, and a year later John Beard, the manager of Covent Garden, accepted *The Shepherd's Artifice*, an all-sung pastoral for which Dibdin wrote both words and music; he sang the leading role himself.

As an opera singer Dibdin's career was brief. He lacked the figure for a hero's role, but his flair for accents made him well suited to character parts. His first great success was as Ralph, the farmer's son in Arnold's popular pastiche opera, *The Maid of the Mill* (1765), and no doubt he played it with a broad Hampshire accent. Three years later he was a sensation as Mungo, the coloured servant in his own afterpiece opera *The Padlock*; the part is written in 'coon' English.

At this period Dibdin seldom wrote his own librettos. From 1767 to 1772 he was lucky enough to have as his collaborator Isaac Bickerstaffe (c1735-c1812), an Irishman who had previously written *Thomas and Sally* and *Love in a Village* for Arne as well as *The Maid of the Mill* for Arnold. His characterization and dialogue are reminiscent of Sheridan, who was in fact a good deal

influenced by Bickerstaffe's *Lionel and Clarissa*. Bickerstaffe had to go to France in 1772, to escape prosecution for a homosexual offence; before then, Dibdin and he had created comic operas of a promise that cannot be paralleled in 18th-century England. The first was *Love in the City*, which has an unusual libretto about London tradesmen, but the novelty of this theme deprived the opera of the success it deserved, and for their second full-length opera, *Lionel and Clarissa*, they turned to the foibles of the landed gentry, a safer subject. Beard did not at first trust Dibdin to compose such operas in their entirety, and in any case the huge success of *Love in a Village* had aroused a taste for pastiche; Dibdin composed no more than the finales of *Love in the City* and two or three songs, and only the Act 1 music was published because the opera was taken off when the engraving had reached that point. What Dibdin called the Boxing Trio in the Act 2 finale must have struck a new note in English opera, for the heroine, Priscilla Tomboy, had to sing while engaged in some spirited fisticuffs in the street. When he wrote this finale Dibdin had just been singing Robin, the gardener in *The Accomplished Maid*, an English version of Piccini's influential *La buona figliuola*, and this too had 'action' finales in several sections. Dibdin was the only English composer before Storace to write dramatic ensembles of this kind, and he did so frequently, for instance in *Lionel and Clarissa*. For this opera Dibdin composed as much as half the score himself, the rest being borrowed mainly from recent Italian operas given in London. Dibdin's contribution is *galant* and Italianate in style; at this period he never wrote strophic ballads for his operas. *The Padlock* (1768) was the first of many 'dialogue' operas for which he composed all the music, and delightful music it is.

Dibdin first showed his unfortunate capacity for irritation when he suddenly left Covent Garden in summer 1768 and signed on for a seven-year spell at Drury Lane. Garrick agreed to pay him £6 a week for the first three years and £7 thereafter; Dibdin was free to write trifles for other theatres in the summer, and to make what he could from publishing his operas. Almost at once he and Bickerstaffe rewrote *Lionel and Clarissa*, partly to suit another set of singers and partly to raise Dibdin's contribution to three-quarters of the whole. Vocal scores of both versions were published, title-pages of the later one state that the opera was performed 'at the Theatres Royal' rather than at Covent Garden. This opera, *The Padlock* and *The Ephesian Matron*, all of them composed to words by Bickerstaffe before Dibdin was 25, were his finest works, and it is sad that none of them survives orchestrally. The only Dibdin opera to do so is *The Recruiting Sergeant* (1770), though in fact the published full score omits the wind parts in the songs (wind parts for two of them are in *GB-Lhm*). This and *The Ephesian Matron* were written for Ranelagh Gardens, where for two summers Dibdin was in charge of the music. They were all-sung (spoken dialogue was illegal there), but only concert performances can have been given in the small Ranelagh bandstand, and there was room for only four singers. Later both operas were staged at the playhouses, but the sick humour of *The Ephesian Matron* was not to people's taste and it did not have the success it deserved. Nor, for a different reason, did *The Wedding Ring* (1773), of which the libretto derives from Goldoni's *Il filosofo di campagna*. The splendid 'action' quartet at the

end of Act I passed unnoticed because the audience was obsessed by the erroneous belief that the words were by the disgraced and despised Bickerstaffe. Garrick was more tolerant and quietly accepted from Bickerstaffe in France a play called *The Sultan*, for which Dibdin wrote some unpublished music. He and Bickerstaffe had already created one 'harem' opera, *The Captive* (1769), and Dibdin wrote another on his own, *The Seraglio* (1776); their influence on the librettos of Mozart's 'harem' operas has been debated, but inconclusively.

Garrick did not encourage Dibdin to sing at Drury Lane. He did, however, sing at Ranelagh Gardens; he published some of his Ranelagh songs and then, thinking well of them, wrote an afterpiece round the most successful, *The Waterman* (1774). The charming libretto about working-class Londoners was his own, and the result was a lasting success. No other operatic successes came his way, apart from *The Quaker*, the rest of his career was a long decline, caused not, as might be thought, by writing his own librettos – he could always write natural, easy dialogue – but by his increasingly truculent and quarrelsome behaviour. Furthermore, as things turned against him, he lost all notion of self-criticism; much of his later music is extremely poor; mere industry was not enough.

Many of his troubles were matrimonial. He was married before he was 20, but soon abandoned his wife in favour of a pantomime dancer, Harriet Pitt, by whom he had two sons who became well known in the following century. He then left Harriet and took up with an indifferent Drury Lane singer called Miss Wilde. Garrick, godfather to one of Dibdin's sons, consequently refused to re-engage Dibdin when his seven years had expired. By summer 1776 Dibdin's debts had risen to £800, he fled to France to avoid imprisonment, taking Miss Wilde and their daughter with him, and spent most of the next two years in Nancy.

One of the very few theatre men Dibdin could tolerate was the Drury Lane actor Thomas King, who had bought Sadler's Wells in time for the 1772 season. Here, as at Ranelagh, spoken dialogue was illegal, and the entertainments, which were aimed at Londoners from the lower middle classes, consisted of songs, acrobatics, rope dancing, and at least one 'dialogue', an all-sung opera on a cockney theme lasting about 15 minutes. For King's opening season Dibdin composed *The Brickdust Man*, the first of his innumerable Sadler's Wells dialogues. Only six are known to have been published, and of these only four are known to survive.

In France Dibdin made efforts to repay his debts. He wrote as prolifically as ever, sending by post a stream of dialogues to King, and an opera libretto (*The Gipsies*) to Arnold, who had been so kind as to complete *The Serapho* for him when he made his escape. He also laid up a store of dialogue operas based on French librettos which he translated and reset. At Drury Lane Thomas Linley, now in charge of the music, made an unexpected success of *The Quaker*, whose single performance in Garrick's day had been unremarked in the confusion of Dibdin's perfidy and Garrick's imminent retirement. *The Quaker* contains a delightfully individual patter song, 'Women are Will o' the Wispis', and some experimental ensembles in which the dialogue flows at the speed of recitative, virtually no words being repeated. Nearly all the music is of interest, apart from the overture. Dibdin's overtures were always poor; his strength lay in his dramatically motivated vocal lines, always so

Charles Dibdin portrait (1799) by Thomas Phillips in the National Portrait Gallery, London

easy to sing in character.

In 1778 the political situation in France forced all foreigners to leave. Dibdin returned to London and presumably found some means of satisfying his creditors, for he was not imprisoned. Harris, the manager of Covent Garden, was so unwise as to engage him at £10 a week; none of the operas and pantomimes Dibdin composed for him had (or deserved) any success. By now he had turned his back on his past style and wrote little but simple strophic ballads. He tried the experiment of publishing his Covent Garden music, not opera by opera, but in monthly anthologies drawn from several works, calling them *The Lyrist or Family Concert*; both this series and the later *Lyric Remembrancer* collapsed from lack of response. In 1781, already out of patience with Dibdin, Harris proposed an operatic version of Dryden's *Amphitruon*, to be called *Jupiter and Alemena*. Dibdin, of all people, insisted on the plot being bowdlerized; Harris insisted that this would destroy its whole point. Dibdin left. None of the playhouses would now employ him, except to write the occasional afterpiece opera – six in the next 30 years, all of them worthless.

Dibdin now joined Charles Hughes, owner of a riding school, and together they persuaded a group of business men to put up £15,000 for the building of a new theatre, the Royal Circus, south of the Thames near St George's Circus. Entertainments alternated between riding displays and short all-sung operas and ballets performed mainly or entirely by children. Dibdin engaged and coached the children, and wrote the entire repertory, words and music; he also mismanaged the theatre's business arrangements. This, coupled with difficulties over getting the theatre licensed, landed the proprietors in debt. Dibdin, also in debt, chose this moment to ask the proprietors for a substantial loan. They sacked him, and by February 1784 he was in the King's Bench, the debtors' prison, and writing an angry little book about what had happened (*The Royal Circus Epitomised*).

When he came out the proprietors, much to their credit, allowed him to resume his theatre work, though presumably in a less responsible position.

Dibdin saw their kindness as an intolerable condescension, and in summer 1787 he decided to emigrate to India. To raise money for the voyage, he made a nine-month tour of English provincial towns, singing his own songs interspersed with spoken patter at the pause marks. He wrote a very readable book about his tour in the form of a series of letters, and it includes a great deal of interesting, if not always reliable information about his life, his music and his finances. But when he set out on his voyage he found the sea not at all to his liking, and disembarked at Torbay. It now occurred to him to present his one-man entertainments in London, and he thereby stumbled on affluence at last. He gave his 'Table Entertainments' (their titles having apparently little significance) from January 1789 until the middle of 1805 when he retired, having been promised a pension, when the pension was cut off he returned to his Table Entertainments for a few more disconsolate seasons. He had started them in the King Street auction rooms, Covent Garden, to an audience of not much more than a dozen, but they soon became popular, and on 20 October 1792 he proudly opened a tiny theatre off the Strand, the Sans-Souci, specially built to his own requirements, typically, he had decorated it himself. He even had enough money to start his own publishing 'warehouse', and in 1796 he moved both theatre and warehouse to his New Sans-Souci Theatre in Leicester Square.

The songs he composed and published at this time run into hundreds. They celebrate such contemporary events as establishing a 'telegraph' across the Channel and a parachute descent in 1802, but the more popular ones were those in which Dibdin could parade his humorous accents and spoken patter. He told of some cockney debacle, made fun of country yokels, Italian opera singers, French fops, Negroes, Jews and Welshmen. He normally accompanied himself on a piano and organ that could be played from the same keyboard, it had attachments like a barrel organ for adding drums, triangle and cymbals. Yet he published these songs on three staves, for two violins and bass, and it may be that he sometimes had a few string instruments to support him.

During this period he was also writing vast quantities of prose. In 1790 he ran a periodical called *The Bystander* which he published anonymously in book form, he is thought to have written almost all the material himself. He even achieved three novels, each of them in three volumes; *Hannah Hewit* was based on fact (a shipwreck in South Africa) and Dibdin tried to turn it into an afterpiece. His novels are, understandably, indulgent about men who leave their wives to live with other women. He also wrote an uninteresting *History of the English Stage*, an autobiography greatly padded out with his own song lyrics, a textbook called *Music Epitomised* (which had reached its 12th edition by 1835), and, most remarkable of all, his *Observations on a Tour through England and Scotland*. He undertook this and other tours in order to present his Table Entertainments outside London, and the surprising aspect of this volume is that it is illustrated with sepia prints taken from paintings by Dibdin himself. Those of the Lake District and the Scottish mountains bear little resemblance to their alleged subjects; nevertheless

Dibdin was skilled in painting as in so many other activities.

In 1842 George Hogarth (Dickens's father-in-law) published a massive volume called *The Songs of Charles Dibdin*. It was impossible for him to include all the music, but he tried to include all the lyrics, and they fill 306 closely printed two-column pages. Few famous poets wrote as much. But quantity is no recompense for quality. There are good songs in the Table Entertainments, such as *Tom Bowling* (Dibdin became famous for his sea songs during the Napoleonic Wars), but there are many more bad ones, and it is tragic that so able and energetic a man should have squandered his inheritance as Dibdin did. He had quarrelled with everyone of note in the theatre world. Arne was the only composer of his own time that he could bring himself to admire. He died in Camden Town, destitute and friendless. According to Hogarth, he had married Miss Wilde when his first wife died; she at least stayed by him, as did one of their daughters.

Since his split with Harriet Pitt in 1775 he had scarcely seen their two sons. Charles Isaac Mungo Dibdin (1768-1833) worked for a pawnbroker until he was 28. He became manager of Sadler's Wells in 1800 and was its proprietor from 1803 to 1819. His 'aquadramas' and the clown Grimaldi brought fame to the theatre, he himself wrote most of the opera and pantomime words that were needed, usually for Reeve to set. His *Memoirs* (1830) remained unpublished until 1966. His son Henry (1813-66) taught music in Edinburgh and published *The Standard Psalm Tune Book* and some keyboard pieces. Henry's son James (1856-1901) wrote *Annals of the Edinburgh Stage* (1888).

Dibdin's other son, Thomas John Dibdin (1771-1841), ran away from his apprenticeship to an upholsterer to become a provincial actor. By 1798 he was writing Covent Garden opera librettos, which were set mainly by Attwood, and he continued to write ephemeral theatre pieces all his life. His published *Reminiscences* (1827) scarcely mention his father.

WORKS

All printed works published in London: vocal scores and librettos published soon after first performance unless otherwise stated.
CG: Covent Garden 11: Little Theatre in the Haymarket
DL: Drury Lane RG: Ranelagh Gardens

PLAYHOUSE OPERAS

(a: afterpiece opera, s: all-sung opera)

- The Shepherd's Artifice* (a, s, Dibdin), CG, 21 May 1764; 2 songs (1764)
Love in the City (Bickerstaffe), CG, 21 Feb 1767, Act 1 (1767), shortened as *The Romp* (a), Dublin, Smock Alley, 1781, DL, 21 Nov 1785
Lionel and Clarissa (Bickerstaffe), CG, 25 Feb 1768, rev. as *The School for Fathers*, DL, 8 Feb 1770
The Padlock (a, Bickerstaffe), DL, 3 Oct 1768, ov (1768)
Damon and Phillida (a, Dibdin, after Colley Cibber), DL, 21 Dec 1768
The Ephesian Matron (a, s, Bickerstaffe), RG, 12 May 1769
The Captive (a, partly pastiche, Bickerstaffe), LT, 21 June 1769
The Jubilee (a, Bickerstaffe, etc., based on Garrick's Shakespeare entertainment at Stratford), DL, 14 Oct 1769, vocal score contains cantata *Queen Mab* in full score
Amphitryon (a, s, Hawksworth), DL, 23 Nov 1769, pubd, no copy known
The Recruiting Sergeant (a, s, Bickerstaffe), RG, 20 July 1770
The Institution of the Garter (a, s, Garrick), DL, 28 Oct 1771
The Wedding Ring (a, Dibdin, after Goldoni), DL, 1 Feb 1773, ov G-B-1hm Add 30950
The Trip to Portsmouth (a, Stevens), LT, 11 Aug 1773, collab. with Arne
The Deserter (a, Dibdin, after Sedaine), DL, 2 Nov 1773, Monsigny and Philidor's opera with new music by Dibdin

- A Christmas Tale (Garriick), DL, 27 Dec 1773
 The Waterman (a, Dibdin), LT, 8 Aug 1774
 The Cobler (a, Dibdin, after Sedaine), DL, 9 Dec 1774, no vocal score
 The Quaker (a, Dibdin), DL, 3 May 1775, vocal score (1777), incl. song by Linley
 The Sultan (a, Bickerstaffe, after Marmontel), DL, 12 Dec 1775, no vocal score
 The Blackmoor wash'd white (a, Bate Dudley), DL, 1 Feb 1776, Act 1, vocal score (1776), ov. pubd in parts but no set known
 The Metamorphoses (a, Dibdin, after Molière), LT, 26 Aug 1776, no vocal score
 The Seraglio (a, Dibdin), CG, 14 Nov 1776, completed by Arnold
 Poor Vulcan (burletto, s, Dibdin), CG, 4 Feb 1778, vocal score omits all recits from Act 2 and some from Act 1
 Rose and Colin (a, Dibdin, after Sedaine), CG, 18 Sept 1778, no vocal score
 The Wives avenged (a, Dibdin, after Sedaine), CG, 18 Sept 1778, no vocal score
 Annette and Lubin (a, Dibdin, after Favart), CG, 2 Oct 1778, no vocal score, finale. *Lhm* Add 30955
 The Chelsea Pensioner (a, Dibdin), CG, 6 May 1779, no vocal score, ov. and 6 vocal items in The Lyrst
 Plymouth in an Uproar (a, Neville), CG, 20 Sept 1779, no vocal score, ov. and 1 song in The Lyrst
 The Shepherdess of the Alps (Dibdin, after Marmontel), CG, 18 Jan 1780, no vocal score
 The Islanders (Dibdin, after Saint-Foix), CG, 25 Nov 1780, no lib or vocal score, ov. and 12 songs in The Lyrst, shortened as The Marriage Act (a), CG, 17 Sept 1781, no vocal score
 Jupiter and Alcmena (Dibdin, after Dryden), CG, 27 Oct 1781, no lib or vocal score
 Liberty Hall (a, Dibdin), DL, 8 Feb 1785, ov. *Lhm* Add 30950
 Harvest Home (a, Dibdin), LT, 16 May 1787, songs. *Lhm* Add 30951, 30955
 A Loyal Effusion (a, Dibdin), CG, 4 June 1794, no lib or vocal score
 Hannah Hewit (a, Dibdin), DL, 7 May 1798, no lib or vocal score, only 1 perf
 The Broken Gold (a, Dibdin), CG, 8 Feb 1806, only song texts pubd, MS lib, *Lhm* Add 30963
 The Round Robin (a, Dibdin), LT, 21 June 1811, songs, *Lhm* Add 30952 3
 Other operas, incl. and unperf., incl. MS lib. to Hassan and The Cake House, *Lhm*

PLAYHOUSE PANTOMIMES

- The Pigmy Revels ('Garriick'), DL, 26 Dec 1772, no lib
 The Medley (Dibdin), CG, 14 Oct 1778, rev. as The Mirror, CG, 30 Nov 1779
 The Touchstone (Dibdin), CG, 4 Jan 1779, unusual for its spoken dialogue
 Harlequin Freemason (Dibdin), CG, 29 Dec 1780, no vocal score, but ov. and songs in The Lyrst

SADLER'S WELLS DIALOGUES

- The Palace of Mirth (Dibdin), 1772, vocal score pubd, no copy known
 The Brickdust Man (Bickerstaffe), 1772, vocal score incl. ov.
 The Ladle (Dibdin, after Matthew Prior), 12 April 1773
 The Grenadier ('Garriick'), 19 April 1773
 The Vineyard Revels, pantomime, 14 July 1773, vocal score pubd, no copy known
 The Mischance (Dibdin), ?1774
 Yo Yea, or The Friendly Tars (Dibdin), 18 Aug 1777, 3 songs (1777)
 Hogarth gives lyrics from the following of which no music survives
 England against Italy, 1773, None so blind as those who won't see, 1773, The Imposter, 1776, The Razor-Grinder, 21 April 1777; She is mad for a Husband, 1777, The Old Woman of Eighty, 1777, other titles in *The Musical Tour* and *Grove* 5, but nothing is known of these works

PIECES FOR THE ROYAL CIRCUS
(all texts by Dibdin)

- The Graces, 1782, lib pubd, no music known
 The Centus, 1783, vocal score without linking recits (1783)
 The Talisman (of Orosmanes), pantomime, also called The Magic of Orosmanes, 28 March 1783, 1 song (1783), another with recit, *Lhm* Add 30951, lib pubd
 Pandora, pantomime, 1783, several MS items, *SOp*, with other unidentified Dibdin music, 2 lyrics in Hogarth
 Robin Hood, pantomime, 9 June 1783, ov. and background music, *Lhm* Add 30950
 The Long Odds, 13 Nov 1783, at least 7 songs, *Lhm* Add 30951-3, MS lib, *Lhm* Add 30964
 The Lancashire Witches, pantomime, 27 Dec 1783, piece for woodwind, *Lhm* Add 30952, song texts pubd, no copy known
 The Benevolent Tar, 1785, songs, *Lhm* Add 30951 2, 30955 and in Hogarth, lib pubd
 The Life, Death, and Renovation of Tom Thumb, 28 March 1785, songs, *Lhm* Add 30952, lib pubd, no copy known

- Clump and Cudden, 1785; 1 song in *Lyric Remembrancer* (1799), others, *Lhm* Add 30954-5, 4 song texts in Hogarth
 The Saloon, 3 song texts in Hogarth

Others, from which nothing survives, listed in *The Musical Tour, The Professional Life*, etc

TABLE ENTERTAINMENTS

(6 to 39 songs from each pubd separately)

- King's Street auction rooms: The Whim of the Moment, 23 Jan 1789
 The Lyceum: The Oddities, 7 Dec 1789; The Wags, 18 Oct 1790
 Polygraphic Rooms: Private Theatricals, 31 Oct 1791, The Coalition, 4 Feb 1792
 Sans-Souci: The Quizes, 20 Oct 1792; Castles in the Air, 12 Oct 1793, Nature in Nubibus, 18 March 1793; Great News, 11 Oct 1794; Will o' the Wisp, 10 Oct 1795; Christmas Gambols, 29 Dec 1795
 New Sans-Souci: The General Election, 8 Oct 1796, Valentine's Day, 14 Feb 1797, The Sphinx, 7 Oct 1797; King and Queen, 6 Jan 1798; A Tour to Land's End, 6 Oct 1798; Tom Wilkins, 5 Oct 1799; The Goose and the Grindiron, 18 Jan 1800, The Cake House, 1 Oct 1800, A Frisk, 3 Oct 1801, Most Votes Carry It, 9 Oct 1802, Britons Strike Home, 17 Sept 1803; A Frolic, 10 Oct 1804, A Trip to the Coast, 10 Oct 1804, The Election, Dec 1804, New Year's Gifts, 1 Jan 1805, Heads and Tails, 12 Feb 1805
 Lyceum: Professional Volunteers, 1 March 1808; The Rent Day, 1808, Commodore Pennant, 16 Jan 1809, little new material

OTHER WORKS

- A Collection of English Songs and Cantatas, op.1 (1763)
 The Ballads sung by Mr Dibdin at Ranelagh (c1770)
 Shakespear's Garland, or the Warwickshire Jubilee, 5 songs and 2 duets (1769), 12 Minuets (1769); 16 Country Dances and 6 Coultions (1769), Queen Mab, cantata, S, full score (1770): all for Garriick's Stratford Jubilee, 1769
 A Collection of Catches and Gleees (1772)
 6 Lessons, hpd/pl (c1772)
 Vaux Hall Songs (1773)
 The Monthly Lyrst, later The Lyrst or Family Concert (1780-81), periodical anthology of Dibdin's theatre music
 Datchet Mead, serenata (1797), sung in shortened version of The General Election
 The Lyric Remembrancer (1799), periodical anthology of Dibdin's theatre music
 8 British War Songs, Iv, military band (1803), some sung in table entertainment Britons Strike Home
 The Passions in a Series of Ten Songs (1806)
 Numerous single songs and instrumental arrangements of his own and others' works (see *RISM* and *BUC'EM*)

WRITINGS

(published in London unless otherwise stated)

MUSIC TEXTBOOKS

- Music Epitomised* (1804)
The Musical Mentor (1807)
The English Pythagoras, or Every Man his own Music Master (1808)

OTHER BOOKS

- The Royal Circus Epitomised* (1784)
The Musical Tour of Mr Dibdin (Sheffield, 1788)

ROGER FISKE

Dibelius, Ulrich (b Heidelberg, 14 Nov 1924). German critic and writer on music. He studied music in Munich and Heidelberg (1942-7), concentrating on the cello, and qualified as a music teacher; later he also took courses in literature, art history and sociology at the

universities of Hamburg and Frankfurt, where his teachers included Horkheimer, Adorno and Wolffheim (1951–4). He was an editor for newspapers in Frankfurt and Hamburg (1953–4) before becoming a Dramaturg and editor for North German Radio in Hamburg (1954–7) and music editor for Bavarian Radio in Munich (1957). In his published work he has moved from writing music reviews to essays and music history, dealing particularly with the sociological aspects of modern and avant-garde music. He is never biased or doctrinaire, and has a reputation for serious and objective argument. His major publication, *Moderne Musik*, is a critical and analytic account of the development of music since World War II.

HANSPIETER KRELLMANN

Di Bona, Gio. See DEL BUONO, GIOANNI RO

Dacey, William. English music publisher, successor to JOHN CLUER.

Dichord. See TRUMPET MARINE.

Dichter, Misha (b. Shanghai, 27 Sept 1945). American pianist of Polish descent. When he was two his parents settled in Los Angeles, where he studied the piano from the age of six. At the university there he attended a master class given in 1964 by Rosina Lhevinne, which led to a scholarship at the Juilliard School of Music in New York, where he continued as her pupil. His crowning success came in 1966 when he won second prize in the third International Tchaikovsky Piano Competition in Moscow. His American début was with the Boston SO at Tanglewood in August 1966, and the next year he introduced himself to London with the New Philharmonia Orchestra. He has toured extensively, making several return visits to the USSR. An all-rounder rather than a specialist, he is particularly at home in the 19th- and early 20th-century repertory, and plays most of the

Romantic concertos. As a youthful interpreter he was sometimes criticized for being over-objective, but unidiosyncratic musicianship coupled with controlled virtuosity have always given his playing poise and authority.

JOAN CHISSELL

Dickie, Murray (b. Bishopton, Renfrewshire, 3 April 1924). Scottish tenor. After study in Britain and Milan (his teachers included Dino Borgioli and Guido Farnelli) he sang the Count in *Il barbiere di Siviglia* at the Cambridge Theatre, London, in 1947. In 1949 he joined the Covent Garden company (Basilio in *Figaro*, the Curé in Bliss's *The Olympians*, Tamino, David in Beecham's *Meistersinger* performances). He sang Pedrillo at Glyndebourne in 1950, joined the Vienna Staatsoper in 1952 and has appeared at the festivals of Salzburg and Edinburgh, and at La Scala, Buenos Aires and the Metropolitan Opera. Although primarily a *buffo* tenor of vitality and charm, he has also sung such parts as Faust and Don Ottavio and appeared with success as a concert artist.

PETER BRANSCOMBE

Dickinson, A(Ian) E(dgar) F(rederic) (b. Blackheath, London, 9 July 1899, d. Reading, 20 Aug 1978). English music educationist and writer on music. He read litterae humaniores at Balliol College, Oxford (1919–21, BA 1921) and studied at the RCM (1921–3) with Vaughan Williams and R. O. Morris (composition), Boult (conducting), Colles (criticism) and H. P. Allen (choral interpretation). In 1926 he took the BMus at Oxford. He was appointed director of music at Campbell College, Belfast (1929), where he founded the New Belfast Orchestral Society (1931) and conducted it until he left the city (1936). From 1946 to 1964 he was a lecturer at Durham University, where he founded the Durham Colleges Choral Society. His writings are marked by the complexity of their style and of the thinking behind them.

WRITINGS

- The Musical Design of the Ring* (London, 1926)
A Study of Mozart's Last Three Symphonies (London, 1927)
Musical Experience what is and what might be (London, 1932)

The Music of Berlioz (London, 1972)

DAVID SCOTT

Dickinson, Clarence (b. Lafayette, Ind., 7 May 1873, d. New York, 2 Aug 1969). American organist and composer. He studied at Miami University, Oxford, Ohio, and at Northwestern University in Chicago. After further study in Berlin and in Paris with Moszkowski (piano), Guilman (organ) and Pierné (composition), he went to St James's Episcopal Church in Chicago and then to the Brick Church (Presbyterian) in New York in 1909. In 1912 he became professor of church music at Union Theological Seminary where in 1928 he established the School of Sacred Music. He was its director until he retired in 1945. With his wife Helen Adell (Snyder) Dickinson (1875–1957), a writer, he produced a steady stream of church anthems and other music that contributed significantly to the improvement of taste in

local churches. In 1917 they published *Excursions in Musical History*, a curious book intended to be 'readable and popular' and reflecting their views on many aspects of music. He edited *Historical Recitals for Organ* in 50 numbers, a series that educated generations of organists, widening horizons and elevating taste. His most famous organ work was the *Storm King Symphony* for orchestra and organ (1921); *In Joseph's Lovely Garden*, an Easter carol, was his best-known anthem. His *Technique and Art of Organ Playing* (New York, 1922) went into many editions, and the hymnal that he edited in 1933 for the Presbyterian Church (USA) was widely used. In 1954 he and his wife edited an important series of 18th-century Moravian anthems. At the time of his death he was the last surviving founder of the American Guild of Organists. The Clarence Dickinson Memorial Library of Church Music has been established at William Carey College in Hattiesburg, Mississippi. Dickinson's long life cast a lingering and benevolent shadow.

VERNON GOTWALS

Dickinson, George Sherman (b St Paul, Minn., 9 Feb 1888, d Chapel Hill, 6 Nov 1964) American music educationist. He studied at Oberlin College (BA 1909), Oberlin Conservatory (MusB 1910) and at Harvard (MA 1912), he became an associate of the American Guild of Organists (1910) and studied theory and composition in Berlin (1913–14). He worked as an organist and choirmaster in various churches (1902–21) and taught the organ and theory at Oberlin Conservatory (1914–16) before joining the faculty at Vassar (full professor 1922–53, music librarian 1927–53, chairman of the music department 1932–4). He made many study trips to Europe and lectured during the summers at several American universities. He was one of the principal founders of the American Musicological Society and its journal (*JAMS*), serving as chairman of its organizing committee (1934) and as president and chairman of the publication committee (1947–8) when *JAMS* was established. Oberlin College awarded him an honorary MusD in 1935. Dickinson was active in the Music Library Association (president 1939–41). At Vassar he developed one of the best college music libraries in the country, his *Classification of Musical Compositions* is one of the bases of American music librarianship. Many of his other writings are concerned with musical style, whose study he regarded as an essential part of music education.

 JON NEWSOM

Dickinson, Peter (b Lytham St Annes, 15 Nov 1934). English composer, pianist and teacher. After attending the Leys School, Cambridge, he became organ scholar at Queens' College, Cambridge, where he was a pupil of Philip Radcliffe. He also received advice and encouragement from Berkeley. In 1958 he was given a scholarship to the Juilliard School, where he studied with Bernard Wagenaar. In the USA he met and was influenced by Cage, Cowell and Varèse, and worked as a pianist with the New York City Ballet and as a critic and lecturer. He was appointed to lecture at the College of St Mark and St John, Chelsea, in 1962, and there he started classes in experimental composition and improvisation, writing much practical music, including *The Judas Tree*, a theatre piece in which psychological and symbolic aspects of the story of Judas are imaginatively treated. In 1966 he moved to Birmingham where he held lectureships first in the extra-mural department and then in the music department and was active as a performer and promoter of concerts of new music. In 1970 he resigned to give his time to freelance composing, performing and lecturing. He became in 1974 the first professor of music at Keele University, where he founded what has become one of the most important centres for the study of American music outside the USA. In texture, melody and use of dissonance his early work shows affinities with that of middle-period Stravinsky; his early experimental and improvisational activity bore fruit in his works of the 1970s. In its use of simple basic material in original ways it recalls Ives and Satie – a composer in whom Dickinson has a special interest, and whose work he has often performed with his sister, the mezzo-soprano Meriel Dickinson. His lively approach to basic problems of language and idiom is well shown in his 1964 series of articles on improvisation.

WORKS (selective list)

VOCAL

- The Judas Tree (music-theatre, T. Blackburn), actors, 2T, chorus, brass, perc, str, 1965.
 2 Motets (Blackburn) John, Mark, ATB, 1963, Martin of Tours (Blackburn), T, Bar, chorus 2vv, chamber org, pf duet, 1966; The Dry Heart (A. Porter), SATB, 1967, Outcry (Blake, Clare, Hardy), A, SATB, orch, 1968, Late Afternoon in November (P. Dickinson), 16 solo vv, 1975.
 A Dylan Thomas Cycle, Bar, pf, 1959, 3 Comic Songs (Auden), T, pf, 1960, rev 1972, An e. c. Cummings cycle, Mez, pf, 1965, Extravaganzas (Corso), Mez, pf, 1970, Winter Afternoons (E. Dickinson), 6 solo vv, db, 1971, Surrealist Landscape (Berners), Ct/Mez, pf, tape, 1 utt (St Augustine, P. Dickinson), 6 solo vv, 1974.

INSTRUMENTAL

- Transformations, orch, 1970, Org Conc., 1971, Conc., str, perc, elec org, 1971.
 Str Qt no 1, 1958; 3 Juilliard Dances, fl, cl, bn, tpt, trbn, perc, pf, vc, 1959, Fanfares and Elegies, 3 tpt, 3 trbn, org, 1967, Translations, rec, va da gamba, hpd, 1971, Rec Music, rec, tape, 1973, Hymns, Blues and Improvisations, pf qnt, tape, 1973; Str Qt no 2, with tape/pf, 1975, Solo, baryton, tape/va da gamba, 1976.
 Variations, pf, 1957, orchd for ballet, 1959, Paraphrase 1, org, 1967, Paraphrase 2, pf, 1967.
 Principal publisher: Novello.

WRITINGS

- 'Improvisation', *MT*, cv (1964), 294, 377, 538, 672, 688, 766.
 'Charles Ives 1874–1954', *MT*, cv (1964), 347.
 'John Cage', *Music and Musicians*, xiv/3 (1965), 32.
 'A Note on The Judas Tree', *MT*, cviii (1967), 323.
 'Erik Satie (1866–1925)', *MR*, xxviii (1967), 139.
 'Berkeley's Music Today', *MT*, cix (1968), 1013.
 'A New Perspective for Ives', *MT*, cxv (1974), 836.

ed., *1st American Music Conference Keele 1975*

ed.: *Twenty British Composers* (London, 1975) [incl. 'Transformations of Erik Satie', p. 47]

'A Note on Some Recent Works', *MT*, cxviii (1977), 559 [on Dickinson's works]

HUGO COLE

Dickson, (Katharine) Joan (Balfour) (b. Edinburgh, 21 Dec 1921). Scottish cellist. After a début recital in Edinburgh in 1942, she studied at the RCM with Ivor James (1945–6) and in Paris (1947–8). She then went to Rome, Salzburg and Lucerne as a student of Mainardi, becoming one of his most distinguished pupils, and gave her London début recital in 1953. She was a founder-member of André Mangeot's quartet (1948–50), and a member of the Edinburgh Quartet (1953–8), the Scottish Piano Trio (1958–69), and the Clarina Ensemble, founded in 1970; she also formed piano and cello duos with her sister Hester and with Joyce Rathbone. In 1965 she was awarded the Worshipful Company of Musicians Medal for services to chamber music. She was appointed to teach at the Royal Scottish Academy of Music in 1954 and became a professor at the RCM in 1967. A finely controlled technique enables her to produce a many-hued tone capable of great intensity yet also of warmth and sweetness; her interpretations reflect the thoughtfulness and integrity of her approach to a catholic repertory. She is the dedicatee of Kenneth Leighton's solo sonata and of concertos by David Dorward, John Purser and Frank Spedding.

LYNDA LLOYD REES

Dictionaries and encyclopedias of music.

1. General. 2. Before 1835 (i) 1st century BC–1495 Varro to Tinctoris (ii) 1495–1732 Tinctoris to Walther (iii) 1732–1835 Walther to Fétis. 3. 1835 to the present (i) Encyclopedias (ii) Terminological dictionaries (iii) International biographical dictionaries (iv) National or regional biographical dictionaries (v) Special dictionaries. 4. Landmarks in musical lexicography

1. GENERAL. In a charmingly ironic mixture of self-deprecation and pride, Samuel Johnson began the magnificent preface to his famous *Dictionary* (1755) with these words:

It is the fate of those who toil at the lowest employments of life, to be rather driven by the fear of evil, than attracted by the prospects of good, to be exposed to censure, without hope of praise, to be disgraced by miscarriage, or punished for neglect, where success would have been without applause, and diligence without reward. Among these unhappy mortals is the writer of dictionaries. Every other author may aspire to praise, the lexicographer can only hope to escape reproach, and even this negative recompense has been yet granted to very few.

As Johnson knew, there had been and would be many such unhappy mortals engaged in this particular lower employment of life. Some of their works, like his own, would achieve lasting fame and widespread importance; others would serve in more modest fashion Man's day-to-day need to understand the ideas, words, facts and things by which he lives. All would be the result of a fierce natural urge to compile and compact the knowledge of the world or of a special interest into handy compendia in order to control it – an urge as old as civilization itself. The classical encyclopedias and dictionaries, from Marcus Terentius Varro's *Disciplinarum* (1st century BC) to Dasypodius's *Lexikon* (1573), though they resemble only slightly those of modern times, nevertheless sprang from the same compulsion, a central purpose not disguised by the different and often

inexact names they bore: *Vocabularium*, *Thesaurus*, *Etymologicum*, *Catholicon*, *Elucidarium*, *Bibliotheca*, *Glossarium* and others. Such compendia were written by scholars for scholars, not specifically for musicians, and were mainly systematically arranged summae (i.e. collections of all knowledge).

Modern lexicography of music began in the 18th century, with the first large-scale dictionary of musical terms (Brossard, 1703) and the first music encyclopedia (Walther's *Lexicon* of 1732). Both, along with the later historian Hawkins (1776) and bibliographers Forkel (1792), Lichtenthal (1826) and Becker (1836), indicate their dependence on many of the early summae, though rarely the degree of dependence. Little research has been done into the sources, particularly the classical ones, used by these and later writers, and it is therefore not possible to establish fully the extent to which modern music lexicography is based on those classical antecedents.

The era of modern music lexicography began with Brossard and Walther, but some earlier music dictionaries are extant. Until recently an 11th-century *Vocabularium* of musical terms in Monte Cassino was considered the earliest, but in 1970 Wiersma-te Nijenhuis published a translation of the *Dattilam*, a *Compendium of Ancient Indian Music*, which was written about 700. One of its verses implies the existence of even earlier terminological dictionaries: 'One should understand the words from common practice with the help of manuals of terms and other [books]'. The earliest compendium to include biographies of musicians, the 10th-century *Kutāb al-ughānī al-kabīr* ('Great book of songs') by al-Isfahānī ('Alī ibn al-Husayn), has been frequently translated and reprinted in whole or in part, but its place in the history of music lexicography remains unclear.

Indeed, that history cannot yet be written. Too many of its aspects are obscure, although a beginning has been made and there are several works which, in their own ways, exemplify the kinds of study needed and which may serve as models of methodology. Stig Walin's study of terms for musical instruments in early Swedish lexica; Thurston Dart's examination of musical terms in Cotgrave's 1611 *Dictionary*; Padelford's work with old English glosses and vocabularies; During's study of Greek musical terminology; and H. H. Eggebrecht's *Handwörterbuch der musikalischen Terminologie*.

The first sections of this article (§2(i) and (ii) below) discuss the precursors of Brossard and Walther and draw attention to the many outstanding research problems. Here, and in the subsequent section (to 1835), a fairly strict chronological sequence has been followed and several of the more important general dictionaries and encyclopedias have been included, if they have musical sections. In §3, which is arranged differently, only specifically musical works are discussed. Each section concludes with a listing of works, giving bibliographical details: none of these lists can be exhaustive, but each supplies a representative selection, drawing attention to the more important works.

2. BEFORE 1835.

(i) 1st century BC–1495: Varro to Tinctoris. Within the tradition of systematic encyclopedias that prevailed during classical times and thence into the modern period, the earliest work of particular interest to musicians is Varro's *Disciplinarum* of the 1st century BC. As is

known from the fragments of his works which remain. Varro organized the *Disciplinarum* into large categories, one for each of the seven liberal arts including music. This arrangement (with the addition of voluminous notes, a practice apparently begun by Pliny (Plinius Secundus) in his encyclopedia, the *Historia naturalis* (c77) served as the prototype for most encyclopedic works up to the 17th century. Although Walther did not mention Pliny's work, he gave a description of the Greek lexicon of Julius Pollux, the *Onomasticon* (c180), an excellent example of the format that Varro and Pliny had established. Both this and Pliny's work were known to Brossard. The *Deipnosophistae* of Athenaeus of Naucratis (c204) is a work of special interest as a result of its origins in the huge lexicon of Pamphilus of Alexandria (*fl* c50), itself derived from many earlier collections, which are now lost. Lichtenthal amplified Walther's description of the *Deipnosophistae* and noted that 12 chapters in the first, third, fourth and sixth books deal with music.

About 420 Martianus Capella, borrowing freely from many predecessors in the traditional manner, produced his curious, allegorical *De nuptiis Philologiae et Mercurii* whose ninth book is called 'De musica' it is printed in Marcus Meibom's *Antiquae musicae auctores septem* (1652) and Gerbert's *Scriptores* (1784). Walther probably knew of Martianus's work from his reading of Meibom. In about 500 Stephanus of Byzantium compiled his *De urbibus*, noted by Forkel, Becker and Lichtenthal. At about the same time Boethius wrote his well-known *De institutione musica*. The latter exerted a great influence on Cassiodorus, the compiler of the notable *De artibus ac disciplinis liberalium litterarum* of about 560: chapter 5 of book 2, *Institutiones musicae*, is printed in Gerbert (1784), and was apparently well known to Walther.

One of the most authoritative reference books of medieval Christendom, the *Etymologiarum* of Isidore of Seville (Isidorus Hispalensis), was completed about 600. Isidore was especially concerned with the words used by his clerical brethren, adding to this systematically arranged encyclopedia two dictionaries of terms, one alphabetical, one topical. As one of the most widely used books of the Middle Ages (Collison, 1964, noted that there are about 1000 surviving manuscript copies), it became a source for countless subsequent lexicographers and exerted a profound influence on learning for 1000 years. Eggebrecht ('Lexika der Musik', *MGG*) believed the 11th-century *Vocabularium* at Monte Cassino to be excerpted from the *Etymologiarum*; Bartholomeus Anglicus in his 13th-century *De proprietatibus rerum* repeatedly stated that things were 'As Isyder sayth'; Walther and Brossard both noted it, and today, those at work on the fascicles of the *Handwörterbuch der musikalischen Terminologie* cite it as one of their authorities for meanings. There are studies of its musical importance by Tello, Fontaine and Avenary, and excerpts are translated in Strunk (1950). Because Isidore cited more Latin sources than Greek, his authority for the sections on music can probably be assumed to be Boethius.

The few Eastern works known to the Western world began to appear at this time. Besides the *Datīlam* and the *Kitāb al-aghānī*, mentioned in the introduction above, there are two 9th-century Chinese encyclopedias the *T'ung-tien* ('Complete institutions') by Tu Yu (735–812), in which chapter 5 is devoted to music, and the *Yueh-fu tsa-lu* ('Miscellaneous notes on music', c890–

900) of Tuan An-chieh – as well as the 10th-century *Mafūth al-'ulūm* ('Keys to the sciences', 975–7) of al-Kwarizmi with three chapters in book 2 devoted to music. The *Yueh-fu tsa-lu* is a remarkable work recently made widely available in a translation and study by Gimm: chapters 13–26 report on instruments and their masters; chapters 27–40, individual compositions; chapter 41 on theory; and chapter 42 on institutions of music, including floor plans for music schools. The *Myriobiblon, sive Bibliotheca librorum* of Photius, a patriarch of Constantinople, written in the 9th century, is important even today as another work which extracts and comments on the writings of nearly 300 authors whose works are otherwise lost. It appears that works like the *Myriobiblon*, syntheses of the vast body of writings of many other authors, were often more popular, more frequently reproduced and more enduring than the originals from which they were drawn.

Clearly very popular throughout the Middle Ages was the 11th-century *Suda* lexicon which circulated widely in manuscript before its first publication (Milan, 1499) and was still in use in the 17th century. It was exceptional in ignoring the systematic arrangement of material, the conventional organization of most medieval encyclopedias and encyclopedic works by book and chapter based on the seven liberal arts, the Trivium (grammar, logic, rhetoric) and the Quadrivium (geometry, arithmetic, astronomy, music). Instead, it was arranged alphabetically, and its nearly 30,000 entries embrace proper names of people and places in addition to terms. Although its sources are mainly the works of the Greek writers, it also includes Roman scholarship. Forkel, Lichtenthal, Becker and others remarked that it included many musical terms and 'historical notices' about music, but little detailed attention has been paid it.

Hugh of St Victor, writing in about 1127, employed the traditional categories of the systematic arrangement in his *Didascalion* and added new categories as well: ethics, crafts and physics. He also ignored the secularity of the *Suda* lexicon, keeping to more monastic concepts and drawing heavily on Boethius, Augustine of Hippo, Cassiodorus, Plato and others.

Another very widely known encyclopedia of the Middle Ages and the Renaissance – and one of those most readily available to musicians because Hawkins reprinted it in his *General History of Music* in 1776 – was *De proprietatibus rerum* by the English Franciscan friar Bartholomeus Anglicus. It was written about 1230, and translated frequently (into French, Spanish, Dutch and English in the 14th century), even before the first edition was printed in 1472. An English translation made by John of Trevisa in 1397 was published in 1495, and then republished frequently, several times in an edition enlarged by Stephen Batman. Brossard noted it among those works he said he would have liked to study; Walther, in turn, provided a biography of Bartholomeus in his *Lexicon*, because, as he admitted, he saw the name in Brossard's list. Bartholomeus depended on Isidore and graciously acknowledged his indebtedness. Imitating Bartholomeus and also dependent on Isidore (to the point of obvious plagiarization) was Vincent de Beauvais' *Speculum maius*, compiled about 1244. In spite of its borrowings from Isidore (or perhaps because of them) it became one of the major encyclopedias of the Middle Ages, and now furnishes ideas about tastes, prejudices and intellectual concerns

in the 13th century more clearly than many of its counterparts. Walther mentioned it, but apparently did not see it, although he does seem to have known Johannes Balbus's *Catholicon*, written about the same time. This, like the *Suidae lexicon* and many later works, included proper-name entries. (The most notable example, Guglielmo da Pastrengo's *De originibus rerum libellus*, appeared a century later.)

Brunetto Latini's *Li livres dou trésor* of about 1264 was probably the first major exception to the tradition of writing in Latin but his departure from it was more than just a change of language; it indicated a change of audience. It was the first encyclopedia compiled for laymen, and it was immensely popular. Between Pastrengo's *De originibus* (c1350) and Johannes Tinctoris's *Diffinitorium* (1495), there were few lexica of importance. Eggebrecht ('Lexika der Musik', *MGG*) discussed three general terminological dictionaries from the period which, although unrelated to the work of Tinctoris, exemplify the growing demand for translations of Latin terms into other languages. Gerardus de Scheieren's *Vocabularium* (1477) and Wenceslaus Brack's *Vocabularius rerum* (1478) These are all Latin-German dictionaries, and they show clearly the derivative nature of most lexicographic work at the time. Brack, for example, derived most of the definitions for the 80 musical terms he included from Isidore's *Etymologiarum* by way of Hugh of St Victor's *Didascalion* (Eggebrecht, 1967)

- Varro, Marcus Terentius *Disciplinarum libri IX*, vii. *Musica* (1st century BC, *Opera*, Geneva, 1573)
- Plinius Secundus [Pliny] *Historia naturalis* (c77, Paris, 1516), ed. I. Jan and C. Mayhoff (Leipzig, 1892/1933), Eng. trans. (1938)
- Julius Pollux of Naucratis *Onomasticon* (c180, Venice, 1502), ed. F. Bethé, *Lexicographi graeci*, ix (Stuttgart, 1900/31/1967)
- Athenaeus of Naucratis *Deipnosophistae* (c204, Venice, 1513), ed. G. Kaibel (Leipzig, 1887/90/1961), Eng. trans. by C. D. Yonge (London, 1853/4), C. B. Gullick (London, 1927/41, 2/1975/6)
- Augustine of Hippo *De musica libri v* (391), ed. in *PL*, xxiii, ed. 1, r trans. by G. Finnaert and F. J. Thonnard (Paris, 1947), ed. 1, Eng. trans. by R. C. Tahafero (New York, 1947)
- Martianus Capella *De nuptiis Philologiae et Mercurii liber IX* (c420, Vicenza, 1499), ed. A. Dick (Leipzig, 1925/1969), *Emendando*, J. A. Willis (Leiden, 1971), *De musica* in M. Meibom (1652) and *U.S.*, i, 63
- Boethius *De institutione musica* (c500, Venice, 1491/2, 2/1498/9), ed. O. Paul (Leipzig, 1872/1973), S. M. Cserba (Regensburg, 1935), A. Damerini (Florence, 1949), extracts in *Hawkins II* and Strunk (1950)
- Stephanus of Byzantium *De urbibus* (c500, Venice, 1502), ed. A. Meineke (Berlin, 1849/1958)
- Cassiodorus *Institutiones musicae*, in *De artibus ac disciplinis liberalium litterarum* (c560), ed. in *PL*, lxxix–lxx (1848, 1865), Eng. trans. by R. A. B. Mynors (Oxford, 1937), L. W. Jones (New York, 1946), in *GS*, i, 14, and Strunk (1950)
- Isidorus Hispalensis [Isidore of Seville] *Etymologiarum sive Originum* (c600, Paris, 1580), ed. in *PL*, lxxxi–lxxxiv, and *GS*, i, 19, ed. W. Lindsay (Oxford, 1911/1962), excerpts in Strunk (1950), see also F. León Tello, *Musica*, i (1952), 11, H. Avenary, *Mf*, xxi (1968), 38
- Dattilam: A Compendium of Ancient Indian Music* (c700), ed. 1, Eng. trans. by E. Wiersma-te Nijenhuis (Leiden, 1970)
- Photius [Patriarch of Constantinople] *Myriobiblon*, sive *Bibliotheca librorum* (c858), ed. A. Schottus (Geneva, 1612), I. Bekker (Berlin, 1824/5), in *PG*, cii (1860), Eng. trans. (1920, 1959)
- Tuan An-ch'ieh *Yueh-fu tsa-hu* [Miscellaneous notes on music] (c890–900, many edns.), Shanghai, 1937, 1957, ed. 1, Fr. trans. by B. Belpaire in *Florilège de littérature des Tang* (Paris, 1957), Ger. trans. by M. Gimm (Wiesbaden, 1966)
- Abdallāh Muhammad ibn Ahmad ibn Yūsuf al-Kwarīzmī. *Mafāih al-ūlūm* [Keys to the sciences] (975/7), ed. 1, Lat. trans. by G. van Vloten (Leiden, 1895)
- ʿAlī ibn al-Husayn [al-Isfahānī] *Kitāb al-aghānī al-kabīr* [Great book of songs] (10th century), see Coover (3/1971) for reprs., trans., suppl., and indexes
- [Johannes Presbyter] *Vocabularium musicum* (MS, I-Mc, 318, 371, 11th century), repr. in J. A. L. de la Fage *Essays de diptérogaphie*

musicale (Paris, 1864), 404

- Suidae lexicon graece et latine* (c1050, Milan, 1499), ed. A. Adler, *Lexicographi graeci*, i (Leipzig, 1928/38/1967), T. Gaisford (Oxford, 1834), G. Bernhardt (Halle, 1834–5), I. Bekker (Berlin, 1854)
- Hugh of St Victor *Didascalion* (c1127, Strasbourg, 1475), ed. C. H. Buttner (Washington, DC, 1939), Eng. trans. by I. Taylor (New York, 1961)
- Bartholomeus Anglicus *De proprietatibus rerum* (c1230, Cologne, 1472), Eng. trans. by John of Trevisa (Westminster, c1495, rev., enlarged by S. Batman, London, 1582), ed. H. Muller, *Riemann-Festschrift* (Leipzig, 1909/1965), in *Hawkins H*, ii
- Vincent de Beauvais [Vincentius Bellovacensis] *Speculum quadruplex, sive Speculum manus* (c1244, Strasbourg, 1473, Douai, 1624/1964/5)
- Brunetto Latini *Li livres dou trésor* (c1264, It. trans. by B. Giamboni, 1474, Fr. edn., Lyons, 1491), ed. F. Carmody (Berkeley, Calif., 1948)
- Johannes Balbus *Summa grammaticalis valde notabilis quae Catholicon nominatur* (1286, Mainz, 1460/1971)
- Guglielmo da Pastrengo *De originibus rerum libellus* (c1350), ed. M. A. Blondo (Venice, 1547)
- Gerardus de Scheieren *Vocabularium qui intulatur Teuthonista* (Cologne, 1477)
- Wenceslaus Brack *Vocabularius rerum* (Basle, 1483)

(ii) 1495–1732. Tinctoris to Walther Tinctoris's *Terminorum musicae diffinitorium* (1495; probably written c1475) is certainly the most important musical incunabulum. In it nearly 300 terms from a wide range of musical matters are defined with an almost cryptic conciseness. Parrish noted in the preface to his excellent translation (1963) that many of the definitions in the *Diffinitorium* appear verbatim in some of Tinctoris's later treatises. The sources that Tinctoris used for these definitions cannot be clearly determined. It is unlikely that he relied on any of the general encyclopedias then in circulation, nor does he appear to have used the 11th-century *Vocabularium* in Monte Cassino, whose definitions (unlike those of Tinctoris) are derived mainly from Isidore. He may have relied solely on earlier music theorists, for the *Diffinitorium* includes only theoretical terms, there are no proper names, aesthetic considerations or descriptions of musical instruments. Although eight copies of the printed book and three early manuscripts (one 15th-century and two 16th-century, with some 19th-century copies of them) survive, there is no evidence that the *Diffinitorium* had any impact on subsequent compendia, and most musicians continued to use the works of Pollux, Isidore, the *Suidae lexicon* and others.

There is, however, a variety of evidence to show the much greater influence and fame of Gregor Reisch's *Margarita philosophica* (1503), with its 32 chapters on music largely derived from Boethius. It was known to a number of 16th-century German theorists; Brossard, Walther and Janovka cite it among their sources, and Zaccaria Tevo's famous treatise of 1706, *Il musico testore*, quotes extensively from it.

Less famous, but cited as one of his sources by Janovka, was Calepino's *Dictionary* (1502). Predominantly a dictionary of terms, though containing some proper names, it was a standard reference work for over 200 years, expanding through many editions to include several languages by 1573. The *Lectionum antiquarum*, published by Rhodiginus (Richerius) in 1516, contained a large number of musical terms scattered throughout its ten chapters. It was cited by Brossard and Walther, but none of the three 18th-century scholars seems to have known Valla's *De expetendis, et fugiendis rebus opus* (1497) or the interesting *Polyanthea* by Nani Mirabelli (1503), arranged alphabetically by subject with etymologies and quoted

examples of word usage. Nor did they mention the various dictionaries by Robert Stephanus (Estienne) (1531 and 1539), by his son, Henry (1572), by Erasmus Alberus (1540) or by Dasypodius (1573); they did, however, use the revised edition of Hadrianus Junius's *Nomenclator* (1567), in which music terms occupy rubrics 243–51 (pp.304–15). The only separate dictionary of music terms from the 16th century and one of the few in manuscript is Giovanni del Lago's *Sequitano alquante definitioni di musica*, written in 1530 and apparently unknown until Edward Lowinsky mentioned it in 1956.

The term 'encyclopedia' appears to have been used first by Rabelais in *Pantagruel* (1532), where Thaumont says that Panurge has opened to him 'le vray puy et abysme de encyclopedie'. Paul Skalé was the first to use it as part of the title for his dictionary, the *Encyclopaedia, seu Orbis disciplinarum* in 1559, but this was exceptional, none of the titles of the many works cited by Brossard and Walther contained it.

Compilers of general encyclopedias after about 1500 were more concerned about the sciences, particularly the natural sciences, than the Quadrivium. Music did not regain what might be thought to be its rightful place in such works until the latter part of the 18th century, most conspicuously with the publication of Diderot and D'Alembert's *Encyclopédie* (1751–80) and Rees's *Cyclopaedia* (1802). In the 20th century, the treatment of music in most general encyclopedias has again been diminished, space being accorded more to practical matters, the greatly increased information on the pure sciences, and political events and ideas.

Although Brossard and Walther used a number of the works mentioned primarily for definitions of terms, the sources which they used for biographical and bibliographical information were more numerous. These include Conrad Gesner's *Bibliotheca instituta et collecta* (1574) and *Bibliotheca universalis* (1545) though apparently not the proper-name dictionary by Charles Stephanus (Estienne), the *Dictionary historicum ac poeticum* of 1554 (called by Collison, 1964, the 'first indigenous French encyclopedia'). The last was a popular lexicon which grew out of Torrentinus's *Elucidarius* (1498), progressed through more than 20 editions by 1700, and served as the basis for Louis Moréri's notable *Le grand dictionnaire historique*, first published in 1674.

There is a similar wealth of English counterparts. Thomas Elyot's *Dictionary* (1538) which became the *Bibliotheca Eliotae* (1542) and was published under that title in many subsequent editions; Thomas Cooper's *Thesaurus linguae romanae et britannicae* (1565), the first dictionary to place proper names in a separate alphabet, and Thomas Thomas's *Dictionary linguae latinae et anglicae* of 1587.

Walther was more dependent than Brossard on the steadily increasing numbers of *bibliothecae* and biobibliographical dictionaries describing the lives and works of artists and writers which appeared throughout the 17th century. He examined and cited many of them as his sources: Gesner, Scaredonius (1558), Poccianti (1589), Verdier (1585), Possevinus (1593) and Alberici (1605). Draudius's three *Bibliothecae* (1610, 1611 and 1611) provided Walther with information for many of his biographical entries, although he also used many local biographical works: Sweetius's *Athenae belgicae* (1628), and the later *Bibliotheca belgica* of Andreae (1623), John Bale's *Illustrum maioris Britanniae scrip-*

torum (1548), which, with the second edition covering 14 centuries, served as a major source of information about English musicians; many Italian sources including Picinelli (1670), and Oldoinus (Oldoini, 1676, 1678), all three containing many notices of writers of the 16th and 17th centuries, Mandosio (1682), Cozzando (1685) and Mongitore (1707–14). Also frequently cited are König (1678), Lipenius (1682), Mencke, Schöttgen and Jacobi (1717), Jablonski (1721) and Bayle (1697) as well as many lesser sources.

Neither Walther nor Brossard seems to have known the interesting collection, *Icones diversorum hominum*, by Boissard (1591) which, according to Becker, contains 35 portraits of 15th- and 16th-century musicians with biographical notices, nor the first edition of Allacci's invaluable *Drammaturgia* (1666), a dictionary of dramas which included many operas. They also seem to have overlooked some important terminological works, particularly John Rider's *Bibliotheca scholastica a Double Dictionary* (1589), which was widely used in England and which contained proper names as well as terms. Other major dictionaries to include musical sections are Nicot's valuable *Thésor de la langue françoise* (1606), Goldast's *Almannicarum rerum scriptores* (1606), Cotgrave's *Dictionary* (1611), Goclenius's *Lexicon philosophicum* (1613) and Baldus's *De verborum vitruvianorum* (1612).

Most of the terms that required definitions and explanations before 1800 derived from the consideration of music as a science, which as part of the Quadrivium it was. Tinctoris in his *Diffinitorium* needed to explain only denotative words, that is, those with categorical meanings. But by 1800 the musical vocabulary had been greatly enriched with connotative words more difficult to define and thus more open to varied interpretation. Terms such as 'adagio' resist precise, scientific description, and in the 16th and 17th centuries they were growing more numerous and richer in meaning. That growth, paralleling the growing sophistication of music and its practitioners, created a need for more specialized and detailed discussion of terms. As a result, dictionaries and glossaries became frequent appendages to books on music theory and introductory tutors, starting with Praetorius's *Syntagma musicum*, ii (1618), which includes a section on 'Itahanische und andere Termini musici'. Robert Fludd's *De templo musicae* of 1617 contains an etymological dictionary in chapter I of book I. Nikolaus Gengenbach's small tutor, *Musica nova* (1626), includes a list of 'Technologicam' (cols.126–51). More extensive glossaries appear in the eighth (1632) and subsequent editions of Demantius's *Isagoge artis musicae* (1607). Shorter lists are found in many later works and incorporate terms of expression, Praetorius, Gengenbach, Demantius, Herbst and Ribovius, for example, all defined 'adagio', 'forte', 'lento', 'piano' and other connotative terms, as did Marin Mersenne and Athanasius Kircher in their two massive encyclopedic music treatises (the 'foible' of each of these authors, according to James Matthew, was 'omniscience'). Throughout their works they concerned themselves with the definition of words in common use; the former's *Harmonie universelle* (1636–7) and Kircher's *Musurgia universalis* (1650) were widely accepted as authorities for definitions, and Janovka, Brossard and Walther all indicated their dependence on them.

Alongside these music treatises a large number of useful general works appeared in the 17th century

which were cited by Brossard and Walther. The latter noted that Martinus's *Lexicon philologicum* (1623) contained many musical terms, and he also referred to the classic works by Ménage (1650), Du Cange (1678) and Furetière (1690), although Brossard listed only the last. Neither mentions works by Sir Henry Spelman (1664), Corneille (the interesting *Le dictionnaire des arts et des sciences*, 1694, which was published as a supplement to the Académie Française's great *Dictionnaire* of the same year, in opposition to Furetière's compendium) or Matthias Schacht who compiled the first biographical dictionary devoted solely to musicians, *Musicus danius*, in 1687, though it was not published until 1928.

These, then, were what may be called the classical antecedents of modern music lexicography, an era which began with Janovka's and Brossard's dictionaries of 1701 and Walther's encyclopedia of 1732. The line of derivation stretching back from these three to Varro in the 1st century BC had been interrupted only once, by Tinctoris's *Diffinitorium* (1495), which was in itself an anomaly. None of its predecessors appears to be related to it in any way, and few if any later dictionaries seem to have been dependent on it, or even aware of its existence.

Then, some 200 years later, two dictionaries appeared simultaneously. Of the two, Brossard's *Dictionnaire* and Janovka's *Clavis ad thesaurum*, the former has proved to be more important. Originally entitled *Dictionnaire des termes grecs, latins et italiens*, it was a glossary which Brossard appended to a collection of his motets, the *Prodromus musicalis* (1695), and the 1701 version was a pre-edition and was incomplete. Only one copy is known to exist, and it lacks important bibliographical features included in the 1703 edition which most scholars consider the true 'first' edition (see Heckmann, 1965). In particular, there is a 'Catalogue de

plus de 900 auteurs qui ont écrit sur la musique', which, as Duckles's review (1968) of the facsimile reprint points out, is a pioneer in the realm of universal music bibliography; it also furnishes some knowledge of Brossard's sources. Brossard's contemporaries recognized its importance; Mattheson, for example, included a 'Zusatz zum Brossardischen Register', a list of an additional 400-plus authors, in volume two of his *Critica musica* of 1725. By 1710 three later editions of the dictionary had appeared.

Although Brossard in his 'Catalogue' noted some 100 books he used, Janovka in the *Clavis ad thesaurum* cited very few. Kircher's *Musurgia universalis* (1650) and Reisch's *Margarita philosophica* (1503) are among them, but the most frequently mentioned is Carissimi's *Ars cantandi* (1692). Brossard defined many more than Janovka's 170 terms, but the latter's work is arranged alphabetically by broad subjects; many of its entries are treatises which incorporate explanations of numerous other terms. 'Tactus' occupies 50 pages in his discussion of 'Stylus', and Janovka defined a variety of separate styles, including, in the 'expressus' category alone: *ecclesiasticus, canonicus, motectibus, phantasticus, madrigalescus, melismaticus, hyporchematicus, symphoniacus* and *dramaticus*. Words used in the definitions that are separately defined elsewhere were indicated by both Brossard and Janovka in ways analogous to the use of asterisks in the present-day *Harvard Dictionary of Music*. Brossard used underlining, Janovka italics. Detailed indexes to these and other lexica like Paterson and Ritori's study of *Hidden Terms in the Harvard Dictionary* (1973) would greatly aid use. Cigler has suggested (1968) that Janovka's dictionary was to have been followed by a companion biographical volume, which would have produced, in combination, the first encyclopedia of music. Brossard had the same idea, and in the preface to his 'Catalogue' remarked that he had been collecting information for years for a similar biographical lexicon. Neither achieved his goal. Walther, on the other hand, about 1708, before publishing his encyclopedia, had prepared a separate dictionary of terms. The manuscript (*D-WRl* Q341c) is entitled *Præcepta der musicalischen Composition*, and it includes about 250 definitions of Greek, Latin, French and Italian musical terms. Among the explicit references to earlier authority in the definitions, there are five to Janovka and others to Praetorius, Printz and Kircher, with even one mention of the *Suidae lexicon*.

In the next few years little of interest to musicians was published. The first English dictionary was called *A Short Explication of such Foreign Words, as are made use of in Musick Books* (1724). Intended for 'Lovers of Musick', it provided brief, almost telegraphic definitions of several hundred musical terms. Appended to it was a 22-page *Account of Printed Musick*, probably works issued by J. Brotherton, a publisher. A few years later, about 1730, a 42-page *Short Explication of such Italian Words* appeared both separately and as part of a Walsh publication entitled *Rules or a Short and Compleat Method for Attaining to Play a Thorough Bass*. The most important English publication between 1701 and 1732, however, was the first edition of Ephraim Chambers's *Cyclopaedia or, An Universal Dictionary*, which appeared in 1728 and which became the prototype for most later general encyclopedias – the *Encyclopédie* edited by Diderot and D'Alembert, the *Encyclopaedia Britannica*, and many others.

Like Brossard's *Dictionaire*, Walther's *Lexicon* first appeared in a pre-edition. In 1728 the entries for 'A' only were published in a small book entitled *Alte und neue musikalische Bibliothec oder Musikalisches Lexicon*. The complete work followed in 1732, and, like Chambers's general encyclopedia, became the prototype for all music encyclopedias that followed. It arranged terms and persons in one alphabet and included biographies of living people, as did J. H. Zedler's general encyclopedia, the *Universal-Lexikon*, begun in the same year (until then most encyclopedias restricted their biographical coverage to the deceased). Zedler was also the first editor to employ associate editors assigned to, and in charge of, special areas.

Walther collected information by sending inquiries to various other authorities (the first music lexicographer to do so) but his primary authorities were books, hundreds of them, which he scrutinized, page by page (many have been mentioned above). His choice of biographies was based on the 900 'auteurs' listed by Brossard in his 'Catalogue'. For definitions of terms, Walther studied many distinguished music treatises, including the dictionaries of his predecessors, Janovka and Brossard. Eggebrecht (1957) examined in detail Walther's definitions and found that Mattheson, Niedt, Glarean, Zarlino, Kircher, Merenne and Praetorius are the most frequently cited of the long list of writers serving as his authorities. A subsequent edition of the *Lexicon* with many corrections was planned but not accomplished, and some manuscript emendations gathered for it were eventually incorporated by Gerber into his *Lexicon* (1790–92). Though the one and only edition of Walther contains numerous errors, it remains a monumental work offering an otherwise unobtainable range of 18th-century opinions, speculations and judgments on music.

(iii) 1732–1835: *Walther to Fétis*. The arrival of the dictionaries of Janovka and Brossard and Walther's encyclopedia resulted in the rapid production of other music lexica. Within five years of Walther's publication of the first music encyclopedia, a second appeared, the *Kurzgefasstes musicalisches Lexicon* published in 1737 by Johann Christoph and Johann David Stössel in Chemnitz (some authorities, including Eitner, cite a 'Barnickel' as the compiler). This was designed to be a compact *Handlexikon* for music lovers, and in many ways was a popularization of Walther's work. However, it also provided topical articles (e.g. 'Music der Hebräer'). Walther is lauded in the introduction, and the list of other authorities at the end cites treatises by a number of music theorists: Mattheson (two), Printz (seven), Werckmeister (eight), Praetorius (*Syntagma musicum*) and others – as well as general compendia such as the *Myriobiblon* (c858) and Jablonski's *Allgemeines Lexicon der Künste* (1721). Handel appears under Hendel; Mattheson's biography requires three pages, Bach's three lines. It is a valuable work and historically interesting, not least because it is the first 'concise' music dictionary.

The first edition of the terminological *A Musical Dictionary* by James Grassineau was published in London in 1740. Often said to be little more than a translation of Brossard, it does not deserve such casual disregard. Although, as Grassineau himself said, 'I have follow'd a French author in many points', worthwhile additions were taken from other writers (see Coover, 1971, and Shaw, 1973). When the publisher, J. Robson, reissued Grassineau's work many years later, in 1769, he added to it, and also published separately, a 52-page addendum of definitions drawn mainly from Rousseau's *Dictionnaire* of 1768 which he thought would improve the coverage and quality. Also in 1740, Mattheson published a curious *Grundlage einer Ehren-Pforte*, a collection of 148 biographies in which German musicians of the later 17th and the early 18th centuries were prominent: most of the notices were written by the subjects themselves, and the book's importance, and much of its untrustworthiness, rest on that autobiographical content.

A few years later, between 1753 and 1776, appeared a cluster of French dictionaries of the theatre, all of which were published anonymously though their authors' identities were known. Together they constitute an intriguing appendage to the history of music lexicography. This unparalleled surge of interest produced a *Histoire du Théâtre de l'Opéra en France* by Durey de Noinville and Louis-Antoine Travenol (1753); Antoine de Lérès' *Dictionnaire portatif des théâtres . . . de Paris* (1754); Claude and François Parfaict's seven-volume *Dictionnaire des théâtres de Paris* (1756); La Vallière's *Ballets, opéra, et autres ouvrages lyriques* (1760), and Joseph de La Porte and S. R. N. Chamfort's *Dictionnaire dramatique* (1776). Also within this period, according to Fétis and others, L. F. Beffara compiled five large dictionaries of opera, ballets, cantatas and other dramatic music totalling over 30 volumes in manuscript, none of which was published. Some are apparently lost, but two survive in the

Bibliothèque de l'Opéra in Paris (Rés.602 and 603). This group of dictionaries, with very similar coverage, compiled within a span of 23 years and seemingly without precedent or successors, warrants closer critical examination.

Several important general biographical dictionaries were published in the second half of the 18th century, soon to be followed, early in the 19th century, by a growing abundance of separate lexica devoted solely to music. These general works include the biographical *Allgemeines Gelehrten-Lexicon* by Jöcher (1750–51, with continuations and additions by Adelung and others until 1897), Meusel's useful *Deutsches Künstlerlexikon* (1778–9), which includes many articles on musicians, and L. A. de Bonnefons' *Dictionnaire des artistes* (1776).

The general dictionaries of terms from this same period show a continuing concern for definition and clarification of the terms of aesthetics. Clear evidence of this concern is the appearance of a number of dictionaries of the fine arts with strong musical coverage: Lacombe's *Dictionnaire portatif des beaux-arts* (1752); Sulzer's *Allgemeine Theorie der schonen Künste* (1771–4), a seminal work to which both Kirnberger and J. A. P. Schulz contributed several hundred music articles; and the later *Kurzgefasstes Handwörterbuch über der schonen Künste* (1794–5), with music articles by F. A. Baumbach.

Neither the increasing numbers of such works nor the earlier publication of separate works by Brossard, Walther, Grassineau and others changed the growing practice of appending lists of terms to music treatises and tutors. Among the more important and useful 18th-century examples are nine pages at the end of Spiess's *Tractatus musicus* (1746), pages 393–482 and 586–99 of Adlung's respected and widely used *Anleitung zu der musikalischen Gelahrtheit* (1758), 20 pages of 'A Musical Dictionary' in the magazine *The Muses Delight* (1754), the section on 'Musikalische Kunstwörter' in Leopold Mozart's *Violinschule* (1756), and an alphabetical *Anhang* to Kürzinger's *Getreuer Unterricht* of 1763.

Tans'ur provided definitions for 1000 terms in editions of his *New Musical Grammar* (1746), and William Billings chose a glossary of 140 words to append to his *The Singing Master's Assistant* (1778), the first appearance of such a list in an American publication. G. B. Doni's posthumous *Lyra Barberina* of 1763 had incorporated a nine-page 'Onomasticum, seu Synopsis musicarum', II, 268 by G. B. Martini, an updated version of the 'Synopsis musicarum, Graecarum at que obscurorum vocum' included by Doni in his earlier *De praestantia musicae veteris libri tres* (1647). (Another dictionary by Martini, a *Nomenclatura musicale . . . a guisa di dizionario*, remains in manuscript in the library of the Bologna Liceo.) A 'Dictionnaire de musique' is included in Azaïs' *Méthode* (1776), and the first such list in a Portuguese publication appears in Solano's *Exame instructivo sobre a música* (1790). J. A. Hiller supplied a 'Kurzgefasstes Lexikon' in his *Anweisung zum Violinspielen* (1792). Two appended dictionaries appear in 18th-century Russian publications – a short list of Italian terms in the Russian translation of G. S. Löhlein's *Clavier-Schule* (1773–4), and a 'Музыкальнй словар' in the first issue of the *Karmannaya kniga dlya lyubeteley muziki* published by Gerstenberg in 1795. Many others probably exist without deserving widespread notice. Though interesting as a group, in part because they re-

flect what their compilers perceived as the needs of their audiences, none is of great lexicographic significance.

Much more important are the monumental general encyclopedias like the historic *Encyclopédie, ou Dictionnaire raisonné des sciences, arts et métiers* (1751–65), edited by Diderot and D'Alembert. A vast literature has accumulated about this famous venture, and a surprisingly large amount is concerned with its musical content. The goal of conventional encyclopedias has always been to present an objective summa of existing knowledge, but the unconventional *Encyclopédie* set out to guide opinion. Scholars and eminent literati made up its editors and contributors; after the much respected musician Jean-Philippe Rameau had declined to prepare the music articles, the editors turned to a closer friend, the eloquent Jean-Jacques Rousseau, who accepted. Although he complained that he had little time to prepare his contributions, he eventually submitted nearly 400 entries, in many of which he graciously acknowledged an indebtedness to Rameau's works. Although Rousseau's haste engendered a sizable number of errors, it was on theoretical and philosophical grounds that Rameau attacked some of the articles, vigorously and almost immediately. The assault extended to Rousseau himself (for whom Rameau had little regard), to the *Encyclopédie* as a whole, and to its editors. The course of the controversy can be traced elsewhere in this dictionary, in the articles on the two principal protagonists.

The terms in the *Encyclopédie* with whose definitions Rameau disagreed were *Accompagnement*, *Accord*, *Cadence*, *Choeur*, *Chromatique* and *Dissonance*, none of them representing concepts easily or simply defined, from him, as from Rousseau, they elicited lengthy essays. From the outset Rousseau himself recognized shortcomings in many of the articles, and they added to his desire to prepare a separate terminological dictionary.

This *Dictionnaire* was completed in 1764 and published in 1768. It was the last of his major writings on music, a summing up of all his thoughts, and for a man who was admittedly an amateur in many ways and a barely successful composer, it was a remarkable work. His ideas on the nature and meaning of music were all expressed in stylish and graceful prose, and the *Dictionnaire* immediately became, as Thomas Hunt has said in his excellent study of the work, 'a vital force in determining musical thought in the second half of the century'. It thus had a great effect on the content of many subsequent dictionaries: it appeared in at least 22 editions as part of Rousseau's collected *Oeuvres*. J. Robson included some of it in translation in his *Appendix* to Grassineau's dictionary in 1769, a complete (though poor) English translation by Waring appeared in 1771. Diderot and D'Alembert, in spite of their quarrel with Rousseau, borrowed 375 articles from the *Dictionnaire* for the supplement (1776–7) to the *Encyclopédie*. Meude-Monpas' *Dictionnaire* of 1787 contains more than 100 of Rousseau's articles without acknowledgment; the two volumes devoted to 'Musique', edited by Framery, Ginguéné and Momigny for the *Encyclopédie méthodique* (1791–1818), include entries from Rousseau with corrections, additions and commentaries, and among the hundreds of articles written by Burney for the 45-volume *Rees's Cyclopaedia* (1802–20), at least 85 include translations from Rousseau, with appropriate acknowledgment. The

Dictionnaire de musique moderne by Castil-Blaze published in 1821 contains 385 articles plagiarized from Rousseau (see Hunt). While willing to 'borrow' to this extent from Rousseau, Castil-Blaze ungratefully abused him with invective. In the same year Turbri published an abridged version, aimed at a wider market. Ernst Ludwig Gerber, in his *Neues historisch-biographisches Lexikon* (1812–14), listed four translations into German then in progress, but apparently none was ever completed.

The *Dictionnaire* was less an alphabetical list of hard words with definitions in the classic mould than a list of topics on which Rousseau, like Janovka before him, was moved to write long thoughtful essays. Although aesthetics and the nature of music interested Rousseau far more than simple definitions of denotative terms, many of his topics were new to music dictionaries (e.g. those pertaining to folk and ethnic musics, including the music of the American Indian), and many were accompanied by music transcriptions. Although the work still contained numerous factual errors, some carried over from his articles in the *Encyclopédie*, its most valuable material lay in these long essays. His handling of terms was clearly much more derivative. Thus, for Greek theoretical terms, he simply borrowed, in many instances from Brossard, while, like Brossard and Walther, Rousseau cited Athenaeus, Julius Pollux, Boethius, Martianus and others. He also depended on many of the same music theorists, especially Mersenne and Kircher, and curiously – in spite of their quarrel years before – on Rameau. Instruments were not described in the *Dictionnaire* because they had been covered in the *Encyclopédie*.

In the years after Rousseau, dictionaries and encyclopedias appeared more frequently, partly, no doubt, because his *Dictionnaire* became a basic source for subsequent compilers. The *Dictionarium musica* by John Binns (issued under the pseudonym Hoyle, 1770), an uneven work of limited value even to amateurs, its intended audience, drew more heavily on Grassineau than Rousseau, but the latter's influence was apparent. Thomas Busby's dictionary (c1783–6) was a more original, better-written work than Binns's and it went through many editions including an American one in 1827, the first time a music lexicon was re-published in the USA. A *Musikalisches Handwörterbuch* by J. G. L. Wilke (published anonymously in 1786) was an indifferent work of no great interest, although G. F. Wolf's *Kurzegefasstes musikalisches Lexikon* of a year later was more substantial, perhaps because it was contrived mainly from Walther and Sulzer with help from Rousseau. It went through several editions and was translated into Danish in 1801. Verschueren-Reynvaan's Dutch *Muzikaal kunst-woordenboek*, even though it covered only 'A–Muz', appeared in two editions, the first in 1789 (370 pages), the second in 1795 (618 pages, but still only 'A–Muz'). It owed much to Rousseau.

The next dictionary of terms was the first of two volumes entitled 'Musique' (vols. 185–6) prepared by N. E. Framery and P. L. Ginguéné in 1791 for the huge, unorthodox *Encyclopédie méthodique* published by Pancoucke and Agasse from 1782 to 1832. For the second 'Musique' volume (1818), J. J. de Momigny joined Framery and Ginguéné as an editor. Each volume contains prodigious borrowings from Rousseau, because the *Encyclopédie méthodique* was essentially a

recasting of the materials in Diderot and D'Alembert's *Encyclopédie*, alphabetically arranged, into a subject arrangement. Of 196 volumes planned, 166 appeared, with 88 alphabets and 83 separate indexes. Added to the borrowings from Rousseau's articles for the *Encyclopédie* were materials from his *Dictionnaire*, yet some of the editorial additions and corrections were, rather ungraciously, harshly critical of Rousseau's works.

John Wall Callcott's slight *An Explanation of the Notes, Marks, Words, &c. used in Music* first appeared in 1793. In 1798 he published a *Plan of a Practical Dictionary of Music*, a much more ambitious work that he hoped to issue in 1799. Although he did not, he left 36 volumes of manuscript material collected between 1797 and 1807, as well as the resulting two-volume manuscript of the *Practical Dictionary* (GB-Lbm Add.27649–50). The principal authorities for this compilation were Tinctoris, Brossard, Walther, Grassineau, Sulzer, Framery, Overend and Arnold. Some of Callcott's materials found their way into Burney's contributions to Rees's *Cyclopaedia* (1802–20). Scholes, in his biography of Burney, noted letters written by Callcott to Burney in 1802–3 indicating his willingness to supply information already collected and to undertake further research if Burney so wished. Callcott's endeavours, if they can be judged by the materials he collected and his assistance to Burney, were of above average calibre, and they deserve more study.

Only five biographical dictionaries of musicians were prepared in the 18th century. Mattheson's *Grundlage einer Ehren-Pforte* (1740), the *ABC Dario Musico* (1780); Hiller's *Lebensbeschreibungen* (1784), Mazza's *Diccionario* (1790), and Gerber's *Lexicon* (1790–92). Of these only the last is important. Both Mattheson's and Hiller's works are more volumes of collected biography than dictionaries and are limited in scope to the author's contemporaries. The *ABC Dario*, the first biographical dictionary in English, presents only critical and satirical résumés, and Mazza's *Diccionario*, though it sets out valuable information on some 300 Portuguese musicians, remained in manuscript until annotated and published by José Alegria in 1944–5. The theatre lexica of Lérís, Parfaict and others from about the middle of the century covered far more than biography. Only Gerber's *Lexicon*, some 50 years after Walther's biographical coverage, remains important, standing as the first independent dictionary of musical biography and a model for many successors. Gerber relied on Walther's work, both the published *Lexicon* and the corrections collected in manuscript. This dependence was more marked in the first edition (1790–92) than in the second (1812–14), but even the first contained much original research. This was surprisingly successful, and correspondents and friends volunteered new information, so that Gerber was encouraged to undertake the greatly improved second edition. Both editions must be used together, for the second complemented rather than superseded the first. The 1966–9 reprint, edited by Othmar Wessely, contains both editions, including various addenda and corrigenda as well as Gerber's own emendations which, until this time, had remained in manuscript.

If works like Gerber's were few in number in this period, so too were separate music encyclopedias. They comprise a *Kurzgefasstes Lexicon* published by Stössel (1737), a three-volume *Dizionario* by Pietro Gianelli, issued in 1801, Lichtenhal's *Dizionario e bibliografia*

(1826), and La Borde's extraordinary *Essai sur la musique ancienne et moderne*. This, published in 1780, was strictly speaking a history, though parts of it, notably the first and second volumes, are encyclopedic in scope, defining terms and furnishing biographical data. The third volume is almost entirely a bio-bibliography of Greek and Roman poets, Greek and Roman writers on music, French and Italian composers and musicians (42 pages for Albinoni alone), classical and later writers on music (including Boethius, Mersenne, Guido and, strangely enough, Isaac Newton) and Italian poets and singers. La Borde cited some classical sources (Julius Pollux, Athenaeus, Isidore and the *Suda lexicon*) but Fénelon, who used the same ones, scorned La Borde's work, describing the *Essai* as 'un chef d'oeuvre d'ignorance, de désordre et d'incurie'.

Two important general encyclopedias deserve attention here: the third edition of *Encyclopaedia Britannica* (Edinburgh, 1790–97, 1803) and Abraham Rees's *New Cyclopaedia* (London, 1802–20). The first two editions of *Britannica* failed to include articles on music, but a sizable number, including some biographies of musicians, suddenly appeared in the third. The articles, prepared mainly by W. M. Morison, Dr Blacklock and John Robison, sometimes cite Burney as an authority, but he had otherwise nothing to do with the work. Had he, the contents would surely have been more informative, less narrowly 'English' in point of view, more graceful, and more entertaining. Burney's experience, knowledge and wit were put to good use a few years later, however, by Rees in his *New Cyclopaedia, or Universal Dictionary*. Over two thousand articles came from the aging Burney in his final years, and although some were repetitive, some flawed, and some eccentric, they covered with great wisdom an enormous range of subjects: biographies of composers, performers and non-musical friends, detailed definitions of terms, dissertations on historical and theoretical topics and on musical instruments (including the acoustics of the 'Umbrella'), as well as essays on countries, cities, organizations and institutions visited by Burney in his travels. Some articles were but a single line in length, others so verbose they should have been trimmed mercilessly. He freely quoted from or summarized a number of sources and acknowledged all: articles by Rousseau in the *Dictionnaire* and for the *Encyclopédie*, Framery and Ginguené's 'Musique', La Borde's *Essai*, and his own four-volume *General History*. Some of the information may have come from Callcott. Scholes's study *The Great Doctor Burney* includes a charming chapter with many details of this enterprise and Burney's extensive contributions.

In 1802 Koch's *Musikalisches Lexikon* appeared, an exemplary scholarly work with detailed scientific articles accompanied by an unusually large number of musical examples. Though it relied on Sulzer more than on Rousseau, it was also highly original. In 1826 it was translated into Danish, an abridged edition appeared in German in 1807, and a second edition of the original was republished as late as 1865.

A large number of terminological dictionaries survive from the first 30 years of the 19th century. Most are derived closely from Rousseau, without in any way approaching his importance. They include the work of Envallson (1802, the earliest Swedish music lexicon), Pilkington (1812, totally derivative), J. C. Röhrner (1820, derived mainly from Verschuere-Reynvaan).

Danneley (1825), Lichtenthal (1826, the first Italian dictionary of musical terms), J. E. Häuser (1828), Jousse (1829), Andersch (1829), Schilling (the compiler of the massive and famous *Encyclopädie*) with his *Musikalisches Handwörterbuch* (1830), Gollmick (1833) and William Smith Porter (1834, the second American dictionary of music terms, and an improvement on Pilkington's earlier work).

Biographical dictionaries from 1800 to 1835 are of two types – those offering international coverage such as the still useful *Dictionnaire* by Choron and Fayolle (1810–11), and a new type offering biographies of musicians in a single country or region. Then, as now, many which professed an international coverage emphasized the musicians of the country in which the compiler or compilers lived and worked (this was even true of Choron and Fayolle). But in the early 19th century there were already traces of the specialization which has now become commonplace and in 1811 Lipowsky published the first bio-bibliography restricted to the musicians of a single area, his *Baierisches Musik-Lexikon*. A chronological survey of the next dozen years shows several biographical dictionaries with strong national bias. The first bio-bibliography of Italian musicians occupied pages 77 to 302 of Gervasoni's *Nuova teoria di musica* (1812); the first English biographical dictionary of musicians, the curious and less than scholarly *Musical Biography* of Bingley, mostly concerned with English musicians, came out in 1814, and Bertini's four-volume *Dizionario* began to appear in that same year, much indebted to Gervasoni and the work of Choron and Fayolle though giving most of the attention to Italian musicians. Bohumir Dlabac's general work on Czechoslovak artists, the *Allgemeines historisches Künstler-Lexikon für Böhmen und zum Theil auch für Mähren und Schlesien* (1815), remains an important source of information on early Czech music and musicians. The first biographical coverage of Polish musicians, Potocki's 'Mały słowniczek muzyczny' was issued in 1818. In 1824, Sainsbury's *Dictionary of Musicians* appeared, the first major biographical dictionary in English, heavily dependent on Choron and Fayolle (even the preface was a direct translation of theirs) and Gerber. A new edition of Castil-Blaze's *Dictionnaire de musique moderne* (1821) was published in 1828 with an appendix, a biographical dictionary of Flemish musicians compiled by J.-H. Mees.

In 1835 F.-J. Fétis's *Biographie universelle des musiciens* and Schilling's *Encyclopädie der gesamten musikalischen Wissenschaften* began publication. Not since the simultaneous appearance of dictionaries by Brossard and Janovka in 1701 had there been such a noteworthy coincidence of two important lexicographies. Schilling's encyclopedia covered terms, topics and biographies in six volumes and a supplement (1841–2). A concise one-volume edition, the work of F. S. Gassner, appeared in 1849. Schilling's energy appears to have been limitless, for he produced an astonishing amount of lexicographical work in a few short years. In 1830, five years before the *Encyclopädie*, he published a terminological dictionary, *Musikalisches Handwörterbuch*; in 1840, another dictionary of terms, *Der musikalische Sprachmeister*; in 1842, a biographical dictionary, *Das musikalische Europa*, as well as a *Musikalisches Conversations-Handlexikon* (a two-volume abridgment, superior to Gassner's, of his *Encyclopädie*); and in 1849, an enlargement of his 1830 *Handwörterbuch* under a

new title, *Musikalisches Conversations-Handwörterbuch* (2/1856). The *Encyclopädie* was a careful work, full of dependable information on a wide range of topics and people, some not discussed in any other lexica, not even in Fétis's monumental *Biographie universelle*.

Though Fétis's famous lexicon does not surpass Schilling's in reliability, it is memorable for the personality of its compiler. Fétis had strong biases, some eccentric, and little hesitation about displaying them in his articles. The eight-volume work was first published from 1835 to 1844, with a second edition, enlarged and revised, from 1860 to 1865. It has been reissued many times, as has a valuable two-volume supplement first published by Albert Pougin in 1878–80; several other writers have published corrections and additions to both the first and second editions and to Pougin's supplement, clearly indicating the work's continued importance. Fétis's respect for classical antecedents is clear. The catalogue of his magnificent personal library (now in the Bibliothèque Albert I^{er}, Brussels) includes many of the works discussed above: Martianus Capella, Julius Pollux, Stephanus (three editions), Calepino, Bayle, Possevinus, Sweetius, Athenaeus, Oldoinus and two copies of the *Suda* lexicon. Among the music encyclopedias and dictionaries listed are those by Walther, Brossard, Praetorius and Mattheson, and large numbers of important treatises (e.g. Kircher and Mersenne), histories, commentaries, biographies, as well as a profusion of works on organology. (This last is not surprising, for Fétis formed one of the finest collections of musical instruments in existence, now in the Brussels Conservatory.) With this magnificent collection of books, scores and instruments readily available to him, it is no surprise that his *Biographie universelle* should prove to be an extraordinarily rich source of information on the lives and works of hundreds of musicians.

By the time of the second edition, the necessary dependence on Choron and Fayolle's *Dictionnaire*, Walther's *Lexicon*, Mattheson's *Grundlage*, Forkel's *Allgemeine Literatur*, Gerber's *Lexikon*, and the histories of Martini, Burney and Hawkins had considerably lessened as a result of extensive travel and a voluminous correspondence with his biographees and other writers on music, such as the bibliographer C. F. Becker. In the long view of history, his methodology is much more significant than his personal biases, for it achieved for the *Biographie universelle* a leading position in the tradition of 'scientific' music historiography.

The 'fierce natural urge' of the lexicographer mentioned earlier manifests itself in three ways, sometimes separately, often all together – bibliography, biography and terminology. Behind that urge rests a conviction that knowledge of people from their biographies, knowledge of what they wrote (assembling what G. Kubler in *The Shape of Time* called the 'grand catalogue of persons and works'), and an understanding of the words which they employed assures comprehension – and more important, control – of all knowledge. Examples are plentiful: Brossard, unable to satisfy completely the impulse, lamented that he lacked the time to compile a biographical dictionary of the names in his 'Catalogue de plus de 900 auteurs'; Janovka is said to have planned a biographical complement to his *Clavis ad thesaurum*; Schilling published both terminological and biographical dictionaries as well as the combined *Encyclopädie*. In more recent times the same impulse has affected such lexicographers as Pulver, Pedrell,

Pazdirek, Baker, Scholes, Slonimsky and others. Fétis, too, responded to that urge and in 1834, one year before the *Biographie universelle* began to appear, included in the second edition of his *La musique mise à la portée de tout le monde* (first edition, 1830) a 'Dictionnaire des mots dont l'usage est habituel dans la musique' which ran to over 100 pages. Within a few years this extremely popular book had been translated into six European languages, and both the Portuguese translation by J. Almeida and the Italian by E. Predari included the dictionary, the latter adding a large biographical dictionary which may have been extracted from the *Biographie universelle*. All of the many French editions of *La musique* after 1834 retained the terminological 'Dictionnaire'.

Fétis's contemporary August Gathy published a modest *Conversations-Lexikon* in 1835, and though it was understandably overshadowed by the works of Fétis and Schilling, it reached a sufficiently large audience to warrant two other editions. Moved by the same lexicographical impulse for total control, Gathy also produced three editions of his terminological dictionary, the *Neues musikalisches Taschen-Fremdwörterbuch*, between 1850 and about 1870.

Among the many general encyclopedias published during this period, few are of special interest to musicians. Perhaps the most valuable is Jettelès's *Aesthetisches Lexicon*, which appeared in two volumes in 1835 and 1837. The music articles were prepared by Freiherr von Lannoy, and it compares favourably with other dictionaries of the arts such as Sulzer's *Allgemeine Theorie* (1771–4) and Lacombe's earlier *Dictionnaire* of 1752.

3 1835 TO THE PRESENT. From 1835 the pace of publication quickened noticeably, from an average of eight new music dictionaries or revised editions each year in the 19th century to nearly 100 a year now. Further, and more significantly, changes were taking place in the nature of the dictionaries themselves, often to meet the needs of a rapidly growing and better-educated middle class and also as a result of the accelerating growth of scholarship. Although there was a large increase in derivative abridgments of earlier lexica, compilers who sought respect for their works had to demonstrate scholarship and sound research and had to furnish new information. Although Fétis was not the only scholar to achieve these aims, he, perhaps more than anyone, defined new goals and standards.

At the same time, the specialized dictionary became more common, and five distinct categories of music lexica became clearly discernible. The three traditional patterns whose prototypes had developed in the 18th century were: the encyclopedia (§3 (i)), which included terms, biographies, and topics (leading to the appearance, towards the end of the 19th century, of a large and

almost separate genre, the concise encyclopedia or *Handlexikon*); the terminological dictionary (§3 (ii)), little changed from Brossard's day (but embracing by the end of the 19th century many so-called 'pronouncing' dictionaries); and the international biographical dictionary (§3 (iii)) modelled on Gerber and Fétis. Two other groups were relatively new: the national or regional biographical dictionaries (§3 (iv)) and the various special dictionaries (§3 (v)) devoted to a single subject, such as the organ, women musicians, modern music or instruments and instrument makers. These categories are rife with subdivisions, and many so-called dictionaries (e.g. those of scales, themes, or gramophone records) stretch the definition of the word to cover what in earlier times would have been considered patent anomalies.

It has seemed impossible, as a result of this increased range, to follow a single chronological line in discussing these dictionaries. Many of them are, in any case, much more readily available for first-hand examination. Because of the much greater number of titles published, the lists at the end of each section have had to be highly selective. Fuller listings are in the 'Index to Topics and Types' in Coover (3/1971) and Eggebrecht's articles on 'Lexika' in both *MGG* and the *Riemann Musik-Lexikon*. Descriptions and annotations for many may be found in King's article 'Dictionaries' in *Grove* 5, or in Duckles (3/1974).

(i) *Encyclopedias*. An encyclopedia is taken to be a work encompassing terms, biographies and topics, and most of the important encyclopedias of music published before 1835 are discussed in §2 above. After 1835 their numbers rapidly increased, balanced by a proportionate decrease in the number of good separate terminological and biographical dictionaries. Only a handful of distinguished dictionaries of musical terms have been published in the 19th and 20th centuries, and few of them approached the worth or influence of Brossard's, Rousseau's or Koch's earlier efforts. Of the international bio-bibliographies compiled between 1835 and the present, probably only Eitner's *Quellen-Lexikon* (1898) and the several editions of Baker's *Biographical Dictionary* (from 1900) possess the durable value of their forebears, Gerber, Choron and Fayolle, and Fétis.

The quality of encyclopedias, on the other hand, has been improving as their numbers grow. Though they tend to be derivative, many examples of original scholarship exist. A few are remarkable because of the sheer strength of their compiler's personality, for example Scholes and Thompson; the saving grace of many others (it gives some of them their only value) is the extent to which they are chauvinistic.

To a great degree the list of entries in most encyclopedias is identical; few of them, published in any country, can afford to ignore Bach or Vivaldi, the term 'Sonata', or the subject of the modes, or even give less space to such articles. The range of entries has widened considerably since the day when Walther included only biographies and definitions of terms. An encyclopedia may now display an amazing variety of features, among them descriptions of compositions (by true title, *Heldenleben*, or translation, *Hero's Life*; or by groups, e.g. Razumovsky Quartets), publishers and instrument makers, geographical entries (articles on Leipzig, Milan, Edinburgh) and surveys of national musics, entries for institutions and organizations (Sacred Harmonic

Society, Three Choirs Festival), for theatres, halls and libraries, and, most important, good cross-reference systems. The article on Bach in a German encyclopedia is apt to be more comprehensive than the article (perhaps by the same authority) in a dictionary published in Spain, and an article about the vihuela in that same Spanish dictionary will usually offer more information than is provided in a Swedish encyclopedia. But such chauvinism is normally modest.

There is, however, a conspicuous move towards more nationally biased works. Since World War II music encyclopedias have been published in at least 12 countries for the first time, and a Canadian and an Indian encyclopedia are in preparation. Nations with a long history of such works have produced more and better ones; in several cases these are more nationalistic, such as the *Diccionario de la música* by Torrellas and Pahissa.

Music encyclopedias improve and grow larger, and the editorial responsibilities are frequently borne by a large group of editors. Most multi-volume works not only have several editors, but include articles from numerous authorities scattered around the world. The tradition of the one-man encyclopedia (of which notable examples were the personable works by Riemann, Scholes and Pratt) is represented by very few recent productions, and the later editions of many dictionaries which began as one man's accomplishment are now produced by many editors and contributors. In most cases the gain in factual accuracy has been balanced by the loss of a unique personality. Only a few are still referred to by a single compiler's name, such as Grove, Riemann and Scholes. More frequently, especially in the last 20 years, they are recognized by their titles; the monumental *Die Musik in Geschichte und Gegenwart* edited by Blume is an example.

The work of the lone compiler has come more and more to be limited to the production of 'concise', 'brief' and 'pocket' encyclopedias, most of them highly derivative, distinguished mainly by their convenient size and price. The amount of information now available for inclusion in a music encyclopedia probably discourages heroic, single-handed compilations like those of Riemann, Scholes and Moser in the recent past, and of Walther, Rousseau, Gerber, Fétis and Burney in earlier times.

The following selective listing is arranged by country or region, and chronologically within each of those sections. The most important works listed - Grove, Riemann, Lavignac, Sartori, Gatti, *MGG*, Michel and others - are not discussed here as they are described in detail elsewhere in this dictionary and in such works as Duckles's *Music Reference and Research Materials*. (In most cases the names under which the books are noted are those of editors rather than authors; a clear distinction is not always possible.)

(ii) *Terminological dictionaries*. Few among the works listed here, published since 1835, match the importance or influence of the illustrious dictionaries of terms published before 1835 by Tinctoris, Rousseau, Janovka, Brossard or Koch. Even the most distinguished among them are decidedly eclectic, remarkable primarily for their compiler's good sense in choosing worthy forebears and then paraphrasing them accurately, or elegantly.

Whatever their quality or lineage, they have been issued in great numbers and are widely used. In deference to their intended audiences they differ greatly in size, coverage and detail. Some simple 'primers' offer little more than equivalents of foreign terms (Buck's *New and Complete Dictionary* of 1873 has the entry, 'Lieder. (Ger.) Songs'). Slightly more ambitious compilers attempt definitions of such terms; a paragraph is devoted to 'Lied' in the 1895 edition of Baker's *Dictionary of Musical Terms*. Still others provide additional data: equivalents in several languages, pronunciation, definitions of the words in various contexts, historical changes of meaning, quoted examples of word usages and references to synonyms, antonyms or related words.

Except for the rudimentary primers almost all furnish essays, long or short, on topics such as 'Opera', 'Acoustics' or 'Form'. Perhaps this is so because an entry for 'Opera' or 'Form' offers a compiler greater opportunity to mingle personal opinions with historical facts than do entries for 'Clausula', 'Langsam' or 'Fanfare'. Choice of subject and length of essay often shed light on the personality of the compiler. Stainer and Barrett, for example, in their *Dictionary* of 1876 devoted only eight columns to 'Opera' but 32 to 'Larynx' and another five to 'Laryngoscope'. Even in a dictionary such as this, the range of topics covers several subjects. The Stainer and Barrett article on 'Larynx' clearly deals with general science and anatomy, but the majority of articles (as in most dictionaries) are historical: sections on 'Greek music' and 'Discantus'. Usually a sizable number are theoretical (e.g. Stainer and Barrett, 'Seventh, Chord of the') and occasionally an article is a mixture of both history and theory (e.g. their ten columns on 'Fingering'). Bibliographical treatments of subjects are plentiful, an excellent example being the treatment of 'Periodicals' in the *Harvard Dictionary*.

Until recently surprisingly little interest was shown in the etymology of musical terms, their changing usage and, historically, the ideas which they connote. H. H. Eggebrecht's *Studien zur musikalischen Terminologie* (1955) is a pioneer work in this field, and the *Handwörterbuch der musikalischen Terminologie* (whose first loose-leaf sections began appearing in 1972) is an apt reflection of the studies he has advocated. It may become the most important terminological lexicon of music since Rousseau's *Dictionnaire* of 1768, for each word is treated as an 'idea', and is the topic of a historical essay, with etymological details and evidence from early theorists and encyclopedists, many of whom are listed above. It harks back to Janovka's systematically arranged *Clavis ad thesaurum* (1701)

where many terms were defined in essays on a small number of topics.

Even more like Janovka's work, however, is the *Harvard Dictionary of Music* edited by Willi Apel, first published in 1944, entries are provided for broader subjects, while hundreds of familiar terms are given cross-references to a major article where the term is set in context (for example, '"Recoupe"', see under '"Basse danse"', '"Dis, disis"', see '"Pitch Names"'').

Before 1835 most of the terminological dictionaries were similar in format and organization, and the works of Janovka, Brossard and Rousseau served as their models. But then some new types emerged, of which the most popular was the English-language 'pronouncing' dictionary (The need for aids to pronunciation had been recognized much earlier. Brossard included in the 1703 edition of his *Dictionnaire* a 'Table ou récapitulation des principales difficultés de la prononciation italienne', but between the time of this one-page guide and the flood of more ambitious works late in the 19th century, most dictionary compilers did not provide such assistance.) The earliest appears to be Adcock's *Singer's Guide* of 1873, and between then and about 1910 their popularity seems to have reached its height, particularly in the USA. Since the end of World War II only a handful have been issued, suggesting clearly that the need has diminished. The same is not true for specialized dictionaries of terms (on jazz, the organ or music theory, for example), which are included in the list in §3(v), these have been increasing in numbers in recent years, as have been the highly specialized 'polyglot' dictionaries of musical terms. The most important of the latter is the *Terminorum musicae index septem linguis reductus* (prepared under the supervision of Horst Leuchtmann to assist those working with or reporting to the offices of *RISM*) which may be the first music dictionary to use the computer. Lexiconometry is a new but already well-established field in which a variety of lexical research has been done with computer assistance, analysing word usage, correlating ancient and modern texts and assembling lexical archives, as well as generating actual dictionary entries. The articles by Aitken, Leyerle and Sherman in the bibliography report on some of these processes, which bear on the production of musical entries in general dictionaries, as well as pointing the way towards the future processes required in musical works.

The list below, arranged by the language of the definitions in each work (although the listings for Britain and the USA are separated), does not claim to be exhaustive. It shows the number of languages in which terminological works are available and, to some extent, the relative productivity in these languages. It will be seen that a general preponderance of English-language works has been maintained. In addition, of course, general dictionaries can be helpful to musicians. There are hundreds available (many are reviewed in Mixer's *General Bibliography*), including the *Deutsches Wörterbuch* (Leipzig, 1854-1960) by the Grimm brothers; Du Cange's *Glossarium* (Niort, 1883-7), Paul's *Dictionnaire alphabétique et analogique* (Paris, 1960-64); and Battaglia's new *Grande dizionario* (Turin, 1961-).

(iii) *International biographical dictionaries* In the history of music lexicography there have been only four dictionaries of international biography which can be considered monumental, those by Gerber (1790-92), Fétis (1835-44), Eitner (1900-04) and Baker (1900).

Of the astonishing number of important works written, compiled or edited by Robert Eitner, none remains more useful than his *Quellen-Lexikon*. Though dependent on its forebears from Walther to Gerber and Fétis, it is a monumental accomplishment, and though corrected, amplified and in some ways superseded by *MGG* and *RISM*, it remains indispensable. The lists of works by major composers with locations of manuscripts are less valuable now than formerly, but those appended to biographical notices of many minor composers are often still useful. Some of Eitner's entries are not included in any other dictionary.

Baker's one-volume work has remained throughout its lifetime the best international biography of musicians in English, and reissues of it under the successive editorships of Gustave Reese and Nicolas Slonimsky have markedly improved each edition. It grows larger and more dependable, and with supplements appearing more

frequently than in the past, it is kept surprisingly up to date.

There are others among those listed below which are also extremely useful. As has been pointed out already, the most valuable feature of many dictionaries and encyclopedias is their emphasis on the music and musicians of the country in which they are published. This is equally true for international biographical works; thus Schmidl's excellent *Dizionario universale* (1887-90) is especially informative about the musicians of Italy, Ricart Matas's *Diccionario* (1956) about those of Spain. Even the four most important works named above display some nationalistic emphasis.

This list is a sampling of works in this category from various countries, arranged chronologically. Except for those international biographical dictionaries which focus on one particular aspect of music, for example jazz, instruments, opera, etc (and included in §3 (v)), most of the important ones are cited here.

- 1790 E L Gerber: *Historisch-biographisches Lexicon der Tonkünstler* (Leipzig, 1790-92, rev. enlarged, 2/1812 14 as *Nouveau historisch-biographisches Lexicon der Tonkünstler*, both R1966 9)
 1810 A-F Choron and F J M Fayolle: *Dictionnaire historique des musiciens* (Paris, 1810 11/R1971, 2/1817)

 1974 J Manen *Diccionario de celebridades musicales* (Barcelona, 1974)

(iv) *National or regional biographical dictionaries.* After Fétis there was a pronounced trend away from the mammoth international biographical dictionary towards those limited to the musicians of one country or region. F. J. Lipowsky's 1811 dictionary of Bavarian musicians was the first, Karl Kossmaly and C. H. Herzel's *Schlesisches Tonkünstler-Lexikon* (1846 7/R), J H Letzer's *Muzikaal Nederland* (1850) and Wojciech Sowiński's *Les musiciens polonais et slaves* (1857) the next important ones. These are now extremely valuable because they frequently offer information about less well-known musicians who have been excluded from newer compilations. Only about 20 such lexica were published in the whole of the 19th century, with another 20 from 1900 to World War II. But since the war, over 50 have been issued; that is only to be expected in view of the growth of the world's population and consequent increase in the number of musicians about whom information is needed and the number of people needing such information. New musical cultures have developed and acquired their own reference material, while older ones have come to be scrutinized in ever more detail.

The following discussion is arranged by country or region. Many local biographical dictionaries need to be used alongside other types of music lexica, in particular the extensive international biographies of musicians (§3, (iii)) and the comprehensive encyclopedias of music (§3, (i)). Frequently such works will furnish more information on musicians of the country in which they are published (*Grove* on English musicians, *MGG* on German) than do the national biographies. As a result, several encyclopedias are mentioned in the following paragraphs. General biographical dictionaries are not discussed here. Many, such as the English *Dictionary of National Biography* or the *Norsk biografisk leksikon*, provide information not available in reference works limited to musicians.

ARGENTINA. See LATIN AMERICA.

AUSTRALIA. The first significant work was James Glennon's combined history and biography, *Australian Music and Musicians* (Adelaide, 1968). A D McCredie's *Catalogue of 46 Australian Composers, and selected Works* (Canberra, 1969) and James Murdoch's *Australia's Contemporary Composers* (Melbourne, 1972) complement each other and provide fair coverage for the present day. *Singers of Australia* by Barbara and Findley MacKenzie (Melbourne, 1967), though a collected biography and not a biographical dictionary, furnishes a great deal of information on a category of artists for which the country has long been famous.

AUSTRIA. Aside from two early works dealing with

contemporary musicians, Anton Ziegler's *Adressen-Buch* of Viennese musicians (Vienna, 1823) and G. A. Pichler's *Biographien Salzburgerischer Tonkünstler* (Salzburg, 1845), only two other works focus specifically on Austrian musicians: Herwig Knaus's *Die Musiker* (Vienna, 1967) covers members of the Kaiserliche Obersthofmeisteramt from 1637 to 1705, and Wolfgang Suppan's *Steirisches Musiklexikon* (Graz, 1962-6) discusses Styrian musicians to 1800.

BELGIUM. The first dictionary of Belgian musicians was J.-H. Mees's 'Catalogue biographique' appended to the third edition of Castil-Blaze's *Dictionnaire de musique moderne* (Brussels, 1828). More important are Edouard Gregoir's *Galerie biographique des artistes-musiciens belges* (Brussels, 1862/R1972) and his *Les artistes-musiciens belges* (Brussels, 1885 90, suppl. 1887). Antoine Audas's *La musique et les musiciens . . . de Liège* (Brussels, 1930) concentrates on musicians of Liège before 1800. Victor van Hemel's *Voorname Belgische toonkunstenaars* (Antwerp, 1933, 3/1958) contains brief notices of about 100 musicians after 1700. Karel de Schrijver's *Bibliografie der Belgische toonkunstenaars* (Louvain, 1958) is in fact a bio-bibliography of musicians after 1800. Most exacting and useful of all the dictionaries available, however, is René Vannes' and André Souris' *Dictionnaire des musiciens (compositeurs) [belges]* (Brussels, 1947), which provides excellent biographies, comprehensive work-lists and bibliographical references for composers, many still living.

BOIVIA. See LATIN AMERICA.

BRAZIL. See LATIN AMERICA.

BULGARIA. No adequate biographical dictionaries of Bulgarian musicians were available until the publication of the *Entsiklopediya na balgarskata muzikalna kultura* edited by Venelin Krastev (Sofia, 1967). In spite of its title, it is largely biographical. Nikolai Nikolov's *Balgarski kompozitori i muzikovedi* (Sofia, 1971) complements it.

CANADA. The first dictionary of Canadian musicians was the *Dictionnaire biographique des musiciens canadiens* (Lachine, 1922, 2/1935), published by the Socurs de Saint-Anne. It was largely superseded by the *Catalogue of Canadian Composers* compiled by Helmut Kallmann for the Canadian Broadcasting Corporation (Ottawa, rev. 1952/R1972). The Canadian Library Association's *Finding List of Canadian Musicians* (Ottawa, 1961) is slight, though more up to date. Even more useful is the revised and enlarged edition of Ronald Napier's *Guide to Canada's Composers* (Willowdale, Ont., 2/1976). A full-scale Canadian encyclopedia of music, edited by K. Winters and G. Poitvin, is in preparation, Kallmann is the general editor.

CHILE. See LATIN AMERICA.

CHINA. Until recently the Western world seemed relatively uninterested in Eastern classical music, its creators and performers. It is reasonable to speculate that biographical dictionaries exist but that, because of lack of interest and the language barrier, they have not yet been reported. The *Chung-kuo yin yueh* of Ch'ou-shêng Ts'ao (Peking, 1959) is said to contain biographies of about 5000 musicians, a number which ought to include some Chinese. The encyclopedia *Yin-yueh t'ü-tien* (Kowloon, 1962) by Chi' ming shu chü may also contain some, but information in Western languages about Chinese artists is virtually non-existent.

COLOMBIA. See LATIN AMERICA.

CUBA. See LATIN AMERICA.

CZECHOSLOVAKIA. The earliest compilation was Bohumír Dlabáček's *Allgemeines historisches Künstler-Lexikon für Böhmen und zum Theil auch für Mähren und Schlesien* (Prague, 1815/R1973), mentioned above. Regrettably, a useful dictionary which was begun by Gracian Černušák and Vladimír Helfert, *Pazdírův hudební slovník naučný II. Část osobní* (Brno, 1937–41), reached only the letter 'M'. It was superseded by a later two-volume work by Černušák, Bohumír Štědroň and Zdenko Nováček, *Československý hudební slovník* (Prague, 1963–5), which offers comprehensive coverage of people and organizations. Jaromír Paclt extended that coverage outside Czechoslovakia to 1972 in his *Slovník světových skladatelů* (Prague, 1972). Čeněk Gardavský's *Contemporary Czechoslovak Composers* (Prague, 1965, also published in French, 1966) makes limited information on some 300 Czech composers readily available to a larger readership.

DENMARK. See SCANDINAVIA

ESTONIA. See USSR.

FINLAND. There was no central source of biographical information for Finnish musicians until the appearance of Sulho Ranta's *Suomen savellajia* (Helsinki, 1945). It has been improved and enlarged in the two-volume second edition edited by Einar Marvia (Helsinki, 1965–6) Toivo Haapanen's encyclopedia, *Musikin tietokirja* (Helsinki, 1948) supplements and augments both Ranta's and Marvia's biographical work.

FRANCE. Despite the early interest in biographical dictionaries in France exemplified by the *Tablettes de renommées des musiciens* (Paris, 1785/R1971) and the Choron and Fayolle *Dictionnaire historique* (Paris, 1810 11/R1971, 2/1817), no modern dictionary had dealt with the musicians throughout France until 1961, when the Paris firm of Seghers issued the *Dictionnaire des musiciens français*. There were some, however, which covered the artists of specific regions. Albert Jacquot's *Essai de répertoire des artistes lorrains* (Paris, 1904), J.-J. Barbé's *Dictionnaire des musiciens de la Moselle* (Metz, 1929); Yolande de Brossard's edition of L. E. S. J. de Laborde's *Musiciens de Paris, 1535–1792* (Paris, 1965); and René Muller's *Anthologie des compositeurs de musique d'Alsace* (Strasbourg, 1970). Two excellent encyclopedias – the *Larousse de la musique*, edited by Norbert Dufourcq, Félix Raugel and Armand Machabey (Paris, 1957), and an *Encyclopédie* edited by François Michel, François Lesure and Vladimir Fédorov (Paris, 1958–61) – offer especially useful coverage of French musicians (see §3, (i)).

GERMANY. The first biographical dictionary of musicians, Mattheson's *Grundlage* of 1740, covered mainly German musicians. Others with this same coverage might have been expected to follow, but though Gerber's and Eitner's later compilations laid some stress on German musicians, it was not until 1929 that a dictionary devoted solely to German artists appeared, E. H. Mueller von Asow's *Deutsches Musiker-Lexikon* (Dresden, 1929). Except for the second edition of Mueller's work, published under the new title *Kurschners deutscher Musiker-Kalendar 1954* (Berlin, 1954), there has been no more recent work. Between 1740 and 1929, however, there were a number of dictionaries for specific regions and cities. F. J. Lipowsky's *Baierisches Musik-Lexikon* (Munich, 1811/R1971) was the earliest, followed chronologically by C. F. von

Ledebur's *Tonkünstler-Lexicon Berlin's* (Berlin, 1861/R1965); Carl Stuehl's *Lübeckisches Tonkünstlerlexikon* (Leipzig, 1887); Karl Kossmaly and C. H. Herzl's previously discussed *Schlesisches Tonkünstler-Lexikon* (Breslau, 1846–7/R); Ewald Röder's *Lexikon, enthaltend kurze Biographien in Schlesien geborener Tonkünstler* (Bunzlau, 1890); and Hermann Fey's *Schleswig-Holsteinische Musiker* (Hamburg, 1922). A dictionary of *Rheinische Musiker*, edited by K. G. Fellerer (1960–67) and by Dietrich Kämper from 1969, and Hubert Unverricht's *Musik und Musiker am Mittelrhein* (Mainz (1974)), are the most recent regional dictionaries.

Composers and writers on music in East Germany are adequately covered in two publications – Heinrich Simbriger's *Werkkatalog zeitgenössischer Komponisten aus den deutschen Ostgebieten* and its supplements (Esslingen, 1955; suppl. 1961, 1965, 1968) which provide excellent biographical sketches and useful lists of works, and the *Komponisten und Musikwissenschaftlicher der Deutschen Demokratischen Republik: Kurzbiographien und Werkverzeichnisse* of members of the Verband Deutscher Komponisten und Musikwissenschaftlicher (Berlin, 1959, enlarged 2/1967). Performers, teachers and others involved in music are, at present, not covered.

GREAT BRITAIN. For decades the British seem to have been as interested in the musicians of all Europe as in their own. Very few biographical dictionaries produced in Britain have been limited to British musicians; they include the curious but not very useful *ABC Dario Musico* (Bath, 1780), James Brown and S. S. Stratton's monumental *British Musical Biography* (London and Birmingham, 1897/R1971), Frederick Crowest's unjustifiably obscure *Dictionary of British Musicians* (London, 1895); and Jeffrey Pulver's *A Biographical Dictionary of Old English Music* (London, 1927/R1968) covering English musicians from about 1200 to 1700.

Except for those, British lexicographers up to the end of World War II had compiled only international dictionaries, and more of those than any other country. Though international in scope, most of them, of course, emphasized British musicians. The more important ones are: William Bingley's *Musical Biography* (London, 1814, 2/1834/R1971); John Sainsbury's *A Dictionary of Musicians* (London, 1824, repr. 1825/R1966, 2/1827); David Baptie's *A Handbook of Musical Biography* (London, 1883, 2/1887) and his *Musicians of All Times* (London, 1889, 2/1897). Brown's *Biographical Dictionary of Musicians* (Paisley and London, 1886/R1970); and a work of the same title by W. H. Cummings (London, 1892, rev. 2/1934). The most famous, though not strictly a biographical dictionary, was that compiled by Grove: the third edition, in particular, is strong on British musicians.

More recent works include Russell Palmer's *British Music* (London, 1948), which is mainly about contemporary musicians, and several issues of the *International Who's Who in Music and Musicians' Directory* (London, 9/1980) in which Britons receive considerably more attention than artists of other nations. *A Biographical Dictionary of Actors, Actresses, Musicians, Dancers, Managers and Other Stage Personnel in London, 1660–1800*, an imposing project by Philip Highfill, Kalman Burnim and Edward Langhams, will contain about 5000 biographical entries – predominantly

British – when the projected 12 volumes are complete (Carbondale, Ill., 1973–).

General reference tools must be used for information about Scottish musicians since 1800; the period from 1400 to 1800 is ably dealt with in David Bapic's *Musical Scotland* (Paisley, 1894/R1972). Welsh musicians before 1900 are discussed by M. O. Jones in his *Bywgraffiaeth cerddorion Cymreig* (Cardiff, 1890), and in F. Griffith's better-known *Notable Welsh Musicians of Today* (London, 2/1896), but for 20th-century artists, British dictionaries must be searched.

HUNGARY. József Ság's *Magyar zenészeti lexikon* (Budapest, 1879, 2/1900–11) is an essential secondary source despite its age. Imre Molnár's newer *A magyar muzsika könyve* (Budapest, 1936) offers many improvements, including a wealth of portraits, and more recent information about organizations as well as musicians in all fields, but it does not supplant Ság's efforts. Gyula Czifágy's *Contemporary Hungarian Composers* (Budapest, 1970, 3/1974) is unusually up to date and especially useful because it is in English.

INDIA. There were few sources of biographical information about Indian musicians in Western alphabets until P. Sambamoorthy began his *Dictionary of South Indian Music and Musicians* (Madras, 1952–71). It is encyclopedic in scope, including biographies, terms and topics, but the biographical coverage is limited to Indians. For musicians in the North Indian tradition no such compilation exists, but some living artists and musicologists are included in the slight *Who's Who of Indian Musicians* (New Delhi, 1968).

IRELAND. For information on Irish musicians researchers must rely mainly on general music encyclopedias, collected biographies and scattered notices to be found in dictionaries of British artists. A small *Catalogue of Contemporary Irish Composers* by E. M. Deale (Dublin, 1968, 2/1973) offers bio-bibliographies for about 30 living artists.

ISRAEL (and Jewish musicians world-wide). The first biographical dictionary of Jewish musicians was Gidal Saleski's *Famous Musicians of a Wandering Race* (New York, 1927/R, 2/1949 as *Famous Musicians of Jewish Origin*). It was and is a dependable source (Not dependable but necessary to note are Christa Rock and Hans Brückner's *Judentum und Musik* (Munich, 1936, 3/1938) and Theophil Stengel and Herbert Gerigk's *Lexikon der Juden* (Frankfurt am Main, 1940, 2/1943), two of several scurrilous dictionaries issued in support of Nazi racist doctrines.) Israel Shalita's *Entsiklopediyah le-musikah* (Tel-Aviv, 1950–65) includes musicians of other nations but stresses Jewish musicians around the world. Manassch Ravina and Shelomoh Skulsky's *Who is Who in ACUM* (Tel-Aviv, 1965; suppl. 1966) is a useful work concerned only with musicians in Israel. The most up to date bio-bibliographical dictionary is Macy Nulman's *Concise Encyclopedia of Jewish Music* (New York, 1975).

ITALY. A 'Descrizione generale dei virtuosi filarmonici Italiani' in Carlo Gervasoni's *Nuova teoria di musica* (Parma, 1812) constitutes the first biographical dictionary of Italian musicians. 19th-century musicians are surveyed in Giovanni Masutto's *I maestri di musica italiani del secolo XIX* (Venice, 1880, 3/1882), while Alberto de Angelis's *L'Italia musicale d'oggi* (Rome, 1918, 3/1928) supplements that by covering musicians living in 1918 and then 1928. A group of excellent encyclopedias and international biographical diction-

aries compiled in Italy, all of which stress Italian artists, ably augment and complement these three national biographies. The encyclopedias of Andrea Della Corte (1926, 6/1959), Claudio Sartori (1963–4), G. M. Gatti (1966–) and Carlo Schmidl's international dictionary (see §3 (i)) furnish remarkably broad coverage. In addition, a conspicuous group of collected biographies comprehends Italian musicians in various regions and cities, and though collected biographies are not normally a part of this essay, these extend the coverage of the works mentioned above to such a degree that they deserve to be listed:

- Apulia - P. Sorrenti *I musicisti di Puglia* (Bari, 1966)
- Bergamo - J. S. Mayr *Biografie di scrittori e artisti musicale bergamaschi* (Bergamo, 1875)
- Emilia - A. Damerini and G. Roncaglia *Musicisti della scuola emiliana*, Chigiana, xii (1956)
- Liguria - See Piedmont
- Lombardy - A. Damerini and G. Roncaglia *Musicisti lombardi ed emiliani*, Chigiana, xv (1958)
- Lucca - A. Bonaccorsi *Maestri di Lucca* (Florence, 1966)
- Mantua - A. Bertolotti *Musicisti alla corte dei Gonzaga in Mantova* (Milan, 1890/R1969)
- Naples - F. de Mura *Enciclopedia della canzone napoletana* (Naples, 1969)
- Parma - C. Alcarì *Parma nella musica* (Parma, 1931)
- Piedmont - A. Damerini and G. Roncaglia *Musicisti piemontesi e liguri*, Chigiana, xvi (1959)
- Simagaglia - G. Radiciotti 'Biografie dei musicisti Sinigaglia', *Teatro, musica e musicisti in Sinigaglia* (Milan, 1893/R1973), 143–84
- Tuscany - A. Damerini and G. Barblan *Musicisti toscani*, Chigiana, xii (1955)
- Vercelli - C. Negri *Biografie dei musicisti vercellesi* (Milan, 1909)

JAPAN. Biographical dictionaries of musicians published in Japan before World War II appear to be almost totally unknown in the West. Unfortunately, those published since the war are largely concerned with European and American artists. Y. Togashi's *Nihon no sakk'yokuka* (Tokyo, 1956), which discusses 63 contemporaries, is an exception, but the language remains a barrier.

LATIN AMERICA. Biographical dictionaries of the musicians in Latin American countries are sorely needed, although there are a few, their scope is limited. Serafin Ramirez's *La habana artística* (Havana, 1891) contains nearly 200 pages devoted to Cuban musicians and Vasco Mariz's *Diccionario bio-bibliográfico musical* (Rio de Janeiro, 1948) includes mainly Brazilian artists. Heriberto Zapata Cuéncar has produced four works on Colombian musicians. His *Compositores antioqueños* (Medellín, 1973) is an alphabetical dictionary. The other three – *Compositores colombianos* (Medellín, 1962), *Compositores vallecaucanos* (Medellín, 1968) and *Compositores narriñenses* (Medellín, 1973) – are all collected biographies. Peter Vásquez Messmer's *Compositores bolivianos* (La Paz, 1975), fills a great need for bio-bibliographical information about Bolivian composers most of whom had been noted only superficially in a few general books on Latin American music. Peruvian musicians (and visitors to Peru) are noted in Rodolfo Barbacci's 'Apuntes para un diccionario biográfico musical peruano', *Fénix*, vi (1949), 414–510; an alphabetized dictionary of Peruvian musicians and topics is to be found in Carlos Raygada's 'Guía musical del Perú', *Fénix*, xii (1956–7), 3–77, and xiv (1964), 3–95, and Andres Sas's *La musica en la Catedral de Lima* (Lima, 1970–72) includes a two-volume biographical dictionary. Other publications include the Pan American Union's *Compositores de América* (Washington, DC, 1955–1972), which, strictly speaking, is a collected biography, and Juan Alvarez

Coral's *Compositores mexicanos* (Mexico City, 1971). Aside from these, only sketchy and scattered information exists.

Encyclopedias, however, are of some assistance; in particular, Albert Torrellas and Jaime Pahissa's *Diccionario de la música ilustrado* (Barcelona, 1927-9, 2/1947-52); Otto Mayer-Serra's *Música y músicos de Latinoamérica* (Mexico City, 1947); Victor de Rubertis's *Pequeño diccionario musical* (Buenos Aires, 3/1949, 6/1962); and Nestor Ortiz Oderigo's *Diccionario de la música* (Buenos Aires, 1949, 2/1965), which is a translation, with Latin-American addenda, of the 1945 edition of Andrea Della Corte and Guido Gatti's Italian *Dizionario* (Turin, 1926, 6/1959). O. Schuma's *Música y músicos argentinos* (Buenos Aires, 1943), Rodolfo Arizaga's *Enciclopedia de la música Argentina* (Buenos Aires, 1971), Luiz Cosme's *Diccionario musical* (Rio de Janeiro, 1957) and Carlos Poblete's *Diccionario de la música* (Valparaíso, 1972) offer specific information about the artists in Argentina, Brazil and Chile respectively.

MEXICO. See LATIN AMERICA.

NETHERLANDS. Edouard Gregoir, who compiled two bio-bibliographies of Belgian musicians, the *Galerie biographique des artistes-musiciens belges* and an expanded *Les artistes-musiciens belges*, provided the first large-scale dictionary of Dutch musicians in his *Biographie des artistes-musiciens néerlandais* (Brussels, 1864). He published two other works which include both Belgian and Dutch artists. The earlier was his *Essai historique sur la musique et les musiciens dans les Pays-Bas* (Brussels, 1861). The second combined material from his 1864 work on the Netherlands with material from the 1862 work on Belgium, added some coverage of French musicians, and appeared in a section entitled 'Notices biographiques' of his four-volume *Littérature musicale* (Brussels, 1872-6). Although the sequence is confusing the interrelationships are particularly interesting.

Edmond vander Straeten's classic work, *La musique aux Pays-Bas avant le XIXe siècle* (Brussels, 1867-88/R1969), contains important additional material to Gregoir's work, especially in volumes vi-viii which, respectively, survey Dutch musicians in Italy and in Spain before 1900. J. P. Heije supplied several useful lists of Dutch musicians in volumes i and ii of the journal *Bouwsteenen jaarboek der Vereeniging voor Nederlandsche muziekgeschiedenis* (1869-74). A valuable anonymous work called *Onze musici portretten en biografieën* was first published in Rotterdam in 1898, went through two subsequent editions, the later in 1923, but does not appear to be widely available. J. H. Letzer's *Muzikaal Nederland* (Utrecht, 1911, 2/1913) comprehends musicians from 1850 to 1910, therefore abutting and extending the coverage of Vander Straeten and Gregoir, and is an indispensable work. Karel de Schryver (who also compiled a bio-bibliography of Belgian musicians) carried Letzer's coverage still later in his *Levende componisten* (Louvain, 1954-5).

Important complements to these are some worthwhile encyclopedias compiled in the Netherlands, all of which emphasize Dutch musicians and activities. Henri Viotta's *Lexicon der toonkunst* (Amsterdam, 1881-5) is the earliest; Gerard Keller and Philip Kruseman's very useful *Geïllustreerd muzieklexicon* (The Hague, 1932) was the only other before World War II. Since 1956 four major

works, all wider in scope, have appeared: the *Encyclopedie van de muziek* edited by L. M. G. Arntzenius, Henk Badings, Jaap Kunst and others (Amsterdam, 1956-7); an *Algemene muziekencyclopedie* edited by August Corbet and Wouter Paap in six volumes (Antwerp and Amsterdam, 1957-63, suppl. ed. J. Robijns, 1972); a smaller two-volume work by Salomon Bottenheim and Paap, the *Prisma encyclopedie der muziek* (Utrecht, 2/1957); and a third edition of G. Slagmolen's *Muzieklexicon* (Utrecht, 3/1974). Together these offer excellent coverage.

NORWAY. See SCANDINAVIA.

PERU. See LATIN AMERICA.

PHILIPPINE ISLANDS. Bañas y Castillo's *Music and Theater of the Philippine People* (Manila, 1924) includes a biographical dictionary (pp. 61-122): there is, apparently, nothing more recent.

POLAND. Ignacy Potočki's 1818 'Mały słowniczek muzyczny' in *Pamiętnik Warszawski*, considered in earlier sections of this essay, was one of the earliest of all biographical dictionaries, but a more comprehensive and accurate - and a more useful work - by Wojciech Sowiński supersedes it. First published in French as *Les musiciens polonais et slaves* (Paris, 1857/R1971), it was reissued in Polish in 1874. It is rich in lengthy biographical notices with excellent bibliographies. Almost 100 years later, but covering the same period as Sowiński, is Adolf Chybiński's *Słownik muzyków dawniej Polski do roku 1800* (Kraków, 1949, and in *KM*, new ser., vi-vii, 1948-9). A more up-to-date two-volume version, edited by J. M. Chomiński, was issued under the title *Słownik muzyków polskich* (Kraków, 1964-7). Paweł Podejko's *Nieznani muzycy polscy* (Bydgoszcz, 1966), a bio-bibliography of 'unknown' Polish musicians, attempts to supplement the earlier works.

The useful *Encyklopedia muzyki* by Józef Reiss, first issued in 1924 (Warsaw), edited by S. Śledziński and republished under the title *Mala encyklopedia muzyki* in 1960, complements the strictly biographical compilations above. In 1968 another edition was published with the same title but without reference to Reiss, the original compiler. Still later, a so-called 'second' edition of that work followed (Warsaw, 1970) and, as is often the case, the latest edition excels in numerous ways, but the earlier versions remain useful for articles subsequently eliminated.

PORTUGAL. Like Potočki's work noted under Poland, above, José Mazza's *Dicionário biográfico de músicos portugueses* (compiled in 1790 but first printed in Lisbon in 1944-5) was one of the earliest of all biographical dictionaries of musicians; its 300 biographies are still valuable. Joaquim de Vasconcellos's *Os músicos portugueses* (Oporto, 1870) and Ernesto Vieira's *Dicionário biográfico de músicos portugueses* (Lisbon, 1900-04) are two magnificent works whose coverage shows considerable overlapping but which are nonetheless useful and complementary. The only later biographical reports on Portuguese musicians are in Eugénio Amorim's *Dicionário biográfico de músicos do norte de Portugal* (Oporto, 1935) and Tomas Borba's encyclopedia, the *Dicionário de música ilustrado* (Lisbon, 1956, 2/1962-5).

ROMANIA. Viorel Cosma's *Compozitori si muzicologi români* (Bucharest, 1965) appeared in a revised and enlarged second edition in 1970 with the title *Muzicieni români lexicon* and was the first biographical dictionary

of musicians for this region. Its emphasis is on contemporaries.

SCANDINAVIA. The countries of this area are considered together here because a dictionary or encyclopedia published in any one of them usually includes information about the music and musicians of the others. John H. Yoell's *The Nordic Sound*, for example, includes a 'Composers' Gallery' which reports on musicians from all three countries.

Among the very few biographical dictionaries limited solely to Danish, to Swedish or to Norwegian artists are Sundelin's *Norrändskt musikliv* (Uppsala, 1946) (including biographies of Swedish musicians in a separate section), H. Olsén and Otto Olsson's dictionary of Swedish church musicians, *Svenska kyrkomusici* (Stockholm, 1928, 2/1936), and Bjarne Kortsén's *Contemporary Norwegian Piano Music* (Bergen, 1973), which includes bio-bibliographies of 50 present-day Norwegian composers. Apart from these, seekers of biographical data must rely on encyclopedias. Those from Denmark include Hortense Panum and William Behrend's *Illustreret musiklexikon* edited by O. M. Sandvik (Copenhagen, 1924-6). A new edition by Povl Hamburger and others was published in 1940, and a still later and even more valuable edition appeared under the title *Aschehougs musikleksikon* (Copenhagen, 1957-8). A. Kjerulff and N. Backhausen's *Musikkens hvem, hvad, hvor politikkens musikleksikon* (Copenhagen, 1950) has been a popular work, and a later edition edited by L. E. Bramsen was issued in three separate volumes, the first two biographical, the third terminological (Copenhagen, 1961-2). Two impressive Norwegian encyclopedias are Olav Gurvin and Ø. Anker's *Musikkleksikon* (Oslo, 1949, rev. 2/1959) and Øystein Gauksstad's *Gyldendals musikleksikon* (Oslo, 1962). In Sweden the earliest encyclopedia was the *Musik-lexicon* of J. L. Hoejer (Stockholm, 1864, suppl. 1867). Tobias Norlind's *Allmänt musiklexikon* (Stockholm, 1912-16, 2/1927-8) and *Sohlman's musiklexikon* (Stockholm, 1948-52, rev. enlarged 2/1975) are both excellent works. The latter is deservedly considered a standard encyclopedia ranking with those of Pena Costa, Sartori, Michel and others. *Bonniers musiklexikon*, edited by Åke Engström and F. H. Törnblom (Stockholm, 3/1975), is a useful one-volume work which stresses biographies of Scandinavians. A popular two-volume encyclopedia on which Engström and Törnblom drew heavily was *Tonkonsten internationellt musiklexikon* (Stockholm, 1955 7).

SPAIN. Felipe Pedrell's *Diccionario biográfico y bibliográfico* (Barcelona, 1894-7) stopped at 'Gaz' in the alphabet, a considerable misfortune because it included Latin American musicians as well as those of Spain and Portugal. The Baron de Alcahali de Mosquera (frequently referred to as 'Ruiz de Lihori') published *La música en Valencia* (Valencia, 1903) - a useful dictionary of the musicians of that city. A three-volume *Músicos vascos* (San Sebastián, 1972) by A. Sagardia gives information on Basque musicians, organizations and institutions. Rogelio del Villar's two-volume *Músicos españoles* (Madrid, 1918-27), though more a collected biography than a dictionary, is essential. José Ricart Matas's *Diccionario biográfico de la música* (Barcelona, 1956, 2/1966), although international in scope, stresses Spanish musicians sufficiently to warrant attention also. Fortunately, a group of good encyclopedias from Spain complements the coverage of these

strictly biographical works: C. J. Melcior's *Diccionario enciclopédico* (Lerida, 1859); the *Diccionario de la música ilustrado* edited by Albert Torrellas and Jaime Pahissa and others (Barcelona, 1927 9; a second edition was expanded to four volumes by Torrellas in 1947-52 as *Diccionario enciclopédico de la música*), a four-volume *Enciclopedia Salvat de la música* (Barcelona, 1967), which is a Spanish version of the copious Michel *Encyclopédie* (1958-61), and a 'Hand-lexikon' by Manuel Valls Gorina, *Diccionario de la música* (Madrid, 1971). Superior to all of these, and indispensable for any studies of Spanish music, is Joaquim Pena Costa's *Diccionario de la música Labor* (Barcelona, 1954).

SWEDEN. See SCANDINAVIA.

SWITZERLAND. A small but uniformly excellent group of lexica provides essential information on Swiss musicians, beginning with Georg Becker's *La musique en Suisse . . . notices historiques, biographiques et bibliographiques* (Geneva, 1874). Edgar Refardt's *Historisch-biographisches Musikerlexikon der Schweiz* (Leipzig and Zurich, 1928) was the standard bio-bibliographical reference work until Becker, many years after his first work, collaborated with Willi Schuh to produce the biographical second volume of the *Schweizer Musikbuch* (Zurich, 1939). An enlarged version of that volume was published separately in 1964 as the *Schweizer Musik-Lexikon/Dictionnaire des musiciens suisses*, and it is now the primary source for information about Swiss musicians of all periods. A collection of bio-bibliographies, *Forti Contemporary Swiss Composers* (Amriswil, 1956), issued by the Swiss Composers' League, provides extensive information in English about the lives and works, together with portraits, of some contemporary composers.

TURKEY. Turkey's new europeanized musical activities have been made more apparent to the West in a number of reference books which include two useful bio-bibliographies and three encyclopedias since 1964. The biographical works are M. Oransav's *Çağdas seslendiricilerimiz ve kuğ yazarlarımız* (Ankara, 1969), and T. Y. Öztuna's *Türk musikisi ansiklopedisi* (Istanbul, 1969-). The three encyclopedias which augment their biographical coverage are Vural Sozer's *Muzik ve muzisyenler ansiklopedisi* (Istanbul, 1964), Faruk Yener's and İlhan Mimaroglu's *Kuğ batı muzığı ansiklopedisi* (Istanbul, 2/1966); and Yener's *Muzik kilavuzu* (Milliyet Yayınları, 1970).

USA. A plethora of dictionaries of American musicians compels a division of this section into two parts: those works encompassing musicians throughout the whole country, and those specialized works covering the artists of one state or region which are listed in four sections below (Dictionaries of American 'popular' musicians are listed in §3 (v)). The first biographical dictionary was F. O. Jones's *A Handbook of American Music and Musicians* (Canaseraga, NY, 1886/R1971). An earlier work by J. Parker, *A Musical Biography*, is sometimes called the first American biographical dictionary but is in fact a collected biography of international scope and little merit.

In 1905 O. G. T. Sonneck issued his monumental *Bibliography of Early Secular American Music*, revised by W. T. Upton (1945, 2/1964/R1973), and though primarily a bibliography, it included in its 'index', in alphabetical order, biographies of many American artists then unknown. It is an extremely valuable ap-

pendage. R. J. Wolfe's analogous bibliography for the period 1801 to 1825, *Secular Music in America* (New York, 1964), followed the same procedure, as do two other more specialized lists, D. L. Hixon's *Music in Early America* (Metuchen, NJ, 1970) and C. E. Wunderlich's *History of American Music Periodicals, 1782-1825* (diss., U. of Michigan, 1971). Lloyd's *Church Musicians Directory* (Chicago, 1910/R1974), F. J. Metcalf's *American Writers and Compilers of Sacred Music* (New York, 1925/R1967), and E. E. Hipsher's *American Opera and its Composers* (Philadelphia, 1927) all reported on the life and works of American musicians in even more specialized fields.

Most of the other available biographical dictionaries of Americans are concerned with those of the 20th century. Claire Reis's standard *American Composers of Today* (New York, 1930, 2/1932 as *American Composers*, 3/1938 as *Composers in America*, rev. enlarged 4/1947), William C. Handy's *Negro Authors and Composers of the United States* (New York, 1935/R1976); *The Year in American Music* (New York, 1946-), which included in each issue a dictionary of 'Composers in America', *The ASCAP Biographical Dictionary* (New York, 1948, 2/1952, 3/1966), Virgil Thomson's *American Music since 1910* (New York, 1970), which contains a dictionary of 106 American contemporaries, sections of Christopher Paviakis's directory, *The American Music Handbook* (Riverside, NJ, 1974), and C. E. Claghorn's new *Biographical Dictionary of American Music* (Nyack, NY, 1974). Two more works have been announced: a *Dictionary of American Composers* by Neil Butterworth (London, in preparation) and *Contemporary American Composers: a Biographical Dictionary* by E. R. Anderson (Boston, 1976). Surprisingly, no encyclopedia of music has been compiled in the USA containing enough information on native musicians to supplement these biographical works to any extent.

THE EAST

- Pennsylvania Federation of Music Clubs. *Pennsylvania Composers and their Compositions* (Philadelphia, 1923)

 G. C. Smith. *Creative Arts in Texas: a Handbook of Biography* (Nashville, Tenn., 1926)
 B. D. Ussher. *Who's Who in Music and Dance in Southern California* (Hollywood, 1933, 1940 as *Music and Dance in California*, compiled by W. I. Perlman, ed. J. Rodriguez, 1948 as *Music and Dance in California and the West*, ed. R. D. Saunders)
 E. C. Whitlock and R. D. Saunders. *Music and Dance in Texas, Oklahoma and the Southwest* (Hollywood, 1950)
 Washington Federation of Music Clubs. *Washington State Composers* (Seattle, 1962)
 C. Boone. *Index of Bay Area Composers* (Berkeley, Calif., 1964)
 T. Todaro. *The Golden Years of Hawaiian Entertainment, 1874-1974* (Honolulu, 1974)

USSR. The earliest biographical dictionaries were the *Ruchnoy muzikal'nyy slovar'* ('Music dictionary') compiled by A. Garas (Moscow, 1850) and the *Biograficheskiiy leksikon russkikh kompozitorov* by A. I. Rubets (St Petersburg, 1879, 2/1886). Neither appears to be widely available today. More accessible, though in some ways less dependable, is A. A. Il'yinsky's *Biografiya kompozitorov IV XX vekov* (Moscow, 1904). An *Illyustirovannyi slovar'* ('Illustrated dictionary') limited to living musicians was published in Odessa in 1907-8, but its two volumes totalled only 70 pages. The first works to furnish worthwhile information in a language of the Western world were A. Vodarsky-Shiraef's *Russian Composers and Musicians* (New York, 1940/R1969) and I. F. Belza's *Handbook of Soviet Musicians* (London, 1943/R1972, 3/1945). They remain important sources. *Sovetskiiye kompozitori*, edited by G. Bernandt and A. N. Dol'zhansky (Moscow, 1957), provides biographies for over 1000 Russian composers and is indispensable. Even more up to date, but international in scope, are Yu. Ya. Vaynkop's *Kratkiy biograficheskiiy slovar' kompozitorov* ('Short biographical dictionary of composers'; Leningrad, 1968, 3/1976) and L. V. Mikheyeva's *Pogovorim o muzike* ('Talking about music'; Leningrad, 1965, 2/1968). A dependable biographical dictionary of Estonian musicians, *Biograafiline leksikon*, edited by H. Aumere and others, was published under the sponsorship of Eesti Heliloojad Muusikateadlased (Tallinn, 1966). Latvian dictionaries include W. Neumann's *Lexikon baltischer Tonkünstler* (Riga, 1909), which is reported to provide valuable coverage of a group of musicians perhaps too little known to most of the world, and S. Stumbr's *Kratkiy biograficheskiiye danniiye i perechen' vazhneyshikh trudov kompozitorov* (Riga, 1959), which includes 42 bio-bibliographies of more recent artists.

General encyclopedias are also helpful. The earliest was Yuly Engel's *Muzikal'nyy slovar'* (Moscow, 1901-4), a translation of Riemann's *Lexikon*, which contains many biographies of pre-Revolutionary Russians added by Engel. He also published a *Kratkiy muzikal'nyy slovar'* ('Concise dictionary of music'), an encyclopedia of terms and biographies with even more emphasis on Russian artists (Moscow, 1907), as well as a pocket encyclopedia, *Karmanniy muzikal'nyy slovar'* (Moscow,

1913). Later encyclopedias are the *Entsiklopedicheskiy muzikal'niy slovar'* by B. S. Shteynpress and I. M. Yampol'sky (Moscow, 1959, enlarged 2/1966); A. L. Ostrovsky's *Sputnik muzikanta: entsiklopedicheskiy karmannyi slovar' spravochnik* ('The musician's companion: a pocket encyclopedic dictionary'; Leningrad, 1964, 2/1969); and Yuri Keldish's *Muzikal'naya entsiklopediya* (Moscow, 1973-). An unusual source of information about 18th-century artists is the sequence of 'Notes biographiques' scattered throughout the three volumes of Robert Mooser's *Annales de la musique et des musiciens en Russie au XVIIIe siècle* (Geneva, 1948-51).

As is true for France, Italy and the USA, a group of dictionaries, and some works falling somewhere between collected biographies and dictionaries, combine to furnish excellent and widespread coverage of specific areas and peoples of the USSR and they warrant notice here:

AZERBAIJAN

R G Khalilov *Kompozitori i muzykovedyi Azerbaydzhanskoy SSR* (Baku, 1956, ?2/1959)

E Abasova *Molodivye kompozitori Azerbaydzhana* [Young composers of Azerbaijan] (Baku, 1961, 2/1965)

BELOUSSIA

D N Zhuravlev *Kompozitori sovetskoy Belorussii* (Minsk, 1966)

GEORGIA

G Chkhikvadze *Kompozitori Gruzinskoy SSR* (Tbilisi, 1940)

KAZAKHSTAN

Kompozitori sovetskogo Kazakhstana spravochnik [Composers of Soviet Kazakhstan a handbook] (Alma-Ata, 1954)

LENINGRAD

Leningradskiy kompozitori (Leningrad, 1950)

MOLDAVIA

Kompozitori Moldavskoy SSR (Kishinev, 1956, ?2/1967)

A Skoblonok *Kompozitori Moldavskoy SSR* (Moscow, 1960)

V Degtyarev *Kompozitori i muzykovedi Moldavi* (Kishinev, 1973)

TADJIKISTAN

Kompozitori Tadzhikistana (Dushanbe, 1957, 2/1966)

TATAR

Ya Girshman *Kompozitori sovetskoy Tatarstana* (Kazan', 1957)

UZBEKISTAN

A Asimovskaya and I Akbarov *Kompozitori sovetskoy Uzbekistana biograficheskiye ocherki* (Tashkent, 1959)

UKRAINE

Kompozitori Ukrainskoy SSR (Moscow, 1940)

A I Mukha and N Sydorenko *Spilka kompozitoriv URSR* (Kiev, 1968)

YUGOSLAVIA The earliest biographical dictionary seems to have been V. R. Djordjević's *Prilozi biografskom rečniku srpskih muzičara* ('Contribution towards a biographical dictionary of Serbian musicians') (Belgrade, 1950), containing 46 sketches. About the same number of Croatian composers are described in Krešimir Kovačević's *Hrvatski kompozitori i njihova djela* (Zagreb, 1960, enlarged 2/1971-). The Union of Yugoslav Composers published *Kompozitori i muzički pisci* (Belgrade, 1968), a catalogue of the society's members and their works, in English as well as Serbo-Croat and therefore useful to a wide readership. Stanko Trobina's *Slovenski crkveni skladatelji* (Maribor, 1972) is more precisely a collected biography, but it offers copious information on a great many Slovenian composers. Truda Reich included many of the same musicians in her bio-bibliographical dictionary of contemporary Yugoslav composers, *Susreti sa suvremenim kompozitorima jugoslavike* (Zagreb, 1972).

An excellent, two-volume encyclopedia, *Muzička enciklopedija*, edited by Josip Andreis and published in

Zagreb (1958-63, 2/1971- ed. K. Kovačević) emphasizes Slav musicians.

(v) *Special dictionaries*. This group comprises encyclopedias, dictionaries of terms, or biographical dictionaries which focus on specific topics in music. As such, they are usually aimed at audiences which are relatively sophisticated about such specialities, and they evolve when the accumulated information on any one topic grows to the point where it becomes effectively impossible to treat it adequately as only one of many topics within the conventional lexicon. They are generated too when a compiler decides that the accumulated information must be arranged in dictionary form for easy reference. Since about 1700 the number of such works has grown rapidly in all fields of study.

The first in music was Friedrich von Drieberg's *Wörterbuch der griechischen Musik* (Berlin, 1835/1974). There are earlier works on broader subjects which include in their coverage important information for musicians: Allacci's famous *Drammaturgia* (1666), which included operas, a so-called 'dictionary of modulations' in chart form by Geminiani (c1754); Wetzel's *Hymnopoecographia* (1718-28); the theatre dictionaries of Durey de Noiville (1753), Lefris (1754), Parfaict (1756), La Vallière (1760), La Porte (1776) and Beffara (c1750), the Russian *Dramaticheskii slovar'* ('Dictionary of the theatre', 1787), and Compan's dictionary of the dance (also 1787). But Drieberg's is the earliest to be devoted wholly and exclusively to a musical topic. Strangely enough, a work which almost became the first special music dictionary - it followed Drieberg's *Wörterbuch* only one year later - was the comic *Dictionnaire aristocratique, démocratique et mistigorieux de musique mis en ordre par Philarmônialetrvônoptékhephâhokingôovadhdnn* (Paris, 1836).

In modern times, because of the amount of information which has become available and the constant need for fast retrieval of it, growing varieties and numbers of special music dictionaries have appeared. Of those recently published a large proportion are devoted to popular music, jazz, the avant garde and ethnomusicology, and they have appeared far in advance of adequate coverage of those same topics in conventional music encyclopedias. That is a change from earlier times when the topics of special dictionaries closely paralleled those in the encyclopedias, e.g. church music, hymns, opera, instruments and their makers, women (it is worth noting in passing that three of the five extant dictionaries of women musicians were published before 1900).

The following list attempts to note all special dictionaries to the beginning of the 20th century, and since then, only the more interesting or important works. No effort has been made to list all dictionaries or glossaries enclosed in or appended to books on theory, history or other subjects, nor are any comments or annotations offered. These are readily available elsewhere, for example in Duckles (3/1974).

4. LANDMARKS IN MUSICAL LEXICOGRAPHY.

- c700 Earliest known dictionary of music terms, the Indian *Dattilam*
 10th c Earliest known biographical dictionary containing notices of musicians, the *Kitāb al-aghānī al-kābir*
 11th c Earliest known separate list of music terms, the *Vocabularium musicum* (f-Mc 318, 371, publ. 1864)
 1495 First published dictionary of music, Tinctoris's *Diffinitorium*
 1666 Allacci's *Drammaturgia*, a dictionary of drama, includes operas
 1687 First biographical dictionary of European musicians by Schacht, *Musicus danicus* (in *DK-KK*, publ. 1928)
 1701 First modern dictionaries of music, Janovka's *Clavis ad thesaurum* and the pre-edition of Brossard's *Dictionnaire*

- 1718 First biographical notices of musicians in a special field appear in Wetzel's *Hymnopoëographia*
 1724 First dictionary of musical terms in English, the *Short Explication*
 1732 First music encyclopedia, Walther's *Lexikon*
 1737 First concise music encyclopedia, *Kurzfassstes musikalisches Lexikon*
 1740 Mattheson's *Grundlage einer Ehren-Pforte*, considered the first general biographical dictionary of musicians
 1752 First encyclopedia of the fine arts, Lacombe's *Dictionnaire*
 1753 First bio-bibliographies of French musicians in an appendix to Durey de Noinville's *Histoire*
 1768 Rousseau's *Dictionnaire*
 1780 First biographical dictionary of English musicians and the first to be written in English, *ABC Dario Musico*
 1786 First separately published German terminological dictionary, the *Musikalisches Handwörterbuch* by Wilke
 1787 Complan's *Dictionnaire*, the first dictionary of the dance
 1787 Special dictionary of the opera in Russian, the *Dramaticheskii slovar'*
 1789 First Dutch terminological dictionary, Verschuere-Reynvaan's *Woordenboek*
 1790 First international biographical dictionary of musicians, by Gerber
 1801 First Italian encyclopedia of music, Gianelli's *Dizionario*
 1802 First Swedish dictionary of terms, Envallson's *Lexikon*, and Koch's *Musikalisches Lexikon*
 1810 Choron and Fayolle's *Dictionnaire historique*, the first separately published biographical dictionary in French
 1811 First biographical dictionary of musicians of a specific country or region, Lipowsky's *Baierisches Musik-Lexikon*
 1812 Pilkington's *A Musical Dictionary*, the first dictionary of music to be published in the USA
 1812 Gervasoni's *Nuova teoria di musica* includes the first biographical dictionary of Italian musicians
 1818 First biographical dictionary of Polish musicians, by Potocki
 1826 First Danish music encyclopedia, Lassen's *Musikalsk haand-lexikon*
 1826 First Italian dictionary of terms, Lichtenthal's *Dizionario*
 1835 First special dictionary of terms, Driberg's *Wörterbuch der griechischen Musik*
 1835 Lévis's *Biographie universelle*
 1835 Schilling's *Encyclopädie*
 1836 First comic dictionary, the *Dictionnaire aristocratique*
 1837 First Spanish dictionary, Roca y Bisbol's *Gramática*
 1842 First separately published Portuguese dictionary, by Coelho Machado
 1845 First US music encyclopedia, Moore's *Musician's Lexicon*
 1870-79 Mendel's *Conversations-Lexikon*
 1878 First edition of George Grove's *Dictionary of Music and Musicians* begins
 1882 First edition of Riemann's *Musik-Lexikon*
 1900 Baker's *Biographical Dictionary* first appears
 1900 Eitner begins issuing his *Quellen-Lexikon*
 1938 Scholes's *Oxford Companion*, first edition
 1939 Thompson's *International Encyclopedia*, first edition
 1944 *The Harvard Dictionary*, edited by W. Apel
 1949 First fascicles of *Die Musik in Geschichte und Gegenwart*
 1972 First fascicles of Eggbrecht's *Handwörterbuch der musikalischen Terminologie*

JAMES B. COOVER

Didacus a Portu. See PUERTO, DIEGO DEL.

Didaskalia (Gk.; Lat. *didascalía*). In classical antiquity, the training of a dithyrambic or dramatic chorus by a poet or professional trainer; or, more generally, the production of a play or dithyramb. In the plural (*didaskaliai*, *didascaliae*) the term meant records of dramatic performances, sometimes inscribed in stone, often with details of the performers (including, for example, names of the composers of the music and aulos players) and *chorēgiai* (see CHOREGIA), and the types of music. *Didaskalia* is also the title of a Syrian Christian document of the 3rd century AD dealing with church order.

Didot, Charles Louis (1767–1837). French dancer and choreographer; see DANCE, §§V, I, and VI, 1(i).

Diderot, Denis (b Langres, 5 Oct 1713; d Paris, 31 July 1784) French philosopher and critic. As the chief architect of the *Encyclopédie* he had a strong impact on the musical thought of his own and subsequent times. Various theatrical 'reforms' of the mid-18th century followed his lead.

Music criticism is strewn throughout Diderot's voluminous writings on all subjects and in his fiction. His early satire on the French court, *Les bijoux indiscrets* (1748), contains a chapter on opera in which Lully ('Utmiutol') is compared with Rameau ('Utremitasollasiutut'). The merits of both emerge, but Diderot's preference clearly went to Rameau, who is praised for his harmonic richness and his fine sense of nuance in distinguishing between delicate shades of feeling – an appreciation that shows an already modern and 'psychological' aesthetic. Diderot's spirit of tolerance, evident here and throughout his career, set him apart from most of his friends and colleagues, who readily took up his ideas but rarely mastered their many-sidedness. In the *Lettre sur les aveugles* (1749) and the *Lettre sur les sourds et les muets* (1751) Diderot described the function of instrumental accompaniment and seized upon obligato recitative as a touchstone of musical modernity. Rousseau copied this idea in his *Lettre sur la musique française* (1753), using it to demonstrate the superiority of Italian music, but he never fully comprehended the implications of assigning so important a role to a harmonically complex instrumental accompaniment. Diderot's difficulties with

Rameau had to do with the great composer's understandable hostility to Rousseau. Rameau was asked to write the music articles in the *Encyclopédie*. Only upon his refusal in 1749 were these taken over by Rousseau. In the early volumes Rameau is repeatedly cited as the supreme authority in music theory. When Rameau, enraged by the attacks on French music during the Querelle des Bouffons, and by Grimm and Rousseau in particular, reacted to the 'errors' in the *Encyclopédie* by an attack on the whole enterprise, Diderot, as editor-in-chief, was forced to rebut. He did so in the preface to the sixth volume (1756). Even when under fire he restrained his pen out of deference and respect for the composer-theorist.

At about this time Diderot began to turn his attention to theatre. He showed the way to bourgeois drama with his two plays written as examples to others, *Le fils naturel* (1757) and *Le père de famille* (1758). These had a particular success in Germany in Lessing's translation. Each play was accompanied by an essay that ranged over the need for reform in every aspect of theatre, and especially the lyric theatre. Diderot's proposals were subsequently carried out by Noverre in his ballets, and by Traetta and Gluck in their operas. In suggesting Racine's *Iphigénie en Aulide* as a perfect operatic subject Diderot was at once contradicting Rousseau's claim concerning the impossibility of opera in French or upon classical French models, and predicting a long series of works on this theme, including Gluck's masterpiece for Paris in 1774, and, by extension, even Mozart's *Idomeneo*.

Still more penetrating was Diderot's next essay in musical criticism, *Le neveu de Rameau*, written shortly after 1760, but not published until 'discovered' and translated by Goethe over 40 years later. In dialogue form, which Diderot often used, the work purports to record a series of conversations between *Le philosophe*, who honours the best achievements of French music, and Rameau's disreputable nephew, who has become a gifted but shallow performer of 'modern' music, meaning that of Italian masters from Vinci and Pergolesi to Duni and Jommelli. Both tastes co-existed within the author. At issue in the largest sense is the independence of aesthetics from ethics. The work is one of the most finished and polished among the philosopher's many essays dealing with this question, and one must wonder why he did not allow it to be published. At the height of his fame as France's greatest thinker, he could have given it to any number of willing editors. Possibly his respect for the great Rameau and his memory held him back, or the disconcerting fact that the mimical relationship between artistic genius and ethical behaviour touched too closely upon his erstwhile friend Rousseau. Diderot was, throughout his life, as loyal as most of his friends were treacherous.

Diderot's travels to the court of Russia in the 1770s acquainted him with many of the more recent musical developments. He made a pilgrimage to Hamburg in 1774 to see and hear C. P. E. Bach, with whom he corresponded; in particular he sought copies of the master's unpublished keyboard sonatas. His interest in the keyboard was related to the instruction of his only surviving child Marie Angélique, who later became, in Burney's estimation, one of the strongest Parisian keyboard players. The *Leçons de clavecin et principes d'harmonie* may be understood in connection with the education of Marie Angélique. They were published

in 1771 under the name of the Alsatian Anton Bemetzrieder, one of Diderot's numerous protégés and his daughter's music master. Both the content and the style of the introductory essay on harmony point to the philosopher himself as author, as Lang has shown. Diderot was both generous and careless with his own writings. He gave Burney several unpublished manuscripts dealing with music and told him to make what use he wished of them. Burney was overawed and promised to publish them, but the promise was not kept. The manuscripts, since lost, might have been the musical *summa* by the century's most perceptive critic.

One of Diderot's most original departures from received theory was his defence of 'pure' instrumental music. He expressed the relationship of instrumental to vocal music by comparing them respectively to an artistic sketch and a finished painting (*Salon*, 1765). He preferred the sketch because it left more to the imagination, and because it expressed life in its rawer and richer state, closer to the original emotion. He subscribed to the doctrine of imitation but not to the notion then current that music expressed something only through words. He elaborated a theory of beauty as the perception of several *rapports* at once. In art as in nature, he wrote, everything is linked, and when one approaches one side of what is true, one approaches many others too ('Entretiens', 1757). He rejected neither contrapuntal complexity nor the combining of many different timbres, as did, for example, Rousseau. He himself contributed most of the articles on instruments to the *Encyclopédie*; they show his expert knowledge of acoustics and his rare ability to go beyond technical description to the essence of tone-colour. For him music was *primus inter pares* among the arts precisely because, being unfettered by concrete ideas, it could render the deepest and most universal feelings. His often quoted remark that 'music is the most violent of the arts', usually ascribed to the *Lettre sur les aveugles*, actually occurs in the additions he made to this work at the end of his life and seems to reflect his penchant for the 'Sturm und Drang' symphonies and sonatas of the 1770s. The second, balancing part of his thought, rarely quoted, completes it with his typical device of paradox. 'it is the most beautiful language I know'.

Didjeridu. An end-blown, straight, natural trumpet, without separate mouthpiece, used by the aborigines of northern Australia. It is of outstanding musical interest because of its unique playing techniques. Although now commonly known by this name, which is probably of European coinage with onomatopoeic intent, some 40

aboriginal names for it are known in the various northern regions where it is used, from the north of Western Australia, through the Arnhem Land peninsula, to northern Queensland. It consists of a termite-hollowed eucalyptus branch, stripped of its outer bark and with its interior walls sometimes slightly thinned at the ends by scraping (see illustration). Trees commonly used include the stringybark (*Eucalyptus tetradonta*), the woollybutt (*Eucalyptus miniata*), the red river gum (*Eucalyptus camaldulensis*) and the ironwood (*Erythrophloeum labouchei*). A rim of beeswax or eucalyptus gum may be fitted to the mouth end, which is the narrower end of the more or less conical tube. Formerly bamboo was used, the nodes being burnt through with a fire stick, but in the 1970s materials such as iron or plastic piping were being used. The instrument is often decorated with ochre and clay designs, using totemic symbols and bark painting techniques, but no further physical modifications are made. The preferred length varies regionally from 1 to 1.5 metres and the internal diameter is approximately 3.5 cm at the proximal end and up to 7.5 cm at the distal end. An exceptionally large tube, 2.5 metres or more in length, is played in *djunggwan* ceremonies, where it represents *yurlunggur* or *julunggur*, the Rainbow Snake.

The instrument is played by male aborigines together with clapping sticks to accompany singing and dancing, and it is used primarily, although not exclusively, in 'open' (non-secret) ceremonies (including funeral and mourning ceremonies), clan songs (which express affiliation with particular lineages, emblems and territories), camp entertainment songs, *djedhangari* or *djatpangari* ('fun' songs of young bachelors) and individually owned songs such as *wongga* and *gunborg*; it may also accompany children's songs. All of these types belong to the 'discontinuous' category, identified by Alice M. Moyle, in which breaks occur in the continuity of the vocal line (see AUSTRALIA, §II, 2).

The most widespread style of *didjeridu* playing is practised west of the Liverpool River in eastern Arnhem Land (Northern Territory), on Goulburn and Croker Islands, in coastal areas north and south of Darwin, further west in the Kimberley region of Western Australia, east from Oenpelli towards Bamyili and in the Gulf region across the Queensland border. In this style the technique consists of blowing the fundamental note with loosely vibrating lips; the pitch is usually somewhere between *D*₄ and *G* according to the length of the tube. In order to sound the note as a continuous drone of more or less constant pitch 'circular' breathing is employed, frequent breaths being snatched through the nose while air which has been stored in the cheeks is expelled under pressure down the tube. This technique demands extremely efficient control and co-ordination of lips, cheeks, tongue and lungs. Although the timbre and pitch of the drone may be maintained with remarkable constancy, both are often slightly varied at the moment of inhalation to impart rhythmic accentuations. Thus the pitch may momentarily rise by as much as a whole tone, and by means of tongue movements and by changing the shape of the mouth cavity the timbre may be varied from a smooth, booming, organ-like quality to a reedy buzz rich in upper partials. Complex rhythmic patterns can be achieved, based on pitch and dynamic accentuation and on variations of timbre. Rapid oscillations of the tongue can produce a kind of 'timbre trill', and pulses of the diaphragm may give vibrato effects.

Didjeridu player from the Liverpool River region of Arnhem Land (see also AUSTRALIA, fig.2)

The fundamental may be attacked, interrupted and released with hard or soft, single-, double- or triple-tonguing. The tongue may strike the teeth or soft palate and may be extended between the teeth or retroflexed at the back of the mouth, affecting rhythm and timbre.

Three kinds of voiced sounds are superimposed on this fundamental to form further rhythmic patterns: these arise from the contrast between the blown note and the complex chords resulting from the difference tones produced by this superimposition. The three kinds of voiced sounds are nasal humming; pharyngeal 'croaking' and 'gurgling'; and imitations of bird and animal sounds such as those of the pigeon, brolga and dingo. The preferred interval for hummed notes is a major 10th above the drone, but 5ths, 9ths and octaves are also used. 'Croaked' and 'gurgled' notes are usually sung briefly or sustained in falsetto, commonly at an augmented 11th above the drone. Glissandos are also used.

Another, less widespread style is found in north-east Arnhem Land and on Groote Eylandt in the Gulf of Carpentaria. Here, in addition to the techniques already described, the first available overtone above the drone fundamental is sounded in rapid rhythmic alternation with it. Owing to the irregularity of the bore the pitch may be anywhere between a minor 9th and an 11th above the fundamental, but a major 10th seems to be preferred. The player can produce either a soft-tongued, staccato, drum-like effect or a hard-tongued, sustained 'hoot'. In the former case the lip technique is so expert that the fundamental appears to sound uninterrupted. This practice produces complex rhythmic patterns.

The player may sit or stand, in the latter case sometimes moving around with the dancers and singers. When he plays seated, he rests the distal end of the instrument on one foot or moves it slightly from side to side just above the ground; the right arm rests on the raised right knee, and the right hand either supports the tube with the wrist or holds it underneath at arm's length, the arm being twisted inwards through 180° until the palm, facing upwards, can support the tube. This is the more common style, in the north-east, however, the player usually rests the distal end on the ground or within a bailer shell or tin (which serves as a resonator and also reflects the sound back to the player) and taps out the rhythms of the clapping sticks by flicking the tube with a finger or tapping it with a stick.

The instrument therefore functions first as a drone of relatively constant pitch, with which the sung melody above usually harmonizes. However, if a *didjeridu* of suitable length is not available, the leading songman, who usually determines the pitch at which the song will be sung, may apparently ignore the discrepancy in pitch. This practice seems to be less common outside north-east Arnhem Land. The *didjeridu* is used to add tone-colour and also functions as a rhythm instrument capable of supplying introductions, interludes and codas, as well as accompaniments to singing and dancing. In addition, it is used to issue elaborate coded instructions to the dancers to change their step pattern, particularly when a change of tempo is about to occur. The leading songman controls performances, however, and he may indicate the correct rhythmic pattern required of the *didjeridu* player by chanting mnemonic patterns of vocables before the song begins.

Although all boys learn to play the *didjeridu* from an early age, the virtuoso player is recognized and highly valued. Among his attributes are accurate and agile

tonguing, great breath control, a perfect seal of the lips in the end of the tube and an excellent musical memory. The *didjeridu* has a wide expressive range: from slow and impressive moods, often of inexorable power, to high-spirited gaiety and even jaunty insouciance, all of which are skilfully communicated to singers, dancers and audience alike. Despite the conservative nature of much *didjeridu* music, there is scope for individual improvisation and embellishment and for the creation of new styles and techniques. Both distribution and repertory are still growing.

Research has failed to reveal when or whence the *didjeridu* came to Australia, and comparisons with the use of similar instruments in other non-literate cultures have indicated that several aspects of its rich combination of techniques are unique to the Australian aborigine. Though he lacks technology and materials, and is unfamiliar with the concept of mouthpiece, reeds, slide or finger-holes, he has nevertheless made a crude implement into a virtuoso musical instrument through the employment of musical imagination and physical skills of a very high order.

For musical examples and illustrations, see AUSTRALIA, §II, 2.

Didur, Adam (b Wola Sekowa, nr. Sanok, 24 Dec 1874, d Katowice, 7 Jan 1946) Polish bass. He studied in Lemberg with Wysocki and in Milan with Emerich. He made his début in 1895 in Rio de Janeiro, and after a South American tour he sang from 1899 to 1903 at the Warsaw Opera. After appearances in Spain he sang at La Scala, 1904–6, and in Russia, 1909. In 1905 he sang Colline in *La bohème* at Covent Garden, and returned in 1914. Hammerstein engaged him for the Manhattan Opera in 1907, which started a long American career, as Gatti-Casazza then engaged him in 1908 for the Metropolitan, where he stayed till 1933. In 1913 he was their first Boris Godunov. His was a real bass with a black timbre of a certain biting quality and he was a splendid actor. After he retired he returned to Poland and taught in Lwów and Katowice. Among his pupils was Eugenia Zareska.

LEO RIEMENS

Didymus [Didymos ho mousikos], Greek music theorist. Fragments of his work survive in quotation by Porphyry and Ptolemy. Most musicological studies have hitherto tacitly assumed him to be identical with the Alexandrian grammarian and lexicographer Didymus, nicknamed 'Chalkenteros' (or 'Chalcenterus') (fl. 2nd half of 1st century BC) who, according to Quintilian (i, §§8, 10) and Athenaeus (iv, §139c), produced more than 3500 books on literary and

antiquarian subjects; these included compilations of Hellenistic philology, much drawn on by later authors, although only a few fragments now survive. The qualification *ho mousikos* ('the musician'), almost invariably added to the name by Ptolemy and Porphyry, suggests, however, that this identification is incorrect. Classical scholars have suggested that Didymus was a younger man of the same name, a grammarian and musician at Rome in the time of Nero, who may be the Didymus who wrote a work, now lost, cited by Clement of Alexandria (*Strōmateis*, i, 26 = ii, 52, 12, ed. Stählin) as *Concerning Pythagorean Philosophy*. The latter work may have served Ptolemy as a source in the final chapters of his *Harmonics* (iii, chaps.3–13).

Porphyry, in the preface to his commentary on Ptolemy (p.3, l.13, ed. Düring), cited Didymus as a primary authority. He quoted a fragment (p.26, l.6–p.28, l.6) which, he said, was from Didymus's treatise *Concerning the Difference between the Pythagorean and Aristoxenian Theories of Music* (p.5, ll 11ff, p.25, ll.5f). This fragment, like that from a certain Ptolemaios of Cyrene which is quoted immediately before (p.22, l.25–p.26, l.6), criticizes musical theory according to the criteria of reason (*logos*) and perception through the senses (*aisthēsis*).

Ptolemy discussed Didymus's doctrines of the division of the monochord and the divisions of the tetrachord (ii, chaps.13f). He sought to correct Didymus's theory of intervals and genera (chap.13), criticizing it as contrary to the findings of empirical observation. He tabulated the calculations of the divisions of the tetrachord made by Didymus and others, together with his own (chap.14). Those of Didymus are as follows: diatonic tetrachord (9:8), (10:9), (16:15), chromatic tetrachord (6:5), (25:24), (16:15); enharmonic tetrachord (5:4), (31:30), (32:31).

Unlike his predecessor Eratosthenes, who had divided the diatonic tetrachord into two equal whole tones (each 9:8) and a *lemma* (256:243), Didymus introduced a distinction in the diatonic tetrachord between a major and minor whole tone (respectively 9:8 and 10:9). The major and minor whole tone together constitute a major 3rd (5:4), previously found only in the enharmonic tetrachord of Archytas, and in including a major 3rd, the diatonic tetrachord of Didymus resembles the upper or lower tetrachord of the modern major scale (e.g. C–D–E–F, or G–A–B–c; see the table in *MGG*, iii, 435f). This tetrachord was adopted by Ptolemy, but with the positions of the major and minor whole tones reversed, as his 'tense' diatonic tetrachord. The difference between the major and minor tones ($9.8 \times 9.10 = 81.80$) is known as the syntonic comma, or comma of Didymus, this is also the difference between the Pythagorean major 3rd (81:64) and the pure major 3rd (5:4).

The chromatic tetrachord of Didymus, besides a harmonic minor 3rd (6:5) and the semitone of the diatonic tetrachord (16:15), contains another, rather small semitone (25:24) that was adopted by no other Greek theorist. His enharmonic tetrachord again includes a pure major 3rd (5:4) with the remaining diatonic semitone (16:15) divided into two quarter-tones which are almost equal (32:31, 31:30). In his tunings Didymus was thus able to achieve pure major and minor 3rds while adhering strictly to the principle of superparticularity (for an explanation of the latter concept, see *PTOLEMY, CLAUDIUS*).

I LUKAS RICHTER

Dieffopruchar [Dieffoprukhar]. See *TIFFENBRUCKER* family

Diémer, Louis(-Joseph) [Joseph-Louis] (b Paris, 14 Feb 1843, d Paris, 21 Dec 1919). French pianist and composer of Alsatian origin. In 1853 he entered the Paris Conservatoire where he enjoyed a particularly successful career, winning *premiers prix* in solfège (1855), piano (by unanimous decision, 1856), harmony and accompaniment (1859) and counterpoint and fugue (1861), as well as a *second prix* in organ (1861); his teachers included A. F. Marmontel (piano), Ambroise Thomas (composition) and François Benoist (organ). Financial difficulties prevented him from pursuing the Prix de Rome. From 1861 he gave piano lessons, and from 1863 performed regularly, both in Paris and in the provinces. He attended Rossini's soirées, played in the chamber concerts organized by Alard, and toured with Sarasate. Always popular with the public, he steadily gained a reputation as a virtuoso. In 1887 he succeeded Marmontel at the Conservatoire, where he exercised great influence on the next generation of French pianists, his pupils included Cortot, Rislé and Robert Casadesu. The success of a series of harpsichord recitals which Diémer gave at the 1889 Universal Exhibition led to the founding (with van Waefelghem, Grillet and Bleuzet) of the Société des Instruments Anciens, and prompted him to dedicate considerable time to promoting early music. In 1902 he established a trust fund for a triennial competition, with a prize of 4000 francs, open to male pianists who had won a *premier prix* for piano in the preceding ten years. Diémer continued to teach and perform publicly until his death. He was named a Chevalier de la Légion d'honneur in 1889.

Diémer's virtuoso playing had a reputation for extreme precision and purity. His compositions, primarily for the piano, were described by Fétis as graceful but not lacking in solidity; some of his songs enjoyed considerable success. He also edited piano music, transcribed symphonic movements and opera excerpts for the piano, and published a piano method.

ELISABETH BERNARD

Diepenbrock, Alphons (Johannes Maria) (b Amsterdam, 2 Sept 1862, d Amsterdam, 5 April 1921) Dutch composer. He came from an artistic Catholic family having much interest in music; he took lessons in piano, singing and violin, but despite his musical talent his parents succeeded in prevailing on him to study classical literature at the University of Amsterdam. He graduated in 1888, obtaining an honours degree with a thesis on Seneca, and taught classics at the grammar school in 's-Hertogenbosch until 1894. Then he settled in Amsterdam where he supported himself by giving private lessons in Latin and Greek, devoting the rest of his time to composition. Self-taught, he immersed himself for the most part in Netherlands polyphony of the 16th century, the late string quartets of Beethoven and the works of Wagner.

Diepenbrock occupied a particularly important place in Dutch music at the turn of the century, in that he was the first modern composer whose works could be judged by international standards. With a single exception (the *Hymne* for violin and piano of 1896) all his works were suggested by literary sources. The chief influences on his individual style were Wagner and, after 1910, Debussy. A work of special importance in Diepenbrock's career and of great significance in the history of Dutch Catholic church music was the *Missa in die festo* (1891), in which 16th-century Netherlands polyphony

is combined with late Romantic harmonic writing. Diepenbrock was writing his finest music in the period 1897-9 (the period of the *Te Deum* and the two *Hymnen an die Nacht*), when the characteristics of his music became intensely apparent. The chief features are flowing melodic lines, rhythmically supple polyphony, chromatic harmony and an orchestration having a preference for high registers and tenuous timbres. The *Hymnen an die Nacht* (1899) are symphonic poems with obbligato voice, in which there are extensive preludes, interludes and postludes using multiple thematic material. This form was also used by Diepenbrock in his later years in *Im grossen Schweigen* (1906) and *Die Nacht* (1911). *Die Nacht*, in particular, has many outstanding quiet and subtle atmospheric effects.

For his songs Diepenbrock often turned to expressions of inner rest, reverie and a nocturnal ambience, such as the *Wanderers Nachtlied*, of which he made three settings. The songs are remarkable for their literary sensitivity, and another important section of his oeuvre is his incidental music. In the music to the mythical comedy *Marsyas* (1910), his orchestration matches the poetic beauty of the text. Equally effective are his scores for *The Birds*, the overture being a masterly example of musical fantasy and of instrumentation, and the *Electra* of Sophocles (1920), his last work. E. Reeser compiled a concert suite from this (and also one from the *Marsyas* music), which has become part of the repertory of Dutch orchestras. Diepenbrock here gave an exalted expression to this Greek drama which was very close to his heart as a classical scholar. His retiring personality contributed to the neglect of his work.

WORKS

CHORAL

- 5 Gesänge nach Goethe: Dämmerung, Auf dem See, Ergo bibamus, Gleich zu gleich, Wanderers Nachtlied, 1884

JOS WOUTERS

Dieren, Bernard van (b Rotterdam, 27 Dec 1887; d London, 24 April 1936) English composer and writer of Dutch birth. The Dutch origin is misleading: Van Dieren's father was half French, his mother entirely so, and there is little in his work that is characteristically northern European. Although at an early age he learnt to play the violin and developed strong literary interests, his training was scientific. He started composing, immaturely, at 20 but broke off to make a serious study of composition and of music history, and only then did his creative work really begin. On settling in England in 1909 he wrote a good deal of criticism, mainly for continental newspapers and magazines. Both his livelihood and his health were precarious, and the promotion of his music was largely dependent on the efforts of a handful of friends and devotees. These included Epstein and Augustus John, the critic Cecil Gray, Heseltine (Warlock), Lambert, Moeran and Walton. The qualities they most admired in Van Dieren were his intellectual vigour and independence and his wide-ranging cultural interests. He was well versed in most of the arts and as early as 1920 wrote a perceptive book on Epstein. His other book, *Down Among the Dead Men*, is a collection of trenchant critical essays.

In his preoccupation with chamber music textures of great complexity and with a personal harmony, Van Dieren was a typical 'spiritual exile' of his generation. Linear complexity is the main barrier to appreciation, especially in his earlier music, and it is possible to feel that technical ingenuity is at odds with emotional expressiveness, but there is always a strong sense of organic unity and a highly economical use of material. Each work has its own distinct identity and may be said to represent an 'entirely separate line of thought' (Gray), the broad trend, however, is from the complex to the comparatively simple. This is well illustrated by the six string quartets which form the backbone of his output. Apart from these and a sizable body of songs, few of his works fall into any clear-cut category. *Diafonia*, for instance, is a large and intricate piece of orchestral chamber music built around settings of three Shakespeare sonnets; and the *Chinese Symphony* for soloists, chorus and orchestra consists of settings of German translations of Chinese poems, although there are no specifically Chinese elements in the music.

Of his larger works, the *Chinese Symphony* (1914) is most impressive for its imaginativeness and integrity. There is some affinity with Delius, especially in the

choral writing, but Delius's radiance is lacking; the string textures have an intensity suggestive of Berg or early Schoenberg, and the overall effect is both sensuously expressive and intellectually alert. The old charge of rhythmic monotony, however, has some validity.

WORKS

- Opera: The Tailor (opera buffa, 3, R. Nichols), 1917

 HUGH OTTAWAY (text) LESLIE EAST (work-list)

Dies [Thies], Albert Christoph (b Hanover, baptized 11 Feb 1755, d Vienna, 29 Dec 1822) German painter, composer and writer. He learnt the trade of a painter and at the same time studied fine arts. He went to Rome in 1775, where he developed his skill as a landscape painter, later he became acquainted with Goethe (see the entry for 22 August 1787 in Goethe's *Italiensche Reise*). During these years he also composed, though according to Thörn he later destroyed most of his works (those remaining have not been traced). In 1796 he worked in Salzburg and from 1797 in Vienna, where in 1806 he was appointed instructor in landscape painting at the Kaiserliche und Königliche Akademie and court painter to Prince Esterházy. When lead poisoning impeded his work as a painter he turned more to music and to cultural and political writing (e.g. his essay in the *Vaterländische Blätter für den Österreichischen Kaiser-Staat*, January 1811). Esterházy sponsored the publication of his *Biographische Nachrichten von Joseph Haydn* (Vienna, 1810), for which Dies collected material from 30 conversations with the aged composer. Because of its factual tone and the typically Classical standpoint of its aesthetic judgments, this work occupies a significant position in early Haydn literature alongside Griesinger and Carpani; its neglect by later critical writers on Haydn was undeserved. Many Haydn documents appeared for the first time in the *Nachrichten*, and it contains a 'list of all the works Haydn composed in London', taken from the lost London notebook.

Dièse (Fr.). SHARP.

Diesener, Gerhard. See DIESENFR, GERHARD

Dies irae (Lat.: 'day of wrath'). The sequence of the Mass for the Dead (*Liber usualis*, p.1810).

1 General and history to 1700 2 Settings since 1700

1. GENERAL AND HISTORY TO 1700. The text of *Dies irae*, attributed to Thomas of Celano (*d* c1250), is thought to have grown out of a rhymed trope of the responsory *Libera me*, of which the verse 'Dies illa, dies irae' begins with the same melodic phrase as the sequence. Thomas's poem has 18 rhymed stanzas (17 tercets, one quatrain), to which a later anonymous author added the final unrhymed couplet with 'Amen'. Its musical form, which incorporates more repetition than the standard sequence (see SEQUENCE (i), §9), may be represented as follows: *AABBC'/AABBC'/AABBC'DEF*. Since the second phrase of *B* is identical with the first phrase of *A*, and since the second phrases of *D* and *E* are the same, not to speak of other resemblances, the degree of melodic unity is high. The poem began to be included in the Requiem Mass in Italy from the 14th century and in French missals of the late 15th century. It was one of the four sequences retained by the Council of Trent (1543–63), but it was not incorporated into the Roman Missal until the papacy of Pius V (1570).

Before the Council of Trent the *Dies irae* was not normally set polyphonically; Antoine Brumel's Requiem was exceptional in containing such a setting (see REQUIEM MASS). Ockeghem, at the end of his lament on the death of Binchois, *Mort tu as navré/Miserere*, set a slight variant of the final couplet of the sequence to a paraphrase of the chant. There are also settings by Giammateo Asola, Orfeo Vecchi, G. F. Anerio and G. O. Pitoni in their requiems

2. SETTINGS SINCE 1700. Whereas in the 16th century and often in the 17th polyphonic settings of the Requiem had the *Dies irae* sung to the plainsong melody, or alternated verses of plainsong with verses of polyphony, orchestral requiems written after 1700 almost invariably include the entire sequence. Indeed, there is a tendency for the *Dies irae* to assume a central position, partly because of its length but equally because of the dramatic possibilities it offers to the imaginative composer. Though influenced by Michael Haydn's Requiem composed in 1771 for Archbishop Schrattenbach of Salzburg, the *Dies irae* of Mozart's Requiem (1791) was perhaps the first to aim at a truly graphic representation of the text, effectively contrasting such sections as 'Rex tremendae' and 'Recordare'. Cherubini's C minor setting (1816), with its opening gong stroke, attempts the kind of dramatic expression which is best realized in the requiems of Verdi (1874) and Britten (1962). The settings by Fauré (1888) and Maurice Duruflé (1947) achieve a more devotional spirit by omitting from the *Dies irae* everything except the last

line, which in each case is set as a separate movement following the Sanctus. Several composers (e.g. Giovanni Legrenzi, Antonio Lotti and J. C. Bach) have set the *Dies irae* as an independent piece.

Pizzetti's unaccompanied Requiem (1922) uses almost the entire plainsong melody for the sequence, but this is rare in post-Classical settings. The plainsong has, however, been much cultivated by composers of secular music, who have traded upon its association with Thomas of Celano's vivid portrayal of the Last Judgment and its ability to inspire listeners (at least in Catholic countries) with a feeling of terror appropriate to a particular context. Since Berlioz's *Symphonie fantastique* (1830) a rich and productive symbolism has grown up round the ancient melody, embracing not only death and the fear of death, but also the supernatural (Bantock's 'Witches' Dance' in *Macbeth*, 1926; Saint-Saëns's *Danse macabre*, 1874), political oppression (Dallapiccola's *Canti di prigionia*, 1941; Ronald Stevenson's *Passacaglia on DSC*, 1962), and even ophiophobia (Respighi's *Impressioni brasiliane*, 1928).

Composers who have used the plainsong in this way have usually quoted only the first phrase and sometimes only the first four notes. For this reason it is not always certain whether a reference to the plainsong is intended, even where it is apt. Composers have also sometimes given the title 'Dies irae' to works which use neither the sequence text nor the plainsong melody, e.g. the second movement of Britten's *Sinfonia da Requiem* (1940) and Penderecki's *Dies irae* (1967). The latter, written to commemorate those who died at Auschwitz during World War II, is a setting of words from the Bible, ancient Greek drama, and modern French and Greek poets

Diesis (i) (It.) SHARP

Diesis (ii) (Gk.: 'separation'). A term applied to various intervals from the time of Pythagoras

According to Pythagorean theory, transmitted by Boethius (iii, 5, 8) from Philolaus (ed. Diels, *Fragmente der Vorsokratiker*, 44 A 26), it was a diatonic semitone equal to the amount that the 4th is in excess of the ditone or major 3rd. Later the term 'limma' was substituted to refer to the same interval.

According to Aristoxenus, the *diesis* was any interval smaller than a semitone. His theory provided for tetrachords that might include a 'hemitone', equal to half of a whole tone; a 'very small chromatic *diesis*', equal to a third of a whole tone; or a 'very small enharmonic *diesis*', equal to a quarter of a whole tone (Aristoxenus 21, ed. Meibom, p.46; see also Cleonides, ed. Jan, pp.190ff; Adrastus as quoted by Theon, ed. Hiller, p.55).

According to Marchetto da Padova, the *diesis* was equal to a fifth of a whole tone. If a melodic whole tone is divided chromatically by the insertion of a leading note (for instance, C–C♯–D) the first interval is, according to Marchetto, a 'chroma', and the second a 'diesis'. Later 14th- and 15th-century theorists (e.g. Nicolaus of Capua, ed. Lafage, p.32) associated the sign ♯ with the term *diesis*, so that in Romance languages the modern SHARP sign came to be called by that name (It. *diesis*; Fr. *dièse*).

Many Renaissance and Baroque theorists used the term for intervals of about a quarter-tone which were too small to be used melodically even though they were available on keyboard instruments tuned to some form of mean-tone temperament with split black keys for G \sharp and A \flat and for D \sharp and E \flat . According to the corresponding arithmetic of just intonation, the difference between four pure minor 3rds and an octave, known as the 'greater diesis', has the ratio 648:625, i.e. (6:5)⁴:(2:1), and amounts to 62.6 cents; and the difference between an octave and three pure major 3rds, known as the 'lesser diesis', has the ratio 128:125, i.e. (2:1):(5:4)³, and amounts to 41.1 cents

LUKAS RICHTER

Diessener [Diesneer, Diesner, Diesener, Disineer, Desznier], **Gerhard** (fl. c1660–84). German composer, musician and teacher, resident in England. He was a musician in the Hofkapelle at Kassel about 1660 (the Christoph Diesner who served in the Oldenburg Hofkapelle in 1650–51 may have been a relative). Several sonatas and orchestral suites by him survive at Kassel, one work bearing the date 1661. It is possible that he had French connections, and he may have spent some time in France before settling in England, which he seems to have done in the early 1670s if the presence of two pieces by him in Locke's *Melothesia* (1673) is any indication. It is apparent from the preface to his *Instrumental Ayrs* that by the time it appeared in 1682 he had been living and teaching in London for some time, since the music had been written for his pupils and performed already at private concerts that he gave weekly at his house in Great Russell Street, London. He adopted the unusual expedient of giving the music at a public concert there when it was published. Among his pupils was the daughter of Sir Harbottle Grimston of Gorbamby, near St Albans, who recorded a payment to 'Mr Dissineer' in July 1684 for teaching her to play and sing. Probably Diessener wrote the surviving harpsichord pieces and the lost *Kitharapaudeia* for his pupils to play. Nothing is known about his activities after 1684.

Diessener was a very minor figure to assert, as Meyer did (*MGG*), that he was once of great importance as a master of Baroque instrumental music is a gross exaggeration. In fact his work is insubstantial, limited in scope and, though touched with imagination, not infrequently inept in technique. The suites written at Kassel show a strong French influence, the more striking for its appearance at such a relatively early date in Germany. The *Instrumental Ayrs* consist of ten suites each comprising six to 15 movements, many with French or English genre titles.

MICHAEL TILMOUTH

Dieter, Christian Ludwig (b Ludwigsburg, 13 June 1757; d Stuttgart, 15 May 1822). German composer and violinist. In 1770 he entered the military orphanage, which two years later became the military academy and in 1781 the Militär-Hochschule. Here Dieter received an excellent free education, but in return had to pledge his life to the service of the Duke of Württemberg. His initial training was in painting, but as his musical gifts became increasingly evident he was soon destined for a musical career. From members of the court orchestra he learnt various instruments, especially the violin but also the viola, flute and bassoon. He studied composition briefly with the court Kapellmeister Antonio Bononi, and later with his successor Agostino Poli. Duke Karl Eugen believed in the importance of a thorough general education, and Dieter's specialized musical studies were supplemented by history, geography, languages and other subjects. He was a diligent student, excelling as a violinist and composer and frequently winning prizes; in 1779 his first Singspiel, *Der Schulz im Dorf*, was performed with great success in the presence of the duke. But he disliked the strict discipline of the court and tried to run away in the spring of 1780; for this he was imprisoned in Ludwigsburg, but was pardoned after declaring his acquiescence to the duke's wishes. On 25 July 1781 Dieter was appointed *Hofmusicus* as first violinist in the court orchestra. The stipend was meagre, and as he eventually had a family of 11 children, he remained poor to the end of his life. He retired in 1817.

Dieter began his career in Stuttgart ten years after the departure of Niccolò Jommelli, and although German Singspiel had by then begun to predominate over the Italian opera, Dieter's works show that he was familiar with Jommelli's operas as well as with Hiller's Singspiels. His librettos follow Hiller's, 'reflecting the Biedermeier quality of the time' (Hermann Abert); his music exhibits features of both styles, especially in *Belmonte und Konstanze* (which bears no relation to Mozart's *Die Entführung aus dem Serail* beyond the common subject). His most characteristic numbers are simple folklike songs, intimate or gay, which stand in marked contrast to the pathos of the bravura Italianate arias given mostly to characters of high social standing. But Dieter's concern was not generally with dramatic characterization, he was particularly successful in the musical depiction of dramatic situations, making use of varied orchestral colour in the manner of Jommelli. Abert has traced evidence of Mozart's influence in his later works.

Dieter's horizons and influence were limited to his native locality, where until about 1800 he enjoyed great popularity. His instrumental works were likewise popular (a critic reviewing some pieces for the *Allgemeine musikalische Zeitung* described them as 'agreeable and jolly'), and his church works, though not notable, were performed throughout Württemberg. His importance lies in his having established the Singspiel in his part of Germany, and for the short period of his activity he gave the genre a picturesque quality that was characteristically his own.

WORKS

(for detailed list see Haering, 1925, pp 188ff)

DRAMATIC

(music lost unless otherwise indicated)

- Der Schulz im Dorf oder Der verheibte Herr Doktor (Singspiel). Stuttgart, 10 May 1779
 Der Irriwisch oder Endlich fand er sie (Singspiel, 3, C. F. Bretzner). Stuttgart, 23 Nov 1779, score, D-DS
 Laura Rosetti (Singspiel, B. C. D'Anien). Stuttgart, court, 9 Feb 1781
 Le feste della Tessaglia (opera, M. Verazzi, trans. Uriot), Stuttgart, 1782, collab. Gauss, Pohl, Zumsteeg
 Belmonte und Konstanze oder Die Entführung aus dem Serail (Singspiel, 3, Bretzner), Stuttgart, court, 27 Aug 1784, score, D-SW
 Der Rekruten-Aushub oder Die Familien-Heirath (Singspiel, 2). Stuttgart, court, c.1785
 Die Dorfdeputierten (Singspiel, 2, ? G. E. Heermann, after Goldoni), Stuttgart, court, Oct 1786
 Das Freischiesen oder Das glückliche Bauernmadchen (Singspiel, 2, ? J. A. Weiten or A. Wippen). Stuttgart, court, 31 Aug 1787
 Glücklich zusammengelogen (Singspiel), Stuttgart, 1788
 Der Luftballon (Singspiel, E. Schickaneder), Stuttgart, 1789
 Der Eremit auf Formentera (Singspiel, 2, A. von Kotzebue), Stuttgart, court, 10 Jan 1791
 Elisinde (Singspiel, C. A. Valpius), Stuttgart, 1794
 Ines von Castro (ballet, C. Morelli), ?Stuttgart, 1796
 Des Teufels Lustschloss (Singspiel, 2, Kotzebue), Stuttgart, court, 1802
 Other ballets for court choreographers Jobst, Tramb

ANNA AMALIE: ABERI

Dieterich, Georg. See DIETRICH, GEORG.

Dietmar von Aist [Eist, Ast, Aste, de Agist] (d before 1171). German Minnesinger. He came from a baronial family whose seat was near Mauthausen in Upper Austria. One of the earliest poets of German Minnesang, he wrote poems that are varied in both form and content, including both the simpler indigenous style and the more complex kinds of song influenced by the Romance poets. The difference between the two styles has given rise to much discussion as to whether there were several poets or whether one man had mastered the various techniques. No music has survived, but Aarburg identified one of his poems as a contrafactum and reconstructed the melody.

BURKHARD KIPPENBERG

Dietrich, Albert (Hermann) (b Forsthaus Golk. nr Meissen, 28 Aug 1829; d Berlin, 20 Nov 1908). German conductor and composer. He attended the Dresden Kreuzschule from 1842 to 1847, studying the piano and composition with Julius Otto. He then studied with Ignaz Moscheles, Julius Rietz and Moritz Hauptmann at the Leipzig Conservatory and attended lectures at the university. In 1851 he went to Düsseldorf, where he was taken into Schumann's circle and became friendly with Brahms. In the autumn of 1853 he wrote the opening Allegro of the 'F-A-E' Violin Sonata (the other movements were composed by Brahms and Schumann) as a greeting for Joachim. Dietrich left Düsseldorf in 1854 and conducted the first performance of his Symphony in Leipzig on 9 December. He then worked in Bonn (1855-61), conducting the subscription concerts and acting as the city's music director, and at Oldenburg (1861-90), where he was court Kapellmeister and took over the musical education of the grand duchess. In 1890 he retired to Berlin, where he had been a member of the Akademie der Künste from 1888, he received the title of royal professor in 1899.

As a conductor Dietrich championed primarily the works of Bach, Schumann and Brahms and had little sympathy for the music of the New German School. As a composer he was a follower of Schumann, and his works enjoyed a considerable reputation during his lifetime; perhaps his greatest success was as a songwriter. Both his operas were performed in his lifetime, his incidental music to *Cymbeline* was played in England at the Lyceum revival in 1896. He also wrote a collection of memoirs of Brahms (*Erinnerungen an Johannes Brahms in Briefen, besonders aus seiner Jugendzeit*, Leipzig, 1898, 2/1899), which was translated into English the year after it first appeared.

WORKS

- Robin Hood (opera, 3, R. Moser), Frankfurt am Main, 1879, op 34
Cymbeline (incidental music, 5, Shakespeare), c.1880, perf. London, Lyceum, 1896, op 38
 Das Sonntagskind (opera, H. Bulthaupt), Bremen, 1886, unpubd
 Die Braut vom Liebenstein (dramatic scene, K. von Noorden), unpubd

Dietrich [Dieterich, Theodoricus], **Georg** (b Meissen, 1525; d Meissen, 3 Sept 1598). German theorist and composer. He spent his life at Meissen; he was educated at the municipal school where Johannes Reusch was Kantor from 1543 to 1547 and Rektor from 1548 to 1555, and from 1549 at the Fürstenschule directed by Georg Fabricius where Michael Vogt was Kantor from 1549 to 1551 and Wolfgang Figulus from 1551 to 1588. In 1553 Dietrich was himself appointed Kantor

Dietrich, Sixt

at the municipal school where he remained until in 1585 a stroke rendered him unfit for work. He received a pension until his death and in 1599 a single payment was made to his widow. His treatise *Quaestiones musices brevissimae e variis authoribus excerptae* (Görlitz, 1573) clearly shows the influence of Reusch and Figulus; its layout and wording are based closely on the *Compendiolum* by Reusch's teacher Heinrich Faber, but it includes more music examples. Dietrich reproduced anonymously as an appendix three metrical works for four voices to be sung before and after lessons at Meissen; his unacknowledged source for these was *Melodiae scholasticae* by Martin Agricola, Figulus's teacher. In his preface Dietrich referred to the value of the music and claimed that, whereas many textbooks were too longwinded, his material was presented in a truly methodical format. The 31 solo funeral songs of his *Christliche Gesenge, lateinisch und deutsch, zum Begrebnuss der verstorbenen Christen* (Nuremberg, 1569) are, with only one exception, taken from older sources (see Zahn); one is a sectional Passion work. His *Nun danket alle Gott*, a nine-voice motet (formerly in *D-Pf*), is now lost

MARTIN RUHNKE

Dietrich, Marlene [Maria Magdalene] (b Weimar, 27 Dec 1901) German actress and singer. She studied the violin and piano and in 1921 entered the Berlin Hochschule für Musik, but abandoned plans for a career as a violinist after developing nerve ganglia in her left wrist. In the early 1920s she attended Max Reinhardt's theatre school, had minor roles in films, and sang and danced in several stage musicals and revues (e.g. *Es liegt in der Luft*, 1923, and *Zwei Krawatten*, 1929, with music by Mischa Spoliansky). She became internationally known in her 12th film, *Der blaue Engel* (1930), singing Friedrich Hollaender's *Ich bin die fesche Lola* and *Ich bin von Kopf bis Fuss auf Liebe eingestellt*. She was a leading actress in over 30 Hollywood films, including *Destry Rides Again* (1939, with *See what the boys in the back room will have*), *Seven Sinners* (1940, with *I've been in love before*) and *A Foreign Affair* (1948), all with music by Hollaender, *Stage Fright* (1950, with Cole Porter's song *The Laziest Gal in Town*), and *Judgment at Nuremberg* (1961). During World War II she entertained Allied troops in North Africa and Europe, singing *Lili Marlene* and other songs and playing the musical saw, she returned to cabaret in the USA and Britain in 1954, toured Germany in 1960 and has continued performing into the 1970s. As a singer she has become legendary for her seductive vamp songs, as much acting as singing with a husky, world-weary, sensuous voice of limited range.

Dietrich [Dieterich, Theodericus, Theodorici], **Sixt** [Sixtus, Xistus] (b Augsburg, c1493; d St Gall, 21 Oct 1548). German composer. From at least the beginning of 1504 he was a choirboy at Konstanz Cathedral. He left the choir on 21 August 1508 when his voice broke and matriculated at Freiburg University. In 1517 he had to leave Freiburg because of debts, and stayed in Strasbourg for a short time with the cathedral chaplain and humanist, Johannes Rudolffinger. In November 1517 the cathedral chapter in Konstanz made him *informator choralium*, with responsibility for teaching the cathedral choirboys grammar and singing. He gave up this post in 1519, probably after the death of his wife, and then took holy orders. In 1522 he was given an altar prebend in Konstanz Cathedral and was ordained priest. As he belonged to the choir, two of his duties were to help the succentors at choir practice and to lead the polyphony, he also wrote music for the choir. When in 1527 the Catholic clergy left Konstanz in the face of the Reformation's growing influence, Dietrich stayed behind and joined the new movement. Although his living was guaranteed, he suffered artistic isolation in a town which followed the principles of Zwingli (whose attitude to polyphonic church music was unfavourable) more closely than Luther's. The town council tried to keep him busy, first with clerical jobs and errands, and later with music lectures. He visited Basle, Strasbourg, Cologne and Wittenberg. In 1537 he planned to go to England but the Basle humanist Bonifacius Amerbach dissuaded him. In 1541 he declined a permanent post at Wittenberg University, he was a guest lecturer in music in the winter term 1540-41 and probably also in 1544. In Wittenberg he met Luther, and often sang with him. Dietrich was friendly with numerous humanists and church reformers. After Konstanz was taken by the Catholic imperial troops at the beginning of August 1548, Dietrich, probably already very ill, took refuge in St Gall with some fellow reformers, and died there.

Dietrich's work can be divided according to the different periods of his life: his student days, his time in the Konstanz Cathedral choir from 1518 to 1527, and finally his period as a free composer from 1527 to 1548. As a student, he seems to have composed mostly secular songs. His appointment in Konstanz required him to produce liturgical compositions for the cathedral choir. In his last period he wrote not only commissioned works for the early Protestant service, but also pieces for the Catholic imperial choir and secular songs; nearly all his printed works belong to this period. The greater part of his work is church music. Important examples survive in collections of *Magnificat* settings, antiphons and hymns. Dietrich used contemporary compositional techniques from the Netherlands, but in a thoroughly individual manner. For example, the harmonic implications of the music are not always supported by the rhythms, which results in a characteristic, restless sound. Its melodies are closely modelled on the style then current in the Netherlands. Most of his church music is based on a *cantus prius factus*, and the range of different ways in which he treated the tenor, and his variety of imitation techniques, is typical of music from the Low Countries. He was most fond of using canon.

Dietrich's eight sacred songs in German are Tenorlied settings containing both chordal and imitative sections, sometimes with breves and semibreves note against note in the simplest manner. A larger collection of these songs seems to have been lost. Dietrich probably also composed some tunes for the Konstanz reformed song-book, which apparently first appeared in 1533 or 1534. Some of his secular songs are chordal, but most are polyphonic; the voices are occasionally treated imitatively at the openings of the two sections of a piece, but otherwise are not melodically related. Some years after Dietrich's death, Matthias Aparius intended to print some of his unpublished works, but died before he could do so.

Dietrich is the most important early Protestant composer next to Johann Walter (i); Luscinius ranked him among Isaac, Senfl and Grefinger as one of the leading German composers of the time. He remained strictly traditional both in his thinking and in his works, and only his sacred songs in German reflect his early Protestant views in their slight tendency towards a more modern style.

WORKS

- Edition *S Dietrich Hymnen* (Wittenberg, 1545), ed H Zenck and W. Gurlitt, E.D.M., 1st ser., xxiii (1942-60) [Z]

MANFRED SCHULER

Dietricus [Karlsruhe Anonymous] (fl. mid-13th century). German theorist. His short treatise, *Regule super discantum et ad discernendum ipsas notas discantus*, appears only in the manuscript *D-KAsp* perg. 29a, ff 7v-8v, with a note that he was at least the copyist: 'qui me scribebat Dietricus nomen habebat'. It cannot be dated precisely because the chronology of contemporary mensural treatises has not been established, but in minor respects it would seem to antedate the work of Franco of Cologne: the ligature forms have certain ambiguities which Franco eliminated, and the alteration of breves is not mentioned.

Despite its title, the treatise is concerned only with mensural rhythmic notation and not with the intervals, consonances or counterpoint of discant. The six rhythmic modes, in the order generally accepted by modern authorities, are outlined, and the 4th is said not to be in current use. Mutation from one mode to another is recognized. In his discussion of note shapes and

ligatures, Dietricus clearly distinguished symbols with plicas, introducing for these an oblique form of the square *punctum*, and referred to the *proprietas* (including *proprietas opposita*) but not to the *perfectio* of ligatures.

The principle is stated that a long before another long is perfect. The semibreve is also recognized; two semibreves are said to equal a *recta* breve, although this does not represent unequivocally a reference to binary rhythm since an unequal transcription in ternary rhythm (1-2) may legitimately reflect Dietricus's meaning. Rests of the value of one *tempus* (a breve), two *tempora* (an altered breve or imperfect long) and three *tempora* (a perfect long) are indicated clearly by strokes spanning one, two or three spaces of the stave.

Dietricus's system is thought to correspond very closely to that used in the Bamberg manuscript of 13th-century motets.

ANDREW HUGHES

Dietsch [Dietzch, Dietz], (Pierre-)Louis(-Philippé) (b. Dijon, 17 March 1808; d. Paris, 20 Feb 1865). French conductor and composer. According to Fétis, he was a choirboy at Dijon Cathedral and from 1822 a pupil at Choron's Institution Royale de Musique Classique et Religieuse (Paris) where, after two years, he took classes for beginners. In 1830 he entered the Paris Conservatoire and studied counterpoint with Antoine Reicha and the double bass with M.-P. Chénie (winning the *premier prix* in the same year). During the 1830s he was active in various Parisian churches (notably as *maître de chapelle* at St Eustache) and played the double bass in the orchestras of the Théâtre-Italien and (later) the Opéra, where in 1840 he became the chorus master, on Rossini's recommendation. He left St Eustache in 1849 to become *maître de chapelle* at the Madeleine, and he taught harmony at the Ecole Niedermeyer at some time after its establishment in 1853. He succeeded Girard as conductor at the Opéra in 1860 but left after three years when he (or an orchestra member) had a disagreement with Verdi during a rehearsal of *Les vèpres siciliennes*. He remained active at the Madeleine and as a composition teacher at the Ecole Niedermeyer until his death.

Dietsch was involved in several controversies. In 1842 he presented a four-voice *Ave Maria* 'by Arcadelt', which he was credited with having discovered until various scholars, noting the faulty prosody of the work, began to suspect that he had composed it. Later research has shown that the *Ave Maria* was actually Dietsch's arrangement of Arcadelt's three-voice chanson *Nous voyons que les hommes*. In the same year Dietsch's opera *Le vaisseau fantôme* was first performed in Paris. Wagner later accused him of having used a translation of *Der fliegende Holländer* (1843) for the libretto; but evidently Dietsch's libretto was written independently of Wagner by Paul Foucher and Henri Révoil, after a popular novel by Frederick Marryat. In 1861 Dietsch conducted the infamous Paris première of *Tannhäuser*. Wagner, whose request to conduct the dress rehearsal and first three performances had been denied (in spite of the obvious difficulty Dietsch had with the score), was furious and suspected sabotage, but Dietsch's failure

was apparently caused by incompetence rather than malice.

Dietsch's conducting was criticized as weak, uncertain and inartistic. His compositions, mostly sacred works among which are several masses, are competent and well constructed but conservative and unimaginative. Fauré, who studied with Dietsch at the Ecole Niedermeyer, wrote that he had a 'cold nature and a methodical, reactionary mind'.

JEFFREY COOPER

Diettenhofer, Joseph [Giuseppe] (b Vienna, c1743, d ? London, after 1799). Austrian teacher and composer. He studied in Vienna with G. C. Wagenseil (counterpoint) and J. A. Štěpán (keyboard). He toured Germany and France for many years, and taught in Paris before settling in London in 1780. In the London press of 1788 he caused some controversy as a self-styled champion of Haydn, who had been criticized for providing previously published symphonies to the Professional Concert organizers as new. Diettenhofer later met Haydn in London (1791). In the same year he left London for Vienna, and from 1797 he was active in Berlin. By 1799, however, he had returned to London and was again teaching the piano, thoroughbass, singing and composition. A review of 1784 praises Diettenhofer's sonatas and especially his didactic keyboard arrangements, and commends his technical knowledge.

Dietz, Anton Ferdinand. See TITZ, ANTON FERDINAND.

Dietz, Hanns-Bertold (b Dresden, 12 Oct 1929). American musicologist of German birth. He received his initial training in church music at the Weimar Hochschule für Musik (1945-8, state certificate, 1948); he then studied musicology (with Osthoff), art history and German at Frankfurt University (1950-52), music theory at the University of Notre Dame, Indiana (MMus 1954), and musicology (with Wilhelm Fischer), art history, philosophy and psychology at Innsbruck University, where he took his doctorate in 1956 with a dissertation on Handel's fugal choruses. On his return to the USA he was assistant professor of music history and theory at St Mary's College, Notre Dame, Indiana (1957-63), and was then appointed a lecturer (1963), associate professor (1966) and professor of musicology (1971) at the University of Texas, Austin; he has also been a visiting professor at Innsbruck University (1968, 1970). His main areas of research are music history of the 17th, 18th and 19th centuries, early keyboard music and Catholic and Protestant church music; he has worked on Stradella sources in Turin and Modena and (as a Fulbright scholar in Naples, 1969) on the Neapolitan sources of 18th-century church music.

EUGENE J. LEAHY

Dietz, Johann Christian (i) (b Darmstadt, 1773; d Holland, 1849). German engineer and instrument maker. His first invention was a 'mélodion', designed in 1805 when he had established his business at Emmerich. It was in the form of a small square piano, measuring approximately 122 cm by 61 cm, and it had curved metal bars sounded by contact with a rotating metal cylinder. Dietz demonstrated the mélodion in Westphalia and the Netherlands in 1806. He had a factory in the Netherlands before he moved to Paris, where on 18 February 1814 he patented his best-known invention, the clavicharpe or keyed harp. This was an attempt to produce characteristic harp tone by means of a keyboard. It had a six-octave keyboard that operated plectra, which gently plucked silk-covered strings sideways. It was 2.15 metres high and resembled a grapple piano without a soundboard and outer case. It was reckoned that even the most careful listener could not detect the difference between it and an ordinary harp. A clavicharpe that Dietz made in 1814 is at Brussels Conservatory.

Dietz's son, JOHANN CHRISTIAN DIETZ (ii), and grandson also made clavicharpes up to about 1890, but they did not come into general use, not least because such an instrument would be extremely difficult to keep in tune and properly regulated. An article in the *Harmonicon* (1828) states 'M. Dietz succeeded in resolving a prob-

lem of considerable difficulty, that of graduating and modifying sounds at will, but not of sustaining them'. The same fate befell Dietz's other inventions, including the trochléon (1812), described in the *Harmonicon* (1828) as 'an instrument of round form, furnished with metal plates of different sizes, sounded by means of a circular bow, set in motion by a pedal'. No example of this instrument survives.

MARGARET CRANMER

Dietz, Johann Christian (ii) (b Emmerich, c1804; d Paris, 1888). German instrument maker, son of Johann Christian Dietz (i). He learnt his craft from his father, and made a clavicharpe (an instrument invented by his father) for the exhibition at the Louvre in 1819. He continued the family tradition of invention and designed a grand piano with freely vibrating sides to the sound-board. He was awarded a medal at the 1827 exhibition in Paris, where he exhibited five different pianos. The one that received most approval was a grand with four strings to each note - the fourth undamped string increased the power of the instrument by providing sympathetic resonance. A few months later he invented the polyplectron, a bowed keyboard instrument, an account of it appeared in the *Harmonicon* (1828). To make the bow act on the strings like other string instruments, Dietz needed as many bows as notes. He dealt with this problem with 'numerous bows, composed of thin slips of leather', which circulated on a cylinder placed on the upper part of the instrument, and over pulleys in the lower part. The motion of the key brought the bow into contact with the string by means of a small, thin piece of copper. The sound could be varied a good deal according to the pressure used on the key. The instrument coped with fast passages very well and had the ability to sustain in a remarkable way, but it did not 'answer the expectations of those who wish to trace in it the sound of a Stradivarius or an Amati'. A panel of literary men and musicians who met in 1828, of whom Cherubini was a member, agreed however that Dietz had 'approached much nearer to perfection than any of his predecessors'.

MARGARET CRANMER

Dietz [Dietzch], Louis. See DIETSCH, LOUIS.

Dieupart, Charles [?François] (b ?after 1667; d c1740). French violinist, harpsichordist and composer, active mainly in London. Dieupart was known as Charles to his English contemporaries and to Hawkins, the main source for the events of his life. Two letters to *The Spectator* (1711 and 1712) signed by Dieupart, Clayton and Haym give Charles as his first name. But an autograph letter in French is signed F. Dieupart, and a French notarial act published by Hardouin shows a François Dieupart living in the parish of St James, Westminster. The father of this Dieupart was François

Dieupart, Parisian candlemaker married in 1667, a date that provides a *terminus a quo* for the lifetime of his son. There is no positive evidence to connect 'Charles' and 'F.' with a Dieupart whom the French capitulation lists of 1695 classify in the bottom category ('deputies and assistants') of *organistes et professeurs de clavecin*, but the likelihood is that they were the same person. A Nicolas Dieupart, *cromorne* and *trompette marine*, secondarily flute and oboe player, appears in the accounts of the Ecurie Royale between 1667 and 1700. This is probably the same Nicolas Dieupart, *joueur de cromorne et flûte*, who figures in the capitulation lists. One final member of this group of homonyms, a Dieupart *fils*, appears in the same lists as a *symphoniste*. The relations among all these Dieuparts remain to be investigated.

Dieupart's *Six suites* (1701) are dedicated to the Countess of Sandwich, daughter of the Earl of Rochester, who went to France towards the turn of the century 'for her health'. The wording of the dedication suggests that she became Dieupart's pupil at some time before her return to England. The work was published in Amsterdam (no French edition is known) and Dieupart's treatment of the suite as a form, with a fixed number of movements in a fixed order, was without precedent in French harpsichord music, as was the prefixing of an overture to each suite. These peculiarities suggest a German influence, although the style of the individual dances is French, with a hint of Corelli. Some of the suite movements are linked thematically. Again without precedent, two versions were published simultaneously, one for solo harpsichord and one for a treble instrument with figured bass. Since the harmony does not always exactly correspond, it is unlikely that they were meant to be used together as instrumentally accompanied keyboard music.

Dieupart is first positively mentioned in England as the composer of the instrumental music for Motteux's interlude, *Britain's Happiness*, performed at the Drury Lane theatre on 4 March 1704. The following year he collaborated with Clayton and Haym at the same theatre in the production of *Arsinoë* (27 January 1705), thus helping to launch Italian opera in England. Hawkins said that he played the harpsichord and Haym the bass in two further adaptations. M. A. Bononcini's *Trionfo di Camilla* (Drury Lane, 10 April 1706) and A. Scarlatti's *Pyrrhus and Demetrius* (Haymarket, 25 December 1708). He had already worked with Motteux on one of the first operas produced at that theatre, *Love's Triumph* (8 March 1708). Motteux said in his preface that any success 'will owe not a little to Mr Dieupart, for his share in the contrivance of the entertainments and his supplying what recitative and other music was necessary'.

The Drury Lane enterprises collapsed under the Handelian onslaught of 1711, and in their letters to *The Spectator* Clayton, Haym and Dieupart invited the public to follow them to the York Rooms where they would offer 'musical entertainments': Clayton's *Passion of Sappho* and *Feast of Alexander*. Addison and Steele, because of financial and other associations with Clayton, supported the new venture with their satirical diatribes against Italian opera, but how successful it was is not known. One story has it that Dieupart was on the point of leaving for the Indies in the wake of a surgeon who proposed to use music as an anaesthetic for lithotomies. According to Hawkins

Dieupart betook himself wholly to teaching the harpsichord, and in the capacity of a master of that instrument, had admission into some of the best families in the Kingdom. In the latter part of his life he grew negligent, and frequented concerts performed in ale-houses, in obscure parts of the town, and distinguished himself not more [?] there, than he would have done in an assembly of the best judges, by his neat and elegant manner of playing the solos of Corelli. He died far advanced in years, and in very necessitated circumstances, about the year 1740.

Both Bach and Walther were impressed enough with Dieupart's music to copy some of it out (*D-Bds* Mus. 8551 and P 801); the theme of Dieupart's A major gigue has been likened to the prelude to Bach's first English Suite; the resemblance is much closer, however, between the Bach piece and a gigue by Le Roux (1705). The flute sonatas look back to the north Italian sonatas of the 17th century in form and style. There are from four to eight movements, often linked into slow-fast pairs by half-cadences. Each sonata begins with a slow *preludio* and ends with a *giga*; otherwise there are few dance movements. Schering mentioned a manuscript containing five 'Konzertierende Sinfonien' by Dieupart; this includes a heavily scored 'Concerto', which according to Brofsky (*JAMS*, xix, 1966) is the earliest example of the use of this title by a French composer.

WORKS

- Edition *C Dieupart Collection*, ed P Brunold (Paris, 1934) [B]
 Six suites de clavecin divisees en ouvertures, allemandes, courantes, sarabandes, gavottes, menuets, rondeaux et giges pour un violon et flûte avec une basse de viole et un archilut (Amsterdam, 1701) [kbd version], ed in B 1
 Six suites divisees propres a jouer sur la flûte ou le violon avec une basse continue (Amsterdam, 1701) [inst version of the above]
 [13] Select Lessons for the Harpsichord or Spinett (London, 1705) [selection from Six suites, kbd version]
 The Overture and Chaconne belonging to the Opera of Thomyris, 2 vn, tpt, ob (London, 1708)
 Six Sonatas, fl, bc (London, 1717)
 33 songs in single publications and collections, incl 27 in The Musical Miscellany (London, 1729-31), ed in B 11
 5 'Sinfonien' (incl 'Concerto' with obs, tpts, and sonata, double str orch, fls), *D-Dib* (according to Schering, see also Brofsky, *JAMS*, xix, 1966, p 89)

DAVID FULLER

Diez (Sp.). An ORGAN STOP.

Diez, Johann Sebastian (b 1720; d ?Wasserburg am Inn, after 1753). German composer. He may have originated in Franconia. He was choirmaster in the church at Wasserburg am Inn, near Munich, by 1753, when his one surviving publication, *Alphabetarius musicus* op.1, was published in Augsburg. This contains seven masses for four voices, two violins and continuo.

Diez was one of many south Germans who published relatively simple church music for the use of parish choirs in the mid-18th century, and his style has much in common with that of Marianus Königsperger, one of his most prolific contemporaries. However, his violin writing tends to be more imaginative than Königsperger's, especially in his use of constant accompaniment figures, and though his solo vocal parts are not

very elaborate their ranges are unusually wide. In choral sections he made much more use of recurrent themes than did many of his contemporaries.

ELIZABETH ROCHE

Dièze (Fr.). SHARP.

Diferencia [differencia] (Sp.). (1) A term for 'variation' in 16th-century Spanish instrumental music. One of its earliest appearances was in Luys de Narváez's *Los seys libros de delphin* (Valladolid, 1538). See VARIATIONS, §6.

(2) The term is also used in the equivalent English sense of DIVISION – the subdividing of long notes into shorter ones. See also ORNAMENTS, §IV.

Difference (from Lat. *differentia*). Any of the various formulae with which a psalm tone may end. In Gregorian psalmody, the psalm and the antiphon sung with it must not only be in the same mode, but also the ending of the psalm tone (its *terminatio*) must lead back smoothly to the initial phrase in the antiphon, which is sung in its entirety after the psalm. In liturgical books the difference is usually indicated by the musical notation above the letters E v o v a e, the conventional abbreviation for *s(a)e-cu-lo-rum A-men* (the words that conclude every psalm). Ex.1 illustrates the application of the principle of differences to two Mixolydian antiphons for the first Vespers of the feast of the holy family.

Ex 1

(a) *Angelus Domini* (with Psalm cxii, 'I audate pueri')

(b) *Pastores venerunt festinantes* (with Psalm cxxi, 'Laetatus sum')

Difference tone. When two loud notes are sounded, a strong note of frequency equal to the difference of the frequencies of the two individual notes is heard. It is ascribed to non-linearities in the audio system producing the sounds or to non-linearities in the hearing mechanism, and is one of the combination tones with frequency $f_2 - f_1$. It should be distinguished from the residue tone in that it only occurs with loud sounds, whereas the residue tone can still be heard with quiet tones and has a different and more obscure origin. The difference tone can be thought of as rapid beats subsequently made audible by the rectifying action of the non-linearities. See also SOUND, §9.

Difnār (from Gk. *antiphonarion*). A category of hymn in the MUSIC OF THE COPTIC RITE.

Di Giacomo, Salvatore (b Naples, 12 March 1860; d Naples, 5 April 1934). Italian poet, novelist, playwright, writer on music and theatre historian. In 1880 he gave up studying medicine to become a journalist, and contributed to the *Corriere del mattino*, *Corriere di Napoli*, *Pungolo* and *Pro patria*. Besides his work as director of

the Lucchesi Theatre library and inspector of the library of S Pietro a Majella, Naples, he organized the Filippini Archives and indexed the Girolamini Music Archives; he was also artistic director of the Collezione Settecentesca, published by Sandron of Palermo. In 1929 he was awarded the title Accademico d'Italia.

Di Giacomo was an outstanding historian of Neapolitan vernacular culture, especially that part of it centred on the Piedigrotta district. In his musical research he concentrated on opera and particularly on musical life in Naples from the 16th century to the 18th; his book on the four Neapolitan conservatories remains a standard reference work. His literary writings, admired by Croce, are characterized by vivid realism and spontaneity of expression; they chiefly depict small-scale but highly emotional situations. Those that provided inspiration for musical settings include his collections of poems *'O funneco verde* (1886), *Ariette e sunette* (1898) and *Canzoni e ariette nuove* (1916), his short stories *Minuetto settecentesco* (1883), *Il voto* (1889), *Pipa e boccale* (1893), *Novelle napoletane* (1914) and *L'ignoto* (1920) and his dramas *Malavita* (in collaboration with G. Cognetti, from the short story *Il voto*, 1889), *A San Francisco* (from a short poem of the same title, 1896), *Assunta Spina* (1909) and *Quand l'amour meurt* (1911). His poems have been set by Costa, Tosti, Pizzetti and many other Italian composers.

FERRUCCIO TAMMARO

Dignum, Charles (b London, c1765; d London, 29 March 1827). English singer and composer. The son of a Rotherhithe tailor, he was brought up a strict Roman Catholic, studied under Linley and made his début at Drury Lane in 1784 as Young Meadows in Arne's *Love in a Village*. He continued to sing at Drury Lane until his retirement in 1812, for instance in most of Storace's English operas, but his short, stout figure seldom allowed him to take the hero's role; usually he impersonated characters twice his age. He was at his best in oratorios - his indifferent acting was then no handicap - and in 1800 he was the tenor soloist in the first English performance of Haydn's *Creation*.

By 1790 Dignum was composing simple ballads, and a little later patriotic songs which he sang himself. Some had such unappealing titles as *On the Ottoman Porte declaring War against France* and *On the Projected Union between England and Ireland*. He never claimed to have made up more than the tunes; at this period the accompaniments were attributed to 'Mr Florio Jun.', an Italian flautist working in London. In 1810 Dignum brought out by subscription his only ambitious publication, *Vocal Music*, a collection of 75 songs, duets and glees. The volume included a portrait of Dignum and the information that the accompaniments were by such composers as Arnold, Calcott, Hook, Shield, Stevens and Samuel Webbe (another of Dignum's teachers). The melodies, which have no merit, are said to have been written in the style of Linley. The list of subscribers is among the longest and most aristocratic in the history of English music. In 1786 Dignum had married the wealthy Miss Rennett, and no other male singer of the day moved in such aristocratic circles. *Vocal Music* is dedicated to the Prince of Wales, with whom Dignum often dined. He is said to have died worth £30,000.

- ROGER FISKI:

Dijkman, Lüdert (b Gävle, mid-17th century; d Stockholm, 1717). Swedish composer, poet and organist. He belonged to a family of musicians, his father being an organist and town clerk. He took up his first position as organist in Avesta in 1669. Within a few years he became organist of Västerås Cathedral, which he left in 1675 to become organist in Gävle. Five years later he became *director musices*, organist and town clerk in Karlstad and finally, from 1689 until his death, *rector cantus* and from 1690 organist of Stockholm Cathedral.

His appointments in Stockholm indicate that he was considered one of the leading Swedish musicians of his time. But he was not only a musician: he also devoted himself to poetry, as can be seen from his only surviving composition, *Lamentum eller en Sorge-Music*, written for the funeral of Princes Gustaf and Ulrik in 1685 (MMS, v, 1968). The poetry glorifies the royal house in heavy, rather unnatural metaphorical language. The musical setting, which was printed in a shortened version only, is the earliest complete setting of a Swedish text of some length according to monodic principles.

BENGT KYHLBERG, JAN OLOF RUDÉN

Dijon. French city, capital of the Côte-d'Or, historically the principal city of BURGUNDY.

1. History. 2. Churches and sacred music 3. Secular music
1. HISTORY. The city was founded by the Romans as a military fortress, became the site of the Benedictine

abbey of St Bénigne in the 6th century, came under the jurisdiction of the bishops of Langres in the 9th century, and in 1015 was ceded to the dukes of Burgundy of the house of Capet.

Under the Valois dukes of Burgundy (1364–1477) Dijon became one of the artistically important French provincial cities. The dukes attracted minstrels to their court, patronized native performers and supported the musical institutions of the local churches, particularly the choir of the Sainte-Chapelle. After the death of Charles the Bold in 1477 and the resulting annexation of the duchy to the French crown lands, the capital of Burgundy experienced two centuries of artistic decline, until the expansionist reign of Louis XIV when it enjoyed an economic and cultural revival. After the Revolution there was again a renewed growth of musical life which continued throughout the 19th century.

2 CHURCHES AND SACRED MUSIC. The musical life of the town was dominated during the 11th, 12th and 13th centuries by ecclesiastical institutions, St Bénigne being an important centre for teaching Gregorian chant and compiling plainsong manuscripts. Guillaume de Dijon (de Fécamp, de Volpiano; *d* 1031), 39th abbot of this monastery, 'so corrected and perfected the singing of antiphons, responsories and hymns that nowhere in the realm of the Roman church could chant be heard sung more correctly'. The famous Montpellier antiphonal (*F-MO* H159), written in both neumatic and alphabetic notation, was copied at St Bénigne in the 11th century. The Sainte-Chapelle was founded in 1172 as a collegiate church for the Capetian dukes of Burgundy and received additional endowments from the Valois dukes during the 14th and 15th centuries. The choirmaster there in the mid-16th century was the composer and lutenist Richard de Rensvois who was burned at the stake for sodomy in 1586. A contract signed by Claude Deroy (1670–1714) in 1691 shows that the choirmaster of the Sainte-Chapelle in that year was to compose '12 masses, motets, hymns or psalms for the major feast days of the year and 15 for ferial days'. He was also to instruct the choirboys in singing, plainsong, counterpoint, sight-reading and composition, and was encouraged to present one public concert each week.

When Dijon was made a bishopric in 1731 the ancient abbey of St Etienne, which had possessed a singing school (*maîtrise*) since the 14th century and an organ since the early 15th century, became the cathedral. Claude Rameau and the composer Claude Balbastre (1729–99) served successively as organists there from 1737 until 1750. The Swabian organ builder Karl Joseph Riepp (1710–75) settled at Dijon in about 1735 and installed a magnificent case at St Bénigne. The Revolution was a disaster for the Dijon churches: the chapters were dissolved, the choirs and singing schools disbanded, and the church organs sold at public auction (23 January 1793). St Bénigne, which became the cathedral of Dijon in 1801, reinstituted its singing school in 1810. It has 100 enrolled chorists and is one of the major choir schools in France.

The Valois dukes of Burgundy were generous patrons of Dijon's ecclesiastical foundations. Typical payments were the six livres Philip the Bold gave to the choirboys of St Etienne and of the Sainte-Chapelle, and to several minstrels who sang and played before him on Christmas Day 1371. In 1425 Duke Philip the Good endowed the Sainte-Chapelle to support four choirboys and a master

who was 'to teach them the art of music including singing, counterpoint and discant'. Eight years later Philip donated 768 livres to the same church to engage four additional singers 'well instructed in the art of music'. Philip's physician and astrologer, Henri Arnaut de Zwolle, a resident of Dijon, compiled the earliest treatise (*c*1440) to describe in detail the construction of the harpsichord, clavichord, organ and lute (*F-Pn* lat.7295).

3. SECULAR MUSIC. Chansons and chanson texts by the 13th-century trouvères Guiot de Dijon and Jocelin (Josselin) de Dijon show that secular music was heard in the town in the Middle Ages. In the late Middle Ages the magistrates of Dijon employed a band of shawm players each evening during Advent to perform the *dorauo*, to sound their instruments while parading through the streets. This tradition was supplanted during the 16th century by the activities of the Mère-folle, a guild devoted to buffoonery that danced, sang, clowned and processed through the streets with musical instruments on holidays. After witnessing operatic productions by touring companies during the late 17th century the city established a municipal theatre within the confines of an abandoned tennis court ('tripot des Barres') in 1717 and in subsequent years engaged companies from Paris to perform comic operas by Favart, Mouret, Rousseau, Duni, Philidor, Monsigny, Gossec, Grétry and others. Serious operas, including Rameau's *Hippolyte et Aricie* (May 1734), and public concerts were performed under the aegis of the Academy of Music (1725–38), and later in the 18th century by the Concerts des Amateurs and the Société Dramatique d'Amateurs.

Much of the music heard in Dijon in the early 18th century was provided by members of the Rameau family. Jean Rameau (*d* 1714), father of the composer and theorist, served successively as organist at St Michel, St Bénigne, St Etienne and Notre Dame of Dijon. Jean-Philippe Rameau (*d* 1764), born and educated in Dijon, was organist at Notre Dame in 1709; his younger brother Claude (*d* 1761) worked variously as organist at St Bénigne, the Sainte-Chapelle, Notre Dame and St Etienne, and in 1725 founded the Dijon Academy of Music. Mozart, his sister Nannerl and father Leopold visited Dijon for 15 days in July 1766 and played in the old hôtel de ville. The accompanying performers, five violins, one viola, three cellos, two oboes and one bassoon, proved less than satisfactory; Leopold's evaluation of each of them varied from 'mediocre' to 'miserable'.

During the Revolution patriotic hymns, marches and songs replaced theatre productions and concert pieces as the musical staple of the town. Opera and public concerts recommenced with vigour in the 19th century on completion of a new municipal theatre (capacity *c*1000) in 1828. There the Société Philharmonique (1832–50) gave 104 concerts, Liszt and Thalberg gave recitals during the 1840s, and the Société Chorale (established 1870) performed works by Handel, Beethoven, Berlioz, Rossini and Gounod during the 1870s and 1880s. Audiences at the theatre heard the standard operatic repertory during the 19th century and, in 1907, a production of Rameau's *Dardanus* directed by d'Indy. Performances by the Opera of Dijon and the Orchestre de la Société des Concerts du Conservatoire have continued regularly since the mid-

19th century.

Dijon Conservatory was founded in 1869; in 1973 approximately 1000 students were enrolled in courses in practical and theoretical music. The Bibliothèque Publique, situated next to the conservatory, has a rich collection of monastic manuscripts and incunabula, and two important 15th-century music manuscripts, MS 517 (the Dijon chansonnier) and the fragmentary MS 2837, both of which may have emanated from the court of the dukes of Burgundy.

CRAIG WRIGHT

Diktonius, Elmer (Rafael) (b Helsinki, 20 Jan 1896; d Nikkilä, 23 Sept 1961). Finnish poet, critic and composer. He studied the violin with Raitio and composition with Furuhielm at the Helsinki Music Institute. His début as a composer was at a students' concert at the institute in spring 1917 with a piano suite, described by a critic as 'extremely daring harmonically'. Critical reaction was frankly hostile after another concert (4 May 1920) when six songs by Diktonius were performed after much trouble with the musicians. The rigid conservatism of Finnish musical life led Diktonius to approach Schoenberg with a view to becoming a pupil, but Schoenberg declined, replying in a letter that he too was conservative. Diktonius found release in a poem

published in his collection *Härda sånger* ('Hard songs'), beginning:

One spring I went out into the world
 to polish off Skryabin
 send that ninny Debussy sprawling
 rap the knuckles of Schoenberg

The harmony of Diktonius's songs is not very adventurous, but it is well suited to the expressionist force of the texts. Partly as a result of the reception accorded his songs, he abandoned composition for poetry (often with musical themes, forms or metaphors) and criticism.

ERIK WAHLSTRÖM

Diletsky [Dilezki], Nikolay [Nikolai] (Pavlovich) [Dylecki, Mikołaj] (b Kiev, c1630; d Moscow, between 1680 and 1690). Ukrainian writer on music and composer. He studied in Poland, first at Warsaw and then at the Jesuit academy at Vilnius, and was much impressed by the Italian-influenced music of such prominent composers as Marcin Mielczewski and Jacob Różycki. He probably lived for a time at Smolensk, and from 1678 until his death he worked in Moscow as choir director, singing teacher and composer to Count Grigory Stroganov. Few of his compositions survive, most of them, from the library of the former Synodal College, are now in Moscow (*USSR-Mm*). His pupils, such as Nikolay Kalashnikov and Vasily Titov, composed copiously in a quasi-Venetian polychoral style. He is of most importance for a major treatise on music. It first appeared as *Toga złota* (Vilnius, 1675). After intervening editions published at Smolensk (*Grammatika musikijskovo penia*, 1677) and at Moscow (*Idea grammatikii musikiskoy*, 1679) it finally appeared as *Musikiskaya grammatika* (Moscow, 1680, ed S. V. Smolensky, St Petersburg, 1910), with a polemical introduction by I. T. Korenov. This work came as a startling revelation to Russian musicians, with its garbled recollections of Zarlino's writings and its descriptions of canonic imitation and the contrasting of *kontsert* (concertino) with 'what the Italians call tutti, otherwise *cappella* or *ripeno*', illustrated by examples from 'the most brilliant Polish artists'.

GERALD ABRAHAM

Dilherr, Johann Michael (b Themar, Thuringia, 14 Oct 1604, d Nuremberg, 8 April 1669). German poet and theologian. He studied theology in Leipzig, Altdorf and Jena. In 1631 he became professor of rhetoric at Jena University, where he also lectured in history and poetry

from 1634 and in theology as well from 1640. In 1642 he went to Nuremberg as headmaster of the Egidien Gymnasium. From 1646 he held the chief ecclesiastical post at the church of St Sebaldus there and became famous as a preacher.

Dilherr's influence in Nuremberg came at a time when the middle classes were once again assiduously cultivating music and the other arts after the ravages of the Thirty Years War. He was closely associated with the Pegnesische Blumenorden, a society of poets and scholars founded in 1644 by the poets G. P. Harsdörffer and Johann Klaj, to which the organist of St Lorenz, S. T. Staden, belonged. He also enjoyed a long friendship with Kindermann, organist of St Egidien who, with Staden and Paul Heinlein, set many of his verses. The dialogues *Mosis Plag* (1642) and *Dess Erlösers Christi und sündigen Menschen heylsames Gespräch* (1643) by Dilherr and Kindermann, publicly performed at the end of church services, are direct forerunners of the German oratorio. Dilherr's librettos enabled the individual characters to be assigned to solo voices and the use of sharp contrasts enhanced the drama; instrumental interludes and choruses were also incorporated. The work of Dilherr and Kindermann closely parallels that of the Pegnesische Blumenorden, whose members Harsdörffer and Staden wrote the first surviving German opera, *Seelewig*, in 1644, and where the spoken oratorios of Klaj were performed.

Dilherr's interest in music is demonstrated not only by his public oration *De ortu et progressu, usu, et abusu musicae* (1643) – to whose delivery Staden added 22 pieces by Giovanni Gabrieli, Hassler and others, as well as some of his own, as illustrations (see Kahl) – but also by his editing of several hymnbooks and by his only musical composition, *Heilige Chorwoche* (Nuremberg, 1653). The many new editions and reprints of his works that appeared up to the 18th century show how esteemed and popular he remained even after his death.

PETER KELLER

Dille, Denijs (b Aarschot, 21 Feb 1904). Belgian musicologist. After studying philosophy and theology at Mechelen Seminary, he taught at Moll College, near Antwerp (1928–36), and then at the Antwerp teachers' training college until 1961. Concurrently he did research in Romance philology and musicology; he has concentrated on contemporary music, particularly that of Bartók, whom he knew personally. From 1961 until his retirement in 1971 he was director of the Bartók Archives, founded in Budapest (1961) by the Hungarian

Academy of Sciences within the framework of the Institute of Musicology. In this capacity he did important work on Bartók's biography and on the source materials and publication of his early works; he also edited the series *Documenta Bartókiana* (1964–70) and a number of his early compositions including the Scherzo for orchestra and piano (1904), *Kossuth* (1903), the Violin Sonata (1903) and two volumes of early songs and piano pieces (*Der junge Bartók*, Mainz and Budapest, 1963–5).

JÁNOS KÁRPÁTI

Dilliger [Dillinger], Johann (b Eislefeld, Franconia, 30 Nov 1593; d Coburg, 28 Aug 1647). German composer, publisher and editor. He received his early academic and musical training at the Latenschule in Eislefeld. When his formal studies were over he went, after a short stay in Naumburg, to Magdeburg, where he apparently became a student of Michael Praetorius from 1611 to 1616, as is indicated by an entry that Praetorius made in 1616 in an album kept by Dilliger (*D-CI* M.49). The album also contains inscriptions by many local musicians, ministers and public officials that provide clues to the diversity of talent and widespread musical activity in Magdeburg at the time. Dilliger next moved to Wittenberg, in 1618, and matriculated at the university to study theology. He married following his appointment as Kantor at the Haupt- und Schlosskirche later that year. In 1623 he was granted the degree of Magister. Two years later he accepted a post as Kantor in Coburg, the city that became his home. The years 1625–33 were musically the most productive of his life, yielding some 30 collections, but in 1633 he entered the ministry. (His largest work, *Thesaurus musicus novus*, a collection of 136 pieces, had been lost in the destruction of Magdeburg in 1631 in the Thirty Years War.)

Dilliger's years in Coburg were filled with cares and sorrow. Devastation, famine and plague ravaged the land; death invaded his home, claiming his mother in 1635 and his wife Margaretha in 1641. But despite frequent severe illness he remained active in the ministry up to the final year of his life. Details of his life are summarized in the funeral address delivered by Archdeacon Georg Pfrüschner at his memorial service on 1 September 1647 and printed in Coburg in the same year.

Dilliger composed only sacred vocal works, but they

exhibit the major musical trends in the Germany of his day: choral music for trained singers with and without accompaniment, and congregational song. They include over 100 contrapuntal motets, many based on chorales (some polychoral, showing the influence of Hieronymus Praetorius), some 200 homophonic songs for four and five voices and Italianate concertos with affective text-setting for up to six voices with continuo. Dilliger wrote all these types of music up to 1633, but then, after his change from musician to minister, he concentrated on devotional songs for the layman.

Like similar works by Schein, Dilliger's motets for two and three voices form a bridge between the 16th-century contrapuntal style and the newer instrumentally accompanied vocal concerto in having the lowest voice simultaneously texted and figured. But he is most modern in his concertos, which demonstrate a keen interest in the *stile nuovo*, reflected also in the number of compositions by Italian composers that he included in his publications.

WORKS

COLLECTIONS CONTAINING ONLY WORKS BY DILLIGER

- Musica votiva, Deo sacra, de Tempore (Coburg, 1622), 18 pieces (16 German, 2 Latin), 2–5vv, insts
 Musica christiana cordialis domestica, 2–4vv (Coburg, 1630)
 Musica poenitentiarum et consolatorum (Coburg, 1630), 20 pieces, 3–5, 7, 8vv
 Musica oratoria et laudatorum oder Bet- und Lobmusica (Coburg, 1630), 30 pieces, 3–5vv
 Musica Thanatobuleutica et excitatoria (Coburg, 1631), 41 pieces, 3–6, 8vv
 Flores musicales, sive musica ad epulum coeleste invitatoria (Coburg, 1631, 2/1633 as Musica invitatoria ad opulum coeleste, lost), 48 pieces, 2–6vv
 Musica christiana castrensis (Coburg, 1632), 22 pieces, 4vv
 Musica christiana rastrensis (Coburg, 1633), 13 pieces, 1 of them by G. Finette adapted by Dilliger, 2–4vv
 Prodromus musicae christianae scholasticae & academicae (Coburg, 1633), 7 pieces, 4, 5vv
 Jeremias poenitentiarum in 52 deutschen Bussprüchen, 2vv (Coburg, 1640), lost
 Musica christiana valedictoria (Coburg, 1642), 26 pieces, 3vv, lost

COLLECTIONS INCLUDING WORKS BY OTHER COMPOSERS

- Titles of individual compositions contained in the collections are given in Thümmeler
 Decas I prodromi triciniorum sacrorum sive neue geistliche Liedlein, 3vv (Wittenberg, 1621), lost
 11 pieces certainly and 5 others possibly by Dilliger, 3vv, in Decas triciniorum sacrorum altera, sequuntur Concerti aliquot sacri clariss (Wittenberg, 1622), lost
 9 pieces in Triciniorum sacrorum decas tertia (Magdeburg, 1623), lost
 3 pieces in D O M A Exercitatio musica I, continens XIII selectissimos concertos (Magdeburg, 1624), lost
 36 pieces, 2–4vv, bc (org), in Neues geistliches musicalisches Lustgärtlein Concerten und Lobgesanglein (Coburg, 1626)
 7 pieces, 1–6vv, insts, bc (org) in Musica concertiva (Coburg, 1632)

SINGLE COMPOSITIONS

Over 40 pieces in a variety of styles (polychoral, motets and devotional songs, 4–8vv, and concertos) composed for specific occasions: civic and academic functions, engagements, weddings, birthdays, seasonal church festivals and particularly funerals [detailed lists given by Adrio (MGG), Eby and Thümmeler]

 MARGARETTE FINK EBY

Dilthey, Wilhelm (Christian Ludwig) (b Biebrich, nr. Wiesbaden, 19 Nov 1833; d Seis, nr. Bozen [Bolzano], 3 Oct 1911). German philosopher. He received his first musical education from his grandfather, the court Kapellmeister Johann Peter Heuschkel, who taught him the piano and elementary music theory. After graduating from the Wiesbaden Gymnasium he studied theology in Heidelberg in 1852, and in 1853 went to Berlin, where the influence of Friedrich Adolf Trendelenburg strengthened his interest in philosophy and the history of ideas. At the same time, with encouragement from the composer and conductor Bernhard Scholz, a boyhood friend, he began studying music theory and composition. From 1856 to 1857 he taught at various Berlin Gymnasien, but then gave up teaching in order to devote himself, as a freelance writer, to his intellectual pursuits. He took an active part in the musical life of the capital, which he saw as the centre of all musical culture, encompassing 'the Classicism of the past as well as the Romanticism of the future'. Beethoven's symphonies were for him 'the highest possible musical achievement'. In 1864 he received a doctorate of philosophy, and in the same year he became a *Privatdozent* in philosophy at Berlin University. A little later he wrote, under the pseudonym Friedrich Welden, the musicians' novella *Lebenskämpfe und Lebensfriede*, a reflection of his musical tastes in those years. In 1866 he became a professor at Basle University, in 1868 he went to Kiel, in 1871 to Breslau, and in 1882 he was honoured with an appointment to Berlin, where he was elected a member of the Prussian Academy of Sciences in 1887.

Dilthey was one of the most important thinkers of the second half of the 19th century. His monumental life work contains relatively little discussion of music, and his views on music are difficult to systematize. Listening to music was for him a religious act, and polyphony the appropriate expression of religious consciousness. He considered music's highest achievement to be in the fact that 'what occurs to a musical mind obscurely, indefinitely or even unconsciously, can find perfect and lucid expression in a musical creation'. Dilthey thereby called for a 'theory of musical semantics', though he himself contributed nothing to the development of such a theory. Two distinct principles of his view of music stand out: that music alone can express the most complex feelings, moods and opinions, which are beyond the descriptive power of words, and that counterpoint is a technical means for unifying contrasting expressive elements.

Dilthey's aesthetic views are midway between those of Hanslick and Wagner; his theory of musical aesthetics, however, has not had any widespread influence. His views on the history of ideas and hermeneutics were more influential, though his impact on the study of music history was due more to his philosophical and historical work as a whole than to his few specialized studies of music, which were published posthumously. The object of the historical study of music for him was

not to establish the psychological state that a composition reflects, but rather to reveal 'something concrete, i.e. the connected sequence of sounds apprehended by the imagination as expression'. Otto Jahn's biography of Mozart and Adolph Bernhard Marx's of Beethoven both disappointed him, since they did not penetrate to the essence of the music. In the third section of the collection *Von deutscher Dichtung und Musik* Dilthey outlined a history of music from Schütz to Beethoven, which he saw as a continuous development, without acknowledging the break in tradition of 1740–50. These sections, like all his writing, show an acute reasoning power and perception and a complete sympathy with his subject, though they are occasionally marred by a layman's approach to the examination of musical details.

Dilthey's influence on musicology in the first half of the 20th century first appeared in the work of Hermann Kretzschmar, then with Arnold Schering and Gustav Becking, and, most strongly, with Wilbald Gurlitt and Hermann Zenck. His method later met indifference, scepticism and rejection, since the continuity of history and therefore the concept of history itself has become questionable.

FRANZ KRAUTWURST

Diluendo (It., from *diluere*: 'to become weaker'). A performance instruction meaning almost the same as DIMINUENDO and MORENDO.

Dima, Gheorghe (b Braşov, 10 Oct 1847; d Cluj, 4 June 1925). Romanian composer, conductor and teacher. After schooling in Vienna, he studied at the polytechnic school in Karlsruhe, but then took musical instruction from Giehne in Baden, and subsequently in Vienna and

Graz from Uffmann and Thierot. He concluded his training with a diploma at the Leipzig Conservatory under Jadassohn and Reinecke. As a baritone, he appeared in some Meyerbeer roles at the Klagenfurt Opera (1868). He returned to his own country and began a diverse career successively in Sibiu, Braşov and Cluj. At first he gave song recitals in Bucharest, Iaşi and several Transylvanian cities, but later conducting and composition, even more than teaching, became his principal occupations.

As the head of various choral societies, with the Metropolitan Choir of Sibiu and in cooperation with the municipal orchestras, he performed oratorios of Handel, Haydn, Mendelssohn and Gade, and operas by Mascagni and Kreutzer. Through these activities he contributed to the development of the musical culture of the country. As a teacher, he worked in public schools, and in 1919 he founded in Cluj the State Conservatory that now bears his name. His own music is cast in a Romantic idiom, and he drew upon folk elements in his songs, ballads, romances and choruses. Some of his ballads are written for voices and orchestra, and one of them, *The Mother of Stephen the Great*, is virtually an oratorio. With his songs to the poems of M. Eminescu he founded the tradition of modern Romanian song-writing. He was a founder member of the Romanian Composers' Society (1920).

WORKS

(selective list published in Vienna, before 1906, unless otherwise stated)

SACRED

- 2 Liturgia sfintului Ioan Gură-de-Aur [Liturgy of St John Chrysostom], 4vv
 Numerous other sacred choral pieces

SECULAR

- Mama lui Stefan cel Mare [The mother of Stephen the Great] (ballad, D. Bolintineanu), solo vv, 4vv, orch, 1884
 Hora (V. Alecsandri), 4vv, orch
 2 cantatas, solo v, 4vv, orch (Braşov, 1900, Vienna, 1902)
 [30] Cîntece populare şi melodii vechi româneşti, 4vv, 18 others, male vv
 Patru cîntece [4 songs], 4vv
 Other MS choral works in *R-Ba*
 [16] Lieder und Gesänge (C F Kahnt), Ger., Rom., 1v, pf acc (Leipzig, 1888)
 [16] Lieder und Balladen, 1v, pf acc
 [12] Rumanische Volkslieder, 1v, pf acc
 Din lumea copiilor [Children's world], 1v, pf acc. (Craiova, 1930)
 9 songs, 1v, pf acc., 5 choruses, male vv, 8 choruses, 4vv, 2 choruses, 4vv, pf acc. in Opere alese, ed V Cosma (Bucharest, 1958)

ROMEO GHIRCOIAŞIU

Di Maggio, Francesco (b Castelvetro, Sicily; d Castelvetro, 1688). Italian composer. A priest and of noble birth, he was a pupil of Giuseppe Palazzotto e Tagliavia and thus represents the fourth and last generation of the so-called Sicilian polyphonic school founded by Pietro Vinci. He may be identical with the Francesco Maggi who sang alto in the choir of the church of the Steccata at Parma from 22 May 1659 until after 12 February 1663. At his death he was a canon of the collegiate church of S Pietro, Castelvetro. As a composer he is known only by *Sacra armonia di musicali cententi ... con una messa a 5 concertata* (Milan, 1670), for two to five voices and continuo, which in addition to the mass contains 15 motets.

PAOLO EMILIO CARAPEZZA

Di Micheli, Antonino [De Michaelis, Antoninus] (b Tusa; d Tusa, 1680). Italian guitarist and music editor. He was a priest. He is known only by *La nuova chitarra, di regole, dichiarazioni e figure, con la regola della scala ... con l'aggiunta d'arie siciliane, e sonate di vari autori* (Palermo, 1680, 2/1698), a collection of dances and Sicilian songs for five-string guitar in Italian tablature. They are preceded by a practical method, with rules for tuning the guitar and for obtaining five-note chords; each of 24 triads is indicated by a letter of the alphabet. In the Sicilian songs the text to be sung is given below the letters of the tablature, appropriate numbers indicate the string in each chord that plays in unison with the voice, so the melodic outline can be reconstructed. The songs lack the rhythmic indications that are added to the dances; they are 'included for those who know how the tune should be sung', to provide an accompaniment for familiar melodies Di Micheli claimed to have taken the songs from other publications, where the vocal line was fully notated, in particular from works, now lost, by Mario Albioso, Silvestro Orlando and Pietro Renda.

PAOLO EMILIO CARAPEZZA

Dimidietas (Lat.) A 15th-century term for that type of diminution which reduces the relative value of note shapes in the ratio 2:1, the *proportio dupla* of the system of PROPORTIONS of the late Middle Ages and the Renaissance. See also NOTATION, §III, 3(vii).

Diminished interval. A perfect or minor INTERVAL from which a chromatic semitone has been subtracted. The perfect 5th C-G is made into a diminished 5th by raising C or lowering G (i.e. C#-G or C'-Gb). A doubly diminished interval is made by subtracting two chromatic semitones from a perfect or minor interval, for example G-Fbb, G#-Fb and G::-F are all doubly diminished 7ths derived from the minor 7th G-F.

Diminished seventh chord. A chord that consists of three superimposed minor 3rds (e.g. B-D-F-Ab, C-Eb-Gb-Bbb, C#-E-G-Bb). Strictly speaking it is a chromatic construction, requiring the use of accidentals in any key; but because it is embedded in the harmonic minor scale (e.g. B-D-F-Ab in the scale of C harmonic minor) it is the commonest chromatic sonority of tonal music, either in the major or the minor. Like the whole-tone scale, however, it divides the octave into equal parts and is for this reason harmonically unstable; by re-spelling one or more of its notes, the same diminished 7th chord can be led by good part-writing to a triad on any degree of the chromatic scale (ex.1). It is therefore an ideal pivot chord for modulation to remote keys, as well as being effective in suspending the tonality of a passage that would otherwise be said to be in a par-

ticular key. Both these features of the diminished 7th chord played an important part in the harmony of the late Classical and the Romantic periods.

Ex.1 Diminished 7th chord resolutions

Diminished triad. A chord built of two minor 3rds, for example b-d -f' or c'-eb-gb.

Diminuendo (It., from *diminuire*: 'to diminish', 'become softer'). A performance instruction sometimes abbreviated *dim.* and sometimes expressed by means of a 'hairpin' (for its history see CRESCENDO). *Decrescendo* (from *decrescere*: 'to decrease', 'wane'), sometimes abbreviated *decresc.*, is virtually synonymous but *diminuendo* is sometimes preferred as being more positive.

Diminuendo and *decrescendo* seem to have come into regular usage rather earlier than *crescendo*, since they represent an effect more fundamental to the nature of Western music – just as *rallentando* and *ritardando* have a longer and richer history than *accelerando*. The 12th-century *Nibelungenlied*, for instance, includes the description 'Dô klungen sine seiten daz al daz hû/erdôz suer unde senfter videlen er began' ('then his strings sounded so that all the house relaxed and he began to fiddle more sweetly and more quietly'). In his *Combattimento di Tancredi e Clorinda* (1624) Monteverdi gave the direction 'questa ultima nota va in arcata morendo' ('this final note is played with a diminishing bowstroke'). In Purcell's verse anthem *They that go down to the sea* the instruction 'soften the voice by degrees' is found in the alto solo where the word 'still' is held for 11 bars, yet the use of the 'hairpin' began extremely late, and in the final ritornello of 'Glory to God' in *Messiah* Handel denoted the effect of dying away with terraced dynamics – from *f* to *p* to *pp*.

Even when it became an accepted part of musical notation the 'hairpin' was liable to misunderstanding. Norman has shown how Schubert's scores before about 1819 were written so that the *diminuendo* and the horizontal accent were often indistinguishable, and how thereafter he often required a fast *diminuendo* in places (particularly on final chords) where one would be more likely to expect an accent. Macdonald found something very similar in Berlioz, as did Deathridge in Wagner, and the whole subject is complicated further by the lack of agreement among composers as to how heavily accented an accent should be: there are also examples of *fp* being used to denote a relatively fast *diminuendo* rather than the sudden one the sign would normally suggest (e.g. in *Die Fledermaus*, ed. H. Swarowsky, 1968, p.28).

DAVID FALLOWS

Diminution. (1) One of many terms, such as the English **DIVISION** and the Spanish *diferencia*, denoting ornamental variation viewed as the breaking down of a smaller number of long notes into a larger number of short notes, that is, a diminution or division of note values through a multiplication of notes occupying the same total duration. As such it is one of the commonest Renaissance and Baroque methods of introducing melodic variation, whether by improvisation or in notation. Quantz gave examples of diminutions in the Italian style, but none in the French style, and remarked that 'pieces in the French manner are for the most part characterized and composed with appoggiaturas and ornaments in such a way that hardly anything else can be added to the text'. See also **IMPROVISATION**, §1, 1 (ii).

(2) In mensural or proportional **NOTATION**, and again in Baroque and subsequent contrapuntal and especially canonic or fugal technique (see **FUGUE**), it is the opposite of augmentation.

See also **DIMINISHED INTERVAL** and **PROPORTIONS**

ROBERT DONINGTON

Dimitrescu, Constantin (b Blejoi-Prahova, 19 March 1847; d Bucharest, 9 May 1928). Romanian composer, cellist, conductor and teacher. After studying in Bucharest with Alexander Flechtenmacher and Eduard Wachmann, he completed his education in Vienna with Schlessinger and in Paris with Franchomme. He was a cellist in the Bucharest PO and at the National Theatre. Later he conducted the orchestra of the Ministry of Public Instruction (the successor to the former Philharmonic). Dimitrescu was also a moving spirit in chamber music as the founder of the first permanent quartet in Bucharest (1880). As teacher of cello at the Bucharest Conservatory, he helped to form a Romanian cello school. His music reflects these activities. The seven quartets and the three cello concertos, among other works, were the first of the genre in Romanian music. An opera and some operettas were written for the National Theatre and for other Bucharest opera companies.

WORKS

(selective list, many MSS in R-Ba)

- Stage: *Sergentul Cartuş* [Sergeant Cartouche] (operetta, 2, 1 Apostolimi), 1883, *Renegatu* [The renegade] (opera, 3, M Dimitriadu), 1886 (Bucharest, 1893), *Sanda* (comic opera, 2), 1886, *Nimi* (comic opera, 3, D Ionescu-Zane), 1897, *Sinziana şi Pepelea* (musical fairy play, 5, V Alecsandri), 1900, other fairy plays, musical comedies and incidental music.
- Orch: *Preludio*, 1880; 3 vc concs., no 1, A, op 45, 1889 (Bucharest, 1894), no 2, b, 1886 (Bucharest, n d.), no 3, d, 1890 (Bucharest, n d.), 2 ovs., 1885, 1907.
- Other works: 8 melodies, pf, op 16, 7 str qts (Leipzig, n d.), no 1, G, op 21, 1883, no 2, d, op 26, no 3, B, op 33, no 4, g, op 38, no 5, F, op 42, no 6, c, op 44, 1898, no 7, a, 1923, 3 choruses, male vv (Bucharest, 1899), pieces for vc, pf, songs.

ROMEO GHIRCOIAŞIU

Dimitrov, Georgi (b Belogradtschik, 2 May 1904). Bulgarian composer. He studied theory, composition and conducting at the Warsaw Conservatory (1927-34) and was then an inspector of choirs and choral conductor in Poland until 1938. In 1939 he returned to Bulgaria and was made inspector of music at the Ministry of

Education; he was artistic secretary to the Sofia National Opera (1940-48) and director of the Council for Creative and Interpretative Arts in Music (1948-58). Additionally, he was appointed lecturer in conducting at the Sofia State Academy of Music in 1949, becoming professor in 1960. Most of his music is choral; many of his 500 or so pieces have enjoyed considerable popularity in Bulgaria, and he has shown a particular gift for humorous and children's choral songs. He is the author of *Besedi po waproa na horowoto iskustwo* ('Conversations on the question of choral art', Sofia, 1968).

WORKS

(selective list)

- Waspew na rodinata* [Song of praise to the fatherland], children's chorus, girls' chorus, male chorus, mixed chorus (1965).
- Isbrani horowi pesni* [Selected choral songs] (1968).
- Many other choral songs, some solo songs.
- Principal publisher Nauka i iskustwo (Sofia).

LADA BRASHOVANOVA

Dimmler [Dimler, Dümmler], **Franz Anton** (b Mannheim, 14 Oct 1753; d Munich, 7 Feb 1827). German composer and instrumentalist. He was a horn pupil of Joseph Ziwini and from 1775 was taught composition by Georg Joseph Vogler in Mannheim. From 1767, along with his teacher and two of Ziwini's brothers, he was a supernumerary in the Mannheim orchestra; the account lists record his salary in 1776 as 100 florins, but by 1778 it stood at 330 florins. In 1778, when the seat of the court moved to Munich, he was listed among the 'accompanying persons'. After 1784 he was a double bass player in the Munich orchestra.

As a composer Dimmler wrote mainly theatrical works, including several Singspiels for Munich in the late Mannheim tradition and a great many ballets which were well thought of in their time. Little has survived of these works, however, and his extant music is primarily instrumental: concertos for various instruments and several chamber pieces. His only published works, a set of six string trios in two volumes, are simple domestic pieces, always in three movements, very short and not very original. The slow movements (mostly andantes) belong stylistically to the *Empfindsamkeit*; the finales are simple rondos.

Various other members of the Dimmler family were musicians active in Mannheim and Munich. Dimmler's brother Joseph Dimmler (b Mannheim, ?c1761; d ? Munich, 13 Oct 1783), also a horn player, was a supernumerary in the Mannheim orchestra (1770-78) and in Munich (until 1780); it is uncertain whether the entry in the death register of the Munich Frauenkirche ('aged 22 years') applies to him. Gerhard Dimmler, perhaps another brother of Franz Anton, appears as a flautist in the Munich orchestra lists from 1786 to 1799, but according to a petition he addressed to the court in 1792 he appears to have been in the service of the Elector Palatine in Mannheim as early as 1777. Dimmler's son Anton Dimmler (b Munich, 24 April 1783) was a clarinetist and guitarist who according to Lipowsky made his first public appearance in Munich on 14 May 1795, playing a concerto by his father. A Martin Dimmler is recorded as a horn player in the Mannheim orchestra lists of 1774.

WORKS

DRAMATIC

- Singspiels: *Der Guckkasten*, Munich, Hoftheater, 1797; *Der Schatzgraber* (Les fosseurs), Munich, Schloss Seefeld, 1798, F-Pc, Die Zobeljäger, mentioned in Lipowsky (1811).

Ritterliebe, incidental music, 1796; c185 ballets, lost

ROLAND WÜRTZ

Dimov, Bojidar (b Lom, Bulgaria, 31 Jan 1935). German composer and conductor of Bulgarian origin. He studied composition with Vesselin Stojanov and the piano with Mara Petkova at the Sofia Conservatory; leaving Bulgaria in 1958, he continued his studies at the Vienna Academy of Music as a pupil of Schiske in theory and composition, also attending Jelinek's 12-note seminars and Cerha's practical course in contemporary music. Dimov graduated in 1964, participated in several Darmstadt summer courses (attending seminars given by Cage, Ligeti and Stockhausen) and moved to Cologne in 1968. There he took part in Kagel's courses (1969) and was appointed to teach at the Rheinische Musikschule and the Pädagogische Hochschule. He is a member of the composers' association Gruppe 8, led by Humpert, and is also leader of the ensemble 'trial and error', which he founded in 1970 and which sees its task in 'the authentic realization of new musical and concert forms'.

WORKS

(selective list)

Incantationes II, S, ens, elec, 1966-7, Komposition III, wind qnt, 1967-8, Raumspiel, pf, lv, ens, conductor, 1968-9, Continuum II, chamber orch, 1969, Invocation, 2 insts/ens, audience, 1970-71, Vereinigungen, 2 ens, 1972-3

MONIKA LICHTENFELD

Dimov Quartet. Bulgarian string quartet. It was formed in 1956 by Dimo Dimov (b Stara Zagora, 10 Feb 1938), Alexander Tomov (b Smolyan, 17 April 1938), Dimiter Chilikov (b Burgas, 14 Nov 1937) and Dimiter Kozev (b Sofia, 26 Dec 1938), who were all students at the Sofia Music Academy. The quartet gave its first concert in 1957; it won the gold medal at the 1959 music competition in Sofia, and the international string quartet competitions at Budapest in 1963 and Munich in 1965. In 1964 it started receiving state sponsorship, it has toured in the USA, Canada, Japan, Australia and elsewhere. Its repertory ranges from Haydn and Mozart to Webern, Penderecki and contemporary Bulgarian composers, and its performances are distinguished by stylishness, and subtleties of rhythm and accent, as well as by outstanding technique and tonal quality. Among its recordings are the quartets of Mozart, Beethoven, Schumann and Bulgarian composers. In 1972 the members of the quartet were appointed teachers at the Sofia Conservatory.

LADA BRASHOVANOVA

Di Murska, Ilma (b Zagreb, 4 Jan 1836; d Munich, 14 Jan 1889). Croatian soprano. She studied in Vienna and Paris with Mathilde Marchesi and in 1862 made her début as Martha (Flotow) in Florence. After appearances in Budapest, Berlin and Hamburg she was engaged at the Vienna Hofoper, where she sang for two seasons before going to London, where she first appeared at Her Majesty's Theatre in May 1865 as Lucia.

She sang regularly in London as a member of Mapleson's company until 1873, and again in 1879, by which time her voice had deteriorated. She sang Senta in the first performance in England of *Der fliegende Holländer* (1870); it was sung in Italian and was the first Wagner opera to be heard in London. She was considered one of the finest interpreters of the Queen of Night, and her repertory also included the Queen in *Les Huguenots*, Dinorah, Isabella in *Robert le diable* and Ophelia in *Hamlet*.

She made her American début in 1873 and returned to the USA in 1880 to teach, but soon went back to Europe and lived in comparative obscurity in Munich. Her voice had a compass of nearly three octaves, and her acting was said to have been original, though sometimes bordering on extravagance. Sutherland Edwards found her 'unrivalled in certain romantic and fantastic characters', and Klein summed her up as 'a phenomenal singer and a pure eccentric'.

D'Indy, Vincent. See INDY, VINCENT D'

Dinicu, Grigoras (b Bucharest, 3 April 1889; d Bucharest, 28 March 1949) Romanian violinist and composer. He studied at the Bucharest Conservatory (1902-6) with D. G. Kiriach (theory and solfège), Rudolf Malcher, Gheorghe A. Dinicu and Carl Flesch (violin), Dimitrie A. Dinicu (chamber music) and Alfonso Castaldi (orchestra) and later with Cecilia Nitzulescu-Lupu and Vasile Filip (violin). He was a violinist in the orchestra of the Ministry of Public Instruction (1906-8) and solo violinist with the Bucharest PO, directed popular music concerts (1906-46) and was leader of the Bucharest Pro Musica (1938-40). In addition, he made tours abroad, collected and arranged Romanian popular melodies and composed several pieces for violin and piano. Among these *Hora staccato* (1906) has achieved particular popularity as a violin encore; others include *Hora spiccato*, *Hora de concert*, *Improvisation à la Dinicu*, *Hora marisurului*, *Hora de la Chişorani*, *Hora Expoziţiei de Paris*, *Orientale à la tzigane* and *Sirba lui Tanţu*.

ANDREW LAMB

Diniz, Jaime (Cavalcanti) (b Água Preta, Pernambuco, 1 May 1929). Brazilian musicologist. He studied philosophy at the Olinda Seminary and theology at the Seminário Central do Ipiranga in São Paulo (1950-56), where he also studied the organ with Furio Franceschini and composition with Pedro Sinzig; in the late 1950s he studied the organ, sacred music, composition and musicology with Potiron and Bihan at the Institut Grégorien and the Conservatoire in Paris, and with Anglès at the Pontificio Istituto di Musica Sacra in Rome. On his return to Brazil he established the music department of the Federal University of Pernambuco (1960), where he became the conductor of the university

madrigal choir and (from 1962) a lecturer in music history, music education and composition, while also working as a parish priest in Recife. In 1961 he was appointed a member of the Brazilian Academy of Music. His work as a musicologist has revealed hitherto unknown documents and music manuscripts of colonial church music from the states of Pernambuco and Bahia. His discovery in 1967 of the manuscript copy of the *Te Deum* by the 18th-century composer Luiz Álvares Pinto, one of the earliest extant works of colonial repertoire, was an important contribution to the history of Brazilian colonial music.

GERARD BÉHAGUE

Diomedes. See CATO, DIOMÉDES

Dionigi, Marco (b. Poli, nr. Rome, d. probably at Parma, shortly before 4 May 1668). Italian music theorist. He settled at Parma, where until 1648 he was a priest at the Collegio di S. Girolamo attached to the church of S. Pietro. Before 1648 he was nominated apostolic prothonotary. On 13 February 1649 he was appointed *guardiacoro* of the third Office in Parma Cathedral, the cathedral records show that his successor was named on 4 May 1668 because of his death. He wrote a two-part treatise on plainsong, *Li primi tuoni, overo Introductione nel canto fermo* (Parma, 1648, enlarged 2/1667). It is a manual for practical use, but it also includes a certain amount of theoretical discussion, especially in the second part.

Dionysus [Dionysos; Bacchus; Bakchos]. Greek god, chiefly representing the unreasoning, irresistible life-force. His worship probably came into Greece from both Thrace and Phrygia. Among Homer's Olympians he is a newcomer, seldom mentioned; only one passage in the *Iliad* (vi, II.132-6) has any substance. During the 6th century BC, this Hellenized Thraco-Phrygian deity appropriated the characteristics of Zagreus, a non-

Olympian Zeus figure worshipped in Crete, and came under the refining influences of Orphic doctrine (see ORPHEUS), receiving a place of honour at Delphi in the religion of Apollo. Although the syncretistic relationship to Zagreus suggests a measure of identity with Zeus (see Euripides, ed. Nauck, frag.475), Dionysus was generally taken to be his son, born to Semele.

The mythic tradition concerning the birth of Dionysus and the one circumstantial Homeric reference foreshadow later references in associating strangeness, violence and madness with him. They do not, however, link him with music; this link was given special prominence in modern thought by Nietzsche's assertion in *The Birth of Tragedy* that plastic art is the province of Apollo and music that of Dionysus. This has distorted the true picture: on the one hand, Apollo cannot be dissociated from music, and on the other, the Attic festivals of Dionysus accorded only secondary - though real - importance to choral and instrumental performance (e.g. that of the dithyramb).

The actual relationship between these two deities was complex, as one detailed example may show. Since the Hellenic age, the symbolic distinction - real or supposed - between the Apollonian lyre or kithara and the Dionysiac aulos has influenced the interpretation of Greek culture. The aulos was undeniably the instrument of Dionysus's followers and worshippers, yet in Greek art and literature the god himself is never represented playing it. The 7th-century poet Alcman, however, stated that Apollo was an aulos player (Edmonds, frag.83), this is an apparent transference to Apollo of a Dionysiac attribute. Eventually Plato (*Laws*, §672c, I.8-d, I.3) was to link the two: he maintained that musical consciousness was given to men 'by the Muses, Apollo and Dionysus'. He nevertheless sought to banish the aulos from the god's liturgy (*Republic*, §399d, II.2-5, e, II.1-3). At Athens, such worship had become a quiet and decorous affair; hence Plato tolerated the Phrygian mode (*Republic*, §399a, I.3-c, I.4), although it

Dionysus represented as a kitharode, singing ecstatically to the accompaniment of his barbiton and attended by two satyrs playing clappers: detail from a cup (c.490 BC). Attic red-figure style (attributed to the 'Brygos painter'), in the Bibliothèque Nationale, Paris

was pre-eminently an aulos mode just as the Dorian was a kithara mode (Aristotle, *Politics*, §1342b, ll.1-3). These affinities were an important aspect of the relationship between Apollo and Dionysus. For Aristotle (*Politics*, §1341a, ll.18-24; §1342b, ll.4-5), the festivals of Dionysus, with their emphasis upon drama, were apparently the only proper occasions for the 'exciting' music of the aulos.

Greek vase-painters occasionally showed Dionysus - and often his followers - with the barbiton (see ALCAEUS). The aulos, already discussed, was still more closely associated with the satyrs and maenads who attended him. Clappers, cymbals and double-headed, tambourine-like drums originally had particular connections with his cult. Euripides used the actual metre of Dionysiac cult-hymns in the *Bacchae* when the maenads sing of their ecstasy, recalling the drums' deep rumble (l.156) and the clear tones of the aulos (ll.127-8). All these instruments, together with the syrinx, are mentioned by later writers in descriptions of Dionysus's power (e.g. Ovid, *Metamorphoses*, iv, ll.391-3, and Nonnus, *Dionysiaca*, xx, ll.327-32; xxiv, ll.151-4). The *rombos*, or bull-roarer, often associated with the rites of Cybele, is a Dionysiac instrument in Euripides' *Helen* (ll.1362-3).

The altar of Dionysus at Olympia was placed with that of the Muses (Pausanias, v, §14, x), an inscription from Naxos even gives him Apollo's epithet, 'Mousagetēs', 'leader of the Muses'. In Italy, where he was worshipped as Bacchus, music continued to have an important place in his liturgy (Livy, xxxix, §8, ll.5-6; Catullus, lxi, ll.261-4; and Ovid, *Metamorphoses*, xi, ll.15-18 are representative sources). Roman artists frequently took for their subjects satyrs and maenads, in many instances holding or playing an instrument, the god himself rarely appears. Only upon Greek soil could his cult truly flourish, and it is by virtue of the religious sensibility and musical culture of Greece that we must reckon with Dionysus.

WARREN ANDERSON

Dioxeian (Gk.: 'through a higher [note]'). The earliest Greek name for the interval of a 5th, found in the writings of Philolaos of Crotona (6th-5th century BC). By the time of Aristoxenos it had been replaced by the term DIAPENTE.

Di Paula [di Paula di Catanzaro], **Innocentio** (b ?Catanzaro, Calabria; fl 1615). Italian composer. He is known only by *Libro primo delle canzone villanesche* (Naples, 1615⁹), for three voices, which he dedicated from Catanzaro. Most of the pieces in it are settings of four or five four-line stanzas, all have two sections, which in about half the pieces cadence at the same pitch. The pieces are competently written and very short, with only touches of chromaticism and triple metre. The book also includes pieces by Francesca (one) and Fabio

Mancuso (four) of Catanzaro, the latter of whom published a book of five-part motets (now lost) at Naples in 1615, according to G. O. Pitoni (*Notitia de contrapuntisti e de compositor di musica*, MS, I-Rvat, C.G., 1/2, c1725, p.441)

Direct (Fr. *guidon*; Ger. *Wächter*; It. *guida*; Lat. *custos*). The symbol placed at the end of a staff (or page) to indicate the first note of the next staff. It is found in musical sources from the 11th century onwards, in the earliest manuscripts sometimes as an alternative to using a clef on the next line. It is the equivalent of the 'catchword' in literary works. The direct is sometimes used nowadays without reference to pitch but merely as a sign of continuation, and may therefore be regarded as the musical equivalent of '&c.'. The direct may take one of several slightly varying forms, the common basis of which is rather similar to the later mordent sign.

Direction (Fr.). CONDUCTING.

Direct psalmody. The chanting of a psalm without textual addition or repetition, that is without antiphon or respond, and without antiphonal alternation between choirs. There are two distinct types: the first and most common is the elaborate solo chant known as the TRACT. The other, less common but simpler, is the straightforward chanting of a psalm to a repeated psalm tone without addition or alternation. See PSALM, §II

THOMAS H CONNOLLY

Direzione (It.). CONDUCTING

Dirge. A burial song or (less commonly) one sung in commemoration of the dead, a song of mourning or an instrumental piece expressive of similar sentiments. The word is a contraction of 'dirige', the first word of the first antiphon in the first nocturn at Matins in the Roman Office for the Dead ('Dirige, Domine Deus meus, in conspectu tuo viam meam'). When, as often happened, the invitatorium ('Venite, exsultemus Domino') was omitted, the office would begin directly with the antiphon, and so in late medieval English the word 'dirge' came to be used in reference to the service as a whole. However, as in the similar case of 'placebo' (the initial word at Vespers in the same Office for the Dead), it soon took on a more general meaning and could be used for any song in the vernacular sung at a burial. In this sense a dirge has much the same connotation as a THRENODY or a lament, though each term carries its own shade of meaning. The dirge has perhaps the most doleful character of them all; it is more specifically associated with the time of burial and often has a march-like tread, reminiscent of a funeral procession.

As a poetic form the dirge is peculiarly English, and most settings of dirges have therefore been composed by Englishmen. The best known of medieval dirges is the anonymous 15th-century *Lyke-wake Dirge* from the north of England, which has been set a number of times, notably by Stravinsky in his *Cantata* (1952) and by Britten in his *Serenade* (1943). Both settings employ exact repetition to achieve that sense of fateful monotony that might be considered a hallmark of the true

dirge, but the two composers employ very different methods to avoid any tedium that might result from this. Stravinsky divided the poem's eight stanzas into four pairs, which he used to form a prelude, postlude and two interludes for other English lyrics, contrasted in mood. Britten's setting is a passacaglia in which the normal roles are reversed, the solo tenor continually repeating the melody, while the orchestral accompaniment changes for each strophe. Its processional character (the tempo marking is 'Alla marcia grave'), and its crescendo to a central climax followed by a gradual lessening of volume and intensity, recall Vaughan Williams's impressive setting of Whitman's *Dirge for Two Veterans* in his cantata *Dona nobis pacem* (1936).

Among Shakespearean dirges that for Fidele in *Cymbeline* ('Fear no more the heat o' the sun') has attracted several composers. Vaughan Williams set it for two voices and piano in 1922, and Gerald Finzi's setting for baritone and piano (or string orchestra) was included in the cycle *Let us Garlands Bring*, dedicated to Vaughan Williams on his 70th birthday in 1942. Among purely instrumental dirges must be mentioned the Dirge-canon which precede and follow the setting of Thomas's *Do not go gentle into that good night* in Stravinsky's *In memoriam Dylan Thomas* (1954).

MAI COLM BOYD

Dirigieren (Ger.) CONDUCTING.

Diringus, Richard. See DERING, RICHARD.

Diruta, Agostino (b c1595; d after 1647). Italian friar, organist and composer, nephew and pupil of Girolamo Diruta. In 1617 while still a friar and a student of theology he was organist at S Stefano, Venice. In the dedication of his *Messe concertate* (22 October 1622) he stated that he had been organist and choirmaster at Asola for two years. He titled himself as a priest and bachelor of theology. In 1630 he identified himself on a title-page as organist and choirmaster of S Agostino, Rome, a position he still held in 1647, the date of his last known work.

CLAUDE V PALISCA

Diruta [Mancini], Girolamo (b ?Deruta, nr. Perugia, c1554; d after 1610). Italian organist, teacher and music theorist. He was the author of the first com-

prehensive treatise on organ playing, in the form of a dialogue under the title *Il transilvano*, published in two parts (Venice, 1593, 1609).

1. **LIFE.** In a letter dated 1 February 1602 from Chioggia to the magistrates of Deruta, Diruta pleaded that after 30 years of work he desired to return to his homeland. This would indicate that he began his career as an organist in about 1572. On 19 June 1574 he entered the Franciscan monastery of Correggio, near Reggio Emilia, at the same time as Battista Capuani, who may have been his first teacher. He apparently went to Venice in about 1580: he acknowledged that he had as preceptors Zarlino, Costanzo Porta, and Claudio Merulo (*Il transilvano, seconda parte*, iii, 11). Merulo left Venice in 1584, so Diruta must have studied with him before that. If he did study with Porta, a fellow Franciscan, it may have been when Porta was in Ravenna (1580-85) or Bologna (1585-9). Merulo was more than satisfied with his pupil's accomplishments, for in a letter printed in *Il transilvano* (1593), he said: 'I take infinite pride that he was my product, because in this doctrine [of playing the organ] he has brought both to himself and to me singular honour, as may be expected of a person of much genius'.

In 1593, as revealed by the title-page of his book, Diruta was organist of Chioggia Cathedral. He was still there in 1602, as testified by the letter cited above, but the desire expressed in it must soon have been fulfilled, for in 1609 he identified himself as organist of Gubbio Cathedral.

On 10 April 1593 Diruta dedicated the first part of his dialogue to Sigismund Bathory (1572-1613), Prince of Transylvania and nephew of the King of Poland. Diruta's link with this prince may have been through Istvan de Jósika, probably the 'Transilvano' who speaks in the dialogue. Jósika was sent to Italy in 1591 to negotiate the prince's marriage to Leonora Orsini, niece of Grand Duke Ferdinand I of Tuscany. The second part of the dialogue, though dated 1609 on the title-page, was dedicated on 25 March 1610 to her as Duchess Leonora Orsini Sforza, for the engagement to Bathory was broken off and she married Alexander VII Sforza in 1592. Another mission of Jósika in Italy was to engage musicians for the prince's court at Gyulafehérvár, and it was probably in this connection that Diruta met him, for a fellow pupil of his teacher Merulo, Giovanni Battista Mosto, was choirmaster at Gyulafehérvár between 1589 and 1595, and Antonio Romanini, the prince's organist, was represented in *Il transilvano* by a 'Toccata dell'ottavo tuono'. In addition to the Transylvanian and Diruta, a third interlocutor figures briefly in the dialogue, the Venetian gentleman Cavaliere Melchior Michele, a papal legate, who was frequently sent to negotiate with Sigismund Bathory, and who in the dialogue and probably in actual fact introduced Diruta to Jósika.

2. **WORKS.** Diruta's treatise on playing the organ, which he praises as the king of instruments, was published on the instigation of Merulo, who believed that certain rules were necessary for playing his own and similar compositions, and the treatise probably sums up Merulo's own teaching. Diruta concerned himself with a multitude of the organist's preoccupations: the position of the player at the instrument, fingering, diminutions and ornamentation, the application of the rules of counterpoint, the church modes and the most suitable regi-

composed music, but the *commune* was adequate for playing 'di fantasia' or impromptu.

Diruta's toccatas, written in *contrapunto commune*, consist entirely of passage-work in one hand against chords in the other, unlike those of his contemporaries Andrea Gabrieli and Merulo, who used this technique in alternation with chordal and sometimes imitative passages. Diruta's pieces are true études in that each exercises some specific technical device, such as conjunct figuration (*di grado*), figurations in which there is a leap from a strong to a weak beat (*di salto cattivo*), or in which the leap is from a weak beat toward a strong (*di salto buono*). His typical ricercars contain a fugal section on one or a succession of subjects followed by a triple-time chordal closing section. His 21 organ hymns and eight *Magnificat* settings – one for each tone – are uniformly 16 semibreve measures long and incorporate the intonation and termination of each chant in such a way that the organist can expand the central section by improvising. They all treat imitatively motifs drawn from the standard hymn melodies and *Magnificat* tones.

The only compositions by Diruta known separately from *Il transilvano* are a set of motets in five parts on cantus firmi from the antiphons of the principal feasts. Only the soprano and alto partbooks survive.

Dis (Ger.). Dg; before the early 19th century also Ep. See PITCH NAMES.

Discant [descant, descaunt(e), deschant, deschaunt(e), dyscant, verb: *discanten*] (Middle Eng., from Lat. *discantus*: 'singing apart'; verb: *discantare*; Old Fr. *deschant*, *descant*; verb: *deschanter*). Type of medieval polyphony having a plainchant tenor, characterized by essentially note-against-note, contrary movement between the voices and the interchange of the consonances octave, 5th and 4th. In the 12th and 13th centuries it was further characterized by the use of the RHYTHMIC MODES, by formally balanced phrase-shapes, and by the fact that the plainchant basis was melismatic. It was not itself a musical form but a technique – in origin a technique for the improvising of two-voice polyphony. In the written repertory it is found within organal plain-

chant settings and clausulas; and, by abandonment of the plainchant basis and principle of melismatic tenor, also in the conductus. Settings survive for two, three and four voices.

I. Discant in France, Spain and Germany. II. English discant.

I. Discant in France, Spain and Germany

1 Etymology, definition 2. The distinction between organum and discant 3. Organum and discant in the 'Magnus liber' and its recensions 4. Discant in three and four voices 5. Later discant: England and Germany. 6. Later discant: France

1 ETYMOLOGY, DEFINITION. The Latin word 'discantus' came into existence in the 12th century from the Greek *diaphonia*, either by direct translation or by analogous word-formation. From the beginning, the word carried the implication not merely of 'sounding apart' (i.e. the concept of interval and its measurement, as in the Greek term), but also, more concretely, of 'singing apart'. It thus implied polyphony, which was developed in the West as a method of performing plainchant. This second implication then reflected back upon the original Greek term. Hence in medieval treatises on music the terms 'organum', 'diaphonia' and 'discantus' frequently occurred as synonymous terms for 'polyphony'. 'Discantus', however, as the latest of the three terms, occurred much less often with this general meaning, as will be discussed below. In addition there is the erroneous definition occasionally encountered of 'discantus' as genuine *biscantus* (i.e. 'double cantus' or 'double-song'), this probably has its forerunners in the numerous (and often incorrect) etymologies in musical treatises – 'diaphonia, a dya quod est duo' and 'diaphonia duplex cantus est' (see F. Reckow: 'Diaphonia', *HMT*, i (1972), §111b).

The meanings of the term 'discantus' as it occurred between the 12th and 17th centuries are all intimately interconnected:

- (i) polyphony in general;
- (ii) a certain type of polyphony (either to be distinguished from organum, or to be understood as improvised polyphony as distinct from notated polyphony),
- (iii) the part that is added to the tenor – thus the part that brings this kind of polyphony into being;
- (iv) the highest part (usually sung by boys) of a polyphonic setting (therefore equivalent to cantus, superius and soprano);
- (v) the high register of chorally constructed instruments, e.g. recorders, cornets, viols and organ stops.

Although polyphony can be seen as the basic factor of each of these categories, a simple historical link should not be presupposed without careful consideration. The first two definitions are the most closely connected and have the greatest historical significance; only these, and with them the third, are discussed here.

2. THE DISTINCTION BETWEEN ORGANUM AND DISCANT. It is necessary to establish initially whether the first definition is a case of the part standing for the whole, which would make the second definition the original; or conversely, whether the second is a narrowing-down of the first. In other words, was the word 'discantus' formed with the intention of providing a separate term for a new or specific type of polyphony? Current research seems to suggest that this was the case.

Despite this uncertainty, an issue possibly of greater importance has been clarified: the question of how the

terms 'organum' (in the restricted sense) and 'discantus' – terms that are normally contrasted within the generic concept of organum (in its wider sense) – differ from one another. For Riemann it was a question of whether there was any difference in kind, or whether the two were simply separated in time. In his *Geschichte der Musiktheorie* (Leipzig, 1898, 2/1921) he tried to draw a sharp distinction between 'organum treatises' – those up to Johannes Afflighemensis – and 'discant treatises' – those after him. He saw as real distinguishing features in the latter the rule of the contrary motion between the parts and the gradual increase in importance of the 3rd and the 6th. Against this, Steinhard (1921, p.220) argued that the treatises cited by Riemann did not represent a new style, but merely gave greater emphasis to the principle of contrary motion within the same style. However, this view rested no more than Riemann's on a thorough examination of all the surviving theoretical and practical sources. As usually happened with medieval concepts of this kind, when the concept as a whole went through a process of reformulation, its individual terms also underwent shifts of meaning and usage. Such shifts, however, do not happen in isolation: the things to which the terms refer change also, and these changes do not necessarily come about and become visible all at the same time. Moreover, in the case of 'discantus' it would scarcely be possible to undertake a definition without constant reference to organum – itself a considerably more complex concept.

Two different kinds of polyphony are intimated as early as Guido of Arezzo's *Micrologus* (c1025–6): one is characterized by parallel movement of the voices, the other admits changes in the interval between the voices. However, no further distinction is made, least of all a distinction of terminology. For this reason Eggebrecht has preferred to regard parallel organum, even in Guido's day, as a technique no longer practised. He sees it as a means of demonstration, or as a kind of technical preparation for the 'old organum' which was the first genuinely polyphonic organum (see Eggebrecht, 1970, p.25).

The basis of this improvised (therefore solo) style was a plainchant melody (or specific parts of one) most of whose notes lay above or between the added organal voices. From this stage of technical development there was a growing tendency after about 1100 to place the newly added organal voice or voices above the tenor. The real reason for this development should be sought in practical considerations of performance. Johannes Afflighemensis's solution (see *De musica cum tonario*, ed. J. Smits van Waesberghe, CSM, 1, 1950, p.157), which implies continual part-crossing and in which the organal voice 'alter per alienos sonos apte circueat', ought presumably to be seen not only as an injunction to avoid extending the total range too much and to assimilate the range of the new voice to that of the first voice, but also as an experiment in texture. However, this solution seems already to have been found unsatisfactory in France, although evidence of it is encountered in German traditions at a much later date (see Göllner, 1957); for, in a note-for-note setting the *vox principalis* and the *vox organalis* (i.e. the voice with the chant, and the added voice) can be heard only as an upper and a lower part. Ultimately the natural effect of the lower part as the supporter of the texture was soon realized and was exploited as such. In allotting this function to the most essential voice – the voice carrying the plain-

song – the other voice, the one most modern in style, was automatically brought into the foreground of the texture. At any rate, the placing of the *vox principalis* at the bottom of the texture, as the 'tenor', became the rule by the mid-12th century at the very latest.

The most important writings about 1100, probably all of French origin (the so-called Milanese, Berlin, Bruges and Montpellier tracts), described post-Guidonian organum – the 'new organum' in its earliest form – in a thorough and rather technical way and mentioned only one form. It was still an improvisatory technique, and was characterized by the prescription of unison or octave at the beginning, and of unison alone at the end. It employed all the intervals designated as *consonantiae* (thus including the 5th and 4th), interchanging them according to certain prescribed rules that allowed for – indeed, required – both parallel and contrary motion. It also featured a free alternation between syllabic and more or less melismatic delivery, in other words, between the elementary harmonic framework and a practical, ornamented performance involving, inevitably, other intervals as well.

The difference between the syllabic and melismatic types became fully evident only a generation or so later when the ornamentation of the *vox organalis* developed from being an optional extra into an essential component part. It is no coincidence that there is a sudden increase in written documents containing this music, among them particularly the so-called St Martial and Calixtine manuscripts (see ex 1). The term 'organum'

Ex 1 shows musical notation for a polyphonic organum setting of the Mass. The notation is in square neumes on a four-line red staff. The Tenor voice (bottom line) and the Organal voice (top line) are shown. The lyrics are: 'I Rex im - men - se, pa - ter pi - e, e', 'lei - son 4 Chri - ste, fi - li pa - tris sum - mi,', 'e lei - son. 7 Con - so - la - tor, dul - cis', and 'a - mor, e - lei son.'

might remain as a generic concept, but it now became necessary to have separate names for the two different styles of performance. This was accomplished first in two anonymous treatises (ed. Schneider and La Fage), where clear distinctions are made between, on the one hand, 'organum' in the special sense in which tenor notes were long-sustained and the *vox organalis* had

freedom to indulge in extensive melismas and, on the other hand, 'discantus' – a style that maintained 'equalitas punctorum', i.e. an approximately equal rate of movement in all the voices. Thus the distinction had nothing to do with contrary motion, a feature relatively common to both; it was primarily a matter of sustained-note tenor combined with melismatic *vox organalis* as against note-for-note settings in two parts ('punctus contra punctum'), or, more generally, of the dissimilarity or similarity of the parts concerned. (Cf ex.1 and ORGANUM, ex 9.) Thus the very form that diverged further from previous usage continued to be referred to as 'organum', while that which owed much more to tradition was called by the new name, 'discantus'. This may be because 'organum' had lost its specific meaning, but may also be due to a certain 'belief in progress' that was characteristic of this period ('organum' was indeed initially the more significant term, although the relationship was later reversed).

The technical production of an organal voice and a discant voice was in principle very much the same. However, dependence on the movement of the tenor meant that in discant the choice of intervals and the way the voices combined with each other had to be very directly controlled. It was for this reason that the theorists always attached special importance to it.

The rules described earlier, derived as they were from improvisatory practices, now underwent certain modifications. First and foremost, as part of a general change in the status of consonances the 4th receded gradually into the background and was replaced by the 3rd and the 6th. The latter were at first used only when they moved directly by step to a perfect consonance, but with their gradual acceptance as consonances this rule ceased to be observed.

In the St Martial manuscripts organum and discant occur side by side, but organum was already predominant. A generation later, at the beginning of what is often called the Notre Dame period, it was quite patently the principal form. The balance was radically shifted when, in about 1180, modal rhythm was finally developed and systematized and began to permeate both forms of music (see RHYTHMIC MODES). The view that this new rhythm came to be linked in some way specially with discant, giving it a particular modernity, is a misleading one. The two must have been very closely associated right from the beginning, because the passing and intermediary notes of the old discantus must have played quite a significant part in the development of the first mode (from which the other five were only developed later, evidently on the basis of literary models).

3 ORGANUM AND DISCANT IN THE 'MAGNUS LIBER' AND ITS REVISIONS. This development can be seen most clearly in the context of polyphonic plainchant settings. The most important collection of *organa dupla*, known as the *Magnus liber organi*, survives today only in versions dating from the 13th century. The original form of the cycle (1163–82), which is attributed to the 'optimus organista Leoninus' (Anonymous IV: CS, 1, 342), cannot now be reconstructed with any confidence as to detailed points of style; and yet (and this is the most important point) it cannot possibly have been wholly and exclusively in modal rhythm. In the surviving versions it is clear that through successive layers of reworking the melismatic organum sections became more and more repressed and were replaced by more

modern modal-rhythmic sections. The result is that, far more than in earlier examples, the repertory of two-voice organum seems to consist of individual sections (see CLAUSULA) of differing structure. (Anonymous IV ascribed this adaptation to the 'optimus discantor Perotinus', but he could only have been referring to the most important and not the sole adaptation; cf MAGNUS LIBER, ex.1; see also LÉONIN and PÉROTIN.) In this process, of course, it was not just arbitrary sections of the organum that were revised but, rather, those that were particularly suitable: above all, melismatic passages in the plainchant, passages whose text invited emphasis, tenor sections with an essentially striking structure (i.e. symmetrical note-patterns or phrases with some kind of sequential organization), passages that could be transformed into discant-like structures with as few changes as possible, sections that were traditionally used for this, etc. In any case, the prevailing distinction between organum and discant, that of sustained notes and melisma as distinct from note-against-note, was heightened by the presence or absence of modal rhythm in the voices. This was given authority in the theoretical writings of Johannes de Garlandia and Franco. With modal rhythm, the relative amount of movement in the various voices became standardized (However, quite apart from modal rhythm, the setting of relatively few duplum notes against any one tenor note remained a basic constituent of the new type of discant; the traditional definition of discant as 'aliquorum diversorum cantuum concordantia' could still be justified.)

The fitting of such discant sections into pieces of organum was particularly popular, and this undoubtedly has much to do with the modernity of modal rhythm. There was at the same time a reversion to the much earlier principle of executing not a whole chant but only certain parts in polyphony (particular words, sections, especially tropes), and of interpolating these into the monophonic context of plainchant. In keeping with this principle there were sections ('clausule sive puncta') that were, even by polyphonic standards, so often set in polyphony and so frequently incorporated into chant at the appropriate points, that they were assembled into special clausula-fascicles in manuscripts, ready for optional use in this way. Ludwig (1910) thus spoke of them as 'substitute sections' (*Ersatzteilen*).

Over and above this piecemeal interpolation of discant phrases, however, the incursion of modal rhythm also becomes noticeable in the two-voice *Magnus liber*. Gradually too the dupla sections with sustained-note tenor were transformed into modal rhythm or else were composed anew. It soon became essential to introduce a separate name for the intermediate form that occurred between the extremes of non-modal organum and modal-rhythmic discant; with Johannes de Garlandia this contingency came to be called COPULA.

As a whole it may be said that the modal rhythm in this repertory initially permeated the upper part (duplum) and only subsequently the tenor – starting with phrases of plainchant that were especially suitable. The reason for this was presumably the inviolability of the plainchant tenor, though there were probably structural considerations as well. Also connected with the swift further development of rhythm, and particularly with the rapid breakthrough of the system of modes, is the fact that during the 13th century the organum sections too became interpretable in terms of measured

rhythm (*fractio modi, modi irregulares* etc) and that from this time monophonic plainchant (*musica plana*) can be distinguished from polyphony as a whole (*musica mensurabilis*).

However, the solving of the technical problems of notation (which have caused much misunderstanding in the study of these areas since the 19th century) was not the only prerequisite for this. Above all, there were the technical achievements in composition, developed in the most far-reaching way within the context of the numerous modal-rhythmic clausula compositions. Composers learned to utilize the melodic line with its new rhythmic properties as a formal device and as a means of fashioning larger units. The frequent repetition of tenor cadences was linked primarily with an acceleration of tenor rhythm. The rational rhythmic arrangement of the tenor part progressed from groups of irregular longs and duplex longs, by way of regular sequences of single notes and ligatures, to complicated formulae lasting several groups of tones - a development that originated in a more basic artificial need, and one in which the roots of the later phenomenon of isorhythm with color and talea are to be found (see ex.2). With their increasing command of the techniques

Ex. 2

of composition composers began to experiment with voice-exchange, imitation, retrogression, hocket etc, as in ex. 3.

Ex.3

Alongside this development - perhaps the first in the history of Western music to spring directly from a formal, constructional idea - there existed others, including developments in subjective response, such as the increasing acceptability of the 3rd as a consonant interval for example, a complete change of melodic style, etc. Yet the future of discant writing was seen not so much in the clausula itself as in the motet - a form that arose out of the clausula by the addition of new text to the upper parts, and which was by then very widely used. This turn of events can be explained not least as a result of the waning interest in plainchant setting as a whole in favour of forms containing repetition patterns.

4. DISCANT IN THREE AND FOUR VOICES. Modal rhythm and discant setting, moreover, were prerequisites for a progression from two-voice to real three- and four-voice compositions, a development that evidently occurred for the first time with Pérotin about 1200. Only 'voices' that are fixed in an exact rhythm can be combined to form a shaped phrase. This is so even when, as was the case with Pérotin, the voices were composed not all simultaneously in relation to each other, but either independently or each one in relation to the tenor alone - and even though, in the spirit of successive composition, some voices might be omitted from or added to existing compositions. These two factors for the first time undeniably produced 'compositions' in the modern sense.

Such compositions were designated *tripla* or *quadrupla* - terms that served as qualifying adjectives to the noun 'organa'. The fact that these discant compositions could be so designated, merely according to their number of voices, demonstrates once again the capacity of the term 'organum' to function both as an overall term

for polyphony, and hence as a specific term for the category of plainchant settings. This does not, however, alter the fact that from the structural point of view these are discant settings, at least as regards the upper voices. Moreover, as these developments proceeded a differentiation in terminology becomes evident between the style of setting or method of composition on the one hand, and the form or type of music on the other.

This distinction had, however, already emerged in a different way, for not only did discant develop within the context of organum, i.e. of liturgical plainchant setting, it also developed in combination with the early forms as well to produce the second great genre of composition in Parisian music around 1200 and after, the polyphonic CONDUCTUS. The conductus was independent of plainchant, was newly composed as to text and tenor part, and was used no more than paraliturgically. As well as the problems it has in common with clausula composition, there are specific notational problems arising out of the syllabic underlay of text and simultaneous declamation in all voices. For this very reason, however, conductus generally presents the 'purest' and most skilful discant setting of the period, making use of modal rhythm and adhering largely to note-for-note and melisma-for-melisma movement among voices. Significantly, conductus began to fade in France just at the time when it began to duplicate the motet in function and in content. The two differed only in the origin and style of the tenor, and partly in the language of the text.

5 LATER DISCANT: ENGLAND AND GERMANY Outside the centres of development, and especially in England, conductus and the particular style associated with it proved considerably more durable, with the result that modern scholars (e.g. Handschin) have sometimes spoken of a 'conductus style'. As can be seen from the pieces in the 11th fascicle of *D-W* 677, which are almost certainly British, and the large group of pieces in the so-called Worcester Fragments, the sustained-note style was hardly ever adopted in England. Only discant technique was really ever cultivated. This was at least partly because improvised forms of discant had a longer and less interrupted history in England, the result being what is known as English discant (see §11 below), and meant that the combining of parts to form harmony (in modern terms, the harmonic idiom) could develop more quickly and more concentratedly (see ex.4). As a result this tradition was to play an important part in the development of the new sonority of the 15th century on the Continent as well. In German-speaking lands, on the other hand, both conductus and, to some extent, primitive note-against-note 'organum' remained derivative and peripheral, marking the end of a tradition.

6 LATER DISCANT: FRANCE In France itself, after Parisian polyphony had ceased to flourish, discant technique was the only new method of composition to be pursued. Organum was still cultivated for some time as a traditional form, but interpreted mostly according to mensural rhythm, which had evolved meanwhile from further developments in modal rhythm. Thus, according to Franco (c1280), organum was already 'partim mensuratum', and at the beginning of the 14th century Odington called it a 'genus antiquissimum'. Otherwise it was rewritten entirely in mensural notation, no new

Ex.4

composition taking place whatsoever. All 13th-century liturgical pieces based on plainchant, including the rapidly increasing number of settings of the Ordinary of the Mass, adopted exclusively discant technique whether they were in the direct tradition of the *Magnus liber* or stemmed from peripheral or older traditions such as that of the Spanish Las Huelgas Manuscript.

From the time of Franco to that of Philippe de Vitry the focal point of interest was the motet. Alongside this the secular song was beginning to develop (including in its sphere polyphonic settings of secular songs in the troubadour and trouvère traditions), and by the time of Machaut it had reached maturity and was at the centre of composition activity. The first aspect of development in all areas was rhythm. After the modal system had become outdated, the shortest note value available was further subdivided several times over, and similarly the tempo of the basic value was several times decelerated (see Besseler, 1926, p.214). With the basic possibility of dividing each notational value into two or three, an unprecedented rhythmic diversity was achieved that was exploited to the full in those examples of late 14th-century *Ars Subtilior* that today can be deciphered only with difficulty (see ex.5). The syncopations, suspensions, anticipations, complementary and counter-rhythms naturally also affect the overall structure, and in par-

ticular the harmonic structure of a piece. Nevertheless, so full a use of the rhythmic possibilities did not occur in all the voices of a composition to the same extent; for here too, it is evident that the practice was at first to differentiate between the relative movement of each voice, before the gradual equalization of movement set in during the 15th century as a result of influences from other techniques of composition, particularly from Italian canonic writing and English conductus techniques.

In another respect the development of discant followed the same pattern, though less dramatically. In the treatises of the *Ars Nova* the earlier advocacy of con-

trary motion took on the status of a general rule, to be relaxed only in the case of dissonances (imperfect consonances); these might occur in parallel movement, but with no more than four at a time in succession, and at first only in movement by step. In addition, they no longer had to be resolved on to the nearest consonance, they might now lead into a more remote consonance (for musical examples see Apfel, 1953). Finally, one dissonance might follow another (Philipottus Andreas, Antonius de Leno). Greatest emphasis was now laid, as it had previously been on the succession of (perfect) consonances, upon the carefully balanced succession of consonances and dissonances and their resolution. Also dissonance on the penultimate became the rule, and when necessary was reinforced by accidentals to ensure the effect of leading note and cadence in the modern sense. (It should be noted that the nature of the phrase was obviously altered by such cadences.)

This particular use of accidentals, even more than the handling of dissonances, shows that composers were beginning to discover the intrinsic dynamic and harmonic potential. Although harmony continued to be the product of several independently moving parts, it now emerged more and more independently into the foreground. Together with this change in aspect of the tonal system came the fact that the Greek notions of interval were finally replaced by the Latin ones, that the distinction between major and minor 3rds became a less important factor than hitherto, and that the acceptability of the two as consonances was exchanged with that of the 4th. Discant was also designated 'contrapunctus' for the first time as early as the treatises of the Vitry school and of Jehan des Murs. This designation, which had been developed from an earlier definition of 'discantus' soon became prevalent once the school of opinion gained ground that no longer construed musical style as the product of several 'voices' but viewed it rather as a combination of sound. The rules governing successions of consonances in discant soon became transformed into the part-writing rules of counterpoint. Thus counterpoint now stood in the same relationship to discant as discant had done previously to organum. Finally, in the 15th century, counterpoint achieved dominance.

II. English discant. Discant against a 'cantus planus' ('playnsong') is reported, in more or less detail, in several 14th- and 15th-century English treatises. The various descriptions show that with respect to contrapuntal rules and procedures discant in England did not differ from the general European discant tradition of the time. It involved, in the main, note-against-note counterpoint, with the cantus firmus in the lower of the two voices, contrary motion as the basic condition, prohibition of dissonances and of parallel 5ths and octaves, and recommendation of imperfect consonances, of which the various English authors respectively allowed three, four or five in parallel succession. (While 'the old techyng was that a man shal never take none imperfite acord bot if he hade a perfite after him', the English with their traditional fondness for imperfect consonances welcomed the proliferation of 3rds and 6ths in discant with such remarks as 'the mo imperfite tones that a man synges in the trebull, the meriere it es', and 'this maner of singyng is mery to the synger and to the herer'.)

Three characteristics set the English tradition apart from that of the Continent: (i) the recognition, by the

20

mid-14th century, of the possibility that the cantus firmus might be carried by the upper voice, to which the lower voice could fit a discant; (ii) the differentiation of voice ranges ('degrees') in which a discant above a cantus firmus could be accommodated, and the designation of the voices as mene, treble and quatreble (also referred to as 'degrees'); and (iii) the 'sight', which was a technical device applicable to the improvisation of a discant. The latter two features emerged in the late 14th century.

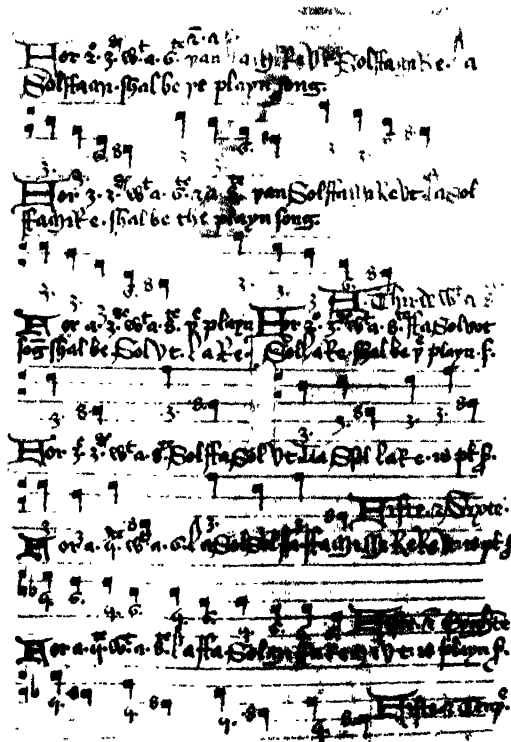

Pseudo-Tunstede (CS, iv, 294a; also iii, 360b), who wrote his treatise in 1351, and the approximately contemporaneous Anonymous V (CS, i, 367-8) both recognized that a discant could be sung below a cantus firmus, the former pointed out succinctly that the same contrapuntal rules apply for this as govern the invention of a discant above the plainchant. The far more detailed description by Pseudo-Chilston (see below) in essence demands the same contrapuntal procedure, except that he differentiated between countertenor and counter ('countir'). The former shares its range with the plainchant, so that, according to whether a passage of the cantus firmus lies high or low, the countertenor may correspondingly either descend as far as an octave below or ascend up to an octave above. The counter, on the other hand, lies below the plainchant; it may form a unison with it, but cannot cross it. 'Properli', the largest interval the counter can form under the cantus firmus is an octave, however, 'yf ye have a low voice, whan the plainsong gothe hye', the counter may also utilize the 10th, 12th, 13th and 15th.

The other two special features of discant in England are reported in the following treatises, all of which survive in English manuscripts datable from the first half of the 15th century, although some of the treatises were probably written in the later years of the 14th century: (1) Anonymous, *GB-Lhm Add.21455*, f.9; (2) Anonymous, in the same manuscript, ff.9v-10; (3) Richard Cutell (*Opinio Ricardi Cutell de London*), *GB-Ob* 842, ff.48-48v (Cutell is documented as a member of the college at St Paul's in 1394 and as cardinal a year later); (4) Anonymous, *GB-Cec* 410, II, ff.13v-15v; (5) Anonymous, *GB-Lbm Lansdowne* 763, ff.113v-116v (the so-called 'Pseudo-Chilston', who, in addition to his treatment of discant, countertenor and counter, and a passing reference to gymel, also discussed faburden); (6) Leonel Power, in the same manuscript, ff.105v-113. The last two items of this list are part of the compilation of musical treatises made by John Wylde some years before 1450. All but the second treatise (which is in Latin, and designates the discanting voice as medius, triplex and quadruplex, respectively) are in English.

The three 'degrees' of discant are defined in terms of the consonant intervals each may form with the cantus firmus. For the mene these lie between unison and octave, for the quatreble ('this degree of descant longth to a childe to syng') between octave and 15th, while the treble is variously defined; chiefly, its intervallic range lies between 5th and 12th.

Although the rules of discant contained in the treatises address musicians generally, including composers ('for hem that wil be syngers, or makers, or techers', as Power put it in his first sentence), the sight system as an aid in the craft of improvising a discant (i.e. 'first-species' counterpoint) seems specifically applicable to singers and teachers. In order to enable a singer to improvise a proper discant *supra librum* it

instructs him to visualize, in the staff on which the plainchant is written, the intervals he chooses to sing above the successive pitches of the cantus firmus. This is easily done in the case of Pseudo-Chilston's countertenor, but requires mental transposition (called 'fictus visus' by the Latin Anonymous) for all the other voices, since, as the author of the Latin treatise pointed out, the higher ranges of traditional discant, especially of a boy treble or quatreble, would otherwise force the performer to imagine a cumbersome staff of a great many lines (or leger lines). Power, who did not discuss the mene, stipulated mental downward transposition of an octave (see illustration and ex.6).

the respective downward transposition intervals for the treble and quaterle are the octave and the 12th, while the counter imagines his part a 5th higher than it sounds (a 12th higher for the 13th and 15th, since 'ther is no sight benethe the plainsong within 4 rwlis and 4 spacis that will serve it, but yf ye chonge your sight')

The term 'sight' actually had several related meanings: (i) imaginary transposition; (ii) the range of a 'sighted' voice (both 'in sight' and 'in voice'); (iii) that voice; (iv) discant by means of 'sighting'. In the later 15th century Hothby and Guilielmus Monachus still reported the treble sight of English discant, calling it *discantus visibilis* and *perfectio ocularis*. Their testimony as well as that of Nicolaus Burtius shows that the practice not only continued in England, but had also been adopted on the Continent.

The English treatises have been misinterpreted repeatedly in two important respects: English discant has been said by Bukofzer first to involve two simultaneously discanting voices, which secondly combined with the plainchant in the lowest voice to form mostly parallel 6-3 chords. This view has been proved invalid (by Georgiades, 1937; Kenney, 1959; Sanders, 1965). The hypothesis that an unwritten tradition of such parallel discant existed in England before the 15th century (Scott, 1971) is supported neither by factual evidence nor by probability. While in the 13th century 'discantus' was an umbrella term comprising the various species of polyphonic music (for two, three or four voices), in the course of the 14th century it became restricted to the meaning described in this article, i.e. one 'first-species' counterpoint above a cantus firmus. Only Pseudo-Tunstede (CS, iv, 294; also iii, 361a) reported a type of discant polyphony consisting of more than two voices, i.e. cantus firmus, two (or three) higher voices paralleling it in 5ths, octaves (and 12ths) in ornamental fashion, and one discant. Yet, in effect, this passage clearly remains within the bounds of tradition by describing how one discant can be applied to a cantus firmus, amplified by old-fashioned doubling. As the author pointed out, it sounds like a complex affair ('plures homines discantare apparent'), although 'in rei veritate' there is only one discantor. The remark of Anonymous V (CS, i, 366b) that 'totus generalis modus cantandi consistat aut in octavo aut in sexto', which might be cited in support of 6-3 chord parallelism in discant, is not elaborated and remains inconclusive. All other authors restricted the use of parallel imperfect intervals (see above).

English composers of the 14th and early 15th centuries wrote a considerable number of discant compositions (*res factae*) that are sometimes mistakenly associated with the conductus. Most of these consist of three voices, with the cantus firmus allotted to the middle voice. In its simplest and least attractive aspect this style is nothing more than note-against-note discant (see ex.7). But in most cases at least the top voice was given a somewhat livelier profile; subsequently, the bottom voice, too, often received more attention from the composers (see ex.8). There is no question, however, but that almost invariably only minimal adornments of a strictly functional style are involved; the rarity of 6-3 chord parallelism (see CANTILENA) corresponds to the restrictions placed by the treatises on the use of parallel imperfect consonances. (The hypothesis forwarded by Scott that the organ may have supported composed discants rests on purely circumstantial evidence.)

Ex.7 GB-WO Add. 68 (no. 85 in Dittmer's edn)

Ex.8 GB-Lbm Add. 57950 (CMM, xlvii no. 115)

The significance of these compositions is twofold. In the first place, the gradual expansion of the overall range brought with it the genesis of the counter, and allowed composers to turn more or less tentatively to designing bottom voices that had the quality of giving greater support than was possible by the generally conjunct style of Gregorian melodies. Secondly, since most of these compositions are settings of choral chants, both their stylistic modesty and their liturgical purpose indicate that such music was not solo polyphony (as in the preceding centuries), but was intended for a small chorus. The emergence of the latter as a new performing medium of cantus firmus polyphony obviously required a relatively simple repertory. The institution of the performance of ritual polyphony by balanced choral groups is a corollary of the expansion of the two-voice framework to two octaves. These various circumstances bear witness to the gradually increasing importance and musical expertise of the choirs of non-monastic institutions, such as collegiate churches, colleges and court chapels.

Discantus (Lat., 'singing apart'). See DISCANT, §I

Discography. A term concerned with the description, listing and study of sound recordings. It may be defined as the method and practice of describing sound recordings, a listing of sound recordings according to the procedures of this method and practice; or the study of one or more aspects of sound recordings in historical or other context. In current usage the term may be applied to all types of sound recording: disc, tape, wire, cylinder, piano and organ rolls, and audio-visual media.

In order to define a sound recording sufficiently, a full discography contains the details of the music, performance, recording etc., details of the type of recording and sometimes comments on the actual content. The principal sources of information are the labels and containers, ideally, these should give details of composer, title of the music (with details of the edition used), performer, name of label, name of manufacturer, name of series, issue number, matrix number, take number, and patent and copyright information. There may also be details of the date of recording and issue, duration, language of text and coded information about the location of the recording studio. Description of the physical form of a sound recording usually follows a standard pattern conforming to the type of recording; for a disc or set of discs the number of sides, diameter, speed, type of groove and number of channels are listed. The primary sources are, in fact, the discs themselves.

The secondary sources include recording studio logs, manufacturers' and dealers' catalogues and advertising materials, reviews, biographies of recording artists and organizations, and catalogues of archives and personal collections; of these the most useful are manufacturers' catalogues and catalogues of archives and personal collections. Other types of discography include subject groupings (art music, jazz, spoken word), catalogues of the works of one composer or one performer, catalogues of a country's recordings, or more specialized lists, for example arranged by quality, or research catalogues of a manufacturer's past output.

Early lists of recordings that were the results of ethnomusicological research include those of Béla

Vikár, Erich von Hornbostel, Bartók and Kodály. Supplementing these, and of more use to the general record collector, are periodicals containing a discography. Probably the first of these was the *Gramophone* (London, 1923-) devoted to reviews of recordings and articles about recording artists. This was followed by *Disques* (Philadelphia, 1930-), *Disques* (Paris, 1934-) and the *American Music Lover* (New York, 1935-). One of the most comprehensive series is that contained in *Audio Record Review*. Many record buyers use comprehensive composite trade discographies, each representing a large number of record labels. Of these the Schwann *Long Playing Record Catalog* (1949-), the *Bielefelder Katalog* (1953-), the *Gramophone Long Playing Classical Record Catalogue* (1953-) and the *Harrison Tape Guide* (1955-) have histories of continuing usefulness. The Library of Congress compilation, *Music and Phonorecords* (1953-), since 1963 books on music have been included), provides valuable lists of records in catalogue card format.

The beginning of discography as a practice embodying standards comparable to those of bibliography is considered to date from 1936, the year of publication of Delaunay's *Hot discographie* and of the first edition of *The Gramophone Shop Encyclopedia of Recorded Music*, the latter listing art music on American and European labels. Both the areas represented by these pioneer works were enriched by more comprehensive discographies, notably those of Rust and Jepsen for jazz and *The World's Encyclopedia of Recorded Music* for art music. A third area that has been intensively cultivated is the reconstruction of catalogues of early makers by such discographers as Deakins, Bennett, and Girard and Barnes. A striking example in this category, exceeding the scope and detail of the originals, is the comprehensive catalogue of Victor recordings being compiled by Theodore Fagan and W. R. Moran; entries in it include date and place of recording, based on the Victor studio logs, and speeds (revolutions per minute) determined by comparison with the printed score and other available documentation. An important discography combining artist listings as main entries and manufacturers' output is Bauer's catalogue (1947). Current developments in discography include attempts to standardize cataloguing procedures as well as to compile bibliographies of discography. Both these developments should eventually contribute to a comprehensive international union catalogue providing identification of recordings and locations throughout the world - a discographic counterpart of *RISM*.

Discordable [discordant, discordé]. See SCORDATURA

Discordato. See SCORDATURA

Disertori, Benvenuto (b Trent, 16 Feb 1887, d Milan, 22 Jan 1969). Italian engraver and musicologist. After studying music and art at Trent and the University of Vienna, he took the chair in engraving at the Accademia Brera, Milan (1931) and taught at the Scuola di Paleografia at Cremona (1950-53). He was famous for his engravings and watercolours of Tuscany and Umbria, and also became known for his research in the history of instruments and instrumental tablature. His editions of frottoles by Bossinensis are important studies of the early history of accompanied song, as are his several introductory chapters.

CAROLYN M. GIANTURCO

Disineer, Gerhard. See DIESENER, GERHARD.

Disis (Ger). DXX; see PITCH NAMES.

Disjunct. A term applied to a melodic line that moves by leap (i.e. in intervals of more than a 2nd) rather than in conjunct motion (by step).

Disposition. (1) The arrangement of different stops among the keyboards or divisions of a harpsichord or organ

(2) SPECIFICATION.

Dissonance. A discord, or any sound which, in the context of the prevailing harmonic system, is unstable and must therefore be resolved to a consonance (for a discussion of the theory and history of consonance and dissonance, see CONSONANCE).

Di Stefano, Giuseppe (b Motta Santa Anastasia, nr Catania, 24 July 1921) Italian tenor. He was educated at a Jesuit seminary in Sicily. One of his fellow students, an opera enthusiast, hearing him sing a popular song, was so excited by the natural beauty of the voice that he suggested he should take up singing as a career. He then went to Milan to study with Luigi Montesanto. He made his début in April 1946 at the Teatro Municipale, Reggio Emilia, as Massenet's Des Grieux, and first sang at La Scala in March 1947. Although not originally engaged for the 1947-8 season at the Metropolitan Opera, he made his début there in February 1948 as the Duke in *Rigoletto* and continued to appear there until 1952, returning again for the 1955-6 and 1964-5 seasons. Di Stefano confined himself until 1953 to the lighter parts in the repertory, such as Wilhelm Meister in *Mignon*, Elvino in *La sonnambula*, Fritz in *L'amico Fritz* and Nadir in *Les pêcheurs de perles*. His singing at that time was notable for its beautiful tone and the use of an exquisite *pianissimo*, the voice possessing a rich, velvety sound (though some critics even then faulted his bel canto style). In the 1953-4 season, however, he began to take on heavier parts; his singing became rougher and less elegant, and the voice larger and less pure. By the end of the 1956-7 season he had added Don José, Canio, Turiddu, Radamès, Alvaro in *La forza del destino* and Osaka in Mascagni's *Iris* to his repertory; thus, when he made his British début at Edinburgh in 1957, his Nemorino had less vocal charm than many people had hoped for. He sang Cavaradossi at Covent Garden in 1961, but during the 1960s his appearances became sporadic. In the 1973-4 season he was Callas's partner (as he had been in many recordings made during the 1950s) in the concert tour she undertook after her long period of silence.

HAROLD ROSENTHAL

Distin. English family of brass instrument manufacturers, musicians, music sellers and publishers active in the 19th century.

John Distin (1793–1863) in 1833 formed with his four sons a brass ensemble known as the Distin Family Quintet, which toured from 1837. In 1844 the family went to Paris, where they tried the new instruments of Adolphe Sax and immediately adopted them for their quintet. In 1845 John Distin established a firm, Distin & Sons, to sell music at 31 Cranbourn Street, Leicester Square, London, and in the following year they became the British agents for the 'saxhorns'. John Distin's eldest son, George, died in 1848, and it was as a quartet that the family toured the USA in 1849.

Henry Distin (*b* London, 22 July 1819; *d* Philadelphia, 11 Oct 1903), the second son, who had received his early training in music at the RAM, took over the family firm in 1849. In 1850 the firm began its own manufacture of brass instruments (which eventually led to a breach with Sax, who transferred his agency to the firm Rudall, Rose & Co. in 1853). Additional premises were opened about 1857 at 9 Great Newport Street, Long Acre, which became the principal place of business after 1859, when 31 Cranbourn Street was given up, the new premises were expanded in 1862, and again in 1866. The firm published much band music in the series *Distin's Brass Band Journal*.

During his lifetime Henry Distin obtained 13 patents for improvements in the design and manufacture of brass instruments: nine in England and four in the USA. He was one of the few British horn makers to adopt rotary valves, his own 'light valve' being patented in 1864. His efforts at improving valved brasses culminated in 1867 with a prize medal at the World Exhibition in Paris. In 1868 he sold the firm to Boosey & Co (which continued it as Distin & Co. until 1874). Henry Distin subsequently lost most of his wealth in several unfortunate business endeavours. In 1877 he went to the USA, where he was associated for a time with Moses Slater of New York and then with J. W. Pepper of New York and Philadelphia. It was during this period that he constructed an alto horn with seven bells which the player wore in a semicircle around the chest and shoulders. About 1884 Henry Distin established his own firm in Philadelphia; the factory, with his son, William, as foreman, was in Cressona, Pennsylvania. In 1887 the entire operation was moved to Williamsport. Henry Distin retired in 1889, leaving the management of the firm to Brau C. Keefer.

Distler, Hugo (*b* Nuremberg, 24 June 1908; *d* Berlin, 1 Nov 1942). German composer and organist. The illegitimate son of a manufacturer and a dressmaker, he went to school in Nuremberg, passing his final school examination at the Realgymnasium in 1927. During his

school years he learnt to play the piano and had instruction in music history and theory. Distler began his studies at the Leipzig Conservatory in the conducting class, with piano as his secondary subject; however, after a short time Grabner advised him to abandon these courses to take up composition and the organ. Friendships that were to last throughout his life quickly developed between Distler and his teachers Grabner and Ramin. His studies with Grabner, in particular, grew into a fruitful discussion, with the teacher learning from the pupil. Furthermore, Högnér, who taught liturgical organ playing at the conservatory from 1929, exercised great influence on Distler. In this way he had contact with two of the leading figures in the *Orgelbewegung*, a movement directed to a return to the organ sound of the Baroque and pre-Baroque. Grabner's tuition stemmed from Riemann's counterpoint teaching, and so from the Protestant chorale; the religious and sensitive Distler avidly assimilated these various influences, and rapidly developed them. Performances by St Thomas's choir under Karl Straube made him thoroughly familiar with new works and with the music of the 16th and 17th centuries, and the Leipzig Bach tradition encouraged him to study the work of the former Kantor. Finally Schütz's music was an important stimulus.

Distler's first two works were published during his student days, but his most fruitful years began only after he became organist of the Jakobikirche, Lübeck, where he produced a quantity of vocal music, particularly in collaboration with Bruno Grusnick and his Lubecker Sing- und Spielkreis. It was at this time, when he directed a children's choir and also the choristers of the Jakobikirche, that most of his sacred works were composed. His work with the musical youth movement resulted in the Lubecker Singtage, first held in 1932, whose focal point was community singing with Fritz Jöde.

In October 1933 Distler was appointed head of the chamber music department at the Lübeck Conservatory, and at about the same time he began teaching at the Church Music School, Spandau, Berlin. The motets of the *Geistliche Chormusik*, modelled on Schütz, are particularly profound works of the period; the *Totentanz* from this collection is the most notable expression of Distler's individual style. The year 1935 was taken up with the restoration of the Jakobikirche's organs, since Distler himself controlled the collection of funds and the work, and when it was completed he published a book on the organs. Difficulties arose in increasing measure as a result of the hostility of the Nazis to those who acknowledged the Church, and to church music. Despite his honourable appointment to the Staatliche Hochschule für Musikerziehung und Kirchenmusik in Charlottenburg, Berlin, Distler decided in April 1937 to move to Stuttgart to teach at the Württemberg Hochschule für Musik.

In Stuttgart Distler had at first to counter state antagonism, which was resisted through the solidarity of the professors at the Hochschule. Gradually his duties extended; he assumed the direction of the Essling Singakademie and then began work with the Stuttgart Hochschule choir. At the same time government pressures grew, and only the intervention of Gerhard Maasz was able to avert the denunciation of Distler's work as 'degenerate art' at the music festival in Düsseldorf in 1938. Distler achieved his greatest public success when the Stuttgart Hochschule choir gave the première of

sections from the *Mörke-Chorliederbuch* at the festival of German Choral Music in Graz in 1939; the event was regarded as the climax of the festival, but the dissemination of the work took place only after the war.

Distler was made professor in Stuttgart in May 1940, and this freed him from immediate war service. On 1 October 1940 he was appointed by Fritz Stein to succeed Kurt Thomas as teacher of composition, organ and choral conducting at the Staatliche Akademische Hochschule für Musik in Charlottenburg, Berlin. There he was contented in his work, although major compositional projects proved abortive; the *St John Passion* soon had to be abandoned and the enormous oratorio *Die Weltalter* stagnated after the complete formulation of the text. The burden of increasing aerial attacks, the deaths of friends, professional strain (Distler was made director of the Berlin State and Cathedral Choir on 1 April 1942 in succession to Alfred Sittard) and finally, and in particular, the hostility of the authorities and the constant threat of recruitment into military service, all contributed to the overburdening of his physical resources and profound spiritual depression that led to his death.

The basis of Distler's work was the rediscovery of old forms and genres, and his highly effective word-painting evolved from the music of Schütz. Distler's vocal music goes beyond its models in rhythmic and harmonic freedom, creating a quite individual style which was spread by choirs in Germany and abroad during the years after World War II, and which in turn stimulated further creative work. The organ pieces are similarly new in principle; something of their originality came from Distler's work with Baroque organs, primarily in north Germany. In both vocal and organ works the distinctive features of Distler's style are its pregnant rhythms and its harmonic boldness within a tonal milieu.

WORKS SACRED VOCAL

- op
2 Herzlich lieb hab ich dich, O Herr, 2 chorus 4vv, 1930

KLAUS L. NEUMANN

Distler, Johann Georg (b Vienna or nearby, 1760; d Vienna, 28 July 1799). Austrian composer and violinist. He was a favourite pupil of Haydn in the 1770s and also studied the violin. In 1781 he became a violinist in the Stuttgart court orchestra, and in 1790 was promoted to concert leader. In 1789 he was also named *Kapell-direktor* there and in 1791 music director. In 1796, because of mental illness, he returned to his family in Vienna, where he died. Two of his sisters, Franziska and Elisabeth, were singers, as was his sister-in-law, Christiane Marianne Regina Distler, wife of his brother Joseph Anton Thomas, an actor. The Mme Distler who sang in the Stuttgart opera in 1799–1800 was perhaps his widow Luise, who lived there.

Distler's two sets of three-movement string quartets opp 1–2 (Basle, 1791, 2/1795) were very popular, op.1 being republished in Augsburg, Paris and London. According to Schilling 'The facility and agreeableness of his ideas, along with his correct treatment of them, were probably the principal reasons for this'. A later set of six, op.6 (Augsburg, 1798), has mostly four movements, with a minuet as the second. Distler also published a popular violin concerto (Basle, 1791) and two trios for clarinet, violin and viola, op.7 (Augsburg, n.d.). A flute concerto is in autograph in the library of the Gesellschaft der Musikfreunde, Vienna. Six string quintets were advertised by Traeg in 1797, but no copy is known.

Distropha, tristropha [double apostrophe, bistropha; triple apostrophe]. In Western chant notations, groups of *apostrophen* (see APOSTROPHE), known collectively as *strophicus*, usually of the same pitch. They were distinguished from simple repeated *virgae* or *puncta* (see VIRGA and PUNCTUM) probably by the manner of their performance, although it is not certain what this may have entailed. Aurelian of Réôme spoke of a staccato reiteration (GS, i, 57), an interpretation favoured by most modern writers (for illustrations see NEUMATIC NOTATIONS, Table 1).

Ditfurth, Franz Wilhelm Freiherr von (b Rinteln an der Weser, 7 Oct 1801; d Nuremberg, 25 May 1880). German folksong collector. After abandoning his law studies at the University of Marburg (1820–25), he made the acquaintance of Spohr in Kassel. This, together with his interest in published folksong collections, inspired him to devote himself to poetry and music and especially to collecting folksongs. He took theory lessons with Moritz Hauptmann in Leipzig and also studied the music of the 15th and 16th centuries. From 1858 he was director of the Department of Old Music at the Germanisches Nationalmuseum in Nuremberg. He collected folksongs from Franconia and historical songs from Germany and Austria from the period 1618–1871.

HORST LEUCHTMANN

Dithyramb (Gk. *dithyrambos*). Name for Dionysus (cf PAEAN) and hence primarily a song in his honour. Although probably older, the term first appeared in a text (frag.77d) of Archilochus (fl early 7th century BC), where dithyrambs were already choral. They were made more literary by Arion (c600 BC) and were introduced in Athens by Lasus (6th century BC), perhaps in an elaborated form (see Pseudo-Plutarch, *De musica*, §xxix and §1141b–c). They became the subject of contests in Athens in the late 6th century BC and were written by eminent poets such as Pindar and Bacchylides. After about 480 BC a considerable stylistic change (associated with Melanippides and later Timotheus of Miletus and others) occurred, in which the aulos accompaniment seems to have become more important and in which solos, including the ANABOLE, were introduced; this development continued into the 4th century BC (Plato,

Laws, iii, §700*d*) and the dithyramb subsequently diminished in importance though surviving at Athens until at least AD c200.

Revivals of the term have generally been intended to evoke the wild and vehement qualities of Dionysus (Bacchus), even though these were not always evident in ancient dithyrambs. The term was revived in the 19th century by Tomášek for pieces in his opp.52 and 65 (c1815) for piano. They are sectional works, often ternary in form, with alternating stormy and lyrical episodes. The idiom of his day and his limited harmonic resources prohibit any marked Bacchic frenzy, but the occasional use of double octaves in syncopated rhythms indicates his intentions. Schubert, who certainly knew Tomášek's pieces, himself gave the title 'Dithyrambe' to a song (D801, 1824). The poem by Schiller is entitled *Der Besuch* and is an evocation of the gods of Greece; in it Bacchus leads the procession of Olympians, and Schubert conceived the song as a stormy and passionate bacchanal. There are also more recent examples, for instance a typically excited one for organ by Basil Harwood (op.7, 1892) and by contrast the last movement of Stravinsky's *Duo concertant* for violin and piano (1931–2), whose 'effect is that of an exalted threnody' (E. W. White: *Stravinsky: the Composer and his Works*, London, 1966, p.335).

Ditonus (Lat., from Gk. *ditonos*). The interval equal to the sum of two whole tones, usually perceived as a major 3rd. The term is found mainly in ancient medieval treatises on music, though some modern writers use the word 'ditone' for the interval of a major 3rd in equal temperament. The pentatonic scale C–E–F–G–B–C (or any transposition thereof) is sometimes called the 'ditonic scale' because the largest interval in it (C–E and G–B) is the *ditonus*.

Ditson, Oliver. American firm of music publishers. The company traces its history to the oldest music publishing firm in the USA, that of Ebenezer Batelle, who opened the Boston Book Store at 8 State Street in 1783 and shortly thereafter began selling music as well; two years later Benjamin Guild purchased the store and added a music publishing section and a circulating music library. Guild managed the firm until his death in 1796, when it was taken over by William Pinson Blake. William Pelham succeeded Blake the same year, and Pelham, in turn, was succeeded by William Blagrove in 1804. Seven years later, the business became the property of Samuel H. Parker who engaged an apprentice, Oliver Ditson (b 1811), in 1823. Ditson left the company three years later to work for Issac R. Butts, another Boston music publisher.

In 1833 the Parker building was destroyed by fire, but the following year the firm reopened at a new site at 107 Washington Street. In 1835 Ditson rejoined Parker and began publishing and copyrighting under Parker's auspices, and in 1836 the firm of Parker & Ditson was formed. After Parker's death in 1842, Ditson acquired the remaining interest in the publishing company. Three years later John C. Haynes joined Ditson, becoming a partner when the Oliver Ditson Co. was founded in 1857. A period of vast expansion followed, during

which Ditson bought more than 50 catalogues of other publishers throughout the country. By 1890 it was the largest music publishers in the USA with a catalogue listing over 100,000 titles including vocal music (45,000), octavo music (4000), instrumental music (48,000) and books (3000). The company acquired the old houses of Miller & Beacham of Baltimore, William Hall & Son of New York, and John Firth & Son, also of New York, and during the same period established the new companies of J. E. Ditson in Philadelphia, C. H. Ditson in New York, Lyon & Healy in Chicago, and the John Church company in Cincinnati.

Ditson published all types of music and music literature. From 1868 the firm also published *Dwight's Journal of Music*, which was successively renamed the *Monthly Musical Record* (1878), the *Musical Record* (1898) and, in 1901, *The Musician* (published until 1919). In 1897 the Ditson company initiated a series of educational books entitled *The Music Students Library*, the best known of these was the *Musicians Library*, begun in 1903, a projected 100 volumes of masterpieces of song and solo piano works, each to be edited by an authority in the field. In 1912 Ditson began a teaching series titled *Mitchell's Class Methods*, and in 1920 the 20-volume *Music Student's Piano Course*. The last of these series, *A Study Course in Music Understanding*, was designed for the non-specialist.

Oliver Ditson died on 21 December 1888. The firm continued to operate until 1937 when the entire catalogue was bought by Theodore Presser of Philadelphia.

W. THOMAS MARROCCO, MARK JACOBS

Dittersdorf, Carl Ditters von [Ditters, Carl] (b Vienna, 2 Nov 1739; d Neuhof, Pilgram, Bohemia, 24 Oct 1799). Austrian composer and violinist. A prolific and versatile composer, he was one of the most important figures of the Viennese Classical school, above all by virtue of his many symphonies and his Singspiels.

1. LIFE. Dittersdorf's father, originally from Danzig, worked as a costumier at the imperial court and theatre in Vienna and held the post of first lieutenant in the Viennese citizens' militia. Comfortable financial circumstances enabled him to give his children an extensive education and in addition to attending a Jesuit school the young Ditters received private instruction in music, French and religion. At the age of seven Ditters began violin lessons with a local teacher named König. Later, through the influence of his second teacher, Joseph Ziegler, he was accepted in the orchestra of the Benedictine church on the Freyung. There he was heard by the renowned horn player Hubaczek, whose efforts gained him a post at one of Vienna's foremost musical establishments, that of the Prince of Sachsen-Hildburghausen. Assuming the post on 1 March 1751, Ditters began a disciplined study of music in a stimulating environment. Trani, his violin teacher, soon discovered his flair for composition and commended him to Giuseppe Bonno, who offered him instruction in composition and introduced him to Fux's *Gradus ad Parnassum*. Except for a brief escapade that took him to Prague, he remained in the prince's service until 1761, when the prince left Vienna to assume the regency in Hildburghausen. Circumstance forced the prince to dis-

band his orchestra, but he secured employment for his musicians with Count Durazzo, theatre director at the imperial court.

Ditters, employed by Durazzo as a soloist and also as an orchestral musician at the opera and at court, experienced his first prolonged contact with dramatic music, which later became the focus of much of his effort as a composer. Early in 1763 he accompanied Gluck to Italy for the première of Gluck's *Il trionfo di Clelia*. There he gained some distinction as a violin virtuoso and met Padre Martini, Farinelli and other notable musicians.

Ditters's contract with Durazzo at the imperial theatre expired in the winter of 1764. Personal difficulties with Durazzo's successor, Count Wenzel Sporck, drove him to accept a post as Kapellmeister to the Bishop of Grosswardein rather than to sign a contract with Sporck. He entered the bishop's service on 1 April 1765, succeeding Michael Haydn, who had left Grosswardein in 1762. In his new post Ditters assembled a reputable orchestra and a small company of singers. Though continuing to compose instrumental music, he also began to write his first vocal works, which included the oratorio *Isacco* and several operas.

When the bishop disbanded his Kapelle in 1769, Ditters left Grosswardein and undertook travels. At Troppau he met his next employer, Count Schaffgotsch, Prince-Bishop of Breslau, and agreed to make an extended visit to his castle of Johannsberg near Jauernig. Early in 1770 he was named Knight of the Golden Spur through the prince-bishop's efforts on his behalf. In the autumn of that year he accepted posts as Kapellmeister to the prince-bishop and as *Forstmeister* in the district of Neisse.

As Kapellmeister Ditters worked at improving the orchestra and also persuaded the prince-bishop to build a theatre. By the spring of 1771 he had assembled a competent group of performers. Works introduced that season included his oratorio *Davide* and his comic opera *Il viaggiatore americano*. On 3 March 1772 he married Nicolina Trink (Demoiselle Nicolini), a Hungarian soprano at Johannsberg who had previously been a court singer at Grosswardein during Ditters's tenure there as Kapellmeister. The next year, on 5 June, Empress Maria Theresia granted him a certificate of nobility, by which he acquired the additional surname 'von Dittersdorf'. His ennoblement was a prerequisite to his appointment as *Amthauptmann* of Freiwaldau, which went into effect on 4 November 1773. In December of the same year, he conducted two successful performances of his oratorio *Esther* in Vienna. The oratorio, written for the Tonkünstler-Sozietät at Florian Leopold Gassmann's request, was regarded by Dittersdorf as his best work in that genre. After Gassmann's death (20 January 1774), Emperor Joseph II expressed interest in employing Dittersdorf to succeed Gassmann as imperial court Kapellmeister. But Dittersdorf, back in Johannsberg, showed no interest in the offer. Apparently, he remained active at Johannsberg until the court was temporarily dissolved during the War of the Bavarian Succession (1778-9). After the war he returned to his post as Kapellmeister; little else is known of his activities until 1786.

In Vienna in 1786, Dittersdorf conducted the first public performance of his oratorio *Giohbe*, also written for the Tonkünstler-Sozietät. His 12 symphonies based on Ovid's *Metamorphoses* and a Singspiel *Doctor und Apotheker*, which had been commissioned in Vienna,

Carl Ditters von Dittersdorf lithograph (1816) by H. E. von Winter

also received premières in that year. The success of *Doctor und Apotheker* led to commissions for two further Singspiels (*Betrug durch Aberglauben* and *Die Liebe im Narrenhause*), which were both well received, and an Italian opera (*Democrito corretto*), which failed. On 24 November 1786, while still in Vienna, Dittersdorf petitioned Friedrich Wilhelm II of Prussia for a post. Having no luck, he returned to Johannsberg in February 1787.

While conditions deteriorated at Johannsberg, new opportunities arose elsewhere in 1793, when Duke Friedrich August of Brunswick-Oels opened his court theatre at Oels. For this theatre Dittersdorf wrote at least 11 new Singspiels as well as a prologue *Die befreiten Gwelfen* and a dialogue *Der schöne Herbsttag*.

After the prince-bishop's death on 5 January 1795, Dittersdorf received only a small pension. Handicapped by arthritis and troubled by financial problems, he was offered lodgings by Baron Ignaz von Stillfried on the baron's property in Bohemia. He continued to compose and remained there with his family until his death, two days after dictating the final pages of his autobiography.

2. WORKS. Gifted with great fluency in composition, Dittersdorf wrote extensively in many genres, including orchestral, chamber and keyboard music, church music, oratorio and opera. The wide circulation of prints and manuscript copies of his works reflects the recognition he enjoyed throughout Europe during his lifetime. Relatively few autographs survive, however, which renders dating and authentication difficult, particularly of non-dramatic vocal works and instrumental music. For dramatic works, the substantial number of extant holographs and known dates of composition or first performance lessens the problem.

Within Dittersdorf's instrumental music, the sym-

phonies, approximately 120 works, stand out as a highly significant contribution. The more than 40 solo concertos form a second important group. Violin concertos figure prominently, Dittersdorf having been a virtuoso on the instrument, but he also wrote concertos for viola, cello, double bass, harpsichord, oboe and flute. The remaining instrumental works consist of divertimentos, cassations, serenatas, parthias, dances, duos, trios, quartets, quintets and miscellaneous piano works.

The development of Dittersdorf's style may be seen clearly in the symphonies, which were composed over a long period, comparable to that of Haydn's symphonic output. The evolution is particularly telling in the *allegro* themes, which range in content from groups of loosely connected motifs in the earliest style to tightly constructed musical sentences and paragraphs in more advanced works. Stylistic development is also evident in the progressively greater contrast and specialization of themes. Like the symphonies of Haydn, Dittersdorf's reveal a wealth of novel and convincing solutions to problems of form, from the earliest works to the latest; especially striking are his manifold, and progressively more sophisticated, patterns of theme distribution in first-movement sonata form.

A specially distinctive feature of Dittersdorf's instrumental music is its almost Haydnesque wit, a trait found most notably in minuets of the late symphonies and characterized by unexpected phrase extensions, deceptive cadences and various rhythmic surprises. Folk elements, too, often occur in the melodies, much in the manner of Haydn. In the design of phrases and themes, Dittersdorf incorporated both asymmetrical and symmetrical patterns, though these are occasionally subject to excessive repetition or sequence. Dittersdorf's harmonic language was mainly diatonic; his later instrumental works, however, sometimes incorporated chromatic harmonies and other enrichments such as altered mediant and submediant key relationships at important structural junctures. Of note is Dittersdorf's penchant for writing programmatic works, which include the *Sinfonia nel gusto di cinque nazioni*, a set of 12 symphonies based on literary extracts from Ovid's *Metamorphoses*, and *Il combattimento dell'umane passioni*, a seven-movement work, variously designated as 'divertimento' or 'symphony', and depicting human emotions.

Among vocal genres Dittersdorf's operas, operettas and Singspiels have far greater historical importance than his oratorios, masses and other sacred works. Three early attempts at opera, dating from the years in Grosswardein, are mentioned in his autobiography but are apparently lost. From the years at Johannesburg 11 operas are known, all Italian. According to a letter of 16 December 1776 from Dittersdorf to Prince Esterházy, nine of these operas were sent to the prince, of which five were performed at Eszterháza under Joseph Haydn's direction. All but one of the works sent to the prince are extant (in *H-Bn*).

Dittersdorf's most significant dramatic works are his Singspiels, written mainly for Vienna (1786–90) and for the ducal theatre in Oels (c1794–9). His first Singspiel, the highly successful *Doctor und Apotheker*, and his subsequent works in the genre, particularly *Betrug durch Aberglauben* (1786) and *Die Liebe im Narrenhause* (1787), helped to crystallize the form as it was to persist well into the 19th century. As Riedinger has shown, Dittersdorf attained a goal towards which

other Viennese Singspiel composers had also directed their efforts: the successful fusion of Singspiel in Hiller's style with *opera buffa*. He achieved this by incorporating folklike music, generally characteristic of the former, and the large-scale ensembles and finales of the latter. Although Dittersdorf's contribution to other genres, particularly the symphony, was also significant, it was through innovations in the Singspiel that he made his most lasting impression on music history.

WORKS

Edition C. D. von Dittersdorf *Ausgewählte Orchesterwerke*, ed J. Liebeskind (Leipzig, 1899–1904/R1970) [L]

(thematic index in Pulkert, in preparation)

DRAMATIC

- Il viaggiatore americano in Joannesberg (farce, S. I. Pintus), Johannesburg, 1 May 1771, lost
L'amore disprezzato (Pancratio, Amore in musica) (operetta buffa), Johannesburg, 1771, *A-Wgm*
Il finto pazzo per amore (operetta giocosa, 2), Johannesburg, 3 June 1772, *H-Bn*
Il tutore e la pupilla (dramma giocoso, 3), Johannesburg, 1 May 1773, *Bn*
Lo sposo burlato (operetta giocosa, ?Dittersdorf), Johannesburg, 1773 or 1775, *Bn*, also as Der gefoppte Brautigam (trans. Dittersdorf)
Il tribunale di Giove (serenade with prol), Johannesburg, 1774, *GB-Lm*
Il mascalco (operetta giocosa, 2), Johannesburg, 1 May 1775, *H-Bn*, ? identical with Der gelehrte Hufschmied (Kaffka)
La contadina fedele (opera giocosa, 2), Johannesburg, carn 1776, *Bn*
La moda o sia Gli scompigli domestici (dramma giocoso, 3), Johannesburg, 3 June 1776, *Bn*
L'Arcifanfano, re de' matti (opera giocosa, 3, ? C. Goldoni), Johannesburg, by 1776, *Bn*
Il barone di rocca antica (operetta giocosa), Johannesburg, by 1776, *Bn*
I visionari, Johannesburg, by 1776, lost
Doctor und Apotheker (Der Apotheker und der Doctor) (Singspiel, 2, G. Stephanie jr. ? after L'apothicaire de Murcie), Vienna, National 11 July 1786, *A-Wgm*, *Wn*, *B-Bc*, *D-Bds*, *Dlb*, *SWI*, vocal score (Mainz, c1786, Vienna, 1787), ed E. Fischer and F. Gessner (Berlin, 1943)
Betrug durch Aberglauben oder Die Schatzgräber (Der glückliche Betrug, Die dienstharen Geister) (Singspiel, 2, F. Eberl), Vienna, Kärntner, 3 Oct 1786, *A-Wgm*, *Wn*, *D-Bds*, modern edn (Leipzig n.d.)
Democrito corretto (opera giocosa, 2, G. Brunati, after J. F. Regnard), composed 1786, Vienna, National, 24 Jan 1787, *A-Wgm*, *Wn*, *D-Bds*, known under various titles incl. Silene (trans. Dittersdorf), Der neue Democrit (trans. H. G. Schmieder), perf. as Democrit der Zweyte, Hamburg, 27 July 1791, with altered text
Die Liebe im Narrenhause (Singspiel, 2, Stephanie), composed 1786, Vienna, Kärntner, 12 April 1787, *A-Wgm*, *D-Bds*, *Rp*, *F-Pc*, as Orpheus der Zweyte, Hamburg, 1788, with altered text and music, vocal score (Mainz, 1790)
Das rote Kappchen oder Hilft's nicht so schadt's nicht (Die rote Kappe, Das Rotkappchen) (comic operetta, 3, Dittersdorf, after F. Livigni Giannina e Bernadone), Vienna, Kärntner, 1788, *A-Wgm*, *D-Bds*, *LÜh*, vocal score (Mainz, 1792, Leipzig, 1792), ? also perf. Johannesburg, c1787
Im Dunkeln ist nicht gut munkeln oder Irrung über Irrung (25,000 Gulden) (comic opera, 2, C. H. Spiess), Vienna, Wiedner, Feb 1789, *A-KR*, also attrib. Piccini, see Riedinger, 231ff
Hieronymus Knicker (Lucius Knicker, Christostomus Knicker, Hokus Pokus oder Die Lebensessenz) (Singspiel, 2, Dittersdorf), Vienna, Kärntner, 7 July 1789, *A-Wgm*, *D-Bds*, *Dlb*, *Mbs*, ? also perf. Johannesburg, c1787, Vienna, Kärntner, 1787, vocal score (Mannheim, c1791, Leipzig, n.d.), ed R. Kleinmichel (Leipzig, 1890, Vienna, n.d.)
Die Hochzeit des Figaro (Singspiel, 2, ?Dittersdorf, after Beaumarchais), Brno, 21789, music lost, ? identical with Der Barbier vom Dorfe
Der Schiffspatron oder Der neue Gutsherr (Singspiel, 2, J. F. Junger/Dittersdorf), Vienna, Wiedner, 1789, *A-Wgm*, *D-Dlb*, as Der Gutsherr oder Gürg und Hannchen, Dresden, 1799; vocal score (Leipzig, 1793)
Hokus-Pokus oder Der Gaukelspiel (comic opera, 2, C. A. Vulpius/Dittersdorf), Vienna, Kärntner, 1790, *Dlb*, ov. (Mainz, c1794)
Der Teufel ein Hydraulikus (comedy, 3, J. F. E. Albrecht, after P. Weidmann Der Betelstudent), Grätz, 1790, *Dlb*
Der Fürst und sein Volk (pasticcio, 1, G. C. Claudius), Leipzig, 1795
March 1791, music lost, collab. F. A. Pterlin, F. G. Bertoni
Das Gespenst mit der Trommel (Geisterbanner) (Singspiel, 2, Dittersdorf, after Goldoni, Conte Caramella), Oels, 16 Aug 1794, *A-Wgm*, *D-Bds*, *Dlb*

- Don Quixote der Zweyte (Don Chisciotto) (Singspiel, 2, Dittersdorf), Oels, 4 Feb 1795, *Dlb*
- Gott Mars und der Hauptmann von Barenzahn (Gott Mars oder Der eiserne Mann) (Singspiel, 2, Dittersdorf), Oels, 30 May 1795, *Dlb*
- Der Durchmarsch (F. X. Girzik), Oels, 29 Aug 1795; arr Dittersdorf from J. B. Panek: Die christliche Judenbraut
- Der Schach von Schiras (Singspiel, 2, Dittersdorf, after A von Kotzebue: Sultan Wampum), Oels, 15 Sept 1795, *Dlb*
- Die befreiten Gwelfen (Die Gwelfen) (prol), Oels, 29 Oct 1795, *Dlb*
- Ugolino (serious Singspiel, 2, Dittersdorf, after H W von Gerstenberg), Oels, 11 June 1796, *Dlb*
- Die lustigen Weiber von Windsor (Singspiel, 2, Dittersdorf, after Shakespeare, arr G. C. Römer), Oels, 25 June 1796, *Dlb*
- Der schöne Herbsttag (dialogue, 1, after Metastasio: Vero omaggio), Oels, 29 Oct 1796, *Dlb*
- Der Ternengewinnst oder Der gedemütigte Stolz (Terno secco) (Singspiel, 2, Dittersdorf, after It. text), Oels, 11 Feb 1797, *Dlb*
- Der Mädchenmarkt (Singspiel, 3, K. A. Herklotz, after Saintfoix), Oels, 18 April 1797, *Dlb*, ? identical with Il mercato di ragazze, 1798
- Die Opera buffa (comic opera, 2, C. F. Bretzner), Vienna, Kärntnerthor, 1798
- Don Corbaldi ossia L'usurpata prepotenza (drama, 2), composed c.1798, ? Dresden, 1798

Ein Stück mit kleinen Liedern, opera based on Frau Sybilla trinkt keinen Wein and Das Reich der Toten, comic opera based on Amore in musica (trans Dittersdorf) perf Grosswardein, c.1767, lost, see writings (1801)

Der alte Überall und Nirgends, frag; Der reisende Schulmeister (trio, 1, A-Wgm, Auguste et Theodor: Die Nacht und Ungefähr (comedy)

VOCAL

(data approximate)

- Isacco, figura del redentore (Metastasio, trans Bishop of Grosswardein), oratorio, Grosswardein, 1766
- Il Davide nella Valle di Terebinto (Pintus), oratorio, Johannesburg, 1771, also known as Davide penitente
- L'Esther ossia La liberatrice del popolo giudaico nella Persia (Pintus), oratorio, Vienna, 19, 21 Dec 1773, A-Wgm, Wn, D-Bds, ov in L ix Giobbe (Hiob) (Pintus), oratorio, Vienna, 8-9 April 1786, A-Wgm, D-Bds
- Cantatas with orch Cantate auf das Geburts-Fest seiner Majestat des Königs (Berlin, 1781), Cantate auf Lichtmess, D-Bds, 2 cantatas, Grosswardein, 1765, 2 listed in Breitkopf suppl., 1778, 7 further works
- Sacred 4 masses, 4vv, insts, org, A-Wn, D-Bds, *Dlb*, PL-WRu, 12 further masses, A-KN, KR, D-Mbs, Requiem, Kyrie et Gloria, 5 offertories, antiphon, 4 5vv, insts, org, PL-WRu, 6 offertories, D-Rp, 8 litanies, 12 arias seu offertoria ex canticis Salomonis etc., 4vv, 2 vn, 2 fl/ob, 1-2 va, org (2 hn, vc ad lib) (Augsburg, 1795), c.160 arias, offertories, graduals, motets, 22 miscellaneous works
- Secular Das Mädchen von Kola ein Gesang Ossians, ana (Leipzig, 1795), 3 arias, S, insts, D-Bds, *Dlb*

ORCHESTRAL

(data approximate, for further details see Krebs)

- Syms [thematic index in Grave] extant publ sets 6 symphonies 4, 8, op 1 (Amsterdam), 6 as op.4 (Paris, 1769), 3 as op 5 (Paris, 1769), 3 as op 6 (Paris, 1773), 4 as op 7 (Paris, 1773), 6 as op 13 (Paris, 1781), 3 symphonies expriment 3 métamorphoses d'Ovide, nos 1-3 (Vienna, 1785), L. i-iii [3 MS syms on Ovid's Metamorphoses, nos 4-6, *Dlb*, H-Bn, L iv-vi, nos 7-12 lost, except in arrs for pf 4 hands by Dittersdorf]; further extant edns listed in RISM, A/1/2, incl Sinfonia nel gusto di 5 nazioni, 4 insts (2 ob, hn ad lib) (Paris, 1767), many sources, esp. A-Gd, KR, LA, Ssp, B-Bc, CS-Bm, KRu, Pnm, D-Bds, *Dlb*, DO, HR, Rtt, SWI, GB-Lbm, H-Bn, I-Gd(I), Fc, US-Wc; 3 syms ed in DTÖ, lxxxii, Jg xliii/2 (1936/R1960), 3 further syms, L vii-viii, xi (incl Grande symphonie Le carnaval ou La redoute), c12 in contemporary anthologies, 59 authentic syms listed in Breitkopf suppl. (1766-87), c210 syms attrib Dittersdorf, of which c120 may be authentic
- Concs 18 for vn, incl 2 in A-Wgm, 16 listed in Breitkopf suppl. (1766-77); 3 for 2 vn, 1 ed in Concertino (Mainz, 1964), 5 for va, incl 3 listed in Breitkopf suppl. (1776-7); 1 for vc, D-SWI; 2 for db, incl 1 in SWI; 1 for va, db; 1 for fl, ed in Corona, liv (Wiesbaden, 1948); 4 for ob, incl 3 listed in Breitkopf suppl (1775), 5 for hpd: 1 publ (Berlin and Amsterdam, 1776), 1 in Bds, autograph, 1799, 1 in *Dlb*, 3 listed in Breitkopf suppl. (1772-3), 1 ed in NM, xli (1929); Grosses Concert, 11 insts, 1766, 2 for str qt, orch, *Dlb*, 2 concertinos, 1 for 2 vn, 2 va, 2 ob, 2 hn, bn, b

CHAMBER

(data approximate)

MARGARET H. GRAVE

Dittmer, Luther A. (Ibert) (b Brooklyn, New York, 8 April 1927). American musicologist of German descent. He took the AB in 1947 and the AM at Columbia University in 1949; he also took courses at the Juilliard School of Music and under Kinkeldey at Harvard. In 1949 he began studies at the University of Basle, where he was taught by Handschin (musicology), Wilhelm Altwegg (Germanic studies) and Albert Bruckner (Latin palaeography); he received the doctorate at Basle in 1952 with a dissertation on the Worcester Fragments. He taught at Wagner College (1953-4), Adelphi College (1954-8) and the Manhattan School of Music (1955-7). In 1958 he became associated with Brooklyn College and the PhD music course at the City University of New York. He was director of the Institute of Mediaeval Music, which he founded in 1957. In 1976 he became head of the music department at the University of Ottawa.

Dittmer's interests include French and English polyphonic music of the 13th and 14th centuries and 16th-century Huguenot music, and as director of the Institute of Mediaeval Music he has provided scholars with facsimiles of MSS including the major Notre Dame sources and translations of theoretical writings. He has also compiled a complex catalogue of the Worcester Fragments with transcriptions of as many of the polyphonic pieces as could be deciphered. His translations of theorists (which have been criticized for in-

accuracies) include writings on the Notre Dame School and on mensural notation.

PAULA MORGAN

Dittrich, Paul-Heinz (b Gornsdorf, Erzgebirge, 4 Dec 1930). German composer. He studied composition with Finke and choral conducting with Ramun at the Leipzig Musikhochschule (1951–6). After working as a choir-master in Weimar (1956–8) he attended Wagner-Régeny's composition master classes at the German Academy of Arts, Berlin (1958–60). He was artistic director and conductor of a Berlin folk ensemble (1960–63), and thereafter lectured as Oberassistent in theory and composition at the Berlin Hochschule für Musik. From the early 1970s his music became more widely known through performances in West Germany, notably at the 1973 Donaueschingen Festival (*areae sonantes*). Dittrich has developed from early alterations with the traditions handed on by his teachers to an independent preoccupation with linguistic and phonetic ideas, in both instrumental and vocal music, aiming at a 'phonetic-instrumental poetry' through a mixture of tones, noises and speech. In 1972 his *Schlagzeilen* received first prize at the Boswil composers' competition.

WILFRIED BRENNECKE

Divertimento (It.: 'diversion', 'recreation', 'enjoyment'; Eng. and Ger. by usage; Fr. *divertissement*). A musical form, prominent in the Classical period.

1 The word 2 Form 3 History

1. THE WORD 'DIVERTIMENTO'. Following its original Italian meaning, 'divertimento' is generally understood, first, to denote a work primarily designed for the entertainment of the listeners and the players, it presupposes on the composer's part a certain lightness of approach, though without excluding the possibility of high artistic achievement, such as is found in divertimentos by Haydn, Boccherini and Mozart. Second, a divertimento could serve as background music for some social gathering such as a conversazione or a banquet. H. C Koch (1802) defined the divertimento as follows: it normally had solo instrumentation; it was neither polyphonic nor extensively developed like the sonata, it was intended to please the ear rather than express different shades of emotion; historically it stood between the parthia and the quartet or quintet. This meaning seems to have crystallized about 1780; before then it was more variously applied, but almost exclusively to music for solo instruments. Its true historical meaning, then, is 'a solo work' rather than 'a diverting work'.

Various other forms of outdoor music or table music (SERENADE, CASSATION, FINALMUSIK, NOTTURNO, NACHTMUSIK, PARTITA, FELDPARTHIE, FELDMUSIK, TAFELMUSIK) are related to the divertimento; the titles all have different shades of meaning, but the categories often overlap. Some scholars have regarded 'divertimento' as a generic term for all such outdoor music, others have regarded it as simply the most generally applicable collective term; still others view each form as a separate entity. It should be added that Hausswald, in his work on Mozart, has taken the serenade as the most general category.

The inexactitude with which titles were applied, by composers, copyists and publishers, makes it still harder to differentiate between the various types of work allied to the divertimento (or to divertimento-like music in general). Titles were freely interchanged; a work described by any of those listed in the preceding paragraph might equally appear in other sources as 'sinfonia', 'sonata', 'trio', 'trattenimento' or 'allettamento'. The lack of effective copyright laws made control of a title virtually impossible in the 18th century. The form, the number of instruments used, the function, the place or even the hour of performance might affect the title chosen. Sometimes titles were coupled to provide clearer definition (Mozart, *Serenata notturna* K 239). One title did not necessarily exclude another but might suggest a different emphasis. 'Divertimento' often replaced 'sonata' in south German music in 1760–75, and was common in the Latin countries; the frequency of the term's

use helped it to become regarded as a comprehensive one. From 1780 onwards the title 'divertimento' was the commonest among those applied to music of a light character. The ways in which the various related titles have been applied, and their individual meanings, are discussed in separate entries under the headings concerned.

2. FORM. Studies of the divertimento – and this applies equally to the serenade and the nocturno – have generally been confined to Mozart's works and have not examined the form in wider contexts; and the significance of the divertimento's normal cyclic structure has not been fully recognized. It may comprise from one to nine movements, and occasionally as many as 13, and is thus suite-like in its movement structure.

From the time of Wagenseil, the Austrian divertimento for harpsichord usually had three movements, Allegro–Andante–Allegro, or Allegro–Minuet–Presto or Allegro; this is the form used by Haydn in his youth. In his keyboard pieces of the 1750s or 60s the title 'partita' can be found alongside that of 'divertimento', though other Austrian composers preferred the term 'divertimento'. Earlier divertimentos, with a more polyphonic texture (such as those by Porsile, J. C. Mann, Wagenseil and Asplmayr), often followed this three-movement plan, but composers varied the choice and arrangement of movements by including dance-like ones as in the earlier suite. Their divertimentos have up to nine movements. Haydn partook of this tradition. While he retained the three-movement plan in his keyboard divertimentos, in the *Divertimenti a tre* and in the nocturnos for orchestral performance, he favoured a five-movement divertimento form for the *Divertimento a quattro*, *a cinque*, etc; this was widely used by his contemporaries and may have influenced Mozart, who generally preferred the divertimento in five or more movements (though his divertimentos for wind alone are mostly in four). A five-movement structure, consisting of Allegro first and last movements, minuets second and fourth, and a central Andante, was almost a norm during the 1760s. The further evolution of this form, by the omission of the second minuet, led Haydn to the classical four-movement string quartet.

The form of the typical divertimento first movement is characteristically *galant*. It follows the structure usually described as 'rudimentary sonata form': the movement is binary (with repeats of both sections), reaching the dominant (relative major in the rare minor-key movements) at the end of the first, with the principal subject reappearing immediately after the double bar (less often the second subject), and a shortened reprise after a modulating passage. (This avoidance of thematic or motivic elaboration no doubt led to the use of the term 'divertimento' for free interludes in fugues.) In its cyclical formation, and in the structure of its first movement, the divertimento forms a clear historical link between the suite or partita and the sonata.

3. HISTORY. The earliest known use of the term 'divertimento' as a title is in a collection of vocal works by Carlo Grossi: *Il divertimento de' grandi: musiche da camera, o per servizio di tavola* (Venice, 1681). This title makes clear the closeness of the divertimento to banqueting music, a relationship maintained to some degree during much of the 18th century. The term was first applied to instrumental music in Giorgio Buoni's *Divertimento per camera* for two violins and continuo

op.1 (Bologna, 1693) and (in its French form) by Johann Fischer in his *Musicalisches Divertissement*, a collection of overtures and suites (Dresden, 1699–1700). (The term 'DIVERTISSEMENT' had been used in France from the late 15th century; it was extensively applied in the 17th and 18th centuries to a 'diverting' interpolation within a larger stage work.) During the early 18th century terms like 'trattenimento', 'allettamento' and 'ballo' were often used by Italian composers for sonatas of a lighter kind, rather than 'divertimento'; Francesco Durante, however, wrote *Sei sonate divisi in studi e divertimenti* for keyboard possibly in 1732.

In the pre-Classical and early Classical periods the divertimento was much cultivated, particularly at the courts, large and small, of south Germany, Austria, Bohemia and to some extent north Italy, and encompassed all types of music for solo instruments. The forces employed varied a great deal, as is to be expected in a repertory largely created for occasional use. Three main types of instrumentation are found: for keyboard, with or without accompanying instruments; for wind ensemble (commonly based on two oboes, two bassoons and two horns), and for strings (trio, quartet or quintet), often augmented by two horns, sometimes flute, oboe or both.

The divertimento for keyboard was closely akin to the sonata. Among those who wrote solo keyboard divertimentos are Wagenseil, Haydn and Joseph Schuster; the more popular accompanied form was used by Georg Benda, Leopold Hofmann, Rosetti, Piccini (according to the Breitkopf catalogue), F. X. Richter, Vanhal, Haydn and Mozart (K 254). The wind repertory includes several six-part divertimentos by Mozart and three by Haydn; Mozart also wrote divertimentos for less usual wind combinations, notably a set for clarinets and basset-horns and others for two each of oboes, english horns, clarinets, bassoons and horns. Wagenseil composed divertimentos for two each of oboes, english horns, bassoons and horns, which also exist as 'Suites de pièces' for obbligato piano with two clarinets, two bassoons and two horns. The divertimento for strings, with or without other instruments, is the most important category. In this form the divertimento is sometimes difficult to distinguish from other genres, like the string trio, the quartet, and even the symphony and the concerto; it is likely that in some cases the composers had orchestral rather than solo performance in mind. Among those who wrote divertimentos for strings, sometimes with one or more of flutes, oboes and horns, are Asplmayr, Dittersdorf, Hofmann, Holzbauer, Kammel, Mann, Monn, Pichl, Vanhal, Gassmann (a large number for trio and quartet), Jommelli (a set for quartet), Boccherini (sets for quartet and for flute with string quintet) and several Mannheim composers, including J. W. A. and C. Stamitz and G. Toeschi, as well as Michael and Joseph Haydn and Leopold and Wolfgang Mozart. Joseph Haydn wrote several divertimentos including the baryton, some for string quartet and quintet, a number with flute, oboe and strings and a small group of late works for two flutes and cello; a set of six published as his op.31 (HX:12), for flute, horns and strings, are largely arrangements. Mozart's most important divertimentos are those for strings and two horns, K 247, 287/271b and 334/320b, substantial, six-movement works though generally in a light vein; they were composed for various Salzburg families. Mozart's

string trio K 563, a piece of orthodox chamber music, is entitled 'divertimento' presumably because of its six-movement form. There are very few divertimentos from north Germany (C. P. E. Bach made no contribution to the form) and a small number from France, where the title 'divertissement' was sometimes used for sonata-like works of a light character.

Many of the divertimentos of the period 1760–80 have the lowest part marked simply 'basso', a term which designated the lowest part and was not an instrumental specification. Recent research (by Bär and Somfai) suggests that this part, possibly even in string quartets, was played not only on a cello but also on a double bass, and perhaps by a bassoon as well. In works performed in the open air, the part was normally played on a double bass alone or with bassoon (a bassoon is specified with the 'basso' of Mozart's K205/173a, with violin, viola and two horns). But it is unlikely that a double bass was used to double or replace the cello in string quartets written after 1770.

Changing attitudes to music and changing social conditions brought about the end of the divertimento's existence in the last years of the 18th century. Neither Beethoven nor Schubert wrote divertimentos, though Beethoven's op.25 Serenade is one in all but name and Schubert was among the composers (who also include Steibelt, Moscheles and Kuhlau) to use the term 'divertissement' for light and brilliant works for the piano. In the 20th century several composers have applied the title to music of a comparatively easy-going, diverting character: they include Busoni (for flute and orchestra, op.52, 1920), Bartók (for strings, 1939), Berkeley (for chamber orchestra, op.18, 1943), Stravinsky (a concert suite, 1949, from his ballet *The Fairy's Kiss*) and Henze (for two pianos, 1964).

HUBERT UNVERRICHT

Divertissement. French term used since the 17th century, partly as an equivalent of the Italian *DIVERTIMENTO* but also in wider senses for music, usually with spectacle, intended for entertainment or diversion. It could apply, in the 17th and 18th centuries, to a simple pastorate or to an entire month's entertainment of which the pastorate was but one modest part; a chamber cantata might be subtitled 'divertissement' (for example, Bernier's fifth book of cantatas 'en manière de divertissements'), and all six volumes of Mouret's music composed for the Nouveau Théâtre Italien are grouped generally as 'divertissements'.

Two general categories of divertissement may be distinguished. The first and more important is the divertissement of vocal solos, ensembles and dances used as a portion of a larger stage work and often, but not exclusively, ancillary to the main action. Such are the divertissements found within the acts of pastorales, *tragédies lyriques*, *opéras-ballets*, productions of the Théâtres de la Foire, parodies and *opéras comiques*. Divertissements in spoken drama, whether within or between the acts (where they were sometimes called 'intermèdes'), were more closely related to the action, for example those by Lully and Charpentier for the *comédies-ballets* of Molière and those by Charpentier, Lalande, Collin de Blamont, Mouret, Gillet, J.-B. Quinault, Rameau, Grandval and Blaise for the plays that P. and T. Corneille, Fuzelier, Piron, Legrand, Regnard, Dancourt, Boissy and Marivaux wrote for the French and Italian theatres. Divertissements were written by Campra, Charpentier, Collasse, Desmarests, Clérambault and Blainville for insertion between the acts of Latin tragedies performed each August at the Jesuit Collège Louis-le-Grand to mark the end of the academic year.

Many divertissements of the Lully–Quinault *tragédies lyriques* show skilful liaison between dance and dramatic action. In the divertissement of Act 2 of *Roland* (scenes iii v), for example, the bucolic levity of a village wedding offers the greatest possible contrast to the mounting anger of the distraught hero. Cahusac elevated the *dance en action* to a dramatic principle in his texts for Rameau (*Les fêtes de Polymnie*, *Les fêtes de l'Hymen et de l'Amour*, *Zais*, *Naïs* and *Zoroastre*). Later in the century, Jean-Georges Noverre made this the basis of his *danses en pantomimes*.

A second category comprises works entitled 'divertissement' which are self-contained musical entertainments, usually on a pastoral or allegorical theme, in single or multiple acts such as Campra's *Venus, feste galante* (1698), a divertissement in prologue and one act. Works meeting this description, however, were not

always called 'divertissement'. At the height of the *grand siècle*, this type of divertissement marked such events as victories and royal births, and was often handsomely staged (see the Chauveau engravings in Félièben's *Les divertissements de Versailles*, 1676). All the main composers of the period were expected to write such *pièces d'occasion*, many of which are lost (the ten divertissements by Collin de Blamont, for example). Also in this category are the *grands divertissements* ordered by Louis XIV in 1664 and 1674: these spectacles, mounted at great expense and often lasting for days or even weeks, were a series of divertissements, usually with a central theme. The first of them, *Les plaisirs de l'île enchantée*, for example, was a three-day celebration in honour of the queen and queen mother based on Ariosto's *Orlando furioso*.

As the centre of gravity shifted from court to Parisian town houses or country châteaux during the last years of Louis XIV's reign and during the regency, musical patronage shifted from king to noblemen and even to wealthy middle-class gentlemen. This resulted in displays such as the famous 'Grandes nuits' of the Duchess of Maine at her château at Sceaux for which Mouret, Bernier, Marchand, Bourgeois and Collin de Blamont composed a series of divertissements in 1714 and 1715.

Divider [dividing dominant]. See **TEILER**.

Divine Liturgy (Byzantine) (Gk. *hē theia leitourgia*). In the Eastern Christian rites, the Eucharist, corresponding to the Mass of the Roman rite. In the strict sense the term 'liturgy' is confined to the anaphora, or consecration prayers, followed by the communion and dismissal rites. The Greek rite, unlike the Roman, has three liturgies in normal use, other Eastern rites, especially the Syriac rites, use dozens of early anaphoras. Two of the three Byzantine liturgies, those regularly used, contain anaphoral prayers attributed to St Basil and St John Chrysostom respectively; that of St Basil is celebrated at major feasts, and that of St John Chrysostom at ordinary feasts. Apart from their anaphoras, their content and structure is practically identical, and they are thus treated together here. The third liturgy, that of the Presanctified ('previously consecrated') Host, represents the ceremonial for days in Lent when no consecration takes place. The following account concerns the musical content of the Byzantine liturgies in the late Middle Ages.

See also **BYZANTINE RITE**, **MUSIC OF THE**

1 Liturgies of St Basil and St John Chrysostom 2 Liturgy of the Presanctified

1 **LITURGIES OF ST BASIL AND ST JOHN CHRYSOSTOM**. The chants occurring in the first part of the Mass, the Mass of the Catechumens, are as follows:

(a) Three opening antiphons (selections from the Psalter, normally Psalms xcī, xcii and xciv) or three typika

('typical' psalms: Psalms cii and cxlv and the hymn *Ho monogenēs huios* ('O only-begotten Son') and the Beatitudes); followed by the eisodikon (invitatory formula), 'O come let us worship', from Psalm xciv.

(b) The Ordinary 'Multos annos' acclamations of the celebrant; during the Byzantine Empire, imperial acclamations naming members of the ruling house were also sung.

(c) The **TRISAGION**, found in three versions: *Hagios ho Theos* ('Holy God, Holy and Mighty'), the Ordinary Trisagion; *Hosoi eis Christon* ('Who in Christ is baptized'), the Trisagion for feasts of the Saviour; and *Ton stauron sou proskynoumen* ('The Cross do we adore'), the Trisagion for feasts of the Holy Cross.

(d) Chants before the Epistle: the announcement *Psalmos tō Daud*, and the florid responsorial prokeimenon (corresponding to the Roman gradual or the Ambrosian psalmellus), whose text is drawn from the Psalter. A yearly cycle of Proper prokeimena is found in the old Constantinopolitan psaltikon.

(e) Chants before the Gospel: the announcement *Alleluia psalmos tō Daud*, and the florid responsorial alleluia and verse (corresponding to that of the Roman and Ambrosian rites). A yearly cycle of some 60 chants is found in the psaltikon.

(f) Dismissal of the catechumens and invocation of the faithful *Hosoi pistoi*, corresponding to Latin formulae such as *Si quis catechumenus est*. The Mass of the Faithful follows.

(g) Offertory - the *chēroubikon*, found in three versions *Hoi ta chēroubim* ('We who mystically represent the cherubim'), the Ordinary *chēroubikon*; *Sigēsātō pasa sarx* ('Let all mortal flesh keep silence'), for Holy Saturday and some other occasions; and *Tou deipnou sou tou mystikou* ('Of thy mystical Supper'), for Maundy Thursday.

(h) Creed, sometimes preceded (at the Kiss of Peace) by *Patera huion kai hagion pneuma* ('Father, Son and Holy Spirit'). Greco-Latin creeds found in 9th- and 10th-century Western manuscripts may indicate that the creed was sung at an early date in the East; but the creed was not sung during the Eucharist in the East after the Iconoclastic period (725-842). The 'Nicene' and 'Constantinopolitan' creeds were sung in association with annual commemorations of the Acts of ecumenical councils, to music (notated only in 11th-century lectionary (ekphonic) neumes) which was evidently simple. A setting of the creed by Mark of Corinth, in the plagal mode on E, dates from the mid-15th century; an anonymous 'new' late 15th-century melody is in the authentic mode of G.

(i) Chants with the anaphora. The anaphora of St Basil may be preceded by a sung introduction, *Axion kai dikaion estin* ('It is worthy and right'). The triple Sanctus is the chief anaphoral chant in the East as in the West, but the Eastern Sanctus, unlike the Western, exists in a single main melodic tradition, occasionally elaborated in a florid manner in southern Italy in the 13th century and in the Byzantine Empire in the 14th and 15th. The same traditional music is sung for the Amen responses following the Words of Institution, and for the hymn at the anamnesis, *Se hymnoumen se eulougoumen* ('We praise thee, we bless thee'). Hymns in honour of the Virgin may be inserted: in the liturgy of St Basil, *Epi soi chairei Kecharītōmenē pasa hē ktisis* ('All creation rejoices in thee'), in the liturgy of St John Chrysostom, *Axion estin hōs alēthōs* ('It is very meet

to bless thee').

(j) Communion chants (koinōnika) An early cycle of some 30 Proper koinōnika for the year occurs in the moderately florid style of the asmatikon. This Constantinopolitan collection also transmits sets of melodies in each of the eight modes for two Ordinary koinōnika: one for Saturdays, based on *Gaudete justi* (Psalm xxxii.1) and one for Sundays, based on *Laudate Dominum de caelis* (Psalm cxlviii.1).

(k) Post-communion hymns, sacerdotal benediction and incidental hymns. The Ordinary post-communion, *Plērōthētō to stoma hēmōn* ('Let our mouth be filled'), exists in settings from the 13th century. The benediction, *Eiē to onoma Kyriou* (*Sit nomen Domini*, Psalm cxii.2) is also sung, and another early hymn, *Eidomen to phōs to alēthion* ('We have seen the true light'). Incidental hymns may be sung: the ninth ode of the Good Friday kanōn, *Tēn timōteran tōn chērouhim* ('You who are more honourable than the cherubim'), and a Proper apolytikion (dismissal hymn) and Proper kontakion.

2. LITURGY OF THE PRESANCTIFIED. The third Byzantine liturgy is attributed in some Byzantine sources to 'St Gregory the Dialogist', i.e. St Gregory the Great. Its framework differs in a number of respects (besides the absence in it of a consecration prayer) from that outlined above, there are links with Hesperinos (Byzantine Vespers), and although the origin of this liturgy is usually considered late, its theme of light reflects the early rite of Lucernarium and gives it an archaic aspect.

Five Ordinary chants particularly distinguish this liturgy. The vesper hymn *Phōs hīlaron* ('Glad some light of the Father's glory') is sung at the Entrance and follows the opening set of vesper psalms. The Lenten Ordinary prokeimenon, *Kateuthynthētō hē proseuchē mou* ('Let my prayer be set forth', Psalm cxl.2) precedes the Epistle. There are Ordinary Lenten versions also of the chēroubikon (*Nyn hai dynamis tōn ouranōn*, 'Now the celestial powers') and koinōnikon (*Geusasthe kai idete*, 'O taste and see', Psalm xxxiii.8). The oldest settings of the latter chant are in the plagal mode on E, the asmatikon also transmits an early cycle of settings in each of the eight modes. Finally, there is a distinctive postcommunion, *Eulogēsō ton Kyriōn* ('I will bless the Lord at all times', Psalm xxxiii.1).

Divine Office. A series of worship services performed in the course of each day and night in the Roman Catholic Church. Sources from as early as the 6th century give detailed information about the Office, though its origins are clearly much older; indeed, some features of the Office are also found in the Jewish prayer hours in which Christ and his disciples took part. In this article, and in those on the individual services, the Office is described as it is presented in manuscripts of the Middle Ages; for information on the structure and content of the Divine Office after the reform of the breviary called for by the Council of Trent and completed in 1568 under Pius V, and that of Pius X (1911), see Righetti, Pascher and Miller. Vatican Council II called for a fundamental renewal of the Divine Office; the Latin text to implement this was published in 1972 under the title *Liturgia horarum* (LITURGY OF THE HOURS).

The Divine Office consists of eight services, each traditionally associated with a particular time of day: Matins, a long service, originally called Vigils, beginning after midnight (often about 3 a.m.); Lauds, at day-break, Prime, at 6 a.m., Terce, at 9 a.m.; Sext, at noon, None, at 3 p.m., Vespers, at twilight; Compline, before retiring. Prime, Terce, Sext and None are often referred to together as the LITTLE HOURS. The services in the Divine Office are composed of psalms and canticles with antiphons, lessons followed by responsories, hymns, versicles with responses and prayers. The arrangement of these in the Office in the course of the day and year follows a fixed pattern, referred to as the cursus. There are two somewhat different cursus: the Roman cursus, followed in churches, which was not given a precise description until Amalar of Metz (c.830); and the monastic cursus, followed in monasteries, for which there is an outline in the Rule of St Benedict (c.530).

Of the material in the Divine Office, some is unchanging: for example, the canticle *Benedictus Dominus Deus Israel* is always chanted near the end of Lauds, and the *Magnificat* near the end of Vespers. Some of it changes through the course of the week according to a regular pattern: each week all of the psalms are chanted, with some assigned to each day. This arrangement is shown more or less explicitly in the liturgical psalter, breviary, antiphoner or ordinal of a particular church, monastery or religious order. The psalms in the weekly cycle are sung with antiphons; other sung texts that change from one day of the week to the next in a regular scheme include the Lauds canticles and their antiphons, the antiphons for the *Benedictus* at Lauds and the *Magnificat* at Vespers, the antiphons for the invitatory of Matins, and (in some later sources of the Roman cursus, and in the monastic cursus) the hymns for various services of the Divine Office. The whole of this may be referred to as the 'Sunday and ferial Office', an annual series of Matins lessons which covers the whole Bible (at least in principle) is combined with it.

From time to time a Proper Office is substituted for the Office of the feria, either of the Proper of the Time

Dixième (Fr.). TENTH.

Dixon, (Charles) Dean (b New York, 10 Jan 1915; d Zug, Switzerland, 4 Nov 1976). Black American conductor. He studied at the Juilliard School and Columbia University in New York, made his conducting début at Town Hall, New York, in 1937, and founded the New York Chamber Orchestra the following year. In a sense Dixon's career as a conductor paralleled Marian Anderson's as a singer: he opened several important doors to black musicians, being the first to appear as guest conductor of Toscanini's NBC SO (1941), of the New York PO (1942) and of the Philadelphia Orchestra (1943). In 1944 he founded the American Youth Orchestra and appeared for the first time with the Boston SO, and in 1948 he received Columbia University's Alice M. Ditson Award for outstanding contributions to modern American music. In 1949 he moved to Europe, holding appointments as principal conductor of the Göteborg SO in Sweden (1953–60), and from 1961 to 1974 as principal conductor of the Hesse Radio SO in Frankfurt am Main, where he made his home; he was also principal conductor of the Sydney SO (1964–7). His London début was with the BBC SO in 1963. In 1970 he began to unite the two strands of his career, adding a series of engagements with the leading American orchestras to his European commitments. Dixon's repertory combined an enthusiasm for American music with a taste for the main European tradition of Beethoven, Brahms and Bruckner. His interpretations tended towards an engaging if occasionally wayward warmth rather than brilliance.

BERNARD JACOBSON

Dixon, George. English organ designer and writer on organs, who collaborated with the firm of HARRISON & HARRISON.

Dixon, George Washington (b 1808, d New Orleans, 1861) American minstrel performer. He made his début in Albany, New York, with a circus in 1827, and performed in New York in 1829. He was one of the first performers to impersonate negroes (see MINSTRELSY, AMERICAN), and in the early 1830s his skits and songs, including *Coal Black Rose*, *My Long-tail Blue* and *Zip Coo* generated the earliest interest in blackface minstrels in New York (see POPULAR MUSIC, §II, 6).

Dixtuor (Fr.). DEZET.

Dizi, François Joseph (b Namur, 14 Jan 1780; d Paris, 1840). South Netherlands harpist and composer. He was the son of a music teacher, from whom he received his first violin lessons. However he was self-taught on the harp, and it was in order to obtain lessons to improve his technique that at the age of 16 he decided to go to England. He embarked, and after an incident while the ship was in harbour he arrived in London penniless and unable to speak any English (according to Fétis Dizi dived overboard to rescue a sailor who had fallen into the water; the ship went on without him, taking with it all his belongings). He somehow found his way to the London house of Sébastien Erard, the celebrated maker of harps and pianos. Erard introduced him to Clementi who, perceiving his talent, helped him to establish himself, before long he came to be regarded as the most renowned harpist in London, a reputation he main-

tained for the next 30 years. He was equally highly regarded as a composer and teacher and among his many pupils was Elias Parish-Alvars.

With Robert Bochsa, Dizi contributed to the enormous popularity of the harp in England during the first quarter of the 19th century: when, in 1820, he was engaged to lead a band of 12 pedal-harp players conducted by Henry Bishop at the Covent Garden oratorios, Bochsa was immediately commissioned by Drury Lane to lead 13 players conducted by George Smart. Dizi also developed a number of improvements to the pedal-action harp, which he patented: these included the 'perpendicular harp' in which the strings maintained a vertical line irrespective of pedalling, but none of his inventions achieved permanence.

In 1830 Dizi left London for Paris where, with the firm of Pleyel, he planned to found an establishment for the manufacture of harps but this came to nothing. He did, however, become teacher of the harp to the daughters of Louis-Philippe, and one of Dizi's harps, used at these lessons, is now in the museum of the Brussels Conservatory.

Dizi's most important work for the harp was a series of 48 studies which are still used; they are musical and melodious as well as technically valuable. He also published a 'grande sonate' in London and, in Paris, variations on an *Air saxon* by Cramer, a *Danse du châle* with variations, three sets of variations on original themes and 12 exercises or fantasias for harp with two rows of pedals. In addition he published other fantasias, romances and variations on English, French and Italian tunes

JOHN LADE

Djemil, Enys (b Paris, 20 May 1917). French composer and teacher. He studied in Paris at the Conservatoire and other institutions, his teachers including Firmin Touche for the violin, Ion Constantinesco and Bigot for conducting, and Aubert and Ropartz for harmony and composition. Before World War II he appeared as a violinist; thereafter he gave his attention to teaching, serving at the Baghdad Fine Arts Academy (1947–8) and the Paris International Conservatory (1948–51), and directing the conservatories of St Brieuc (1951–60), Le Mans (1960–68) and Clermont-Ferrand (from 1968).

GUY BOURLIGUEUX

Djordjević, Vladimir R. (b Brestovac, 1 Dec 1869; d Belgrade, 12 June 1938). Yugoslav ethnomusicologist

from his association with Agricola in 1505–6, when both were members of the chapel of Philip the Handsome. The *Missa 'Quem dicunt homines'*, based on a motet by Richafort, may have been written in competition with a similar mass by Mouton when they were in the French royal chapel. His *Missa 'Gaude Barbara'*, based on a motet by Mouton, could have been written in homage to his colleague. All three masses illustrate the chief feature of parody technique (see PARODY (i)), still novel at the beginning of the 16th century: the basing of a new work on the principal motifs, and not merely a theme or single voice, of an older one. Divitis, along with Mouton and other musicians of the French royal chapel, played an important role in the shaping of this technique, which was to dominate mass composition in the 16th century.

WORKS

MASSES AND MASS SECTIONS

- Missa 'Gaude Barbara'*, 4vv, *F-C-A* 3 (on Mouton's motet)
Missa 'Quem dicunt homines', 4vv, ed. in *Cw*, lxxxiii (1960) (on Richafort's motet)
Missa super 'Si dederō', 4vv, *D-Ju* 7 (on Agricola's song-motet)
Missa pro fidelibus defunctis, 3–4vv, *B-Br* IV 922
Credo, 6vv, *D-Ju* 4, *Mbs* 6
Pleni sunt coeli (?fragment), 3vv, 1541²

MAGNIFICAT

- Magnificat secundi toni*, 4vv, ed. P. Bunjes *G. Rhau Musikdrucke aus den Jahre 1538–45*, v (Kassel, 1970), 281
Magnificat quinti toni, 4vv, *Treize livres de motets parus chez Pierre Attaignant*, vi, ed. A. Smeyers and A. T. Merritt (Monaco, 1960), 54 (probably by Divitis, also attrib. Richafort)
Magnificat octavi toni, 4vv, *D-Ju* 20

MARTIN PICKER

Divoto (It.: 'dedicated', 'devoted'). An expression mark that appears rather earlier in music than one might expect. The anonymous *A Short Explication* of 1724 said that the word 'signifies a grave, serious manner, or way of playing, or singing, proper to inspire devotion'.

For bibliography see TEMPO AND EXPRESSION MARKS

Dix, Aureus [Aurius, Audius, Aureo] (b 1668 or 1669; d Prague, 7 July 1719). Bohemian lutenist and composer. He was a friend and possibly a pupil of Count JAN ANTONIN LOSY. His death certificate states that he died of consumption and that he was then 50.

Dix had a high reputation in his day and both Baron and Walther mention him with approval. He also had some reputation as a teacher. Bohumír Dlabáč described a lute tutor by Dix, but this has not been located. Nor have two sonatas for two lutes listed in a Breitkopf catalogue of 1761.

For a long time it was believed that no compositions by Dix had survived, but in 1955 two suites were found (in *C-S-Bm*), and since then seven more pieces have come to light. While it is difficult to generalize from so few sources, one can say that his pieces, all in the standard dance forms of the time, are in a squarer, less ornamented style than those of his contemporaries. The suites are melodically attractive and exploit the lute well, showing that Dix deserved his title of 'supreme Prague lutenist'.

ADRIENNE SIMPSON

Dixie Jass Band. See ORIGINAL DIXIELAND JAZZ BAND

Dixieland jazz. A term sometimes used to refer to NEW ORLEANS JAZZ as a whole, at other times to TRADITIONAL JAZZ, but most often to the work of certain white jazz musicians of the early New Orleans school. In this sense the term derives from the name of the first important group of this sort, the Original Dixieland Jazz Band, whose success just after World War I gave rise to many similarly named white jazz groups. Though largely a species of New Orleans style, the music of these groups differed from contemporary black jazz in being more dependent on the repertoire and character of middle-class dance music (e.g. quadrilles), marches, and on written scores, with some devices of black jazz incorporated for special effects. (The precise relationship of black jazz and white during this period is disputed, several writers maintaining that black groups more often imitated their white counterparts rather than the reverse). After the appearance in the early 1920s of the New Orleans Rhythm Kings, a white group showing a much fuller understanding of the vocalized timbre, flexible intonation and relatively free rhythm of black jazz, it became less necessary to distinguish between the two types of music. See also JAZZ, §3.

Dizi, François Joseph (b Namur, 14 Jan 1780; d Paris, 1840). South Netherlands harpist and composer. He was the son of a music teacher, from whom he received his first violin lessons. However he was self-taught on the harp, and it was in order to obtain lessons to improve his technique that at the age of 16 he decided to go to England. He embarked, and after an incident while the ship was in harbour he arrived in London penniless and unable to speak any English (according to Fétis Dizi dived overboard to rescue a sailor who had fallen into the water; the ship went on without him, taking with it all his belongings). He somehow found his way to the London house of Sébastien Erard, the celebrated maker of harps and pianos. Erard introduced him to Clementi who, perceiving his talent, helped him to establish himself, before long he came to be regarded as the most renowned harpist in London, a reputation he main-

tained for the next 30 years. He was equally highly regarded as a composer and teacher and among his many pupils was Elias Parish-Alvars.

With Robert Bochsa, Dizi contributed to the enormous popularity of the harp in England during the first quarter of the 19th century: when, in 1820, he was engaged to lead a band of 12 pedal-harp players conducted by Henry Bishop at the Covent Garden oratorios, Bochsa was immediately commissioned by Drury Lane to lead 13 players conducted by George Smart. Dizi also developed a number of improvements to the pedal-action harp, which he patented: these included the 'perpendicular harp' in which the strings maintained a vertical line irrespective of pedalling, but none of his inventions achieved permanence.

In 1830 Dizi left London for Paris where, with the firm of Pleyel, he planned to found an establishment for the manufacture of harps but this came to nothing. He did, however, become teacher of the harp to the daughters of Louis-Philippe, and one of Dizi's harps, used at these lessons, is now in the museum of the Brussels Conservatory.

Dizi's most important work for the harp was a series of 48 studies which are still used; they are musical and melodious as well as technically valuable. He also published a 'grande sonate' in London and, in Paris, variations on an *Air saxon* by Cramer, a *Danse du châle* with variations, three sets of variations on original themes and 12 exercises or fantasias for harp with two rows of pedals. In addition he published other fantasias, romances and variations on English, French and Italian tunes

JOHN LADE

Djemil, Enys (b Paris, 20 May 1917). French composer and teacher. He studied in Paris at the Conservatoire and other institutions, his teachers including Firmin Touche for the violin, Ion Constantinesco and Bigot for conducting, and Aubert and Ropartz for harmony and composition. Before World War II he appeared as a violinist; thereafter he gave his attention to teaching, serving at the Baghdad Fine Arts Academy (1947–8) and the Paris International Conservatory (1948–51), and directing the conservatories of St Brieuc (1951–60), Le Mans (1960–68) and Clermont-Ferrand (from 1968).

GUY BOURLIGUEUX

Djordjević, Vladimir R. (b Brestovac, 1 Dec 1869; d Belgrade, 12 June 1938). Yugoslav ethnomusicologist

and composer. After completing music studies with Fuchs at the Vienna Conservatory and with Šebor in Prague, he worked as a music teacher and choirmaster in various Serbian cities, then, during World War I, in France, and finally at the Stanković Music School in Belgrade. He collected many folk tunes from Serbia and Macedonia, published numerous papers on folk music and contributed to the study of Serbia's musical history. His compositions, based mainly on folk themes, include arrangements for violin, piano, chorus and orchestra

STANA ĐURIĆ-KLAJN

Djurić-Klajn, Stana. See ĐURIĆ-KLAJN, STANA

Đlabač, Bohumir [Godefridus] **Jan** [Đlabač, Gottfried Johann] (b Cerhenice, nr. Český Brod, 17 July 1758, d Strahov, Prague, 4 Feb 1820). Czech art historian, lexicographer, librarian and choirmaster. He studied music at school in Český Brod and Dobřichov, and became a chorister at the Břevnov Benedictine monastery in Prague (1771), and later at the Premonstratensian monastery in Strahov (1773). After studying philosophy at Prague University he entered the latter order in 1778, taking the monastic name Godefridus (in Czech Bohumir, in German Gottfried). During his theological studies at the Premonstratensian seminary of St Norbert in Prague he was choirmaster to the collegiate church of St Benedict (1782-5). After returning to Strahov, in 1786 he was appointed second librarian (first librarian from 1801) and later succeeded J. L. Oehlschlägel as choirmaster (1788-1807). He also served as archivist (1805-9) and annalist (from 1804).

Đlabač was a man of manifold interests. Prominently involved in the cultivation of the Czech language during the 'Czech national revival', he wrote Czech verses and translated into Czech such works as Francis Bacon's *Nova Atlantis* (1798); for his literary activities he was elected in 1793 to the Learned Society of Lusatia, and in 1796 to the Royal Bohemian Society of Sciences, which he later served as director (1813-18). As choirmaster at Strahov he conducted the Prague première of Haydn's *Die Schöpfung* (23 April 1800). His primary contribution to music, however, was his *Allgemeines historisches Künstler-Lexikon* (1815), the first encyclopedic survey of Bohemian cultural history. Based on authentic source material and direct accounts from contemporary artists, the work remains an invaluable aid to the study of Czech music, literature and fine arts.

Many music manuscripts copied by Đlabač for the Strahov church choir are in the Národní Museum in Prague, and his papers and inheritance are housed at the Památník národního písemnictví (formerly Strahov

monastery). He probably did not compose; he wrote only the words to the printed song attributed to him in *RISM* (music by J. Kuchař).

D la sol. The pitch *d'* in the HFXACHORD system.

D la sol re. The pitch *d'* in the HEXACHORD system.

Đługoraj, Wojciech [Albertus] (b 1557 or 1558, d probably after c1619) Polish lutenist and composer 'Gostinensis', indicating his birthplace, can refer to many places in different parts of Poland. He was in the service of the Polish nobleman Samuel Zborowski, an important political figure, who had him educated for the position of lutenist at his court but alienated him by his notorious brutality. In 1579 Đługoraj fled from his master and entered the Observants' monastery at Kraków, but he was expelled in 1581 because of his improper mode of life. He then became lutenist to an unknown master, but Zborowski sought him out and compelled him to return to his service. In 1583 Đługoraj revealed politically compromising letters to King Stefan Batory, thereby contributing to the execution of Zborowski and the banishment of his brother Krzysztof. From 1583 to 1586 he was a lutenist at the royal court. He then apparently left Poland for fear of the Zborowski family's vengeance and went to Germany, possibly to Stuttgart or Leipzig. The compilation of the great Leipzig lutebook of about 1619 (*D-LEm*, II.6.15) is attributed to him. Literary sources refer to him as an eminent virtuoso. His art most probably lay in skilful improvisation, as may be inferred from the comparatively small number of extant pieces by him and from the improvisational nature of his three most 'personal' compositions, two fantasias and a fugue. His surviving pieces indicate a marked interest in folk dances, both Polish and Italian (as in the villanellas); one of his fantasias also includes certain dance elements.

PIOTR POŹNIAK

Długoszewski, Lucia (b Detroit, 16 June 1931). American composer. After a training in science at Wayne State University (BA 1949), she moved to New York to study the piano with Grete Sultan (1950-55), analysis with Felix Salzer (Mannes College, 1950-52) and composition with Varèse (1952-4). While appreciative of the sensitivities of composers such as Bartók and Webern, she has been chiefly influenced by the philosopher F. S. C. Northrop, oriental poetry and scientific philosophy. Her music, much of it commissioned for dance, reflects her interest in aesthetics, particularly radial empirical immediacy, and the 'undifferentiated aesthetic continuum' (see her article 'What is Sound to Music?', *Main Currents*, xxx/1, 1973, 3). She has developed the 'timbre piano' (1954) and families of percussion instruments (e.g. tangent rattles, ladder harps), and has performed widely on these instruments as musical director of the Eric Hawkins Dance Company (from 1954).

BRIAN FENNELLY

Dłuski, Erazm (b Szczuczynce, Podolia, 1857, d Otwock, nr Warsaw, 26 Feb 1923). Polish pianist, composer, conductor and teacher. At the St Petersburg Conservatory he studied the piano with Anton Rubinstein and composition with Nicholas Solovyev, and later orchestration with Rimsky-Korsakov. In 1891 he won first prize in the conservatory's annual Rubinstein Composers' Competition for his cantata *Wieża goryjska* ('The Gorian tower'). While still a student, he organized and conducted the concerts of the St Petersburg Amateur Music Group, and on graduating he became the director of a local orchestra, also working as an accompanist and singing teacher. He moved to Warsaw in 1919 and co-directed the opera class at the conservatory with Antoni Róžański from 1920. Dłuski was also made an honorary professor of the Brussels Conservatory.

Dłuski's two piano sonatas were particularly successful, and were performed by Rubinstein. However, Dłuski's main interest was in operatic and vocal music. He composed five operas, of which only one (*Urwas*, after Kalidasa) was performed in its entirety (Lwów, 25 February 1902; a concert performance had been given there in June 1901); the opera was characterized by many orientalisms and rich orchestration influenced by Rimsky-Korsakov. It was well received in St Petersburg (25 March 1902). Another opera, *Kobieta z kindzalem* ('The woman with a dagger'), was scheduled for perfor-

mance in St Petersburg during the 1903-4 season, but no information is available on whether or not it was given; the earlier opera *Romano* was performed in 1890 on the stage before its completion.

Doane, William Howard (b Preston, Conn., 3 Feb 1832; d South Orange, NJ, 24 Dec 1915). American composer of gospel tunes. See GOSPEL MUSIC, §1.

Dobiáš, Václav (b Radčice, nr. Semily, Bohemia, 22 Sept 1909; d Prague, 18 May 1978). Czech composer. The most prominent pupil of Foerster (1930-31) and of Novák (his teacher at the Prague Conservatory), he worked in the Czech Ministry of Information before his appointment as professor of composition at the Prague Academy of Music. His early years were devoted to the composition of chamber music: the first three quartets, the *Řikadla* ('Rhymes') for nonet, the violin and cello sonatas and the Chamber Symphony are rooted in the folk music of the Krkonose mountains and have a distinctive melodic and rhythmic freshness. Further study with Hába led Dobiáš to adopt quarter-tone writing in the Violin Concertino and the Piano Suite (1941, 1939), but he abandoned this technique in composing the First Symphony (1943), a harsh and slightly pompous score written in defiance of the German invaders; its gloomy shadows linger in the Sinfonietta and the turbulent Sonata for piano, strings, wind and timpani. Dobiáš's sympathy with the Czech Army found expression in various orchestral works; the cantatas *Stalingrad* and *Buduj vlast, posilíš mir* ('Build your country, strengthen peace') sing the merits of the Red Army and reveal a composer writing to order on themes of social and political reform. In the Symphony no.2 (1956-7) he began to compose with greater personal conviction. His refined style and sure technique are shown to good advantage in several song cycles, and the relaxed melodic lilt of the community choruses has won them popularity. A set of marches for the gymnasts of the Spartakiad, and the Festive Overture (1966), also found wide favour. Dobiáš published several essays in *Hudební rozhledy*, *Rytmus* and *Tempo*.

BRIAN LARGH

Doblinger. Austrian firm of music publishers. Friedrich Mainzer opened a music lending library in Vienna on 1 August 1817 which from 1825 also sold antiquarian music. Ludwig Doblinger acquired this business on 12 July 1857. On 1 Aug 1876 it passed to Bernhard Herzmansky, whose son, also Bernhard Herzmansky, managed it until his death in 1954, when his nephew Christian Wolf assumed ownership and took over as business manager.

Doblinger expanded the firm to a music shop and music publishing house; in 1874 he obtained the publishing rights of J. P. Gotthard. Under Herzmansky the undertaking had considerable success, particularly with the publication of music by Bruckner and other leading contemporary composers. At the turn of the century the publishing output was reorganized, many publications were transferred to the newly founded Universal Edition and the emphasis was placed more on contemporary operetta, while between the wars light music and Viennese songs were particularly promoted. After 1945 the enterprise (which has continued to operate under the name of Doblinger) began to foster the interests of modern music research and to encourage the work of contemporary composers. Its popular house concerts and its impressive series *Diletto musicale* (1958), which includes pre-Classical and Classical Viennese music, give it a leading place in Austrian musical life. The firm also publishes the *Flautario* series for recorder and much music for church use.

ALEXANDER WEINMANN

Dobneck, Johannes. See COCHLAUS, JOHANNES.

Döbriht, Johanna Elisabeth (b Weissenfels, 16 Sept 1692; d Darmstadt, 23 Feb 1786). German soprano. She was the youngest daughter of the opera singer Daniel Döbriht (1650-94) and the singer Katharina Elisabeth Grosse. She was trained at Weimar under Christoph Alt, and worked at the Leipzig opera. On 17 February 1711 she sang as guest in Graupner's *Telemach* at the newly opened opera house in Darmstadt, and was engaged there on 3 July to sing at the court and the church. On 6 September 1713 she married the composer and gamba player ERNST CHRISTIAN HESSE. She was considered the finest German

woman singer of her day. Quantz praised her 'beautiful, euphonious high register and the genuine womanliness of her acting'. She undertook various concert tours, and in 1740 was granted a pension, though she still often sang. Fiedler's beautiful portrait of her in old age is in a private collection in Munich.

ELISABETH NOACK

Dobro. A Hawaiian steel guitar; see ELECTRIC GUITAR.

Dobroven, Issay Alexandrovich (b Nizhny-Novgorod, 27 Feb 1894, d Oslo, 9 Dec 1953). Norwegian conductor of Russian birth. He made his début as a pianist when he was five years old, and at the age of nine entered the Moscow Conservatory, where he studied piano with Igunnov and composition with Taneyev. After further study in Vienna with Leopold Godowsky, he began teaching and conducting in Moscow, but left after the Revolution to settle in Germany. Between the wars he held opera and concert appointments at Berlin and Dresden (from 1924); Sofia (Bulgarian Opera, 1927-8); Frankfurt and San Francisco (from 1930), and Budapest Opera (1936-9). In each centre he made Russian music his speciality. He conducted the German première of *Boris Godunov* in Dresden in 1922. In the mid-1930s Dobroven went to Oslo and became a Norwegian citizen. He escaped to Sweden in 1940, where he took engagements at the Stockholm Royal Opera and the Göteborg Philharmonic concerts. After 1945 he resumed travelling, and in 1949 initiated a notable series of Russian operas at La Scala, putting into practice his long-standing concern for the integration of music and drama by producing as well as conducting. His last operatic engagement was a revival of *Boris Godunov* at Covent Garden (December 1952-January 1953). He composed a piano concerto, in which he often played the solo part, and a number of chamber works.

NOËL GOODWIN

Dobrowolski, Andrzej (b Lwów, 9 Sept 1921). Polish composer. His early studies were with Rutkowski (organ), Belina-Skupiewski (singing) and Kurkiewicz (clarinet); then from 1945 to 1951 he studied composition with Malawski and theory with Łobaczewska. In 1947 he was appointed to teach at the Kraków Conservatory, from which he moved to become reader in theory and composition at the Warsaw Conservatory. He was also general secretary of the Polish Composers' Union for many years, and he has worked at the Experimental Music Studio of Polish radio in Warsaw. At the beginning of his compositional career he produced numerous orchestral works, undemanding pieces based on Polish folkdance themes. His contacts with Lutosławski, Serocki and others over the years 1958-64 caused him to work intensively to develop a more individual style. This first showed itself in the *Music for Strings and Four Groups of Wind Instruments* (1964) and, more significantly, in the *Music for Tape and Oboe Solo* (1965); the general features of his later works are craftsmanship and animated wit. From 1976 he taught at the Hochschule für Musik, Graz.

BOGUSŁAW SCHÄFFER

Dobński, Julian (b Nowe, 31 Dec 1811 or 1812; d Warsaw, 2 May 1886). Polish tenor. From 1826 he studied in Evasio Soliva's class at the Warsaw Conservatory; he completed his studies in Italy, and sang in Turin and Genoa (1846-8). After making his début in *Il barbiere di Siviglia* on 20 September 1832, he performed in the Wielki Theatre in Warsaw in a wide range of operas by Donizetti, Meyerbeer, Weber, Hérold, Auber, Halévy and Verdi. On 1 January 1858 he created the role of Jontek in *Halka*, and Moniuszko wrote the aria 'Szumią jodły' for him, to replace a planned mazurka. Dobński also sang in concerts, captivating audiences by the beauty of his tone as well as by the dramatic power of his performances. On 25 February 1858, after a performance of *Ernani*, he received a solid gold diamond-encrusted wreath engraved with the titles of all the operas in which he had appeared, to mark his 25 years as a singer.

Having incurred the displeasure of the authorities for his part in the spring revolution of 1848, he left the country temporarily. However, he was later put in charge of the singing class at the Warsaw Music Institute (1861-4) and, from 1866, at the Conservatory. In 1863 he began to edit *Echo*, a collection of songs by foreign composers. He also wrote a few songs, including *Niezapominajka* ('Forget-me-not') and *Kochanek lutni* ('Lover of the lute').

IRENA PONIATOWSKA

Dobrzyński, Ignacy Feliks (b Romanów, Volhynia, 25 Feb 1807, d Warsaw, 9 Oct 1867). Polish composer, conductor, pianist and teacher. He was brought up at Romanów, the family residence of Count Iliński; there his father, the composer Ignacy Dobrzyński (b Warsaw, 2 Feb 1779; d Warsaw, 16 Aug 1841), was master of the chapel. Dobrzyński received his first music lessons from his father, and then (after 1825) studied with Józef Elsner at the Warsaw Conservatory. From 1845 to 1847 he travelled to various cities in Germany, including Berlin, Dresden, Bonn and Munich. In Warsaw he was active as a teacher, critic, impresario, pianist and conductor, and was also director of the Opera (1852-5).

As a composer Dobrzyński followed the Viennese Classical tradition, though his musical language incorporates elements of Polish folk music; in 1834 he won second prize in an international competition for composers in Vienna with his *Symfonia charakterystyczna w duchu muzyki polskiej* ('Characteristic symphony in

the spirit of Polish music'). His piano music shows clearly the influence of Chopin.

Dobszay, László (b Szeged, 2 Feb 1935). Hungarian musicologist. In Budapest he studied composition at the Academy of Music with János Viski (diploma 1957) and took a degree in Hungarian literature and history at the university (1959). He taught solfège, chamber music and theory at the Budapest Music School Organization (1956-66), where he reorganized the music analysis syllabus, and then became a research assistant at the Folk Music Research Group (later part of the Institute of Musicology of the Hungarian Academy of Sciences) in 1966, professor of musicology at the Budapest Academy of Music (1969) and senior lecturer in music theory at its teacher-training college (1971). In 1976 he took the *kandidátus* degree with a dissertation on the lament style in Hungarian folk music and music history. His research has been chiefly concerned with medieval music in Hungary, Hungarian folk music and the history of melody, and he has also written on music education and produced numerous school editions.

Doche, Joseph Denis (b Paris, 22 Aug 1766, d Soissons, 20 July 1825). French composer. He received his musical education as a choirboy at Meaux Cathedral and became in 1785 *maître de chapelle* at the Cathedral of Coutances, Normandy. In 1791 he went to Paris, in 1794 he entered the orchestra of the Théâtre du Vaudeville, playing viola, cello and double bass, and in 1810 became conductor, a post he held until 1823, when he retired to Soissons.

From 1799 onwards Doche wrote new airs for a great number of vaudevilles produced at his theatre, starting with *Le maréchal ferrant de la ville d'Anvers* (12 May 1799). His collected vaudeville airs were published in 1822, with a supplement in 1823. Doche also wrote some comic operas, a mass, piano pieces and romances of which several collections were published.

Doche's son, Alexandre Pierre Joseph (1799-1849), was conductor at the Vaudeville theatre from 1828 to 1848 and wrote two one-act works for the Opéra-Comique: *Le veuf du Malabar* (27 May 1846) and *Ali* (13 March 1847). He died in St Petersburg.

WORKS

(selective list)

- Fanchon la vieilleuse (comedy, 3, Bouilly, J. Pain) Paris, Théâtre du Vaudeville, 18 Jan 1801, *F-Pn*, lib with tunes (Paris, 1803)
 Point de bruit, ou Le contrat simulé (opéra-comique, 2), Paris, Théâtre de la Porte St Martin, 25 Oct 1802, *B-Bc*
 Les deux sentinelles (opéra-comique, Henrion), Paris, Théâtre de la Gaîté, 26 Sept 1803
 La musette du vaudeville, ou recueil complet des [428] airs de Mr Doche, 1 3vv (Paris, 1822)
 Songs and romances in many contemporary collections, incl. *Les diners du vaudeville* (Paris, 1796-1801) and *La lyre d'Anacréon* (Paris, 1799-1812)

Dodart, Denis (b Paris, 1634; d Paris, 5 Nov 1707). French physician and academician. He trained at the Faculty of Medicine in Paris, where he received his

doctorate in 1660 and accepted a chair in pharmacy in 1666. He served as personal physician to the Dowager Princess of Conti and other members of that house before being named medical adviser to Louis XIV. In 1673 he was named a member of the Académie des Sciences and in 1699 was appointed pensionary botanist. He carried out research in a variety of subjects, notably botany and medicine, and published his findings. His principal contribution to music is his 'Mémoire sur les causes de la voix de l'homme, et de ses différens tons', published in the *Mémoires de l'Académie royale des sciences* (1700), pp.244-93; it was later issued separately (Paris, 1703), and he published 'suppléments' in the *Mémoires* for 1706, pp.136ff and 388ff, and 1707, pp.66ff. Dodart dealt in this essay with the physical characteristics and formation of the human voice and its quality of expression; he intended it to form part of a projected history of music, which he did not complete.

ALBERT COHEN

Dodd. English family of bowmakers and instrument sellers

(1) **Edward Dodd** (b Sheffield, 1705; d London, 1810). He is generally held to have been a bowmaker, and most 18th-century English bows are or have been attributed to him. Enough bowsticks exist to show that English bows of the period 1700-60 were often of very fine quality. Sandys and Forster cast doubt on his having made any, let alone most, of these bows (*The History of the Violin*, 1864), having noted briefly that he did indeed make bows (chap 11), they went on to state that his occupation was unknown (chap 26). The fact that his son (2) John Dodd had two occupations before becoming a bowmaker may also be indicative of Edward's having followed some other profession. Edward Dodd may turn out to be a myth of the 19th-century violin trade

(2) **John Dodd** (b ?London, 1752; d Richmond, Surrey, 1839). Son of (1) Edward Dodd. He was the greatest English bowmaker before Tubbs. According to Sandys and Forster (chap.26), he was a gunlock fitter and then a money-scale maker before turning to bows. He is said to have lived in Southwark (1786-9), then in Kew for several years, and finally at Richmond. Morris added that he was excessively fond of drink and finished his days in the workhouse. It seems probable that he began to make bows in the decade 1780-90, a time when in England, at least, the evolution of the modern bow was far from complete. Bow heads then were of two quite different types, the modern bow head being in a sense a compromise between them: the tall, often graceful 'swan' head type, with the hair towards the point considerably separated from the stick, and the more squat 'hammer' head, in use in Italy and France before it came to England. As continental makers quite often made the 'swan' as well as the 'hammer', there were probably players everywhere who had a distinct preference one way or the other. It seems clear that John Dodd made both, but whereas hammerhead bows are

often branded 'Dodd', the violin makers and dealers who applied their own names usually favoured the swan.

The great improvements in bow construction which occurred in France well before 1800 – the Tourte-pattern head and the metal ferrule where the hair meets the frog – seem to have come to England much later, perhaps only after the end of the war in 1815. Even then such makers as Thomas Tubbs and Louis Panormo more often than not omitted the ferrule, probably for the sake of speed and cost rather than at the players' request. The octagonally shaped stick was another novelty from the Continent. The last period of Dodd's work incorporated all the innovations, but many of the earlier sticks have also survived, having been modernized later, their plain ivory mountings either adapted or jettisoned. The choice of Pernambuco wood available to Dodd must have been an enviable one, for many of the sticks have a wonderful feel and appearance. A common 19th-century theory has it that the wood came to England not as material for dye-making but in the form of barrels: certainly it is common to find traces of nailholes grazing or even passing straight through a stick.

Modern players find the shortness of Dodd's violin and viola bows a serious deficiency; Tourte and his French followers had achieved the ideal. Dodd's cello bows, however, are usually found to be the perfect length, and the considerable number of comparatively heavy sticks suit players better than many French makes. At all times he was capable of giving perfection of form and finish to his work, signs of haste being visible only where the stick itself was of poor quality and the remuneration presumably inadequate.

(3) **Thomas Dodd** (fl c1785–c1830). Son of (1) Edward Dodd. He was mainly if not entirely a dealer in instruments, rivalling the shops of Betts and Forster from 1798, when he established himself in New Street, Covent Garden. In 1809 he moved to 92 St Martin's Lane, where he stayed until another move to Berners Street in 1823, at which point his interest turned away from bowed instruments to harps, and later to the piano. His two sons were also involved in instruments, but achieved little of consequence.

Most of the instruments made in Dodd's shop were of excellent quality, modelled after Stradivari and constructed, it is believed, by Bernhard Fendt and Lott Senior. Richard Tobin also appears to have worked for Dodd. Dodd himself was an enthusiastic experimenter with varnish, and probably varnished his assistants' work. It is likely that he followed a contemporary trend of branding the bows that he sold with the name of the shop rather than the name of the individual maker. He doubtless sold bows made by his brother (2) John Dodd, and perhaps those of other makers as well: Thomas Tubbs is one whose bows often have the Dodd brand. Unfortunately thousands of German bows from the end of the 19th century are also so branded. Many of them are quite good copies, though made of inferior wood; others are almost worthless.

(4) **James Dodd** (fl c1864). ?Grandson of (1) Edward Dodd. His father, James Dodd the elder, is said to have been a brother of (2) John Dodd and (3) Thomas Dodd, and to have made bows. He himself is known still to have been a bowmaker in 1864. Most of his bows were probably made for the trade, including the firm of Betts.

His early work, perhaps influenced by John, was his best, particularly the cello bows. Later he developed certain eccentricities and inaccuracies in his method. He used the brand 'J. Dodd' for many of his productions.

CHARLES BEARE

Dodds, 'Baby' [Warren] (b New Orleans, 24 Dec 1898; d Chicago, 14 Feb 1959). Black American jazz drummer, brother of Johnny Dodds. He worked with Fate Marable's riverboat bands (1918–21) before joining King Oliver's group in 1922, and took part in Oliver's important 1923 recordings in Chicago. In the next two decades he was based mainly in Chicago, and played and recorded with, among others, Louis Armstrong, 'Jelly Roll' Morton and especially his own brother. He worked with Jimmie Noone, Sidney Bechet and Bunk Johnson in the 1940s, and occasionally led his own group. Dodds was the most important jazz drummer in the New Orleans style, and his equipment and technique became standard. His basic style derived from the press-roll, which he used with remarkable ingenuity and drive, but he was also noted for introducing coloristic effects on the floor-tom, cymbals and other auxiliary pieces. His most important work was done in the 1920s with Oliver (when he occasionally played melody parts on a slide whistle) and Armstrong; his style can best be studied from two recorded performances of 1946, *Spooky Drums* and *Maryland*, with his own explanatory narration, and from a recorded account of his technique.

BRADFORD ROBINSON

Dodds, Johnny (b New Orleans, 12 April 1892; d Chicago, 8 Aug 1940). Black American jazz clarinetist and alto saxophonist. He played the clarinet from the age of 17 and worked occasionally with Kid Ory and other New Orleans groups until he was 25. He left New Orleans to work with Fate Marable and others in 1917–19, then joined King Oliver's group, playing in Chicago and elsewhere until 1923. He remained active in Chicago in the 1920s and 1930s, often appearing with his brother, the drummer 'Baby' Dodds, and Freddie Keppard.

Dodds was among the leading clarinetists in the New Orleans tradition, and his embellishing countermelodies to trumpet solos are regarded (along with Jimmie Noone's) as models of excellence in that style. He recorded very widely – with his own groups, with the established bands of Oliver and Keppard, and with studio groups specially assembled by Louis Armstrong and 'Jelly Roll' Morton; he was almost alone among important New Orleans musicians outside that city in eschewing later jazz styles in his playing. As a self-taught musician he had an uneven technical command, but his best blues performances, coloured by a vibrato

centred slightly beneath true pitch, are landmarks of the earliest period of recorded jazz.

J. R. TAYLOR

Dodecaphony. A synonym for 'atonality' or, in some cases, '12-note serial composition'. See ATONALITY; SERIALISM; TWELVE-NOTE COMPOSITION.

Dodge, Charles (Malcolm) (b Ames, Iowa, 5 June 1945). American composer. He studied composition at the University of Iowa, Tanglewood and Columbia University and took special studies in computer music at Princeton University. He received a DMA degree from Columbia University in 1970 and was appointed to its faculty the same year. He was awarded a Guggenheim Fellowship in 1972. He has received commissions from the Fromm Foundation (1965), the Koussevitzky Foundation (1969) and Nonesuch Records (1970). Both his instrumental and his computer-generated music treat pitch, timbre and duration as distinct elements, specifically inter-related.

JEROME ROSEN

Dodgson, Stephen (Cuthbert Vivian) (b London, 17 March 1924). English composer. He was educated at the RCM, where he has taught since 1965. He has worked, so far, on a modest scale, most of his music being written for particular performers, and being designed to divert and charm rather than to edify or promulgate great truths. His instrumental music is distinguished by skilled and discriminating handling of the materials of music; several song cycles reflect his sensitivity to English poetry. He is one of the few living composers to write with understanding for the guitar, harpsichord and clavichord. His music is always civilized, thoughtful, and marked by a distaste for extreme gestures. His works include four concertos, a symphony for wind instruments, vocal and chamber music, two suites for clavichord, music for harpsichord and piano and music for radio plays

HUGO COLE

Doe, Paul (Maurice) (b Norwich, 8 Sept 1931). English musicologist. He studied music at Worcester College, Oxford, with Harrison and Rubbra (1949-52), gaining the BA in 1952. From 1954 to 1956 he was a research student at Oxford, studying Tudor church music. In 1956 he was appointed an assistant in music at the University of Aberdeen, and became a lecturer at Birmingham University in 1959. He was appointed professor of music at Exeter University in 1971. Having served on the committee of Early English Church Music since 1970, he became general editor of the series in 1972. In 1975 he joined the editorial committee of *Musica Britannica*.

Doe's musical activities always centred on practical performance. From 1949 to 1951 he was the leader of

the National Youth Orchestra; at Oxford, and later at Birmingham, he led the university orchestra. His writings on and editions of early Tudor church music are marked by a careful attention to detail and a fine historical perspective; his edition for EECM makes available in a practical form seven of the 50-odd extant early Tudor *Magnificat* settings. From 1965 to 1977 he edited the *Register of Theses in Music* (printed in *RMARC*, iii onwards).

DAVID SCOTT

Doef [Doff] (Dutch). An ORGAN STOP.

Doelle, Franz (b Mönchengladbach, 9 Nov 1883; d Leverkusen, 13 March 1965). German composer. His early training was on the piano and cello. In 1911 he secured the position of first horn player in the orchestra of the Apollotheater in Berlin, where he later became musical director and house composer. He was then associated with the Komische Oper. Doelle composed operettas (*Sybill*, produced 1919) and, in the 1920s, music for many revues, some of it in collaboration with other composers. Two of his most popular songs were published in many vocal and instrumental arrangements: 'Ich habe in Mai von der Liebe geträumt' from the revue *Berlin ohne Hemd* (1926) and the foxtrot 'Wenn der weisse Flieder wieder blüht' from *Donnerwetter 1000 Frauen* (1928). Not only foxtrots but also tangos and idioms from jazz and other popular music were the basis of his songs. In the 1930s he turned most of his attention to composing music for films, including the following operetta films: R. Schünzel's *Viktor und Viktoria* (1933) and *Amphitryon* (1935), G. Lamprecht's *Prinzessin Turandot* (1934), and H. Maisch's *Königswalzer* (1935). From 1941 to 1943 he composed for the film director Herbert Selpin, and after the war he lived in retirement as a farmer.

WILLIAM D. GUDGER

Doerr, Ludwig (b Speyer, 12 July 1925). German organist. He studied music from 1945 to 1949, first at the Episcopal Church Music Institute in Speyer, then at the Musikhochschule in Cologne under Joseph Zimmermann (organ) and Heinrich Lehmann (composition), and finally at the Musikhochschule in Stuttgart with Anton Nowakowski (organ) and Karl Marx (composition). In 1952 he became cathedral organist in Speyer and was also consultant on organs and church bells for the diocese. He became a lecturer at the Church Music Institute in Speyer in 1949, and its director in 1969. From 1953 to 1969 he also lectured at the Pädagogische Hochschule in Landau, and in 1964 he taught organ and Gregorian studies at the Musikhochschule in Saarbrücken. He became professor

and director of an organ class at the Musikhochschule in Freiburg in 1970 and cathedral organist there from 1972. Doerr has toured many European countries, has made recordings, and served on the juries of international competitions. He has given interpretation classes on Reger and Bach, on whose music his comprehensive repertory is centred, along with French Baroque music. He is fond of improvising, which he regards as a spontaneous creative process above and beyond its liturgical function. His recent compositions, like his colourful and powerful interpretations, have met with much acclaim.

GERHARD WIENKE

Doflein, Erich (b Munich, 7 Aug 1900; d Freiburg, 29 Oct 1977). German music teacher and musicologist. From 1919 he studied music under M. Auerbach, E. Praetorius and H. Kaminski, musicology under Max Schneider, art history under W. Pinder and philosophy under R. Hönigswald in Breslau and Munich. He took the doctorate at Breslau in 1924 with a dissertation on form and style in music. Subsequently he studied under Gurlitt and Erpf at Freiburg, where in 1928, with E. Keller and E. Katz, he founded an institute for private music teachers which remained in existence until 1937 as the town's music school. From 1941 to 1944 he was head of department at the regional music school in Breslau (Wrocław). After military service and captivity he was appointed professor, department head and acting director of the newly founded Hochschule für Musik, Freiburg (1947), where he remained until his retirement (1965). He was a co-founder (1948) and president (1956–60) of the Institut für Neue Musik und Musikerziehung, Bayreuth (later Darmstadt).

Doflein's work is characterized by an active participation, based on sober critical reflection, in the contemporary problems of music since about 1925. Article titles such as 'Fragmente zur Zeitdeutung' (1925) or 'Musik heute: Entwurf einer Diagnose' (1959) are typical. Through his particular interest in avant-garde music, Doflein tirelessly propagated a form of progressive musical education that would combine avant-garde music, older music suited to teaching purposes and musicological research under the name of music-educational theory. One result of this concept is the *Geigenschulwerk* (Mainz, 1931, 2/1951; Eng. trans., 1957), compiled by Doflein with his wife Elma (née Axtfeld), which contains more than 800 pieces from historical sources and for which he also gained the collaboration of such composers as Hindemith, Orff and Genzmer. Similar aims were pursued in his numerous editions of music for two violins, string trios, violin and piano, recorders, flute and piano.

Dogleg jack (Ger. *getreppte Docke*, *abgesetzte Docke*). A form of jack used on two- or three-manual harpsichords that do not employ a manual coupler. The dogleg jack is not bent, as its English name implies; but its lower third is partly cut away to form a step. This step rests on the end of an upper manual key while the uncut portion of the jack reaches down to rest on the corresponding key of the lower manual (see HARPSICHORD, fig.17). Consequently, when the dogleg register is engaged, it automatically sounds from both manuals. (This makes it impossible to play a *PIÈCE CROISÉE* unless the upper manual is provided with a second independent register of its own in addition to the dogleg.) Although most harpsichords having dogleg jacks, in particular those of the English and Flemish schools, do not have sliding keyboards, harpsichords of the German school often employ a short dogleg jack and a sliding lower manual whose keys are fitted with small padded blocks. When the lower manual is pushed inwards, these blocks are positioned beneath the uncut portion of the jacks, permitting them to be activated from the lower manual as well as from the upper. In this way, the upper manual jacks are coupled to the lower manual without actual coupling of the manuals themselves. When the lower manual is pulled outward, the blocks pass in front of the uncut portion of the jacks, and the jacks are activated only by the upper manual, thus making possible the performance of *pièces croisées*.

EDWIN M. RIPIN

Dognazzi, Francesco (fl 1603–43). Italian composer. In the dedication (not written by him) of his volume of 1643 he is said to have spent 40 years serving the Mantuan court. He is first heard of there in 1607, is recorded as a singer in S Barbara (the ducal church) between January and May 1611, and on the title-page of his volume of 1614 is called 'musicus' (probably meaning 'singer'). In 1619 he became 'superiore delle musiche', probably denoting the position of director of music at the court (as opposed to S Barbara), though by 1643 he held the post at S Barbara. Monteverdi indicated in two letters from Venice that he thought highly of Dognazzi, who had worked with him in Mantua and who visited Venice in November 1619 and possibly also in November 1620. He must have been a

fine singer, for he was paid a large fee to sing under Alessandro Grandi (i) at an important religious celebration at Bergamo in 1628: Grandi, who was anxious to employ the best singers northern Italy could offer, had no doubt met him while working with Monteverdi in Venice. As a composer he was undistinguished. He produced mainly secular music. There are 13 monodies and five duets in his collection of 1614; the tunes in the lighter pieces are unmemorable, but the solo madrigals are more convincing, and are in an up-to-date manner. On the other hand the five-part music of the 1643 volume is old-fashioned for its date, however, it was seen through the press for him and may have been regarded as a commemorative record of his long service at Mantua. Dognazzi himself saw through the press Amante Franzoni's second set of three-part *Fioretti musicali* (Venice, 1607) and five-part madrigals (Venice, 1608).

JEROME ROCHE

Doh. The tonic note of the prevailing key (or, if this is minor, its relative major) in TONIC SOL-FA

Döhl, Friedrich (b Göttingen, 7 July 1936). German composer and teacher. He studied school music, the piano with Seemann and composition with Fortner at the Freiburg Musikhochschule (1956–64), concurrently studying musicology, German philology, art history and philosophy at the universities of Freiburg and Göttingen. In 1967 he took the DPhil at Göttingen with a thesis *Weberns Beitrag zur Stilwende der neuen Musik*. He was a scholar of the Studienstiftung des Deutschen Volkes (1957–64), a lecturer at the Düsseldorf Conservatory (1965–8) and a German Academy scholar at the Villa Massimo in Rome (1967–8). In 1969 he was appointed chief lecturer in music theory at the Free University of Berlin, where he was made professor in 1972, and in 1974 he took over the directorship of the Basle Academy of Music. He received the Förderungspreis of North Rhine-Westphalia in 1968 and that of Berlin in 1971. In his music he went through a phase of free and serial atonality before coming to terms with the serial technique of Webern, with whom he has a close spiritual affinity. Influenced by 'informal' painting, he developed after 1962 a spontaneous, associative style; from 1965 he has tended towards an ascetic, meditative and expansive manner in which sound and form, construction and expression are intimately connected. In some works of the early 1970s he collaborated with visual artists in an attempt to create a new 'intermedium'.

WILFRIED BRENNECKF

Döhler, Theodor (von) (b Naples, 20 April 1814; d Florence, 21 Feb 1856). Austrian Jewish pianist and composer. As an infant prodigy he was Benedict's pupil in Naples, after 1825. In about 1829 he went to Vienna to study the piano with Czerny and composition with Sechter. In 1836 he began a series of international tours as a virtuoso. In Paris he was judged less remarkable than Thalberg, but an appearance as composer and soloist at a Conservatoire concert on 13 April 1838 gained him recognition. Further journeys to Germany and the Netherlands culminated in a stay at St Petersburg in 1843–5. Raised to the nobility by the influence of his patron the Duke of Lucca, he married the Russian Princess Chermetev in 1846. After this he gave no more public performances and settled in Florence in 1848. There, in 1880, his opera *Tancreda* was performed. Döhler wrote chiefly piano music, including a concerto op 7

EDWARD DANNREUTHER/DAVID CHARLTON

Dohnányi, Christoph von (b Berlin, 8 Sept 1929). German conductor. After studying law in Munich, he entered the Musikhochschule there in 1948 and won the Richard Strauss Conducting Prize in 1951, his final year. He joined his grandfather, the composer Ernő Dohnányi, in the USA, where he attended conducting courses given by Leonard Bernstein. In 1952 he was engaged by Solti as chorus master and conductor at the Frankfurt Opera. He was general music director in Lübeck (1957–63), Kassel (1963–6) and Frankfurt (1968–75), and was appointed to a similar post at the Hamburg Staatsoper in 1975. In addition he was chief conductor of the West German Radio SO at Cologne from 1964 to 1969. Dohnányi conducted the premières of Henze's operas *Der junge Lord* (Berlin, 1965) and *Die Bassariden* (Salzburg Festival, 1966), and has appeared frequently at major European festivals, the Bavarian and Vienna State Operas, and in the USA at the Metropolitan, New York, and the San Francisco Opera. His British début was with the LPO in April 1965, and in 1974 he first appeared at Covent Garden, conducting *Salome*. Dohnányi can be considered one of the most successful German conductors in the post-1945 period, as much for his technical ability as for his qualities of orchestral leadership and the expressive, spontaneous personality often reflected in his performances. He is more successful in works requiring intricate conducting technique than in those calling for a purely musical approach; he has been responsible for

widely praised productions of Schoenberg's *Moses und Aron* at Frankfurt and Vienna.

HANSPETER KRELLMANN

Dohnányi, Ernő [Ernst von] (*b* Pozsony [now Bratislava], 27 July 1877; *d* New York, 9 Feb 1960). Hungarian pianist, composer, conductor, teacher and administrator. Next to Liszt he ranks as the most versatile Hungarian musician, whose influence reached generations in all spheres of musical life. He is considered one of the chief architects of Hungary's musical culture in the 20th century

LIFE. He received his early training in Pozsony. His father, an outstanding amateur cellist, and Károly Forstner, cathedral organist, gave him lessons in piano playing and theory. Despite the absence of professional training, he showed an extraordinary appetite for music and made rapid progress. Having finished at the Gymnasium, he decided to obtain his formal education in music at the Budapest Academy. He was the first Hungarian of significant talent to do so and his example, as well as his personal intervention, induced Bartók (his friend from early schooldays) to follow the same course. Dohnányi studied the piano with Thomán and composition with Koessler, and received his artist's diploma in 1897, after three years. That summer he spent five weeks with d'Albert, preparing for his début.

In 1898 Richter took him to London, where a single performance of Beethoven's Fourth Piano Concerto laid the foundation for Dohnányi's world fame as a pianist. His op.1, the Piano Quintet in C minor (which he composed after 67 juvenile works), had already been acclaimed by Brahms in 1895, and Brahms himself arranged the première in Vienna. In 1899 his Piano Concerto op.5 received the Bösendorfer Prize and by 1900 he had established himself, in both Europe and the USA, as the greatest Hungarian pianist and composer after Liszt. He used his position to introduce the neglected works of Mozart, Beethoven and Schubert into the repertory and became the first among world-famous pianists to perform chamber music regularly. This brought about a special friendship with Joachim, who in 1905 invited him to teach at the Hochschule in Berlin. Dohnányi remained there for ten years, from 1908 with the rank of professor. He nevertheless continued his extensive concert tours and, while in Berlin, composed some of his best works.

In 1915 Dohnányi returned to Budapest and undertook the reshaping of the country's musical life on a grand scale. He selected programmes for his countless concerts with a determination to raise the standards of his public's musical tastes. This activity reached a peak in 1919-21 when he gave (in the absence of visiting artists) about 120 concerts each season in Budapest alone. According to Bartók, Dohnányi was providing the entire musical life of Hungary. The new generation - Bartók, Kodály and Weiner - assembled behind him, and he championed their music and their cause above all. From 1916 he taught the piano at the Budapest Academy, for which he worked out a comprehensive reform plan in 1917. Some of this he was able to put into practice when appointed director in February 1919 by the republican government. However, in October 1919 the new, quasi-fascist regime replaced him with Hubay. The staff went on strike, but failed to reverse the decision. Despite this treatment, Dohnányi stayed in

Hungary and continued his work, giving concerts, creating a number of institutions and conducting the Philharmonic Orchestra. He was first elected chief conductor of the Philharmonic Society in 1919 and was re-elected for 25 consecutive years. He used this post, too, to further the music of others, even at the expense of his own compositions. Between 1921 and 1927 he made extensive annual tours of the USA, and in 1925 the New York State SO appointed him chief conductor.

Ernő Dohnányi

Dohnányi returned to the Budapest Academy in 1928 as head of the piano and composition master classes. In 1931 he was appointed musical director of the Hungarian radio and in 1934 director of the academy once again. His manifold commitments at home and several prolonged illnesses in the 1930s led to the decline of his international concert career, except for occasional tours. From 1939 much of his time was devoted to the fight against growing Nazi influences. By 1941 he had resigned his directorial post at the academy, rather than follow the anti-Jewish legislation. In his orchestra he succeeded in keeping on all Jewish members until two months after the German occupation of Hungary, when he disbanded the ensemble. In November 1944 he went to Austria, a decision which drew criticism for many years. In fact, Dohnányi was criticized either from the left or from the right for most of his deeds, from his student days on. The explanation may be found in his unassailability on musical or ethical grounds. Thus attacks were launched on political premises, according to the ever-changing Hungarian spectrum. Dohnányi, who happened to be apolitical, possibly had enough experience to foresee coming

events and chose not to await the next offensive, unleashed in 1945 and reverberating long after.

The 'accusations' levelled against him always took the form of rumours. This, and the magnitude of the so-called charges (never substantiated), made it impossible for Dohnányi to defend himself. Yet, with major tours in England (1947-8), he was on the verge of reviving his international career when family reasons forced him to find security on the other side of the Atlantic. For a few months he was head of the piano department in Tucuman, Argentina, before finally settling in Tallahassee in September 1949, as pianist and composer-in-residence at Florida State University. His mental and physical powers remained unimpaired to the end, but persisting rumours prevented him from re-entering the world stage. However, he continued to play, compose, conduct and teach, and in 1956 he made a last appearance at the Edinburgh Festival, where his youthfulness astonished British audiences. He died while making some gramophone records, at a time when invitations from everywhere were beginning to come once again.

2. **WORK** As a pianist Dohnányi ranked among the greatest of all time. Above all, his tone production, his complete understanding of music and the size and choice of his repertory made him unique in his time. Among his pioneering achievements were the performance of all Beethoven's piano works in 1920 and that of all 27 Mozart piano concertos in 1941. As a composer he soon discarded the strong early influences of Schumann and Brahms, and by 1902 he had found his own language in the *Serenade* op.10. He did not seek to open new paths, but concentrated his efforts on expressing the entire Romantic heritage in the perfect forms of the 18th century. His forms, however, are not replicas; he merely drew from past achievements to create the framework for his highly lyrical and vivacious music, which, often tinged with a rare sense of humour, was so much his own. As a master of chamber music he had few equals after Brahms, and his nine important works in this field are all of a high standard. The rest of his output is variable, but he composed excellent works in almost every genre. They show an unerring mastery of form and instrumentation, fluency, and a rich but utterly natural sense of harmony. He succeeded in blending the 'Brahmsian' preservation of classical form with the Lisztian concept of motivic strands binding together a large-scale work. His best opera, *Der Tenor*, is one of the few true comic operas written in the first half of the 20th century. Among his orchestral compositions, both symphonies, the *Suite* in F# minor and most of the concertante works are highly rewarding for the performer as well as the audience, as is the *Mass* op.35. He composed as if he were a virtuoso of all instruments and he was obviously thinking of his own natural, flowing approach to performing at all times.

As a conductor Dohnányi's chief merit was the recognition of Bartók's genius decades before others, despite his own very different musical make-up. In Hungary audiences also owe to him the carefully planned introduction of many masterpieces of earlier periods, previously neglected. As a teacher he brought up generations of musicians, his pupils including Annie Fischer, Georg Solti and Géza Anda. His legendary musicianship (in all fields, including memory, score-reading and improvisation) and his strength of character

served as examples over the decades. These virtues, however, proved to be too heavy a burden in a small country, and with Bartók's death (1945) there remained no obstacle for those who wished to attempt to erase the influence of Dohnányi's towering personality from the Hungarian scene. Not until 1970 was the time ripe for his revaluation in his native country.

Doizi de Velasco, Nicolás [Dias Velasco, Nicolao] (*b* c1590, *d* probably at Madrid, in or after 1659). Portuguese guitarist and writer on the guitar, resident in Spain and Italy. By 1624 he was living at Madrid, where he knew the poet, novelist and musician Vicente Espinel. After belonging to the household of Philip IV's brother, Cardinal Fernando of Austria, who left for the Low Countries in 1634, he served the Duke of Medina de las Torres, Ramiro Núñez de Guzmán, who was Viceroy of Naples from 1636 to 1644. The authors of the laudatory *décima* and madrigal prefacing his only known work, the *Nuevo modo de cifra para tañer la guitarra con variedad, y perfeccion, y se muestra ser instrumento perfecto, y abundantissimo* (Naples, 1640), called him 'Apolo Portugues' and 'Amphion Lusitano'. The following year he returned to Madrid to become one of Philip IV's chamber musicians and remained there comfortably until at least 1659, when he ceased being paid and may thus have died. In 1651, a year in which he visited Jaén, he was drawing the large annual sum of 736,000 maravedis. In his 'New tablature method for playing the guitar diversely and perfectly and showing it to be a perfect and most abundant instrument' he praised it as being equally adaptable to every key and approved for greater sonority courses in which the fourth and fifth strings are doubled at the octave. Relying on Zarino, he classed the 4th as a consonance; his other authorities include Cerone and Cerreto. He preferred Italian notation at pitch to the Spanish Baroque custom of notating a 5th above sounding pitch. His tablature system uses all letters from *a* to *n* except *i* and *k*. Among his musical examples is a *chacona* formula.

ROBERT STEVENSON

Dokshitser, Timofey (Alexandrovich) (*b* Nezhin, Chernigov district, 13 Dec 1921). Soviet trumpeter. After attending the military band school and the Glazunov Music Academy, he studied under Tabakov at the Moscow Conservatory and the Gnesin Institute, becoming Tabakov's assistant in 1950. In 1954 he was granted independent status. He became cornet soloist in the Bol'shoi Theatre Orchestra in 1945, and from 1957 to 1959 conducted the orchestra in the subsidiary theatre. As Russia's foremost trumpet soloist, Dokshitser has made many recordings. His colleague G. A. Orvid has written, 'his perfection of trumpet technique allows him to perform compositions demanding a high standard of virtuosity and an intensity and lucidity of tone'. For many years he played on a cornet made by Alexander (Mainz), in 1958 he began using a Selmer Bb trumpet with a Bach 7E mouthpiece. He teaches at the Gnesin Institute. His writings include *Shtrikhi na trube* ('Phrasing on the trumpet', Moscow, 1976).

EDWARD H. TARR

Doktor, Paul (*b* Vienna, 28 March 1919). American violist of Austrian birth. He studied the violin with his father, Karl Doktor, violist in the Busch Quartet, and graduated at the Vienna Academy of Music in 1938. He changed to the viola and in 1942 won the Geneva International Music Competition. His début (1938-9) was with the Busch Quartet in quintets in Zurich and London. Doktor left Vienna in 1938 and from 1939 to 1947 was a soloist with the Lucerne SO. His American début, in the Library of Congress, Washington, DC, in 1948 was followed by tours of the USA, Canada and Europe. He became an American citizen in 1952. He joined the staff of the Mannes College in 1953, the Philadelphia Academy in 1970 and the Juilliard School in 1971.

Doktor's tone is warm and sweet, though light; he possesses a virtuoso technique and his large repertoire is extended by his own transcriptions. He gave first performances of concertos by Quincy Porter and Walter Piston and the BBC première of Wilfred Josephs's *Meditatio di Beornmundo*. He is a founder-member of the Rococo Ensemble, the New York String Sextet and the Paul Doktor String Trio. His 17th-century viola is attributed to Pietro Guarneri of Mantua.

Dolar, Jan Krítel. See TOLAR, JAN KRÍTTEL

Dolcan (Ger.). An ORGAN STOP (*Tolkaan*).

Dolce (i) (It.: 'sweet'). A word whose earliest musical uses were apparently indications of mood and performing style, not dynamics. Brossard (1703) defined *dolce*, along with *dolcemente* and *con dolce maniera*, in this manner; and the anonymous *A Short Explication* (London, 1724) followed his lead in its definition of *con dolce maniera*. But in 1768 Rousseau (article 'Doux') said that *dolce*, *doux* and *piano* also meant simply 'quiet', though he added that some Italian purists considered

that *dolce* could also mean *più soave*, corresponding more or less to the French *louré*. Probably all three words were used fairly loosely in the 17th and 18th centuries, though PIANO had already begun to develop its independent tradition in the 17th century. In the 19th century *dolce* was often used as an alternative indication to play quietly; and there is an old story among orchestral musicians that *dolce* means 'play loudly' because it specifically denotes phrases that must seem quiet but carry through the orchestral texture. The superlative form *dolcissimo* (current only in musical contexts) is also common and often abbreviated to *dolciss.* Examples of the use of *dolce* when it is clearly not a dynamic indication include the *mf e dolce* in Beethoven's Quartet op.59 no.1 and *f dolce* opening the finale of Schumann's Third Symphony.

Doles, Johann Friedrich (b Steinbach, Thuringia, 23 April 1715; d Leipzig, 8 Feb 1797). German composer, organist and conductor.

1. LIFE. His father Johann Andreas Doles, the Kantor of Steinbach, died in 1720, leaving the family in great poverty, and the boy's musical education was entrusted to his elder brother Johann Heinrich, who succeeded to his father's position. At the age of 12 Johann Friedrich was sent to school in Schmalkalden. There at 15 he was offered the vacant organist's post, in which he deputized for a year. At 19 he enrolled in the Schleusingen Gymnasium. After one and a half years he was made prefect of the school's choir, he also organized a weekly concert series, together with a number of fellow students, and composed some motets, arias, an *Actus dramaticus* (1737) and occasional pieces. After completing his course in 1739 he immediately enrolled at Leipzig University, and while there pursued his study of music under Bach, who after four years of instruction recommended him to the post of Kantor in Salzwedel. Near the end of his student years Doles apparently directed Leipzig's new Grosses Konzert (founded in 1743 and later to become the Gewandhaus Orchestra), and frequently attended performances of Italian opera at the Saxon court in Hubertusburg; these were later to have a decisive influence on his own compositions.

Although Doles's application to Salzwedel had been successful, he instead took up the superior post of Kantor in Freiberg (1744). Through this post he became Kantor at the cathedral and at the churches of St Peter, St Nicholas and St John, as well as *Quartus* at the Gymnasium.

As co-director of the Gymnasium Doles found himself in open conflict with the rector J. G. Bidermann and the school's board of clerical and lay overseers who, following neo-humanistic precepts, wished to remove music to the periphery of the school's curriculum. Among the many works composed by Doles during this productive period was a school opera (1748, now lost)

to commemorate the centenary of the Peace of Westphalia; the text, at least in part Bidermann's, was ridiculed by Lessing, who however gave high praise to Doles's music. Perhaps as a result of this Bidermann, with his *De vita musica* of 1749, launched his disastrous *Rektorsprogramm*, which questioned the role of music in education. The ensuing battle of polemics involved above all Mattheson, but also Gottsched and Bach, and led Doles, who apparently took no part in the journalistic campaign against his rector, into six unrelenting years of accusations, rejoinders and lawsuits (exhaustively documented by Banning, pp.25-49).

Doles escaped this imbroglio by being appointed on 1 October 1755, unanimously and without audition, to succeed Harrer as Kantor of the Leipzig Thomaskirche; C. P. E. Bach was among the unsuccessful applicants. On 30 January 1756 he took up that office, which had remained unchanged in range of duties, salary and terms of contract from Bach's day. He soon established contact with the poet Gellert, whose odes he set and published as early as 1758; a close friendship arose between them which was to last until Gellert's death (1769). From 1770 Doles deputized for the aging Görner as music director of the University Church, but was refused the post by the council at Görner's death in 1778. Disputes again arose with the rector, but Doles was no longer equal to them. In 1784 he submitted a petition to the council much like Bach's *Kurzer, jedoch höchst notwendiger Entwurf* of half a century earlier, and on 2 March 1789 asked to be relieved of his post solely because of the annoyances caused by these disputes. Shortly before his release he was visited by Mozart (20 April 1789), who played to Doles's complete satisfaction on the Thomaskirche organ and who made his well-known remarks about Bach's music (reported by Doles's pupil Rochlitz) after hearing a performance of the motet *Singet dem Herrn* under Doles's direction. Doles composed a cantata to Gellert's *Ich komme vor dein Angesicht* in remembrance of this occasion; the work appeared in print the following year with a revealing 'Vorerinnerung' which put forth his views on the performance of sacred music.

Doles left the Thomaskirche in 1789 and, as earlier in the Grosses Konzert, was succeeded by J. A. Hiller. Still in full possession of his powers, he continued to compose, attended lectures in theology at the university and made numerous manuscript copies of his works for outlying churches, giving rise to the present wide distribution of his works. Many of these pieces were performed long after his death, even far into the 19th century.

Doles's son Johann Friedrich Doles (b Freiberg, 26 May 1746; d Leipzig, 16 April 1796) was a successful lawyer and an active dilettante composer, singer and keyboard player. His works, including a set of six harpsichord sonatas (Riga, 1773) and three vocal pieces in manuscript (*D-LEm, LEt*), are reminiscent of his father's.

2. WORKS. Doles, along with his Dresden colleague G. A. Homilius, was the most important practitioner of Protestant church music in late 18th-century Germany. His works, comprising mainly cantatas, lieder, motets and chorales, have frequently been criticized for departing from the style of his teacher Bach. Such criticism represents a misunderstanding of the radically different aesthetic outlooks of their respective ages. Doles himself

formulated the difference as follows (1790):

It is far from my intention, a pupil of the late Sebastian Bach and myself the composer of many works in fugal style, to decry the value of the higher art of composing, still less to dispense with it. Nay, I merely disapprove of its untimely application.

By this he referred to the use of this style in church services, where he felt few of the congregation would comprehend, let alone be moved by, its rigours. Instead he chose as models the melodically orientated styles of Graun and Hasse, indeed of opera altogether, through which he aimed at a simplicity and artlessness which would directly awake the pious sentiments of the untutored listener. (This aim, which reflects populist notions of the Enlightenment, had a decisive effect on Hiller, with superior results.) Critics from earliest times, however, have pointed out the discrepancy between Doležálek's expressed aim of simplicity and the rich ornamentation which overburdens many of his solo parts. He also gave primacy to clear rhythmic articulation, with the result that most of his works are in almost dance-like metres at fast tempo. They combine series of symmetrical two-bar phrases, and feature feminine cadences and cadential 6-4 chords; chromaticism is rare, parallel 3rds and 6ths quite common.

Doležálek's 160 or more cantatas encompass a wide variety of forms, from the traditional 'madrigal cantata' on short biblical passages, to the full chorale cantata in Bach's style, and finally to the 'figured chorale' which is practically Doležálek's own invention, though his handling of the orchestral accompaniment was foreshadowed in the sacred lieder of Grafe and Hesse. In this style, notable for its simplicity and its virtual disregard of text, the chorus sings a simple four-part harmonization of the chorale melody, broken line by line and accompanied chordally except in the more elaborate orchestral ritornellos and transitions between phrases of text. Doležálek composed about two dozen such settings beginning in the 1760s. Perhaps more important were his 35 motets in a similar style; many of them have an ornamented solo part on a Biblical text in counterpoint against a chorale setting in even note values. These works show the outstanding craftsmanship of the Bach school; one of them, a setting of the chorale *Ein feste Burg*, remained in use throughout the 19th century and was reprinted in the 20th.

Doležálek's two extant volumes of lieder – the *Neue Lieder nebst ihren Melodien* of 1750 and the Gellert settings of 1758 – were well received in their time, despite a superfluity of *agrément*s which even his contemporaries found taxing. The first is in the tradition of Sperontes's anacreontic songs (Kretzschmar praised Doležálek's 'Wein, vergnüge mich!' as the best of this school). The second approaches the First Berlin School and C. P. E. Bach, though the work will not bear comparison with Bach's own Gellert settings. A third volume is lost. Doležálek also published a volume of four-part chorales for organ (1785) which, as the first of its type (though patterned after Bach), stimulated similar works by Kühnau and Hiller. Perhaps his most lasting contribution was as a teacher and choir trainer; a manuscript singing tutor (*A-Wgm*) and a description by Rochlitz of a lesson under Doležálek give useful accounts of his methods.

WORKS

(complete list with sources in Banning)

SACRED

Cantatas, psalms, chorale settings, for solo vv, chorus, orch. Gott ist unser Zuversicht (Ps xlvii) (Leipzig, 1755), Ich komme vor dein

Angesicht (Gellert) (Leipzig, 1790); c160 others, MS. Motets, choral lieder, 4vv. Herr, wer bin ich, in Vierstimmige Motetten und Arien, ed. J. A. Hiller, II (Leipzig, 1777); 34 others in MS, incl. 15 for 8vv.

Passion music. 2 St John Passion, incl. 1 frag.; St Luke Passion, St Mark Passion, 3 St Matthew Passion, Nun ist er da, der Grosse Tag, Passion oratorio, Oratorio on the Crucifixion, only text extant; settings of 3 Passion texts.

Masses. 5 Missa brevis, Sanctus.

OTHER WORKS

Lieder [25] Neue Lieder nebst ihren Melodien (G. Fuchs), 1v, bc/obbl. kbd (Leipzig, 1750), [21] Melodien zu Gellerts Geistlichen Oden und Liedern, 4vv/1v, bc (Leipzig, 1758), 15 kleine Lieder mit leichten Melodien für Kinder und Anfänger auf dem Klavier (F. Höltz) (Leipzig, 1790), lost; Morgenlied, in Beliebte Gesänge, ed. E. Seidler, IV (n.d.), Fliese, meine frommste Zähre, MS.

Kbd Vierstimmige Choralbuch oder Harmonische Melodiensammlung auf 2 Linienzeilen (Leipzig, 1785) [215 pieces], arr. with bc in *D-Dib. L.E.M.* [40] Singbare und leichte Choralvorspiele (Leipzig, 1794-7), Arioso con variazioni, Sonata, in Musikalisches Handbuch, ed. J. A. Hiller, I (Leipzig, 1777).

Numerous lost or doubtful works, incl. many cited in Breitkopf catalogues, see Banning.

BRADFORD ROBINSON

Doležálek, Jan Emanuel (b. Chotěboř, nr. Jihlava, 22 May 1780, d. Vienna, 6 July 1858). Bohemian composer, instrumentalist and teacher. He was born into the tradition of village schoolmaster-composers which characterized Czech cultural life in the 18th and 19th centuries, his considerable musical talent enabled him to move from his provincial environment to Vienna, where he studied with Albrechtsberger. There he soon became known as a versatile musician, playing the piano and the organ well enough to compete for the position of court organist in 1822 (he was defeated in this contest by his compatriot Voříšek) and giving concerts as a cellist. He also gained a reputation as a teacher and composer.

Most of Doležálek's compositions are for piano and consist of dances and sets of variations which were published by the Viennese firms of Artaria and Mechetti; among these his *Deux marches russes* and his *Variations sur un thème de M. Umlauf tiré du ballet* became popular. He also wrote many songs for voice and piano, some of which are settings of texts by such German authors as Schiller and Goethe (e.g. *Nähe des Geliebten*), but his most charming songs are those to Czech texts, notably his collection *Ceské písně v hudbu uvedené* ('Czech songs set to music', Vienna, 1812). He was one of the many composers who tried to revitalize the Czech language and heighten national feeling by contributing to the five-volume *Věnez se zpěvů vlasteneckých* ('A garland of patriotic songs', Prague, 1835-9; ed. J. Plavec, Prague, 1960). A number of manuscripts of his sacred choral works, including a fine Mass in D, survive (*CS-Pnm*). He was acquainted with Beethoven (reminiscences of whom are incorporated in Jahn's and Thayer's biographies), who was the major influence on his work.

ADRIENNE SIMPSON

Dolge, Alfred (b Leipzig, 22 Dec 1848, d Milan, 5 Jan 1922). American manufacturer of piano felts and soundboards and dealer in piano supplies. He began his career as an apprentice in the piano factory of A. Dolge & Co. in Leipzig, emigrating to the USA in 1866. From 1867 to 1869 he worked in the New Haven, Connecticut, shop of Frederick Mathushek (who had worked with Henri Pape in Paris). He subsequently left to become an importer of piano supplies (skins for piano hammers and Poehlmann's music wire), and by 1871, in Brooklyn, he was manufacturing hammer felts which in 1873 won a first prize at the Vienna Exhibition. The demand for good-quality felts led him to establish in 1874 a larger manufacturing concern in the Adirondack village of Brockett's Bridge. With ample water power and a large timber supply for the making of soundboards, Dolge transformed the town (renamed Dolgeville in 1887) into a busy industrial community, which later also became the centre of Zimmermann autoharp manufacture. Dolge's felts and soundboards were used by most leading piano makers. Throughout his career, he maintained a large piano supply-house at 122 East 13th Street, New York.

After attempting to build a railway connection for the transport of his products, Dolge suffered financial disaster in 1898 and left Dolgeville to begin a new life in southern California, first as an orange rancher and wine producer, later as a felt maker at the Alfred Dolge Felt Co. (at Dolgeville, California). He was also the author of *Pianos and their Makers*, which gives valuable information about early 20th-century developments in American piano making, including descriptions of Dolge's own improvements in machines for applying felt to hammers and in the quality of the felt.

CYNTHIA ADAMS HOOVER

Dolgorukov, Prince Pavel Ivanovich (b Moscow, ?1 Dec 1787; d Moscow, ?20 Feb 1845). Russian composer. His father was the well-known writer and poet Prince Ivan Mikhaylovich Dolgorukov (1764-1822). It seems that he was educated at the University of Moscow and that in 1809 he took up an appointment in the civil service. He was a fine pianist and in fact most of his compositions were piano pieces written for the salon concerts in which he performed. Like many of his contemporaries, he composed several sets of variations on Russian folk tunes, including *Vydu l' ya na rechenku* and *Golova bolit*. He also composed a number of shorter dance pieces, among which are three polonaises opp. 7, 8 and 12, and a set of six waltzes op. 13. He wrote sympathetically for the piano in a diatonic style, spiced occasionally with mild chromaticism. His best compositions are the powerful marches written in memory of the heroes of the war of 1812.

GEOFFREY NORRIS

Doliarius, Hieronim. See WIETOR, HIFRONIM.

Doll, Joseph [Giuseppe] (d Naples, Aug 1774). German musician and teacher, active in Italy. Called 'Giuseppe Doll di Baviero, tedesco', and sponsored by the archbishop, Cardinal Spinelli, he entered the Neapolitan conservatory Poveri di Gesù Cristo on 15 December 1736. His teachers there were first Francesco Durante and after 1738 Francesco Feo. It can be assumed that Doll went to Naples as a youth, since in 1757 the impresario Grossatesta of the Teatro S Carlo characterized him as 'Joseph, giovane virtuoso e capace'. On 1 December 1755 Doll, with Carlo Cotumacci, succeeded Francesco Durante at the conservatory S Onofrio a Capuana in Naples; he was the only non-Italian ever to become *maestro* of a Neapolitan conservatory. Mozart, who met Doll in Naples, wrote to his sister on 5 June 1770: 'We gorged ourselves today with Herr Doll. He is a German composer and a fine fellow'. In 1774 Doll also served as second organist in the Cappella del Tesoro di S Gennaro. After his death he was succeeded there, and at S Onofrio, by Giacomo Insanguine.

HANNS-BERTOLD DIETZ

Dollé, Charles (fl ? 1735-55). French composer, viol player and teacher ('maître de viole'), who worked in Paris. His extant works include a book of pieces for seven-string bass viol (*Pièces de viole avec la basse continue* op. 2; 1737), two books for the *pardessus de viole* (*Sonates, duos & pièces* op. 4; 1737, *Sonates à deux pardessus de viole sans basse* op. 6; 1754), and a book of trios (*Sonates en trio pour les violons, flûtes traversières et viols* op. 1; 1737). He also published as op. 5 a *Livre troisième, pour le pardessus de viole, tant à cinq qu'à six cordes* (*Mercur de France*, December 1749), and another book of pieces (op. 3) probably also for the *pardessus*. Both are lost.

In his *Pièces de viole* op. 2, dedicated to the Prince of Carignan, he uses throughout the signs for vibrato and ornaments adopted by Marin Marais, and the second of his three suites includes a tombeau for Marais *le père*, a rondeau whose chordal style, use of the high register and vibrato (called 'plainte') recall the expressive playing of the late master of the viol. His sonatas op. 4, though consciously Italianate in melodic style, with frequent sequences, syncopations and wide leaps, still reflect the French taste in expression and ornamentation. In addition to the five sonatas for *pardessus* (three with figured bass, two duets without bass), he includes five 'pièces' with descriptive titles, employing frequent double stops. His duets op. 6, published 17 years later, are thoroughly Italianate in form and melody, rich in parallel 3rds and imitation, but retaining the ornaments of the French style.

MARY CYR

Döllér, Florian Johann. See DELLER, FLORIAN JOHANN.

Dolmetsch. English family (of mixed French, German, Swiss and Bohemian origins) of instrument makers,

scholars and performers of early music. (1) Arnold Dolmetsch had great influence on late 19th- and 20th-century attitudes to scholarship and performing practice, particularly through the reconstruction and development of obsolete instruments (the viols, keyboard instruments and notably the recorder). His work was continued by his heirs, principally (5) Carl Dolmetsch.

(1) (Eugène) Arnold Dolmetsch (b Le Mans, 24 Feb 1858; d Haslemere, 28 Feb 1940). Pioneer in the revival of performances of early music (particularly instrumental) on the original instruments and in the style of the period. Born into a family of musicians and craftsmen, he learnt piano making in his father's workshop and organ building from his maternal grandfather, Armand Guillaud. In 1878 he married Marie Morel, a lawyer's daughter eight years his senior. After a short visit to the USA, he studied privately with Vieuxtemps and at the Brussels Conservatory from 1881 to 1883. He then went to the Royal College of Music, in its first year, where he studied the violin with Henry Holmes and harmony with Bridge; he also played in the first five concerts given at the college in a quartet led by Emil Kreuz (1883-4). George Grove, both then and later, encouraged his growing interest in early music. From 1885 to 1889 he taught the violin at Dulwich College, where to assist intonation he fretted his pupils' violins and favoured the learning of simple tunes rather than scales or exercises. His published arrangements of instrumental music by Corelli, Handel and Purcell, with realizations of the figured basses, date from this time and are not truly representative of his work.

In 1889, while looking for music for the viola d'amore, Dolmetsch first came upon English fantasies for viols in the RCM library and in the British Museum. He began to acquire and restore early instruments, which were then played by his wife, his daughter and some of his pupils. In 1890-92 he supplied musical illustrations to Bridge's Gresham lectures, playing works by Jenkins, Simpson, William Lawes and Locke, on viols and harpsichord. At his first public concert, in June 1890, his daughter Hélène played Eight Divisions on a Ground by Simpson on the bass viol. Throughout the 1890s he gave concerts in his own home on period instruments, regularly introducing works taken from MSS and early printed editions. In 1894 he and his wife separated; they were later divorced. At that time Dolmetsch still lived in Dulwich; later he moved to Bloomsbury where Elodie, formerly the wife of Edgard Dolmetsch (Arnold's brother), kept house for him and played the harpsichord in his concerts. They were married in 1899.

After restoring many old instruments, Dolmetsch made his first lute in 1893; his first clavichord followed in 1894. At the suggestion of William Morris he built his first harpsichord, which was shown at the Arts and Crafts Exhibition in October 1896. It was at this time that Mabel Johnston first came to Dolmetsch as a violin pupil; she later became an apprentice instrument maker. In 1897, Arnold and Elodie played the harpsichord continuo in the first 'modern' performance of Purcell's *King Arthur* (in Fuller Maitland's edition) in Birmingham under Richter. In July 1900 he provided the musical accompaniment for Isadora Duncan's *Dance Idylls* at the New Gallery in London.

In 1902, after various financial and domestic

Arnold Dolmetsch

upheavals, he toured the USA, where he was greeted with enthusiasm. The next year, when his second marriage failed, he married Mabel Johnston. He went to America again in 1904, when he worked with Ben Greet, the Shakespearean actor-manager; at Boston he accepted a job at the piano makers Chickering & Sons, running a department of his own where he made harpsichords, clavichords, lutes and viols. Some of his finest instruments date from this period, including a harpsichord for Busoni. He stayed with Chickering from 1905 to 1911. After a trade recession he left the USA, and he worked for Gaveau in Paris from 1911 to 1914.

At this time he began the work which led to the publication of his book on the interpretation of 17th- and 18th-century music. Although many other scholars have since expanded the state of knowledge in this field, Dolmetsch's work remains a landmark: at that time nothing comprehensive had been written on the subject. In 1914 Dolmetsch returned to England; in the following year, he designed and built his first 'triangular harpsichord', a spinet-type instrument with two pedals which, when folded, fitted into a London taxicab.

In 1917 he moved to Haslemere, and he later taught at Dunhurst School. In 1919, following the loss of a Bressan recorder acquired in 1905, he perfected the first modern recorder made to Baroque specifications. Friends financed the building of a workshop in 1920, and from that time until World War II Haslemere was a centre for the study and re-creation of the traditions of performance of the music of previous centuries under unique conditions. The first Haslemere Festival was held in 1925 and consisted of two weeks of concerts of early music played on contemporary instruments. By 1926, Dolmetsch had reconstructed the full family of recorders and these were played for the first time in the festival of that year. Although those early performances showed signs of under-rehearsal, interest and support were such that the festival became an annual event. Much of the music performed there is still edited from MSS and early printed music in the Dolmetsch

library, which (together with its instruments) is one of the finest private collections in England. The workshops that Dolmetsch started still produce keyboard instruments and viols following Arnold's maxims and developed by his son (5) Carl Dolmetsch, but it is the recorder which is especially associated with the workshops at Haslemere; examples are to be found in the hands of schoolchildren and of professional players all over the world. In 1929 the Dolmetsch Foundation was established to further the study and performance of music according to Dolmetsch's principles: it provides apprenticeships and scholarships to students of all nationalities and produces an annual journal devoted to its aims, the *Consort* (first published in 1929, sporadically until 1948, and continuously from that date).

In 1937 Dolmetsch was granted a British Civil List pension, and in 1938 the French made him a Chevalier de la Légion d'honneur; in 1939 he was awarded an honorary DMus by Durham University.

Throughout his career Dolmetsch was met consistently by the prejudice of his contemporaries, which was due largely to their scepticism, but also to his own intolerant and intractable nature. Towards the end of his life scholars and musicians were at last beginning to recognize the true value of his work, but he was a very sick man and had by then lost touch with them and their researches, and refused to believe their sincerity when they praised him. In *Grove 5* Donington, who worked and studied at Haslemere, wrote:

In his prime his critical faculty fully matched his uncanny intuition: in his last years his intuition remained more fruitful than un intuitive learning can ever be, but grew less sure from lack of scholarly contact. His flair for early style and for inspired tone-production on early instruments amounted to a unique phenomenon. He once characteristically remarked 'students should learn principles rather than pieces: then they can do their own thinking'.

Dolmetsch's great gift was that, in a period when early music was virtually ignored except for academic study, he had both the imagination and the musicianship to take a musical work which had become a museum piece and make it speak to the people of his own time in a language intelligible to them. Today, the performance of early music has taken its place as a subject for serious study: Dolmetsch's pioneering work helped to lay the foundation for such a development.

(2) **Mabel Dolmetsch** (b London, 6 Aug 1874; d Haslemere, 12 Aug 1963). Third wife of (1) Arnold Dolmetsch. She specialized in the playing of the bass viol, and studied this instrument with (3) Hélène Dolmetsch. She is best known for her extensive

researches into court dances of the 16th, 17th and 18th centuries.

She had four children: Cécile (b Dorking, 22 March 1904), who has specialized in playing the pardessus de viole, Nathalie (b Chicago, 31 July 1905), who founded the Viola da Gamba Society in 1948 and has edited much viol music, written prefaces to facsimile editions of tutors for the viol by Simpson and John Playford (1955, 1965) and written *The Viola da Gamba: its Origin and History, its Technique and Musical Resources* (London, 1962, 2/1968); (4) Rudolph Dolmetsch; and (5) Carl Dolmetsch.

(3) **Hélène Dolmetsch** (b Nancy, France, 14 April 1878; d Dulwich, 7 July 1924). Only daughter of (1) Arnold Dolmetsch by his first wife. A pupil of Carl Fuchs, she was a cellist and a highly gifted viol player. Her career began in her father's concerts when she was seven, but in 1902, following litigation over the disputed ownership of an instrument, she ceased to play with the Dolmetsch consort.

(4) **Rudolph (Arnold) Dolmetsch** (b Cambridge, Mass., 8 Nov 1906; d 6 or 7 Dec 1942). The eldest son of (1) Arnold Dolmetsch and his third wife. He played the harpsichord and viol, the former brilliantly and the latter with a promising natural talent. He was educated at the RCM and was the first of the family to show an interest in modern music, both as composer and conductor. His career was cut short tragically when he was lost at sea during the war.

(5) **Carl (Frederick) Dolmetsch** (b Fontenay-sous-Bois, France, 23 Aug 1911). Second son of (1) Arnold Dolmetsch and his third wife, (2) Mabel. He made his début in a viol consort at the age of seven, and was a soloist at the first Haslemere Festival (1925). He studied with his father, Carl Flesch and Antonio Brosa. He plays a variety of instruments, including viols, but is best known for his virtuoso recorder playing. He is a founder-member and was the first musical director of the Society of Recorder Players (founded 1937). Since 1947 he has been the musical director of the Haslemere Festival and the Dolmetsch Foundation.

Carl Dolmetsch is the father of four children. Jeanne and Marguerite (both b Haslemere, 15 Aug 1942) were educated at the RAM and also studied the recorder, viol and harpsichord with their father. Jeanne specializes in the recorder and treble viol, Marguerite in the recorder and tenor viol. Both play in the Dolmetsch Ensemble with their father. Carl's second son was Richard (Arnold) (b Haslemere, 2 March 1945; d Preston, 9 May 1966), who was educated at the RAM and played the recorder, violin and harpsichord. In 1961 he won the Gold Medal of Le Royaume de Musique in Paris, but his later years were marred by illness, and he committed suicide.

Carl Dolmetsch gives regular recitals with Joseph Saxby (harpsichord) and has had many works specially written for him and his instruments by contemporary composers, including Berkeley, Cooke, Chagrin, Gál, Maw and Rubbra. As well as his concert activities, Carl supervises the workshops at Haslemere. He has written many articles for a variety of journals, both musical and

those concentrating on the technical aspects of instrument construction. He has made many editions of music for recorder, and is the general editor of *Il Flauto Dolce*, a series of tutors and music for the instrument. In 1954 he was created CBE, and in 1960 Exeter University conferred upon him the degree of honorary DLitt.

MARGARET CAMPBELL

Dolphy, Eric (b Los Angeles, 20 June 1928; d Berlin, 29 June 1964). Black American jazz alto saxophonist, clarinetist and flautist. He began to study the clarinet at eight and the saxophone at 15. After working locally with Gerald Wilson and Buddy Collette he replaced the latter in the Chico Hamilton group, with which he toured in 1958. He was subsequently heard with George Tucker and Charles Mingus before leading a cooperative band with the trumpeter Booker Little in 1961; he then worked with John Coltrane. From 1962 until his death during a European tour he was principally active as a freelance musician in the New York area.

Dolphy's playing was characterized by instrumental agility, melodic resourcefulness and skill in tonal manipulation; *Free Jazz* (1960), recorded with Ornette Coleman, shows his skill in group improvisation. The bass clarinet work in *What Love* (1960) represents him at his best, while *Something Sweet, Something Tender* and the *Out to Lunch* collection (1964) suggest that he was moving towards a more varied form of expression especially relevant to his multi-instrumental talents.

MICHAEL JAMES

Dolukhanova, Zara [Zarui] (Agas'yevna) (b Moscow, 15 March 1918). Soviet mezzo-soprano. She studied with V Belyayeva-Tarasevich at the Gnesins' music school, and graduated from the Gnesin Institute in 1957. In 1939 she made her début at the Erevan Opera but soon left the stage for the concert hall. She was, however, one of the singers who took part in re-establishing Rossini's florid mezzo roles in the repertoire she broadcast performances of Cinderella and Rosina (also Cherubino) and recorded extracts of *Semiramide*. She was appointed a soloist with the All-Union Radio and Television in 1944, and with the Moscow PO in 1959. Dolukhanova was outstanding among Soviet singers. She used the wide range and agility of her coloratura voice with controlled ease, giving polished performances of such differing composers as Musorgsky, Tchaikovsky, Prokofiev, Verdi and Debussy; she also gave the first performance (1955) of Shostakovich's cycle *From Jewish Folk Poetry*. In all her interpretations she displayed a keen style, and she went to the heart of whatever she sang. She has toured widely, in east Europe, and in Italy, France, Britain, Argentina, the USA, Japan, New Zealand and other countries. She was made People's Artist of the RSFSR in 1956, and was awarded the Lenin Prize in 1966.

I M YAMPOL'SKY

Dolzaina (Fr. *douçaine, doussaines, douchaines*; Ger. *Cornamuse*; Sp. *duçayna, dulzaina*). A somewhat mysterious instrument documented from the 14th century to the 17th; it was most probably a straight-capped shawm with a soft tone. For details, see WIND-CAP INSTRUMENTS. The word 'dolzaina' should not be confused with 'dulzian' or 'dolzian', terms applied to the early BASSOON and sometimes mistakenly to the bass or tenor SHAWM. The present-day Spanish *dulzaina* is a loud treble shawm, uncapped, that is used in folk music.

Dolzansky, Alexander Naumovich (b Rostov-na-Donu, 12 Sept 1908; d Leningrad, 21 Sept 1966). Soviet musicologist and theoretician. He studied music at the Musical Training College in Leningrad and composition with Pyotr Borisovich Ryazanov (1928-30). After graduating from the Leningrad Conservatory in 1936, he continued postgraduate work on polyphony under the supervision of Kristofor Stepanovich Kushnaryov. He taught at the First Musical Training College (1930-41) and at the Leningrad Conservatory (1937-48; 1954-66). He was an active figure in the Union of Soviet Composers and lectured widely. Dolzansky wrote numerous studies of the music of Shostakovich and Tchaikovsky, Glinka and other 19th-century Russian composers. His other research interests included questions of mode, musical form and classical and contemporary polyphony.

Dolzian. A corruption either of *dulzian*, an early term for BASSOON, or of *dolzaina*, a WIND-CAP INSTRUMENT.

Domaine Musical. Parisian concert society established by Boulez in 1954 and active until 1973; see PARIS, §VII, 3.

Domaniewski, Bolesław Marian (b Gronówiek, nr. Sieradz, 16 July 1857; d Warsaw, 11 Sept 1925). Polish teacher, pianist and composer. From 1871 to 1874 he

studied the piano under R. Lorer and Józef Wieniawski in Warsaw, and later at the St Petersburg Conservatory under A. Kross, Anton Rubinstein, Lyadov and Nikolay Solov'yov; on completing his studies in 1882 he was awarded a gold medal. He gave concerts from 1874, first in Russia, then in Poland, France and Italy. From 1890 to 1900 he was professor of the most advanced piano class at the Kraków Conservatory. In 1900 he settled in Warsaw, where from 1902 to 1925 he was head of the School of Music (later renamed the Chopin Higher School of Music); he directed the piano class, and under his guidance the academic standards of the school attained a very high level. From 1906 to 1925 he was director of the Warsaw Music Society. Domaniewski wrote *Vademecum pour pianistes modernes* (Leipzig, 1897), a book of piano exercises which is still used. He also composed many piano pieces. From 1905 to 1907 he edited the fortnightly musical and literary journal *Lutnist* ('The lutenist') and also wrote articles on music for other Polish periodicals.

ELŻBIETA DZIĘBOWSKA

Domanínská [Klobásková, Vyčichlová], **Libuše** (b Brno, 4 July 1924). Czech soprano. She studied at Brno Conservatory and with Řezníčková, made her début with the Brno Opera and soon became a leading member of the company. Her soft, warm, 'jugendlicher dramatische' soprano, gifted in cantilena and capable of delicate expressive nuances, was primarily valuable in Smetana. But she won great success, in many ways still unsurpassed, with Janáček's *Jenůfa*, *Kát'a Kabanová* and *Vixen*, in which the outstanding character of her voice was supported by sensitive dramatic feeling. In 1955 she joined the Prague National Theatre and with that company has sung at the Edinburgh and Holland festivals and the Helsinki Sibelius festival. She has also appeared at the Teatro Colón, Buenos Aires and from 1958 to 1968 as a regular guest at the Vienna Staatsoper. As well as her Czech roles, she has sung in Russian and Soviet operas and in Verdi, Puccini and Mozart. She sang in Janáček's Glagolitic Mass at La Scala and her repertory also includes a wide range of songs. In 1966 she was made Artist of Merit and in 1974 she became a National Artist for her work in the Prague National Theatre.

ALENA NĚMCOVÁ

Domarto, Petrus de (fl ?Naples, ?c1470-85). Composer. The manuscripts containing his music were copied in the 1470s and 1480s. His *Missa Spiritus alme* was cited by Tinctoris and seems to have been popular, since it is found in four manuscripts. His two secular works, *Cheluy qui est tant plain de deul* and *Je vis tous jours*, both survive in manuscripts that can be related to Naples.

Domberger, Georg Joseph. See DONBERGER, GEORG JOSEPH.

Dōmbra [dombra]. A name referring to various types of central Asian lute; see AFGHANISTAN, §§3, 12, BALALAIKA; CENTRAL ASIA, §§1, 7; II, 2, 5; UNION OF SOVIET SOCIALIST REPUBLICS, §XI, 4, 9(i).

Domenico [Dominici], **Gianpaolo di** [Paolo, Gram-paolo de, Giovan Paolo de] (fl Naples, c1706-40) Italian composer and instrumentalist. He was probably a Neapolitan; the librettos of his three comic operas name him as 'Virtuoso de Camera del' ... Dochessa de Laurenzano', and he was paid 45 ducats for playing in the Teatro di S Carlo orchestra in the season 1739-40.

His first opera was *Lisa pontegliesa* (text, A. Piscopo; Naples, Teatro dei Fiorentini, winter 1719) where, according to Scherillo, Neapolitan dialect was used for the first time in the pastoral variety of *opera buffa*; it would be more correct to say that here the customary Neapolitan domestic farce is given a pastoral setting, for in number of characters, plot and dramaturgy the work is far closer to the popular *chelletta pe' mmuseca* than to the traditional pastoral comedy. Both Domenico's other operas, *Li stravestimento affortunate* (F. A. Tullio; written 1719, Naples, dei Fiorentini, November 1722) and *Lo schiavo p'amore* (Naples, dei Fiorentini, November 1724) rely heavily on the comic device of transvestite disguise, borrowed from literary romance. The libretto of the latter work contains an interesting letter by its unknown author (according to Manfredi, A. Palomba) criticizing the public taste in comic opera. This taste, he said, requires that an *opera buffa* be very short, yet contain many time-consuming arias; that the plot be complicated, but that there be very little of the necessary recitative to develop such a plot; that the opera be highly amusing, yet be without any pungency of wit.

A cantata for soprano and continuo by Domenico appears in an MS miscellany (*GB-Lhm*); it is dated 1706. The Breitkopf catalogue of 1763 advertises three oboe concertos by a 'Domenico', and the *Recueil lyrique d'airs choisis des meilleurs musiciens italiens* (Paris, 1772) contains an aria by a 'Domenico'.

Domenico [Domenichino, Domenegino] **da Piacenza** [Ferrarese] (Piacenza, late 14th century; d ?Ferrara, c1470). Italian dancing master, dance theorist and composer. He taught dancing to GUGLIELMO EBREO DA PESARO and ANTONIO CORNAZANO, who referred to him as 'mio solo maestro e compatriota' (in his *Libro dell'arte del danzare*). In 1455 Domenico choreographed and took part in the elaborate dances for the wedding of Tristano Sforza and Beatrice d'Este in Milan at the request of Francesco Sforza. As early as 1456 he appears on the salary lists of the Este court and except for

brief absences seems to have remained there until 1470. In Forlì with the assistance of Guglielmo Ebreo he also choreographed the dances for a wedding, probably that of Pino de' Ordella and Barbara Manfredi in May 1462. In 1465 both returned to Milan 'a fare moresche e molti balli' for the marriage festivities of 'la duchessa de Calabria', probably Eleonora of Aragon who became wife of Maria Sforza, Duke of Bari.

Domenico's important treatise, *De arte saltandi e choreas ducendii* (F-Pn fonds it.972, dated about 1420), sets the example for later dance instruction manuals: the first half contains the theory of dancing and the second the dances themselves (balli and bassadanzas). He was the first to discuss the aesthetics of dancing, frequently referring to Aristotle's *Aesthetics*. The chapters on dancing style, space, musical accompaniment and dance technique as a means of artistic creativity are particularly important. All the steps and movements are systematically described. Each of the four basic metres (bassadanza, saltarello, quadernaria and piva) has its own characteristic step unit (*tempo*) but all good dancers should interchange the *tempi* as the dance requires, resulting in complex but expressive patterns. In the second part the dances included range from simple ornamental ones for two or three people to elaborate creations for 12 or more; the latter (e.g. *Tessara* and *Gelosia*) are frequently based on a thematic floor pattern and use gesture for dramatic effect. Unlike the French and Burgundian choreographies that employ a step tabulation, Domenico's are described in words. Among the dances are the first two real ballets: *La mercanzia* and *La sobria*; they are miniature dance dramas, employing all the steps and movements of the dancer's repertory.

INGRID BRAINARD

Domenico del Matta. See MAURO MATTI.

Domenicus Gundissalinus. See GUNDISSALINUS, DOMENICUS.

Domestikos. The precantor in a Byzantine choir who intoned the ENÉCHĒMA.

Domgraf-Fassbänder, Willi (b Aachen, 19 Feb 1897; d Nuremberg, 13 Feb 1978). German baritone. He was sent to the Cathedral School at Aachen to study church music. He subsequently studied singing with Jacques Stückgold and Paul Bruns in Berlin, and Giuseppe Borgatti in Milan. He made his début in Aachen in 1922. Engagements followed at the Deutsches Opernhaus, Berlin, at Düsseldorf and at Stuttgart. In 1928 he became first lyric baritone at the Berlin Staatsoper, where he remained until the end of the war.

He was first heard in England at Glyndebourne on the opening night of the first season in 1934, when he sang Figaro. His warm and pleasing natural baritone made his Mozart singing particularly appealing, and his mercurial personality and good looks were an added attraction. He appeared again at Glyndebourne in 1935 and 1937 as Figaro, Guglielmo and Papageno; he also sang the last role under Toscanini at Salzburg. After the war he appeared in Hanover, Vienna, Munich and Nuremberg, where he was chief producer from 1953 to 1962. He scored a great personal success in the title role of Egk's *Peer Gynt*, and in the title role of *Wozzeck*. In 1954 he joined the teaching staff of the Nuremberg Conservatory. His daughter, and former pupil, is the mezzo-soprano BRIGITTE FASSBÄNDER.

HAROLD ROSENTHAL

Dominant. The fifth step or DEGREE of the major or minor scale. It is of fundamental importance in tonal music because it is the highest note of the tonic triad, and as such a starting-point for melodic ideas in the tonic keys, and because its own triad (always assumed to be major) contains the two degrees closest to the tonic and therefore resolves more conclusively to it than any other triad. The tonality of the dominant provides the most frequently used key contrast of tonal music as well as the strongest means of preparing the tonic.

Dominant seventh chord. With reference to a given tonality, the chord consisting of a major triad built on the fifth scale degree with an added minor 7th; the dominant 7th of C major (or minor) is G-B-D-F. Its strongest tendency is to resolve to the tonic: its root is the same as the 5th of the tonic, its 7th tends to resolve to the 3rd of the tonic, and its 3rd - the leading note of the tonality - tends strongly to resolve upward to the root of the tonic.

Domingo, Plácido (b Madrid, 21 Jan 1941). Spanish tenor. Taken by his family to Mexico in 1950 he studied the piano, conducting with Markevich, and finally singing. In 1957 he made his début as a baritone in a zarzuela, *Gigantes y cabezudos*. His first major tenor role was Alfredo in *La traviata* in 1960. From 1962 to 1965 he was a member of the Israeli National Opera, singing some 300 performances of 12 operas, most of them in Hebrew. In 1966 he made his New York début at the City Opera in the first North American performance of Ginastera's *Don Rodrigo*. He first sang at the Metropolitan, as Maurizio in *Adriana Lecouvreur*, in 1968, at La Scala, as Ernani, in 1969, and at Covent Garden, as Cavaradossi, in 1971. He scored great successes as Vasco da Gama in the revival of *L'afriqueine* at San Francisco in 1972, as Arrigo in the new production of *Les vêpres siciliennes* (in Italian) in Paris and later in New York, and as Othello in Hamburg and Paris in

Various distinctive ballroom dances were current in the principal Dominican cities during the 18th and 19th centuries. As in other Latin American countries, their popularity declined, and the dances considered national (such as the *carabiné*, the *danza* and the *contradanza*) were replaced by others; in the present-day Dominican Republic such dances as the *mangulina* and *yuca*, fashionable in the 19th century, may still occasionally be found. Thus historical data regarding structure, movement and other musical characteristics of folk-dances no longer apply to present forms.

Afro-Dominican music forms an essential part of certain religious functions such as the feasts of St John.

1 The merengue dance accompanied by guayo (scraper), accordion and tambora (drum)

St Peter, the Holy Ghost and certain evening entertainments such as the Cruz de Mayo.

The music of African character falls within the categories *plenas* (see above), *salves* and *bailes de palos*. Though some dances of African character may take place independently of Catholic religious worship, they appear mostly in connection with it. Sometimes both sacred and Afro-secular elements may be combined in a

single form, as for example in the *salves* (songs of blessing) sung indoors, and the *baile de palos* (stick dance) performed out of doors in *enramadas* (groves).

Salves are usually sung by women, as soloists or in chorus, although boys' and male voices are sometimes added. The melodic part is generally free and independent of the accompaniment (see ex.6), which is usually provided by the *panderos* and *guayos* whose percussion and timbre give the piece a distinctly African character. A noteworthy characteristic of these songs is the typically African responsorial practice. The songs or *tonadas* used in the *baile de palos* are varied. Although generally fast, some, for instance the *tonadas de palos* dedicated to the Holy Ghost (ex.7), are slow, with a markedly ritual character, akin to that of liturgical litanies; the voices of the male soloist and the mixed chorus are plaintive, almost funereal. The accompanying percussion is provided by the drums *palo grande* and *alcahuete* which make contrasts of pitch and timbre, as is also common in African music.

Instruments in the Dominican Republic are of both African and Spanish derivation. Among idiophones the *guayo* (metal scraper, see fig.1) is either cylindrical or open like a grater (the tool used to grate yucca roots is known by the same name) and is scraped with a thin metal object or nail; its sound is metallic and strong, but not very high-pitched. The Dominican marimba (cf Cuban *marimbula*) is a lamellaphone with three or four thin steel lamellae attached to a small box resonator with a soundhole.

♩ = 132

There are several local varieties of membranophone. The *alcahuete* (fig.2) is a single-headed drum made from the hollow trunk of an avocado tree. The heads are generally made of calves' hide, and are nailed or held in place by wedges. The largest drum of the Dominican Republic is the *palo grande*. Like the *alcahuete*, its single head is either nailed or held in place by wedges depending on local custom. It is always played with the hands, but the position of the drum varies: it may be held between the legs, stood in front of the player (fig.2) or laid horizontally on the ground, in which case the player sits on top of it. The *tambora* is a double-headed drum, placed across the knees of the seated player, who strikes one side with his hand and the other with a thin

2. *Palo grande* and *alcahuete* (drums)

small stick (fig.1). The *pandero* is a frame drum of 20 cm or more in diameter. Unlike the Spanish *pandero*, it does not have metal discs attached to the frame. It is played by alternately rubbing and striking the head.

Of the chordophones, the *tres*, a member of the guitar family, has three double courses (from which the name *tres*, 'three', derives); the first and third are tuned to the octave, the second to the unison. Played with a plectrum, it is primarily a melodic instrument, but sometimes also provides rhythmic chordal accompaniment.

LUIS FELIPE RAMÓN Y RIVERA

Dominiceti, Cesare (b. Desenzano del Garda, 12 July 1821, d. Sesto S. Giovanni, Lombardy, 20 June 1888). Italian composer. He studied in Milan. His first opera, *I begli usi di città*, was successful in his native city in 1841, but failed in Venice later that year. His next, *Il fiera di Tolobov*, was unsuccessful in Brescia in 1845. *Due moglie in una* (performed Milan, 1853, excerpts published there), a *melodramma giocoso* in the Rossini style, was judged to have some originality, winning praise from Alberto Mazzucato, and another opera, *La maschera*, was performed at La Scala in 1854. Dominiceti's life soon took a melodramatic turn: he went to South America as a conductor with a travelling opera company and was abandoned in Bolivia by its impresario. For 18 years he worked in a tin mine, amassing a modest fortune. He then returned to Milan and resumed his career as an opera composer with *Morovico* (Milan, 1873), but was now considered out of date. From 1881, the year of his last opera (*L'ereditiera*, Milan), he was composition professor at the Milan Conservatory.

Of the three operas by Dominiceti performed after his return, only *Lago delle fate* (Milan, 1878; vocal score published there) had any success. Classified as a *dramma fantastico*, it was set in a gorge in the Black Forest. It is structured as an old-fashioned number opera, but uses harmonies that are modishly chromatic, and has one interesting delirium scene. Dominiceti's fame in later years rested on his ability as an orchestrator; it was rumoured that he helped Boito with the scoring of the revised *Mefistofele*. Boito wrote a libretto, *Irām*, for him; it is usually stated that he never composed it, but according to Ricordi's 1875 catalogue the autograph score was then in their archives.

Dominici, Gianpaolo [Giovanni Paolo] di. See DOMENICO, GIANPAOLO DI.

Dominicus de Ferrara (fl c1420). Italian composer, probably from Ferrara. His only surviving work, a ballata refrain *O dolce compagno*, is found only in *GB-Ob* 213. The composition is a canon cancrizans whose text gives instructions for the realization of the two upper voices.

Dominik, Alexander. See KOWALSKI, JÚLIUS.

Dommer, Arrey von (b Danzig, 9 Feb 1828; d Treysa, nr. Kassel, 18 Feb 1905). German music historian and librarian. He intended to follow a career in theology, but changed to music, studying composition in Leipzig with J. C. Lobe and E. F. Richter and taking organ lessons. He taught music in Leipzig before moving to Hamburg in 1863, where he was a critic for the *Hamburgische Correspondent* for seven years. In 1873 he was appointed to the staff of the Hamburg City Library, he remained there until 1889, when he retired to Marburg. Little known for his compositions (a few vocal works), Dommer earned more acclaim for his work on prints of Luther's music and early Marburg prints and for his longer writings on music, particularly his *Handbuch der Musikgeschichte*.

GAYNOR G. JONES

Dommett, Leonard (b Toowoomba, 21 Dec 1928). Australian violinist and conductor. He studied at the Melbourne University Conservatorium of Music and toured Australia and New Zealand with the Ballet Rambert in 1947–8 as leader and assistant conductor. He also toured Europe with the Ballet Rambert in 1950. He has been a member of several orchestras in Britain and Australia and became a soloist for the Australian Broadcasting Commission in 1954. He formed the Brisbane Musica da Camera Chamber Music Society in 1955 and the Jacksonville SO, Florida, in 1957. In 1961 he became leader and assistant conductor of the South Australian SO and in 1965 leader of the Melbourne SO. In 1972 he formed the Melbourne String Quartet with Donald Scotts, Paul O'Brien and Phillip Green. He has stimulated Australian composers to write both chamber and solo works, and has given the first performances of violin concertos by Werder, Banks, Butterley and Tibbits. He was appointed OBE in 1977.

ANN CARR-BOYD

Domnérus, Arne (b Stockholm, 20 Dec 1924). Swedish jazz alto saxophonist, clarinetist and bandleader. He led his first combo in 1942 and appeared during the next few years with several Swedish dance and jazz orchestras. In 1949 he performed at the International Jazz Festival in Paris, an event which first brought international recognition to Swedish jazz, and in the same year made his first recordings on his own. From 1951 to 1968 he led a medium-sized jazz group which over the years included many of the foremost Swedish musicians (Lars Gullin, Jan Johansson and others). He was also a member of the Swedish Radio Band (1956–65) and became the leader of its successor, the Radio Jazz Group (1967).

Domnérus won international acclaim as a soloist in the early 1950s, mainly through a large number of recordings with Swedish and international all-star groups and under his own name, and came to be regarded as a leading European alto saxophonist of the decade. His distinctive style blended elements from those of Charlie Parker, Lee Konitz (he had performed with both) and Johnny Hodges.

ERIK KJELLBERG

Domnich, Heinrich (b Würzburg, 13 March 1767; d Paris, 19 July 1844). German horn player, composer and teacher, active in France. Son of the Hungarian-born principal horn at the Würzburg court, Friedrich Domnich, he was the most famous of three brothers; the others were Jacob (b Würzburg, 1758), who in about 1790 emigrated to Philadelphia and taught and played extensively there, and Arnold (1764–1827), principal horn at the Saxe-Meiningen court in the early 19th century. At an early age Heinrich entered the band of Count von Elz at Mainz, but when subjected to livery service he went to Paris where he studied with Punto. His first solo appearance there was in 1781. In 1785 he appeared as second to Jean Lebrun in a double concerto at the Concert Spirituel, earning praise for the neatness and facility of his playing. In 1788 he played a solo concerto by Devienne, but he otherwise appeared mainly in duos and trios. By 1787 he had joined the Opéra orchestra as Lebrun's second and in 1793 entered the National Guard band. He was appointed professor of *cor basse* at the Paris Conservatoire in 1795, continuing until his retirement in 1817, when his class was merged with Dauprat's.

Domnich's importance is as a teacher rather than a performer. His *Méthode de premier et de second cor* (Paris, 1807/R1974) was the first definitive tutor for the horn, laid the foundations of the French school of horn playing, and remains invaluable in teaching hand technique. His description of Hampel's hand-stopping experiments is the earliest and most complete; he must either have studied with Hampel or have written down what Punto recounted from his studies with Hampel. Domnich wrote solo concertos (which remain useful works for hand-horn students), symphonies concertantes for two horns and romances.

WORKS

(published in Paris)

Vocal 6 romances, acc. pf, op. 1 (n.d.); 6 romances, acc. pf/harp, op. 2 (n.d.); [3] Recueil des romances suivi d'un duo, acc. pf/harp, opp. 3–5 (n.d.); 6 romances ... 6me recueil, acc. pf/harp (n.d.)

Orch: Concerto pour premier cor (n.d.); 2me concerto pour le second cor (n.d.); [3 me] conc., hn; lère symphonie concertante, 2 solo hn (1812); Symphonie concertante, 2 solo hn, mentioned by Fétis

HORACE FITZPATRICK

Domokos, Pál Péter (b Csikvárdotfalva, 28 June 1901). Hungarian musicologist and folklorist. After taking a diploma as a schoolmaster and music teacher in Csiksomlyó (1919) he studied music and sciences at the Budapest Teachers' Training College (graduated 1926) and then worked as a music teacher and choirmaster in Csikszereza (1926-9). Between 1926 and 1940 he played an important role in the cultural life of the Hungarian minority in Romania: he founded a newspaper, initiated a movement to revive popular customs and organized choral festivals to perform Kodály's works. Subsequently he was the principal of the teachers' college in Kolozsvár, now Cluj-Napoca (1940-44) taking the doctorate in 1943 at Kolozsvár University with a dissertation on the Magyars in Moldavia. In 1944 he moved to Budapest.

Domokos began his research with pioneering field-work in Moldavia (1929, 1932), where he collected folksongs among the Csángó-Magyars, and in Bukovina (1932); material from the first trip was published in his first book *A moldvai magyarság* (1931). Bartók, whose work on folk music had prompted this research, transcribed the songs from phonograph cylinders. In Budapest Domokos continued collecting folk music among a group of Csángós resettled in Hungary, and published it with Rajeczky in *Csángó népzene*. In the 1960s, prompted by the scarcity of written 18th-century musical sources in Hungary, he began to investigate the libraries and archives of Hungary and Slovakia, and found about 200 dance melodies in 18th-century manuscripts.

MARIA DOMOKOS

Domvill, Silas. See TAYLOR, SILAS.

Donà, Mariangela (b Piove di Sacco, Padua, 23 May 1916). Italian musicologist. She took a degree in philosophy at Milan University under Antonio Banfi with a dissertation *L'estetica della musica nel primo Romanticismo tedesco*. From 1942 she was librarian of the Brera National Library, Milan, and later (1961-3) worked as an editor for Ricordi. In 1965, with Sartori, she founded Ufficio Ricerca Fondi Musicali (the music section of the Brera National Library), and has since worked to fulfil its aim of gathering catalogues of all known Italian collections of music and thus becoming the bibliographical centre for the country's music. In 1969-70 she was director of the Messina University Library. Her main research interests in Romantic music and philosophy have led to the translation of important works by Hanslick and Hoffmann and to studies of musical expression and of the doctrine of the Affections.

CAROLYN M. GIANTURCO

Donalda [Lightstone], **Pauline** (b Montreal, 5 March 1882, d Montreal, 22 Oct 1970). Canadian soprano. She studied at the Royal Victoria College, Montreal, and went to Paris in 1902 taking her stage name from her benefactor, Donald A. Smith (Lord Strathcona). After studies with Edmond Duvernoy and Paul Lhéris, she made her début as Massenet's Manon in Nice in 1904. The following year she made her Covent Garden début as Micaela with Destinn and Dalmorès. Later she sang several roles there and was Ah-joe in the première of Leoni's *L'oracolo* (1905). In 1919 she was the first London Concepción in Ravel's *L'heure espagnole*. She also sang at the Théâtre de la Monnaie in Brussels, the Opéra-Comique in Paris and the Manhattan Opera in New York. Her rich timbre and vivacious style won admiration. She was first married to the baritone Paul Séveilhac, then to the Danish tenor Mischa Léon. She retired in 1922 and taught in Paris until 1937; she then returned to Montreal, where she founded the Opera Guild in 1940. That organization gave several Canadian

premieres and she remained president until its demise in 1969. In 1954 she received an honorary doctorate from McGill University. Among her pupils were Clarice Carson and Robert Savoie.

GILLES POTVIN

Donaldson, Walter (b Brooklyn, 15 Feb 1893; d Santa Monica, Calif., 15 July 1947). American songwriter, lyricist and publisher. He was a pianist and song plugger in Tin Pan Alley before World War I and then became a staff composer for Irving Berlin's publishing company. His best-known songs include 'My Mammy' (1918), 'My Buddy' (1922), 'Carolina in the Morning' (1922), 'Yes, sir, that's my baby' (1925), 'My Blue Heaven' (1927), 'Makin' Whoopee' (1928) and 'Little White Lies' (1930). In 1928 he helped found the music publishing company Donaldson, Douglas and Gumble, and from 1929 he wrote for film musicals in Hollywood. Donaldson's melodies are characterized by repeated motifs and inventive harmonies and rhythms. Many of his tunes have been favourite material for jazz musicians.

DEANE L. ROOT

Donath, Helen (b Corpus Christi, Texas, 10 July 1940). American soprano. After studies at Del Mar College, Corpus Christi (1954-60), she moved to New York and studied with Paola Novikova (1962-7). She appeared in concert and recital in New York and Texas from 1958 to 1960, then won a contract at Cologne (1962-3), where her roles included Liù, Blacher's Juliet, Micaela and Branghien in Frank Martin's *Le vin herbé*. In 1963 she moved to Hanover and received special recognition in the theatre and on television as Jeanne in Egk's *Die Verlobung von San Domingo*. A regular performer in Munich, she made her débuts at Salzburg (Pamina) in 1967, San Francisco (Sophie and Oscar) and the Bol'shoi (Sophie with the Vienna Staatsoper) in 1971, and La Scala (Micaela) in 1972. She is active in oratorio and recital, and has recorded much of her repertory, including Mozart masses under Colin Davis and, among her opera roles, Eva and Marzelline (under Karajan), Gluck's Amor and Sophie (under Solti), and Micaela (under Maazel). Her husband, the conductor Klaus Donath, of the Darmstadt Opera, is her coach and teacher. Her light lyric soprano is notable for its flexibility, purity and ease in the upper register.

MARTIN BERNHEIMER

Donati [Donat]. German family of organ builders. In 1653 Christoph Donati the elder (b Marienberg, Erzgebirge, 30 Sept 1625; d Leipzig, 14 Aug 1706) built with Matthias Tretzschler from Kulmbach, Bavaria, an organ in the Stadtkirche in Bayreuth. The same year he was in Leipzig, where he was made a citizen on 4 October 1662. After his third marriage, in 1684, he came into possession of an inn. He built clavichords as well as about 20 organs, including those at Neuenkirchen, Lower Saxony (1661-2), Luckau (Cathedral of St Nicolai, 1672-4), Eisenberg, Thuringia (Schlosskirche, 1683-8) and Brandis bei Wurzen

(1705), all notable examples of his craftsmanship. Johann and Johann Philipp Krieger were involved in the final arrangement of the disposition of his organ at Eisenberg; Sebastian Knüpfer composed the music played for the dedication of an organ at Knauthain, and Mattheson published the disposition of his organ in the Leipzig Neukirche. Christoph Donati the younger (b Leipzig, baptized 2 Dec 1659; d Leipzig, 14 June 1713) was an efficient assistant and successor to his father, but he does not appear to have produced any works independently.

Johannes Jacobus Donati (b Leipzig, baptized 27 June 1663), son of Christoph the elder, was organ builder at the princes' courts at Gotha and Altenburg; on 9 February 1701 he married Severin Holbeck's daughter, and took over his late father-in-law's business; on 28 June 1704 he was made a freeman of Altenburg. He was also a versatile musician. Christoph Thielemann and Wahlfried Ficker are known to have been his pupils and worked with him. He built a large number of instruments (showing a preference for unusual stops and pungent voicing) and his talent was often remarked upon, both during his lifetime and after his death. His 1724 organ in Schlunzig, near Glauchau (one manual and pedal, ten speaking stops), is a remarkable example of organ construction. A clavichord built by him in 1700, now in the Leipzig Museum of Musical Instruments (Karl-Marx-Universität), is thought to be the first with full bass octave. After his death his Zwickau workshop was run by his son Johann Jacob Donati (b Zwickau, baptized 15 Oct 1715).

Johann Christoph Gottlob Donati (b Leipzig, baptized 19 Oct 1694; d Glauchau, buried 8 Sept 1756), son of Christoph the younger, had been apprenticed to his uncle Johannes Jacobus in Zwickau; in 1726 he was working as an organ builder in Glauchau, where two years later he bought a house in the outskirts, and where from 1740 he was assistant judge at the district court (on the occasion of the peace celebrations in 1763, however, his widow received alms from the poor-box). A contemporary account of him as 'instrument maker' seems to indicate that he also built clavichords and harpsichords. His excellent organ for the Schlosskapelle, Lichtenwalde (1740-41), has been since 1962 in the Stiftskirche, Ebersdorf.

Christian Gottlob (b Glauchau, baptized 3 Aug 1732; d Altenburg, Thuringia, 13 Nov 1795) and Gotthold Heinrich Donati (b Glauchau, baptized 24 Oct 1734; d Altenburg, 28 Dec 1799), sons of Johann Christoph Gottlob, continued to run their father's workshop after his death, and in March 1770 they were made freemen of Glauchau. In December 1771, Christian Gottlob was made organ builder at the Prince of Saxony's court, and in the following year he and his brother moved to Altenburg. After Christian Gottlob's death, Gotthold Heinrich took over his post; his achievements were complimented by the court organist Krebs. Organs by the brothers survive at Neuen Mörbitz (1770), Wettelswalde (1793) and Böhlen (1794). Johann Christoph Donati (b Glauchau, baptized 21 Dec 1737; d Glauchau, buried 15 Jan 1764), another son of Johann Christoph Gottlob, worked with his brothers, and was also a respected craftsman during his brief life. Carl Friedrich Donati (b Glauchau, baptized 2 May 1740; d Glauchau, 2 Feb 1814), a fourth son, was a master carpenter in Glauchau, where he was made a freeman on 25 February 1774. His work on

organs included helping to install the Gesau positive organ.

August Friedrich Wilhelm Donati (*b* Altenburg, 21 May 1773; *d* Altenburg, 1 Feb 1842), son of Christian Gottlob, was made court organ builder at Altenburg on 17 January 1800, and in 1805 he rebuilt the organ in the Schlosskirche at Eisenberg. On 18 March 1814 he was given the post of Hoffourier, and as part of his organ-building work also tuned the instrument in the Schlosskirche. He is not known to have built any organs independently.

Whereas the dispositions of the organs built by Christoph Donati the elder show the influence of the north German tradition, the work of his descendants is in some respects related to that of Gottfried Silbermann. The Donatis retained their independence, however. Their surviving instruments are characterized by beautiful cases and an expressive, majestic sound.

W THOMAS MARROCCO

Donati, Ignazio (*b* Casalmaggiore, nr Parma, c1575, *d* Milan, 21 Jan 1638). Italian composer. He was *maestro di cappella* at Urbino Cathedral from 1596 to 1598 and again from 1612 to 1615, at Pesaro in 1600, at Fano from 1601 to 1605, at the Accademia dello Spirito Santo, Ferrara, in 1616, at Casalmaggiore from 1618 to 1623, at Novara Cathedral from October 1623 to 1629, at Lodi Cathedral in 1629–30 and finally at Milan Cathedral from 10 April 1631. Though this long succession of posts might suggest that he was restless, it does show not only a geographical progression, from the distant east coast of Italy to Ferrara – a comparatively advanced musical centre – and then on to his native Lombardy, but also a progressive rise in status, from the comparative backwaters of Pesaro and Fano, by way of a distinguished academy to the Lombard cathedrals, of which Milan was the peak.

Donati's output is almost exclusively church music. He was consistently inventive in all the branches of it that he worked in but he is specially important as an outstanding pioneer of the small-scale concertato motet for a few voices and continuo: most of his works in this genre are for two to five voices, though he also published two volumes entirely of solo motets. He produced only one collection of psalms, the remarkable *Salmi boscarecci* of 1623, with its optional ripienos and many alternative methods of performance. The first of his two volumes of masses (1622) contrasts in separate works, to cater for different tastes, the usual modern style with

a smoother, more old-fashioned one (though not a pallid *stile antico*).

With the practical experience that he gained in directing so many provincial choirs Donati was concerned that his music should be as adaptable as possible to limited resources. In verbose but fascinating prefaces to several of his publications he explained how, for example, one could omit the middle voices of four-part motets (1612) or perform the *Salmi boscarecci* with one, two, three or even four choirs, with or without instruments, according to whether serial or festive music was required. He also experimented with positioning solo voices at a distance from the organ, as well as with the more usual spatial disposition of separated choirs, and had interesting ideas on the teaching of singing, with which he prefaced the solo motets of 1636.

Like the best composers of small-scale concertato motets Donati was equally at home in intimate solo, duet and trio motets and in works in four to six parts. In the latter he liked to contrast as many varied groupings of voices as possible with contrapuntal dexterity and also melodic charm – qualities rarely combined in this genre in the decade 1610–20. An example is the six-part *Confitebor* from op.6, where, despite the long neutral text, monotony is avoided by a delightful uninterrupted succession of solos, small groupings and tutti. Donati's music is often cheerful: he seldom set pathetic texts. A specially attractive illustration of this is the joyous Easter motet *Alleluia haec dies*, for four voices and optional violin, from his 1629 collection. A striking emotional change from belligerence (chromatic bass line, brittle counterpoint) to security (bright major key and homophony) is found in the motet *Ecce confundentur* in op.6. In duets and trios Donati's melodic gift is even more evident: he states his melody, often carefully varied by sequences, in one voice and then another before combining them in canon, over a brisk 'walking' bass line, and sometimes attempted thematic unity or used a refrain, as in the charming three-part *Non vos relinquem orphanos* in op.4. He published a few solo motets as early as 1612, but they differ from the two solo volumes in lacking vocal ornamentation. This is particularly prominent in the 1636 book, whose contents are mostly in a brilliant style, declamatory and with some very expressive mood painting, an unusually heartfelt mood characterizes *Peccavi super numerum*, which belongs to the best traditions of monody.

JEROME ROCHE

Donato [Donati], **Baldassare** [Baldissera] (b. ? between 1525 and 1530; d. Venice, 1603, probably in June). Italian composer and singer. In 1550 he was a singer in the choir of St Mark's, Venice, where he was appointed to teach the boys in 1562. Two years later he was given the post of director of the *cappella piccola*, a body evolved to relieve Rore (then *maestro di cappella*) of administrative and teaching duties, but the divided control of the choir proved unworkable, and when Zarlino succeeded Rore in 1565 Donato resumed his former position as singer. He remained at St Mark's for the rest of his life. In 1577 he became head of the ensemble of singers at the Scuola Grande di S Rocco, Venice, but within a year quarrelled with its governing body and resigned. In 1580, though elected *maestro di cappella* of Padua Cathedral, he did not take up the post, since the Venetian procurators made him singing teacher to their seminary with an increased salary. He was made vice-*maestro di cappella* of St Mark's on 30 October 1588 during the serious illness of Zarlino, whom he succeeded as *maestro* in March 1590. The procurators seem to have had doubts about his competence, as they

appointed him initially for only five years and he was also expected to continue teaching at the seminary; but his appointment was renewed in 1596 and he directed the music at St Mark's until his death. A portrait of Donato as a young man (probably painted before 1547; see illustration) by Giovanni Cariani is in the Stern Collection in New York.

Donato is an important figure in the history of Italian light secular music. His collection of 1550, whose popularity can be gauged by its large number of subsequent editions, was extremely influential: he followed the example of Willaert in freeing the villanella from the restrictions of Neapolitan dialect song, thus giving it a more international flavour. His best works in the genre seem to owe something to the witty, realistic French chanson, though they are less contrapuntal and usually more concise. They frequently have an attractive melody in the highest part. The rhythms are more akin to those of the Neapolitan school, with lively cross-accents, and the formal pattern is always very clearcut, each section being repeated. Since they are for four voices there is no satirical use of parallel triads as with earlier composers. Harmonically the strong tendency in them towards diatonicism seems similar to that in Gastoldi's ballettos of 40 years later: Donato is thus a forerunner of the school of composition which made possible the monodic aria of the 17th century. The well-known *Chi la gagliarda* is in fact a balletto, even to the use of the fa-la refrain; and other pieces, notably *Viva sempre in ogni etate*, may have been meant for dancing.

Donato's serious madrigals are less important. In the earlier volumes in which his music appears he is sometimes associated with Rore, but he does not attempt Rore's modern way of matching words and music, remaining content to express a general mood without detailed symbolism. Again his melodic gift makes his works attractive, and it is not surprising that several of his madrigals appeared in *Musica transalpina* (RISM 1588²⁹). Some pieces reveal more up-to-date traits. He embellished one part of his *Dolce mio ben* (1568; transcr. in Einstein, iii, 322ff), the others being reduced to the role of accompaniment: since this predates by more than 15 years the treatises on ornaments by Venetians such as Dalla Casa and Bassano, it seems that Donato may have taught them about the art. He was also a composer of state ceremonial music: the texts of certain of his madrigals suggest that they were to be sung on Venetian festival days, though he shows less flair than Andrea Gabrieli in writing sonorous music suitable for grand forces. His choral dialogues are, on the other hand, more overtly modern and dramatic than Gabrieli's, since they assign definite roles to the opposing groups.

Donato's church music was collected in 1599 in a retrospective volume which includes the work of many years. Some of his motets are in a rather old-fashioned style, with imitative points worked out in a polyphonic manner and with smooth melody nearer to Palestrina's than to that of the more vigorous Venetian school. Again there is a strong tendency towards the diatonic, and a care in treating dissonance suggests the influence of Zarlino. Some of the larger-scale works are more obviously Venetian, with more interest in sonorities. A double-choir setting of *O magnum mysterium* has some chromatic progressions and a rich sound not unlike that of Giovanni Gabrieli's setting of the same text (1587). The echo piece *Virgo decus* displays the same play on

 DENIS ARNOLD

Donato da Cascia [Magister Dominus Donatus de Florentia] (fl. Florence, 2nd half of the 14th century). Italian composer. The position of Donato's works in *I-FI* 87 suggests that he was somewhat younger than Lorenzo and older than Landini. Sacchetti designated Donato as 'presbiter de Cascia' (Cascia near Florence, not the Umbrian Cascia). Donato has nothing to do with the Dominus Donati who is mentioned by Clercx as applying for a canonry in Liège in 1344. The titles Ser, Dominus and Don as well as his dress as depicted in *I-FI* 87 (f. 71v) indicate that he was a Benedictine or a Camaldolensian (see illustration).

Very little information can be gleaned from the texts of Donato's madrigals. The two lost settings of texts by Sacchetti presumably date from the 1350s. *Sovran uccello se'* was possibly composed on the occasion of one of the two journeys to Rome made by the Emperor Charles IV (in 1355 and in 1368). *Dal cielo scese* possibly refers to Samaritana di Polenta who married Antonio della Scala (Verona) in 1378. Some doubt is cast on this relatively late dating of a work by Donato by the fact that the two-voice madrigal is still dominant in his work, as it is in the work of the older trecento composers. On the other hand, the style of the only surviving ballata (if indeed it is a work by Donato) contradicts this, for it can hardly belong to the early examples of its genre. As well as Sacchetti, Donato also set texts by Soldanieri, Belondi and Degli Alberti.

14 madrigals, one caccia, one ballata and one virelai have survived; with one exception (the virelai in the south German MS *CS-Pu* XI E 9) they are all to be found in Tuscan sources. The largest repertory is contained in *I-FI* 87, with 15 works.

On the one hand Donato is indebted stylistically to Jacopo da Bologna, notably in the transitional phrases between lines of madrigal verse, these being usually untexted and monophonic (though some are two-voiced and modern in style), and in sporadic points of imitation. On the other hand Donato's style is similar to that of Lorenzo in its rich, virtuoso melismas. With the exception of the caccia-madrigal – which is texted in all three voices and does not belong among the older caccia – all pieces are for two voices, in the early trecento fashion, with text supplied for both voices. (The missing text in the tenor of *Come 'l potestu far* is presumably to be supplied.) Pieces with completely simultaneous syllabic articulation are found alongside others in which the text is offset by rhythmic or melodic imitation. The one virelai is composed in a simple French style. The ballata with text in dialogue form, contained in *I-FI* 87, is syllabic in style and has a tripartite structure which is

otherwise only encountered in the late 14th century and the 15th. Thus, older and more modern stylistic elements occur side by side in Donato's work.

 KURT VON FISCHER

Donatoni, Franco (b. Verona, 9 June 1927). Italian composer. He attended the Verona Liceo Musicale from the age of seven, studying first the violin and later composition. At the same time he received a general education and graduated in accountancy. Encouraged to devote himself to composition by his first teacher Piero Bottagisio, in 1946 he entered the Milan Conservatory, where he studied counterpoint and fugue with Ettore Desderi. He continued his studies at the Bologna Conservatory (1948–51) under A. Zecchi, Liviabella and others, taking diplomas in band scoring, choral music and composition. After further studies with Pizzetti at the Accademia di S. Cecilia (1952–3), he gradually approached the most recent compositional techniques as a result of a meeting with Maderna (1953), the influence of the Darmstadt summer courses (which he attended in 1954, 1958 and 1961) and above all his acquaintance, from 1959, with the critic Mario Bortolotto. Beginning in 1953, he has taught at the conservatories of Bologna,

Turin and Milan, where he was appointed professor of composition in 1969, and since 1970 he has held courses at the Accademia Chigiana and at Bologna University. Among the prizes he has won are those awarded in the international composition competitions organized by Radio Luxembourg (1952 and 1953) and the ISCM Italian section (1961) and a Marzotto Prize (1966), the last two for *Puppenspiel* nos. 1 and 2.

From the beginning, Donatoni has shown remarkable powers of self-renewal, which recall, in many respects, those of Petrassi, a persistent influence on him since his graduation exercise, the cantata *Il libro dei sette sigilli* of 1951. The immediately succeeding compositions, alternating brooding intensity and dynamic exuberance, displayed an eclectic modernism, which was increasingly dominated by the Bartókian references underlying the overall architecture and the instrumental writing of the *Concertino* and the *Sinfonia* (two orchestral works which share a similar string scoring) as well as the expressive refinement achieved in the *Cinque pezzi* for two pianos. After the transitional *Musica* for chamber orchestra (1955), however, Donatoni abruptly turned to advanced 12-note serialism, first straightforwardly supported by the example of Webern (*Composizione in quattro movimenti*), then more sophisticatedly by that of such leaders of post-Webernism as Boulez – on whose Second Piano Sonata the first and third numbers of the *Tre improvvisazioni* are seemingly modelled – and Stockhausen, whose *Zeitmasse* emerges as Donatoni's decisive point of reference in the unrelieved pointillism of *Quartetto II*.

This new direction did not prevent a conventional attempt at stage music in the ballet *La lampara*, nor did Donatoni's subsequent interest in Stockhausen's group technique (foreshadowed in *Strophes* and *Movimento*) exclude the recovery of a traditional communicative urge in the expressionist vocal part of the *Serenata*. Though avoiding the full implications of his models, Donatoni's further exploitation of the dead end of serialism was consistently guided by a craftsmanlike objectivity, permeating both the frozen compulsiveness of the glittering chamber textures of *For Grilly* and the dramatic exploration of orchestral sonorities of *Sezioni*. Before long, as instanced in the virtually permutable form of *Doubles* (a set, not in fact aleatory, of meteoric 'exercises' for harpsichord), he found himself deeply involved in a technical development which had the effect of undermining the foundations of the common avant-garde language presupposed by his derivative practice.

Ending not only Donatoni's serial period but also the whole first stage of his output, such forces burst upon his music in *Puppenspiel* (1961), whose impassive, mechanical juxtaposition of the densest 'agglomerating' structures (concealing even some tonal rediscoveries) with increasingly overwhelming aleatory passages reveals clearly that radical change in approach which, in the next few years, established him as a leader of the new music in Italy. With *Per orchestra* (perhaps his most adventurous work) Donatoni began to investigate the possibility of totally indeterminate material, abandoning the electronic means tried out, with questionable results, in *Quartetto III* and focussing, rather, on novel instrumental writing. In subsequent works such as *Quartetto IV* (*Zrcadlo*), *Asar* and *Black and White* – whose aesthetic position appears halfway between Stockhausen's formal mobility and Cage's chance operations – the composition is definitively released from the

predictive will of the author and from the intervention of the performer, the function of the former being reduced to providing lists of diverse and unorthodox materials, and that of the latter to setting off (sometimes with thought-provoking allusions to action music, as in *Quartetto IV*, whose events depend on the performers' perusal of four newspapers) ingenious devices capable of generating the music automatically.

The material further came into its own in Donatoni's compositions after 1964, in which he pursued an intrinsic devaluation of the creative process rather than the outward indeterminacy of its outcome. Hence that decreasing emphasis on resourceful inquiry into unusual instrumental effects, which eventually led him to reintroduce traditional notation. The theoretical strictness underlying this new line of development is fully displayed in *Questo* (1967–9), a singular, self-analytical prose work whose very structure, like his later achievements in musical technique, demonstrates the influence of experimental writers such as Burroughs. Furthermore, the ironic agnosticism cloaking, in this book, the reduction of compositional methods to a mechanical transformation of materials (whose originality is finally unnecessary) supplied an ideological seal for that balance between current self-awareness and earlier craftsmanship which Donatoni achieved in the same years either by in various ways reformulating *Doubles*, *Quartetto II* and *Puppenspiel* in *Babai*, the *Divertimento II* and *Puppenspiel no. 2* respectively, or by reworking material derived from Schoenberg's op. 23 (in *Etwas ruhiger im Ausdruck*) and from Stockhausen's *Gruppen* (in *Souvenir*, *Orts* and *Estratto II*).

All this outlines an eccentric experimentalism that the fleeting Baroque reminiscences of *Solo* (1969) show in emblematic form as dependent on an intriguing medley of decadent and neo-classical approaches (cf Donatoni's statements concerning the identity of private life with compositional research and concerning the unassuming, self-sufficient qualities of his recent work). The peculiarity of such an 'experimental craftsmanship', based on patchwork materials whose objectivity is guaranteed by the neutralization of their original stylistic features, is incisively confirmed by his compositions of the early 1970s, from *Doubles II* to the *Quarto estratto*. Since Donatoni deliberately hides even the compositional procedures adopted in them, they are intended to be heard without intellectual mediation. But their amazing technical accomplishment – exemplarily shown in the massive score of *Voci*, thoroughly derived from the name 'Bach' – actually inhibits the renewal of musical perception claimed by genuine experimentalism. At best the listener's response to such works may end in a sort of philosophical meditation, like Bortolotto's or Baroni's, whose criticism, however, should be counterbalanced by the appreciation of Donatoni's ability in accommodating his cultural roots to the crisis of the European avant-garde in the late 1950s, a crisis which he thus succeeded in turning into a personal possibility for continuing to compose: in his case, for continuing to give artistic evidence of a far-reaching crisis in values.

Donatus de Florentia, Magister Dominus. See DONATO DA CASCIA

Donaueschingen. Town in the Federal Republic of Germany, noted in the 20th century for its festival of contemporary music. It was the home of the Fürstenbergs from 1488; they maintained a court chapel and opera which achieved particularly high standards during the late 18th and early 19th centuries, and employed musicians such as F. C. Neubaur, J. W. Kalliwoda, J. A. Sixt, Joseph Fiala and K. J. von Hampeln. The works of Mozart, Dittersdorf, Umlauf and J. A. Hiller were particularly popular there and Italian works by Cimarosa,

Gazzaniga, Piccinni, Sarti, Salieri and Paisiello were frequently heard. It became an internationally known centre for contemporary music between 1921 and 1926, and since 1950 has re-established its reputation.

Prince Max Egon zu Fürstenberg founded the Gesellschaft für Musik Freunde in 1913 which led to the Donaueschingen Festival, of which he remained the chief patron. This festival is the earliest to devote itself exclusively to contemporary music; it is organized by the Gesellschaft der Musikfreunde Donaueschingen, in collaboration from 1950 with South-west German Radio, Baden-Baden. The programmes between 1921 and 1926 were organized largely by Joseph Haas and Hindemith. Between 1950 and 1970 Heinrich Strobel, director of music at South-west German Radio, Baden-Baden, was responsible for the artistic arrangements; Otto Tomek took responsibility for the programme in 1971. The general aim of the festival is to promote unknown and disputed talent, and to try out new methods and forms of expression. Donaueschingen's first Kammermusikaufführungen zur Förderung Zeitgenössischer Tonkunst (contemporary chamber music programmes) in 1921 provided the basis for the later fame of Hindemith, Krenek and Hába. Since 1950 it has provided a springboard for numerous significant composers including Boulez, Stockhausen, Xenakis, Penderecki and Ligeti.

The history of the Donaueschingen festivals falls into several periods. The first, up to about 1924, concentrated on a new style of chamber music centring on the string quartet; the extension of these stylistic tendencies to vocal music inaugurated the phase of Gebrauchsmusik and 'Musik für Sing- und Spielkreise'; in 1926 the question of mechanical instruments (the Wolte-Mignon piano and organ) was raised. After 1926 the Donaueschingen Festival was shifted first to Baden-Baden and in 1930 to Berlin. At the 1926 festival a new area, that of theatre music, was entered with the presentation of Oskar Schlemmer's *Tradischen Ballett* (with music by Hindemith), but chamber opera was a major feature of the Baden-Baden Festival programme, which included premières of Weill's *Kleine Mahagonny* to a libretto by Brecht, Hindemith's *Hin und zurück*, Milhaud's *opéra minute L'enlèvement d'Europe* (1927), and the *Lehrstück Der Lindberghflug* (1929), by Hindemith and Weill to a libretto by Brecht. The Neue Musik Berlin festival in 1930 brought an abrupt end to Donaueschingen's efforts. Nonetheless, the concepts and ideals established there continued. Between 1934 and 1939 an attempt was made, within the constraints of the Nazi cultural policy, to revive in Donaueschingen the tradition of the early chamber music concerts, but the programmes and influence were purely provincial. Two further attempts, in 1946 and 1947, were equally unsuccessful.

In 1950, through the collaboration of Donaueschingen and South-west German Radio, Baden-Baden, the festival was successfully revived and its international reputation increased. Since then the South-west German RSO, first under Hans Rosbaud and from 1964 under Ernest Bour, has been placed every year at the disposal of Donaueschingen. Thus, the earlier emphasis on chamber music at the festivals was given up and the title was consequently changed to Donaueschinger Musiktage für Zeitgenössische Tonkunst (Donaueschingen Festival of Contemporary Music). After 1950 South-west German Radio made a

practice of giving commissions to Donaueschingen (123 up to 1973), and they work together on the production of the compositions; this contrasts with the Kammermusikaufführungen of the 1920s, whose programmes consisted largely of works that were not commissioned for the occasion. The post-1950 period also falls into two phases. The first (to 1960) reflects the considerable influence of Schoenberg's 12-note technique after World War II and the generalization of the row theory in post-Webern serial technique. The second phase reflects different attitudes to post-serial style. Since 1969 there has been a marked tendency towards the presentation of multi-media works the title of the festival was changed for the third time, to the Donaueschinger Musiktage. Important premières at Donaueschingen include Hindemith's *Kammermusik no.1* op.24 no.1 (1922), Webern's *Six Songs* op.14 (1924), Hartmann's *Second Symphony* (1950), Boulez's *Poésie pour pouvoir* (1958), Messiaen's *Chronochromie* (1960), Stockhausen's *Mantra* (1970) and works by Berio, Fortner, Hába, Henze, Ligeti, Nono, Penderecki and Xenakis.

JOSEF HAUSLFR

Donberger [Donnberger, Domberger], **Georg Joseph** (b Bruck an der Leitha, 11 Feb 1709, d Herzogenburg, 2 April 1768). Austrian organist and composer. He attended the Jesuit College in Vienna from 1720, studying the humanities; he also studied the organ, the violin and especially the viola d'amore. His attempts at composition pleased Caldara, who accepted him as a pupil, and a music drama by him was performed at the Jesuit College before Emperor Charles VI in 1727. Donberger went on to study philosophy in Vienna and earned his living teaching music, making the acquaintance of J. G. Graun, František Benda, Quantz and Tüma. On 30 May 1733 he was ordained priest and became *regens chori* at the Augustinian monastery of Herzogenburg; most of his compositions are sacred, written for this and other Austrian monasteries, although he also wrote some instrumental music. Along with Zechner and Tüma, Donberger was one of the leading composers in Austria between Fux and Haydn, and his works remained popular there well into the 19th century. His music shows a solid contrapuntal technique as well as an element of virtuosity, particularly notable in his masses and his German and Latin solo works.

ANDREW HUGHES

Donemus Foundation. A Dutch organization founded in 1947 to promote Dutch music, particularly that of contemporary composers, its name is an abbreviation of 'Documentatie in Nederland voor Muziek'. Its founders included Eduard Reeser, J. A. Alsbach, A. A. Smijers and Eduard van Beinum, and André Jürres directed it from 1952. Based in Amsterdam, the foundation has developed not only as a promotional body and documentation centre but also as a publisher producing about 150 works annually, about 90% of all new Dutch music. It has a large library of scores and records, the scores including over 4500 works published by the foundation, in addition to about 13,000 Dutch compositions dating from the mid-19th century onwards in the Alsbach Collection, it also contains biographies etc on Dutch composers. The foundation has published the periodicals *Muzikaal perspectief* (1948-57), *Sonorum speculum* (1958-74) and *Key Notes* (1975-), and its series of records 'Donemus Audio-Visual' (1961-) and 'Composers' Voice' (1975-) include scores of Dutch music, mainly contemporary but also 16th- to 19th-century works. The foundation is supported by the Dutch government, the City of Amsterdam and the Vereniging voor Nederlandse Muziekbelangen (Society for Netherlands Musical Interests).

Donfrid [Donfried], **Johann** [Johannes] (b Veringenstadt, nr. Sigmaringen, 1585; d Rottenburg, nr. Tübingen, 1654). German music editor, singer, teacher and composer. He studied at the University of Dillingen, one of the main cultural centres of south-west Germany, and in 1610 took a post as singer at St Martin, Rottenburg. This carried with it duties as a schoolteacher: in this capacity he became rector of the school in 1622 and in his musical capacity Kapellmeister of the church in 1627.

Donfrid is chiefly interesting as an editor who saw it as his task to propagate in Catholic southern Germany the best and most popular church music by Italian composers of his day. To this end he published five large

anthologies at Strasbourg in the 1620s: the tripartite *Promptuarii musici*, consisting of motets arranged in a liturgical cycle, as had been done by other editors, such as Schadaeus, before him; the *Viridarium*, devoted to Marian pieces; and the *Corolla musica*, a selection of 37 masses (the *Jubilus Bethlehemeticus* does not belong with this group). The importance of these collections is clear: they cemented musical links between Italy and Germany at a time when Italy was to a large extent the arbiter of style in European sacred music, and indeed they helped to achieve for German Catholic music what Schütz's two Venetian visits did for Lutheran music.

The liturgical scheme of the *Promptuarii musici* is such that the first two volumes between them cover the church's year, dividing at Easter, while the third duplicates some liturgical seasons and also includes much material for individual feasts and saints' days. Donfrid drew on the work both of conventional polyphonists such as Victoria, Marenzio and Hassler (he did not ignore native German music) and, more often, of early composers of concertato pieces: he included a number of Viadana's *Cento concerti ecclesiastici* (1602) and motets by his immediate imitators such as Leone Leoni, Finetti and Patta in northern Italy and Cifra, Agazzari and Ottavio Catalani in Rome. A number of Germans are represented, such as Loth, Rudolph Lassus, Holzner, Wolfgang Mayr and Pfendner, the last four all active in Bavaria, as well as the bigger figure of Aichinger. From the Italian point of view it must be conceded that this represents a conservative selection for the date of part I, 1622, but part III and the *Viridarium*, both of 1627, contain music by some much more adventurous Italians, such as Alessandro Grandi (I), Biagio Tomasi and Ercole Porta, which certainly raises the artistic level; no fewer than 35 motets by Grandi appear in these two volumes. Only one piece by Donfrid himself is known – a motet in *Promptuarii musici*, I.

JEROME ROCHE

Don heusser, Der. See TANNHÄUSER, DER.

Doni, Antonfrancesco (b Florence, 16 May 1513; d Monseice, 1574). Italian writer, academician and

musician. His chequered career began in a Servite monastery in Florence, but having been expelled he set out for northern Italy c1540. After some wanderings, documented in his letters, he settled in Piacenza in 1543, with the intention of studying law. He soon dropped this in favour of literary and artistic activities. With the aid of a few nobles and men of letters (including Lodovico Domenichi and the poet Luigi Cassola) he founded the short-lived Accademia Ortolana. At this time Doni described himself as 'writer, instrumentalist, singer, and painter'; he played the viola and as a member of the Ortolani he contributed not only literary efforts but musical compositions as well. Part I of Doni's *Dialogo della musica* was written here in 1543.

The next year Doni went to Venice. Though he confessed himself to be overawed by the splendours of Venetian musical life, he made new acquaintances, completed his *Dialogo* and persuaded the printer Girolamo Scotto to issue this work as well as a volume of letters. He returned to Florence in 1545 and was elected secretary of the Accademia Fiorentina in 1546. For a brief time he set himself up as a printer in Florence and hoped to publish music; an MS collection of madrigals with a printed frontispiece from Doni's shop survives (see Haar: 'A Gift of Madrigals'). Like many of Doni's projects this career soon foundered and by the beginning of 1549 he was again in Venice.

In the 1550s Doni was an active member of the Venetian Accademia Pellegrina, whose activities he reported with such exaggerated fancy that the very existence of this group has been questioned by sober historians. He won some fame by engaging in controversy with Domenichi and with Aretino. He saw to the printing of some of his major works, including *La zucca, I mondi* and *I marmi*, all issued by Francesco Marcolini. After another period of aimless wandering he went into retirement near Padua, where he died.

Although many of the tales and anecdotes in works such as *I marmi* are concerned with music and musicians and many of Doni's letters mention music, his important contributions to the musical culture of his age are the *Dialogo della musica* (1544; modern edition Milan, 1965) and the musical portion of his bibliographical work *La libreria* (1550/51). The *Dialogo* is not a formal treatise at all; of it Doni said that 'Cicero holds that music consists of numbers, tones and measures; but in my *Dialogo* I have used neither square nor compass'. It is a lively series of tales and conversational exchanges by a group of interlocutors (among them composers such as Parabosco and Perissone Cambio), with its text punctuated with contemporary madrigals, motets and a chanson. The speakers are singers as well, talking about the pieces before and after performing them. The music of the top voice is printed in the volume of text, with the remaining voice parts in separate partbooks. Unique in form, the *Dialogo* illustrates how music was performed in company. Doni was proud of this work, in which he boasted that he had 'performed a feat of arms with the printer's press and as it were outdone Josquin in this music'.

In his *Libreria* Doni gave a list of all the printed collections of music he knew; as one of the few such lists surviving from the period, it is a valuable source of information about editions and works now lost.

 JAMES HAAR

Doni, Giovanni Battista (b Florence, baptized 13 March 1595; d Florence, 1 Dec 1647). Italian classicist, philologist and music theorist. From about 1630 he dedicated himself almost totally to the rediscovery of Greek music and to the revival in modern practice of the ancient *tonoi* and genera. As an offshoot of this investigation he reviewed the history of modern music drama and wrote several revealing critiques of the earliest styles of musical pastoral.

1 **LIFE.** At the age of ten Doni was sent to study arts and letters at Bologna, and he then studied philosophy, classical languages, geography and mathematics at the Jesuit College in Rome: among his teachers were Tarquino Gallutio, professor of rhetoric, who remained his mentor for many years, Torquato de Cuppis, Bernardino Stephonio and Famiano Strada. In 1613 his father sent him to France to study law at Bourges, where he was a fellow student of his relative Louis Doni d'Atichy (who became Bishop of Riez, Provence, in 1628). He spent more time, however, on Latin, philosophy, oriental languages and writing prose and verse than on law, and his family recalled him from France in 1618. At his father's insistence he completed the *laura* in canon and civil law at Pisa and reluctantly entered legal practice. But his ambition was to teach Greek at Pisa, and he lost no opportunity of collecting antiquities; he eventually accumulated 6000 inscriptions.

Doni entered the employ of Ottavio Corsini shortly before Corsini was sent by Pope Gregory XV as legate to the King of France in 1621. He used his sojourn in Paris to work in the colleges and libraries and to meet French scholars, notably Mersenne, with whom he corresponded throughout his life. The death of one of his brothers took him back to Florence in 1622, but the following year he went again to Rome to serve Maffeo Barberini shortly before he was elected pope as Urban VIII. When, on 9 October 1623, the pope's nephew Francesco Barberini was made a cardinal, Doni became his secretary. They went on diplomatic missions to Paris in 1625 and 1627 and to Madrid in 1626. Everywhere he went Doni sought out libraries and collections of antiquities and established ties with humanists and scientists. Among his most devoted associates and correspondents were Claude de Saumaise, René Moreau, Jean Bourdelot, Nicolas-Claude Fabri de Peiresc, Lucas Holste, Galileo Galilei, Athanasius Kircher, Gaspar Scioppius, J. A. Ban, Daniel Heinsius, Gabriel Naudé and Isaac Voss.

In 1629 Doni was appointed secretary of the sacred College of Cardinals, which entitled him to wear the purple robe of the chamberlains of the pope. But he wrote the same year to a friend that he felt out of place in the courts of prelates, since he lacked the boldness and affection demanded of a courtier, and that he longed to devote himself to scholarship.

In 1633 the death of another brother (in a duel near Vaison, France, where he was governor) led Doni to throw himself into the study of music to cure his melancholy. He worked to improve the understanding of the tables of Alypius so that he could transcribe Greek notation, and he sought to adapt modern instruments to perform the ancient modes and genera. When in 1635 another brother died he looked for an opportunity to return to Florence to save his house. He re-established himself in his home city in 1640: in that year he was appointed professor of rhetoric at the university and was admitted to the Accademia della Crusca and made consul of the Accademia Fiorentina. He married in 1641. He died quite suddenly after a brief illness.

2 **WORKS.** Inspired by the progress already made by Girolamo Mei and Vincenzo Galilei, Doni sought to uncover all he could concerning the practice of Greek music. In his reverence for all things classical he believed that the application of ancient methods to modern composition would lead music to a new flowering. The chief fault he found with modern monodic music was the lack of diversity in its tonal system. In the ancient Greek system, as he described it in *Compendio del trattato* (1635), on the other hand, he found more diversity than probably actually existed. He recognized correctly, following Ptolemy, that the Dorian double octave was transposed to six other keys. He went beyond this to assume that each of the octave species thus produced in the central range, which he called modes, could also be transposed to six keys. Thus not only the Dorian pattern of tones and semitones but also the other interval sets were available at each height of pitch. Some of these permutations are shown in ex.1, the last, the Hypolydian mode in the Hypolydian *tonos*, demonstrates the need at the time for special instruments to play and accompany in certain of these intonations, particularly in the syntonic diatonic of Didymus, which Doni preferred as the most perfect. He designed and had constructed several such instruments, 'diharmonic' viols and violins, 'diharmonic' and 'triharmonic' harpsichords, a theorbo with three fingerboards and a 'panharmonic' viol. The most famous of his inventions was the

Dorian mode in the Dorian *tonos*

Dorian mode in the Phrygian *tonos*

Phrygian mode in the Dorian *tonos*

Engraving of Doni's lyra Barberina from 'Lyra Barberina' (1763)

'amphichordal' lyre or 'lyra Barberina' (see illustration), which permitted the performance of all his ancient modes and transpositions. Its pear-shaped body was disposed with strings of gut on one side for certain modes and with strings of metal on the other side for other modes. Doni claimed that it had a louder and fuller, yet sweeter tone than the lute and an evenness of timbre throughout its range, though plucked, it was capable of sustained notes.

Doni described this instrument in his essay 'Lyra Barberina', dedicated to Pope Urban VIII, which he began in 1632 and probably finished in 1635. The main

part of it is a history of Greek string instruments that carefully distinguishes, with ample documentation, the many forms of lyre, kithara, chelys, testudo, phorminx, pektis, and other types named in the Greek literature. Because of its many pictorial illustrations, Doni sent the treatise to France to be printed through the intercession of the brothers Putecanus around 1640, but he died before the project could be carried out. More than a century later A. F. Gori and G. B. Passeri published it together with other essays by Doni in two volumes of his collected writings, but unfortunately they could not locate the drawings of ancient instruments that Doni

had prepared, for which they substituted other figures, few of which served Doni's intention.

Doni was not a musician, but he persuaded several composers – Frescobaldi, Domenico Mazzocchi, Pietro Eredia, G. A. Capponi, Ottaviano Castelli, Luigi Rossi and Pietro della Valle – to experiment both with his instruments and with the ancient modes. Castelli composed an entire *commedia in musica* in 1641 in this way, though using a scale of equal semitones. Della Valle was the most faithful to Doni's ideas and applied them in both the *Dialogo di Esther* (1640; lost) and the *Oratorio della purificazione* (in *I-Rn*).

Although he disclaimed practical knowledge of music, Doni undertook, in two French treatises dedicated to Louis Doni d'Attichy on 12 May 1640, a reform of the solmization system and of staff notation. He proposed the elimination of *ut* and *la* and the application solely of *mi*, *fa*, *sol* and *re* to the rising Greek tetrachord, e.g. B–C–D–E. If more syllables were to be used he preferred expanding the hexachord to an octave and replacing *ut* by *doh* and adding *bi* after *la* (*Nouvelle introduction de musique*, pp.29ff). In the same treatise he proposed that staff notation be reformed so that each line would be identified at the beginning by a letter and the notes written only on lines that were spaced to show steps and half-steps.

An important facet of Doni's work is represented by the *Trattato della musica scenica*, written in 1633–5 and later revised, and the critiques of dramatic music in the *Compendio* and *Annotazioni*. Particularly valuable are his classification of the different styles of monody (see *STILE RAPPRESENTATIVO*) and his remarks on the use of ornamentation and other expressive devices in monody. His main thesis is that the Greeks sang only the choruses and lyrical portions of their tragedies, not the dialogue, and that modern music drama should be reformed in imitation of the ancient. If the dialogue were spoken, he argued, this would improve the production's variety, dramatic interest and acting, while shortening the duration and permitting the composer to concentrate his art on the expression of emotion. In the *Annotazioni* he proposed for passages of narrative or dialogue a simple sung recitative with a florid accompaniment. He deplored the simplicity of the accompaniments in contemporary opera and urged composers to apply the contrapuntal art of the polyphonic madrigal to the lyrical monodies and unison choruses. He had little respect for the operatic composers of his day and detected only slight advances in dramatic music after Peri, Caccini and Monteverdi (who at the time that Doni was writing had still to compose his last three operas).

Donington, Robert (b. Leeds, 4 May 1907). English musicologist, husband of Gloria Rose. He was a foundation scholar at St Paul's School (1921–6) and a senior classical scholar at the Queen's College, Oxford (BA 1930, BLitt 1946). He studied the viol, the violin and the interpretation of early music with Arnold Dolmetsch in Haslemere, harmony and counterpoint with H. K. Andrews and R. O. Morris, and composition with Wellesz at Oxford. He has since divided his career between performance and scholarship. As Leverhulme Research Fellow (1934–6) he scored and catalogued English 17th-century music for viols. He was a member of the English Consort of Viols (1935–9) and the London Consort (1950–60), and founded and directed the Donington Consort (1956–61). From 1961 he spent much of his time in the USA, where he has lectured and performed at several universities and music festivals, including the Carmel California Bach Festival (1961, 1971), Stanford University (1961, 1964), the University of Southern California (1964), Rutgers University (1968) and Yale University (1970–71). In 1964 he was appointed professor of music at the University of Iowa. He was a founder-member of the Galpin Society in 1946 and has held office as a council member of the American Musicological Society (1967–8, 1970–72). He was awarded the OBE in 1979.

In addition to *The Instruments of Music*, one of the standard surveys of the field, Donington has published a thoughtful and provocative study of the symbolism in Wagner's *Ring* based on the precepts of Jungian myth

Donizetti, Gaetano, §1: Early years

analysis. He is also known for several studies of Baroque performing practice. He contributed several important articles, notably 'Ornamentation' and 'Ornaments', to *Grove 5*. His *The Interpretation of Early Music* has rightly become an indispensable reference work, even though it has been criticized for presenting too many quotations from treatises without putting them into any larger context or including enough explanation to allow the reader to know precisely how the suggestions are to be applied to individual compositions. His briefer and more popular *A Performer's Guide to Baroque Music* complements the earlier work, containing many valuable insights into problems of performing practice and a healthy commonsense attitude towards their solution. Not least, his discussion of early gramophone recordings and his application of conclusions drawn from early 20th-century singing to earlier periods is stimulating if controversial. In all his writings on performing practice Donington is at pains to avoid the dogmatic and emphasizes the importance of relying on good taste and instinctive musicianship. He has carried on the pioneering work of Arnold Dolmetsch in illuminating problems of Baroque performing practice, and he has done more than any other British scholar to encourage performers to learn as much as they can about earlier conventions by carefully reading the existing theoretical sources.

HOWARD MAYER BROWN

Donizetti, (Domenico) Gaetano (Maria) (b Bergamo, 29 Nov 1797; d Bergamo, 8 April 1848). Italian composer. In the years between the death of Bellini (1835) and the emergence of Verdi with *Nabucco* (1842) Donizetti dominated Italian opera.

1 Education and early career 2 The achievement of fame (1830) 3 Final period and last illness (1838-48) 4 Donizetti's character 5 Operas 6 Vocal chamber works 7 Sacred works 8 Instrumental works 9 Conclusion

1 **EDUCATION AND EARLY CAREER.** Donizetti was born in extreme poverty, the fifth of six children of Andrea and Domenica (Nava) Donizetti, then living in the Borgo Canale on the north-west slope of Città Alta, Bergamo. The house, now no. 14, has been a national monument since 1926, and the dark basement apartment is open to visitors. A tradition that the Donizetti family was of Scottish origin was proved by Caversazzi's research (1924) to be without foundation. There was no tradition of music in the family, although

Gaetano's eldest brother Giuseppe (1788-1856) served as a military bandsman and in 1828 moved to Constantinople to become chief of music to the Ottoman armies. Another brother, Francesco (1792-1848), played the drum in a Bergamo band.

The opportunity that allowed Gaetano to emerge from this unpromising background came from Johannes Simon Mayr, who was to be the dominant figure in his musical education. Since 1802 Mayr had been *maestro di cappella* at S Maria Maggiore, Bergamo, while pursuing a distinguished career as an opera composer throughout Italy. He persuaded a local charitable institution to open a free music school, primarily to train choirboys but also to impart a well-grounded musical education. The school opened in 1806, and Gaetano was in the first group of scholars to be enrolled, attending until 1814. Mayr was a thorough, punctilious teacher, familiar with a wide variety of music, particularly that of the Viennese school. He and the teachers chosen by him (Salari, Gonzales and Capuzzi) exposed Donizetti to a musical regimen then scarcely available elsewhere in Italy. Indicative of Mayr's beneficent discipline is the series of string quartets that Donizetti composed (chiefly 1819-21) while awaiting the definitive start of his career.

Donizetti, for all his quickness and talent, was a high-spirited student, as appears from the school's records with their awards of prizes and reprimands. Mayr always supported Donizetti, and his belief in his student's exceptional talent was unwavering. The libretto of a pasticcio put together by Mayr for a student performance in 1811, *Il piccolo compositore di musica*, gives a vivid picture of Donizetti as an exuberant and talented 14-year-old. When Mayr believed that Donizetti's musical horizons needed broadening, he arranged and partly paid for his transfer to Bologna, where he studied counterpoint for two years with Padre Mattei. Donizetti undoubtedly profited from this training, but Mattei's taciturn manner never aroused the respect and affection that Donizetti all his life showed towards Mayr. At Bologna he made his first attempts at composing operas, but these were not performed.

In late 1817 Donizetti returned to Bergamo. With Mayr's help he was given a contract with the company headed by the impresario Zancla, then chiefly active in Venice, for which he composed four operas. None of them made any lasting impression, and they should be regarded as apprentice work. A large number of non-operatic compositions, sacred, orchestral and instrumental, also belong to this period. Donizetti turned them out in a day, often at a single sitting, thus demonstrating a capacity for intense application and rapid work that was to remain characteristic of him until his final illness.

Much nonsense has been written about Donizetti's supposed military service. The usual story identifies one or another of his early operas as having so impressed an Austrian officer that he was summarily released from the service to pursue his career. The truth is that Donizetti was never conscripted. In 1818, as his 21st birthday approached, a lady of Bergamo, Marianna Pezzoli-Grattaroli, impressed by his promise, bought his exemption. The proof of this is contained in a letter published by Zavadin, that Donizetti wrote on 26 July 1839, in which he alluded to the event.

The real start of Donizetti's career occurred in Rome, where *Zoraida di Granata* (Teatro Argentina, 28

1. Gaetano Donizetti: portrait by an unknown artist in the Museo Teatrale alla Scala, Milan

January 1822) had an unexpected success. He owed this opportunity to Mayr, who had turned over his contract to his pupil. As a result, the famous impresario Domenico Barbaia offered him a contract for an opera at the Teatro Nuovo, Naples. Donizetti arrived in Naples in February 1822 just before Rossini's departure from what had been since 1815 his principal arena. Bellini was still a pupil at the local conservatory. In this period Donizetti established himself as both promising and productive, but he produced no smashing successes. His first Neapolitan opera, *La zingara* (Teatro Nuovo, 12 May 1822), achieved 48 performances, but it appears never to have been given elsewhere. During the next several years he composed two to five operas a year, ranging from one-act farces to full-length serious works, chiefly for Naples, but also for Milan, where the failure of *Chiara e Serafina* (La Scala, 1822) kept him from being invited to produce another opera there until 1830, and for Rome, Palermo and Genoa, where he fared somewhat better. Besides composing 23 operas from *La zingara* to *Anna Bolena* (Milan, Carcano, 1830), after 1827 Donizetti was also regularly preparing and conducting operas by other composers in Naples. It has become a cliché to describe this period of his career as 'Rossinian', but although the influence of the most popular opera composer of the day can be detected, symptoms of Donizetti's mature style are more common. The general lack of success of the operas of this period may be attributed to the inept librettos he was given by his Neapolitan librettists.

In 1828 Donizetti married Virginia Vasselli (1808-

37), the daughter of a Roman lawyer. None of their three children survived infancy. Of the sincerity of Donizetti's affection for Virginia there is no doubt, and her death during the horrors of a cholera epidemic left him grief-stricken and fostered the strain of melancholy so pronounced in his later years.

2 THE ACHIEVEMENT OF FAME (1830). The triumph of *Anna Bolena* marks the watershed of Donizetti's career. This was the first of his works to be performed in Paris and London, and it opened up for him the possibilities of an international career, although it would be nearly a decade before he could reap their full advantage. He became so dissatisfied with the limitations that Naples imposed on him that in 1832 he broke his contract there, freeing himself to accept more frequent engagements in other theatres. Not all the operas that followed *Anna Bolena* were equally successful, but the number of works that proved their hardihood in several theatres, including those that have never disappeared from the active repertory, is greater than those which failed. His first opera following the break with Naples, *Ugo, conte di Parigi* (Milan, La Scala, 13 March 1832) was a fiasco, but Donizetti more than righted the balance with *L'elisir d'amore* (Milan, Canobbiana, 12 May 1832), composed in less than a month to a libretto adapted by Romani from Scribe's *Le philtre*, set by Auber (1831). In 1833 he produced in Rome two operas, *Il furioso all'isola di San Domingo* and *Torquato Tasso*, that brought him under the stimulating influence of the 23-year-old baritone Giorgio Ronconi, whose

extraordinary dramatic power awakened him to the possibilities of this type of voice, until then little exploited in Italy in serious opera. *Lucrezia Borgia* (Milan, La Scala, 26 Dec 1833), based on Hugo's play, was to keep a firm hold on the stage for half a century.

In 1834 Donizetti signed a new contract with Naples to compose one serious opera a year for S Carlo. The first of these was to have been *Maria Stuarda*, but the censors objected to the tragic ending (the story that Queen Maria Cristina fainted at a rehearsal is untrue). In little more than two weeks Donizetti rearranged his score to a completely new libretto, *Buondelmonte*; not surprisingly, the result won scant applause. When *Maria Stuarda*, based on Schiller's play, was given in its original form (Milan, La Scala, 30 December 1835), the ill-health and caprices of the soprano Malibran produced a resounding failure. A large number of revivals have proved it to be an opera of considerable effectiveness, with a final scene of great beauty and power.

Early in 1835 Donizetti went to Paris at Rossini's invitation to give *Marino Faliero* at the Théâtre-Italien. Produced in the wake of the extraordinary success of Bellini's *I puritani*, the opera made little effect, although a revival at Bergamo (1966) revealed some striking anticipations of Verdi. This first visit to Paris was important because it exposed Donizetti to 'grand' opera as practised by Meyerbeer and Halévy. Further, he found a standard of theatrical and musical excellence at the Opéra-Comique and Théâtre-Italien and a level of remuneration superior to those then prevailing in Italy. He returned to Naples to bring out *Lucia di Lammermoor* at the S Carlo (26 September 1835) as performed by Persiani and Duprez. *Lucia* aroused the highest enthusiasm. Cammarano's libretto, a ruthlessly skilful reduction of Scott's *The Bride of Lammermoor*, is tautly constructed and provided Donizetti with the framework to construct a score that is a foundation-stone of Italian Romanticism. In 1839 he revised and simplified the score to fit a French translation. Although the French version is inferior to the Italian, it helped insert the work into the French national consciousness. With *Lucia* Donizetti's pre-eminence among his contemporaries was clearly established.

Donizetti's next opera, *Belshario* (4 February 1836), the first of three he was to write for Venice, was moderately successful. It reflects his Paris visit in his attempt to expand the framework and to put more emphasis on spectacle, but the total effect of its well-constructed score is, as Barblan said, oddly impersonal. Back in Naples Donizetti awaited the opening of the S Carlo season by composing two delightful comic operas to his own librettos for the Teatro Nuovo: *Il campanello* and *Betty*, both in one act (the latter later expanded to two). His opera for the S Carlo's autumn season that year was *L'assedio di Calais*, one of his most interesting. He described it as written 'in the French style' – that is, with a ballet, fewer cabalettas and many important ensemble scenes. Cammarano's strong libretto deals with the incident of the Burghers of Calais. In it, for the last time, Donizetti followed the almost extinct tradition of writing a heroic male role for a female contralto. His next three operas produced a mixed bag: *Piu de' Tolomei* (Venice, 18 February 1837), a score with a few pronounced merits, *Roberto Devereux* (Naples, 29 October 1837), a fine achievement, and *Maria di Rudenz* (Venice, 30 January 1838), burdened by a preposterous libretto.

In 1837, at the death of Zingarelli, Donizetti had been offered, pending royal approval, the post of director of the Naples Conservatory, where he had been teaching composition for several years. The confirmation of his appointment was delayed and finally allowed to lapse because a strong party preferred Mercadante, who was more closely identified with Naples, for the post. Further, his next opera, *Poliuto*, on which he had pinned great hopes, was banned by the royal censorship because it depicted on stage the martyrdom of a saint. The banning of *Poliuto*, coupled with his disillusionment over the directorship of the conservatory and his grief for his wife, strengthened his resolve to leave for Paris.

3. FINAL PERIOD AND LAST ILLNESS (1838–48). Within two years of his arrival in Paris in October 1838 Donizetti had had operas performed at four Paris theatres, much to the consternation of contemporary French composers, particularly Berlioz, who attacked him in the *Journal des débats*. Besides reworking some of his Italian successes for the Théâtre-Italien and making the French version of *Lucia* for the Théâtre de la Renaissance, he brought out *La fille du régiment* at the Opéra-Comique (11 February 1840), followed by *Les martyrs* at the Opéra (10 April 1840). *Les martyrs* was *Poliuto* expanded from three to four acts and considerably revised to a French libretto by Scribe. It failed to win the success Donizetti had counted on, but *La favorite* (Opéra, 2 December 1840), after a cold start, established itself solidly in the repertory. This score was originally in three acts, entitled *L'ange de Nisida* and intended for the Théâtre de la Renaissance, but when that theatre went bankrupt before *L'ange* could be given, Donizetti expanded the score into *La favorite*. The oft-repeated story that Donizetti wrote Act 4 of *La favorite* in a single night is not true, almost all of that act formed part of the score of *L'ange*, which Donizetti had completed in December 1839. He added to the act an aria (now usually known as 'Spirto gentil'), which he had already composed for the never-completed *Le duc d'Albe*. Most of the music composed new for *La favorite* is in Acts 2 and 3.

Donizetti had gone to Paris with hopes of earning enough money to enable him to retire from the agitating world of the opera house, as Rossini had done. But as his health started to decline, he clung to his career with obsessive intensity, until by 1844 he had lost the ability to concentrate sufficiently to compose works of more than a limited compass. His rounds of activity as recorded in his letters began to take on a frantic restlessness. He went to Rome for *Adelia* (11 February 1841), an unsettling near-fiasco, and to Milan for *Maria Padilla* (26 December 1841), where the censors' meddling upset him. In March 1842 he went to Bologna at Rossini's invitation to conduct the Italian première of the *Stabat mater*. Rossini's composition was a great success, and he urged Donizetti to accept the important post of *maestro di cappella* at S Petronio in Bologna. Donizetti refused this offer because he was on his way to Vienna, drawn by hopes of gaining the even more important appointment of Kapellmeister to the Austrian court. There, his newest opera, *Linda di Chamounix* (19 May 1842), aroused great enthusiasm, as did his conducting of Rossini's *Stabat mater*, and he was appointed to the post, which allowed him six months' leave each year to pursue his career elsewhere.

Donizetti's last four operas are particularly notable.

Although he began to compose *Caterina Cornaro* before *Linda*, that opera was the last to be given its première in his lifetime (Naples, S Carlo, 18 January 1844). Badly performed, the opera made little impression, but revivals have shown it to be a tautly concentrated work illuminated by piercing melancholy. *Don Pasquale*, tailored to the unequalled talents of Grisi, Mario, Tamburini and Lablache, became overnight one of the glories of Paris's Théâtre-Italien (3 January 1843). Generally regarded as Donizetti's comic masterpiece, it gives no sign of his worsening condition; yet the fact that it contains a surprising amount of reworked material suggests some impairment of his inventiveness. *Maria di Rohan*, brought out in Vienna the following June, is a powerful Romantic melodrama that gave the baritone Ronconi (as Chevreuse) one of his great acting roles. Donizetti's last completed opera, *Dom Sébastien, roi de Portugal* (Opéra, 13 November 1843), is weighed down by a sombre and sometimes preposterous libretto by Scribe, but it contains pages of great nobility and monumental sadness. Donizetti was deeply disappointed that the opera failed to move the public as he had hoped. Although the score had been dismissed as 'a funeral in five acts', such a judgment is altogether too glib, and the opera, in spite of some flaws, contains passages, like the great septet in Act 4, that rank among Donizetti's finest achievements.

During the trying rehearsals of *Dom Sébastien*, Donizetti's sometimes erratic behaviour began to trouble his friends; he became increasingly subject to embarrassing lapses, and ugly gossip circulated about his uncontrollable excesses. After the Vienna season of 1845 his loyal friends in Italy hoped he would return to them, and they were alarmed when he insisted on going to Paris, from where he wrote to them wildly about the vast amount of work he had to do. This deterioration continued through 1845, and his friends appealed to Giuseppe Donizetti in Constantinople, who finally sent his son Andrea to Paris.

Finding his uncle's condition worse than he had feared, Andrea arranged a consultation of doctors on 28 January 1846. Their findings (corroborated by the autopsy of 1848) were that Donizetti was suffering from cerebro-spinal degeneration of syphilitic origin, and they recommended that he be placed in an institution. Three days later he was moved to a sanatorium at Ivry, near Paris, where he remained for almost 17 months. Finally overcoming persistent opposition, Andrea obtained permission to move his uncle, by now helplessly paralysed and able to utter only an occasional monosyllable; on 6 October 1847 they arrived in Bergamo, where Donizetti was lodged with friends who carefully tended him until his death.

First buried in the Valtelle cemetery, in what was then a suburb of Lower Bergamo, in 1875 his remains were moved to S Maria Maggiore and placed near the monument by Vela (1855); in 1951 they were moved to another part of the church. The house where Donizetti died, now the Palazzo Scotti in Upper Bergamo, is marked by a plaque. The Istituto Musicale G. Donizetti, a continuation of the school started by Mayr in 1806, contains a Museo Donizetti that houses memorabilia and an important collection of manuscripts. Other important collections of Donizetti manuscripts are in the library of the Naples Conservatory, the Ricordi archives, Milan and the Paris Conservatoire.

Four of Donizetti's operas were first performed post-

humously. *Il Pigmalione*, his first opera, written when he was still a student at Bologna, was given in 1960 at the Teatro Donizetti, Bergamo, which makes a practice of reviving a little-known Donizetti opera each season. *Gabriella di Vergy*, composed in 1826, was given in Naples in 1869 in a version drastically modified by other hands. *Rita*, an *opéra comique* composed in 1841 to a French text by Vaëz, had its première in Paris in 1860. *Le duc d'Albe* was begun in 1839 and put aside approximately half-composed. In 1880 the publisher Giuseppina Lucca obtained the rights to the opera and established a commission headed by Ponchielli to supervise the completion of the score, that task being assigned to Matteo Salvi, who had been Donizetti's pupil in Vienna. The opera was first given at the Teatro Apollo, Rome, on 22 March 1882. The chief attention aroused by the work was the discovery that Scribe had later revamped the same libretto to serve for Verdi's *Les vêpres siciliennes*. In 1959 Thomas Schippers made a second version, closer to Donizetti's original intention, which was introduced at the Spoleto Festival.

4. DONIZETTI'S CHARACTER. Over 1000 of Donizetti's letters have been printed. These give a vivid picture of his personality and the conditions under which he worked; they could form the basis of a fascinating psychological study. He was warm and humorous, capable of deep feeling and eloquence. As his physical condition altered in his later years, his letters are a moving witness to his gradual disintegration. The obsessiveness increased and the tone of melancholy grew more insoluble; the last letters, pathetic cries for help from a disorientated brain, were written in the first days of his confinement at Ivry.

The letters to Mayr are of particular interest because they show the constant affection and respect he felt for his old teacher. He was surprisingly fair in his comments about other composers, not at all like the morbidly jealous Bellini. Except when he thought he had been the victim of malice, he was modest about his achievements. His letters reveal no interest in the political events of his time. Nor is this surprising. Donizetti's career depended on retaining the goodwill of the régimes controlling the theatres for which he worked. Nevertheless, some of his close associates were political activists and exiles. If Donizetti was himself involved in such activities, no clear evidence of it has yet been recovered.

Donizetti's literary aptitude appears in the three comic librettos he wrote for himself (*Le convenienze ed inconvenienze teatrali*, *Il campanello* and *Bely*). They are deft and well shaped and contain frequent elements of parody. He was well read, with a particular affection for Dante; yet he was always at heart the practical man of the theatre, deeply involved in the practice of his craft.

5. OPERAS.

(1) *General survey.* Along with Bellini, Donizetti epitomized the Italian Romantic spirit of the 1830s. A more fragile spirit than its German or French counterpart, it declared itself through – and often in the teeth of – an operatic tradition of fixed, generic forms and vocal virtuosity, linked to the necessity of rapid production. If Bellini expressed Italian Romanticism in its most concentrated form, Donizetti compensated by a greater versatility and resource and a stronger feeling for

dramatic movement. He also had the benefit of a more thorough musical training under Mayr and Mattei, and this contributed much to his superior fluency of technique and invention.

When Donizetti began his career in 1818, Italian music was wholly dominated by Rossini, whose formal, abundantly florid style all composers were bound to imitate, since, as Pacini wrote, 'there is no other way of making a living'. Although reputedly desirous of reform, Donizetti conformed to this style without difficulty, whether in the *seria*, *buffa* or *semiseria* genre, and the 30 or so works produced over the next ten years, mainly for Naples and other cities in the south, all show nimble craftsmanship and melodic fertility. In the serious and 'semi-serious' operas there is as yet little trace of individuality, which, in all the principal voice parts, tends to sink under the weight of Rossinian *canto fiorito* and *soffeggi* (see ex.1, a passage for one of the four virtuosos basses in the heroic opera *Otto mesi in due ore*, ossia *Gli esiliati in Siberia*, 1827).

Ex.1

It is his comedies, such as *L'ajo nell'imbarazzo* (1824), *Olivo e Pasquale* (1827) and *Il Giovedì Grasso* (1828), that afford the earliest glimpse of the true Donizetti. The first, in particular, shows that blend of humour and tenderness (here enhanced by the felicity of Ferretti's verse) that is the hallmark of his comic style. Even the routine syllabic setting for the two *buffi* are floated on a characteristically fresh melody embellished with light, faintly sensuous chromatic inflections (see ex.2).

After 1828 Donizetti's own style began to take shape under the influence partly of Bellini's *Il pirata* (1827), which brought to Italian opera a new manner in which *fiortura* was both reduced and subordinated to passionate expression, and partly of Rossini's monumental French operas, such as *Le siège de Corinthe* (1826) and *Moïse* (1827), which found their way to Italy in translation. Rossini's influence is noticeable in *Les eul di Roma* (1828), with its abundant choruses, and in *Il diluvio universale* (1830), an *azione tragico-sacra* whose melodic fertility amply repays its obvious debt to 'il nuovo Mosè'. Hints of Bellini are evident in *Alina, regina di Golconda* (1828), *Il paria* (1829) and *Elisabetta, o Il castello di Kenilworth* (1829). The next operas are marked by a tendency for *canto fiorito* to disappear from the male voices or to be relegated to the cadenzas; at the same time, the melodies shed the declamatory element inherited from Rossini to become more lyrical and periodic in Bellini's manner, or else more vivid and concise in an anticipation of Verdi's.

During this period certain works stand out as land-

marks. With *Anna Bolena* (1830) Donizetti came into his own as a tragic composer. Here, for the first time, the traditional procedures were put to recognizably personal use, in the service of a drama both powerful and swift. *L'elisir d'amore* (1832) saw the perfection of sentimental comedy in a pastoral setting and remains as much a classic of its genre as does Rossini's *Barbiere* of late Classical *opera buffa*. In *Lucrezia Borgia* (1833) Donizetti explored a vein of sensational melodrama in which convention was more radically modified than ever before: the concertato and stretta that were expected to end at least one act were reduced to a few pages at the end of the prologue, not one of the duets is in the standard Rossinian three-part form that had generally served Donizetti until then. The first movement of that between Lucrezia and Alfonso ('Vi chiedo, o signore') takes the form of a dialogue; the duettino 'Qui che fai' in the same act is conducted as a series of *parlanti* over a sinuous orchestral theme. Both served Verdi as models, in *Nabucco* and *Rigoletto* respectively.

The progress away from Rossini was gradual and not uniformly maintained. *Torquato Tasso* (1833) was a more innovatory work than *Rosmonda d'Inghilterra* (1834). Even *Lucia di Lammermoor*, generally considered the archetype of Italian Romantic opera, remained a curious blend of old and new, as may be seen by comparing the two duets 'Della tomba che rinserra' and 'Il pallor funesto orrendo'; the first was conceived lyrically throughout, the second cast in a typically Rossinian mould of complex symmetries in which the architectural element takes precedence over the dramatic. The deeply pathetic sextet with its groundswell to climax (a legacy from Bellini that was seized on by the Italian Romantics) is framed by two movements

built on the same orchestral theme – another device associated with Rossini, which artificially heightens the contrast between stasis and action. Likewise, though vocal coloratura is used effectively to depict the fragility of the heroine, some of the Mad Scene remains on a purely decorative level, even when shorn of the disfiguring cadenza for flute and voice added for or by Teresa Brambilla and still performed. The brilliant cabaletta 'Spargi d'amaro pianto' shows a curious indifference to the mood of Cammarano's text. Unlike Bellini's Elvira in similar circumstances, Lucia lacks the excuse of morbid euphoria for her roulades.

By 1836 drama has gained the upper hand in determining the structure of most duets. In *Roberto Devereux* (1837) the middle movement of that between Nottingham and Sara ('Nol sai che un nume vindice') is a dialogue over the funeral march that conducts Essex to the Tower of London, while the cabaletta allocates contrasted themes to the two soloists. Vocal virtuosity became increasingly functional. Unlike Bellini, Donizetti never wholly abandoned the declamatory flourish characteristic of the 1820s. Hence, in ex.3, the late but characteristic instance of an 'open' melody (to use Friedrich Lippmann's useful term for a melody that begins with ornamental, declamatory gestures in free time and gradually takes on a regular periodic motion as it proceeds) in the heroine's cavatina from *Pia de' Tolomei* (1836), 'O tu che desti il fulmine'.

During the years from 1839 onwards Donizetti's style was further enriched as a result of his commissions for Paris and Vienna and the need to cater to audiences more sophisticated than those of Naples or Milan. All the foreign works apart from *Dom Sébastien* have full-length overtures, mostly worked out with considerable

skill, though only three (those of *La fille du régiment*, *Maria di Rohan* and *Don Pasquale*) are thematically associated with the operas to which they belong. In general, the orchestration is fuller, the harmony subtler and more varied than in previous works. Donizetti took full advantage of the greater resources offered by the Paris Opéra (the overture to *Les martyrs* begins with an Andante for four bassoons). Yet apart from such obvious gallicisms as the trio 'Tous les trois réunis' in *La fille du régiment* (1840) – a counterpart to the stretta 'Vencz amis, retirons-nous' from Rossini's *Le comte Ory* (1828) – and the portentous denunciation of Balthasar in *La favorite* (1840), which echoes that of Cardinal Brogni in Halévy's *La juive*, his music did not change its physiognomy in response to a French text, as Verdi's so often did. Indeed, it is a French opera, *La favorite*, that supplies one of the most evocatively Italian arias in the tenor repertory – 'Spirto gentil', originally intended for the unfinished *Le duc d'Albe* (begun in 1839). Few would maintain that it gains anything by being sung in the original French. Only *Dom Sébastien*, with its preponderance of military rhythms and accompanimental 'tics', suggests a conscious attempt to imitate the grand manner of Meyerbeer.

The wider horizons offered by Parisian grand opera also benefited the last Italian operas, three of which were written for non-Italian audiences. *Linda di Chamounix* is Donizetti's ripest and most varied essay in the *semiseria* genre, including a hilarious scene for *buffo* bass and chorus, a melancholy ballad sung by a boy-minstrel, a solemn prayer for bass and chorus that serves as an act-finale, a mad scene for the heroine and a 'theme song' (here a love-duet), the singing of which by

the hero recalls the distraught heroine to her right mind. In this work the current Italian idiom is sometimes invaded by harmonies of an almost Schumannesque sensibility (see ex.4).

Don Pasquale (1843), Donizetti's comic masterpiece, recovered for Italy the Classical heritage of Mozart; it features a unique style of conversational recitative of freely floating lines with only an occasional string chord to underpin the modulations (until 30 years later composers were still using a continuo instrument for recitative in *opera buffa*). *Maria Padilla* (1841), *Caterina Cornaro* (composed in 1842) and *Maria di*

Ex.4 (ARLO)

tut - to scor da a un tuo sor - ri so tut-to in te mi dona a-mor

Rohan (1843) all hint at the way Donizetti's art would have evolved if his career had not been cut short. In the heroine's scena and cavatina in Act I of *Maria Padilla* the traditional Rossinian framework appears dissolved into an interplay of declamatory and lyrical elements, of vocal and orchestral melody sustaining a dramatic flow less urgent than Verdi's, yet no less continuous. *Maria di Rohan*, Donizetti's most concise tragedy, brought recitative into the heart of a formal number, thus achieving a variety of pace unusual for the time. All three works are free from the consciously grand manner that Mercadante had introduced with his *Il giuramento* (1837) and *Elena da Feltre* (1838). The most elaborate of Donizetti's concertatos is unfailingly limpid.

(ii) *Melody, form, harmony.* Donizetti's melodic style was that of his time and place, with little to distinguish it from that of his contemporaries, who were all working in the same enclosed tradition and who, like their 18th-century forebears, availed themselves of a common stock of procedures. Donizetti had no such obvious traits as Bellini's 'heavenly length', his personal manner of articulating a melody or his continual use of simple discords on accented beats. Scholars such as Lippmann and Ashbrook, however, have drawn attention to his use of graceful, rather sensuous chromatic passing notes in the course of plain diatonic melodies, a penchant for cadences and half-cadences that descend from the fifth to the third degree of the scale, a robust, popular quality in choral and stage-band music (a trait shared with Luigi Ricci and Verdi), a fondness for lyrical melodies in triple or 6/8 time, often resulting in a characteristic mazurka-like setting of the ubiquitous octosyllabic verse (e.g. 'Da un tuo detto sol dipende', *Alina, regina di Golconda*, 'Per guarir di tal pazzia', *L'elisir d'amore*, 'Chi mi frena in tal momento', *Lucia di Lammermoor*; and 'Sin la tomba è a me negata', *Belisario*). Notable above all was Donizetti's ability to generate long, satisfying periods from plain, often predictable extensions of a single rhythmic idea (e.g. 'Rayons dorés', *La favorite*; 'O luce di quest'anima', *Linda di Chamounix*; the prayer with chorus 'Deh, tu di un umile', *Maria Stuarda*; and ex.5, Gennaro's solo 'Di pescator ignobile', *Lucrezia Borgia*).

Another characteristic melody is that which, either due to a natural abruptness or because it reaches its climax earlier than expected, exhausts its momentum in varied repetitions, shortenings or expansions of the cadential phrase (see 'Mentre il cor abbandonava', *Il diluvio universale*; and 'Tu che siedi in terzo cielo', *Fausta*). This design is especially effective in cabalettas, where the repetitions not only afford a basis for virtuosity but also prepare for the desired full stop and applause (see 'Spargi d'amaro pianto', *Lucia*; and 'Mon arrêt descend du ciel', *La favorite*). In general, however, Donizetti's achievement lay less in any specific contribution to the post-Rossinian tradition than in a wide-ranging invention within it. His cabalettas present every

possible variety from the brilliant to the expressive and sentimental. His cantables exploit the standard binary form in many unpredictable guises. His use of quasi-recitative to diversify narrative arias is especially skilful (see 'Nella fatal di Rimini', *Lucrezia Borgia* and 'Regnava nel silenzio', *Lucia*). Particularly affecting are those sudden modulations towards the end of a period, increasingly common in the later operas. The most magical instance occurs in the duet 'Signorina?' in *Don Pasquale* (see ex.6)

Ex.6

[l'ef]-fet-to or-bi-so-gna del-pro-
-fet-to, ...

Donizetti often combined two forms within the same number. Leicester's cavatina 'Ah rimiro il bel sembiante' (*Maria Stuarda*) is half duet, half aria with *pertichini*. Sometimes he added a strophic dimension to his cantables, as in 'Ah non avea più lagrime' (*Maria di Rudenz*), or the famous minor-major romanza 'Una furtiva lagrima' (*L'elisir d'amore*), the first verse of which ends in the relative minor, the second in the tonic major. There is scarcely an opera from 1830 onwards that does not contain an unobtrusive novelty of form and texture, whether it be Guido's mournful cavatina 'Questo sacro augusto stemma' (*Gemma di Vergy*), sung over a pattering recital by Rolando and the chorus of the story of Joan of Arc, the clinching of a cabaletta with a phrase taken from the cantabile, as in the duet 'Fama! Sì, l'avrete' (*Anna Bolena*), or the sobbing tran-

sition from central ritornello to the second statement of the cabaletta 'Ugo è spento' (*Parisina*). As might be expected, the French works make use of the ternary form with modulating middle section (see Zaida's two romances in *Dom Sébastien*); all the works of this period show a more frequent use of thematic reminiscence, which, however, nowhere approaches the quasi-symphonic concept of leitmotif. In his view of opera Donizetti postulated the supremacy of the human voice and the vocally conceived period as its principle of organization; his harmony and scoring are conditioned accordingly. His tonal range is in general wider than Bellini's, his harmonies blander and yet more sophisticated (he was more sparing in the use of poignant discord). Like most of his Italian contemporaries he aimed at dramatic expression by means of vocal contour rather than harmonic nuance; hence the somewhat generalized emotion of the many cabalettas based on simple major-key harmonies in a tragic context. Nor did he fail to observe the unwritten law that any piece begun in the minor key must conclude unequivocally in the major, whether relative or tonic – a scheme that weakens many a rondò finale and in particular the remarkable stretta 'Come tigr di stragi anelanti' in Act I of *L'assedio di Calais*. Local colour is rare (the yodelling themes in *Betty* are an exception). There is nothing in *Napoli* to indicate that the drama is set in India. Only in the 'Danse arabe' in *Dom Sébastien* did Donizetti avail himself of the harmonic resources offered by the exotic, and, partly for this reason, his ballet music is in general trite and undistinguished.

(iii) *Orchestration and vocal writing.* In his scoring Donizetti followed Rossini's 'prismatic' treatment of the orchestra, tracing variegated patterns of wind colour over a neutral string background, pointing modulations with sustaining instruments, doubling melodic lines wholly or in part with solo flute, clarinet or trumpet, as the case may be. Concertante and obbligato instruments, always treated in bel canto style, frequently embellish a scena or form the basis of a prelude, with or without an accompanying harp. Instances include a glass harmonica (*Elsabetta, o Il castello di Kenilworth* and also *Lucia*, where it was later replaced by a flute), clarinet (*Torquato Tasso*), harp (*Lucia*), bass clarinet (*Maria di Rudenz*) and trumpet (*Don Pasquale*). Tutti are usually noisy and opaque, while lyrical accompaniments keep to a plain rhythmic pattern in a more popular variant of Rossini's manner and sometimes justify Wagner's famous gibe about the big guitar. But put any score of Donizetti's beside one of Mercadante's or Pacini's and what leaps to the eye is its sparseness. It seems impossible that so few notes can make the effect that they invariably do. If in his early operas Donizetti's use of wind colour may appear ornamental and hedonistic, in his later works it can be powerfully evocative. Horns play an important role in establishing the atmosphere of *Lucia di Lammermoor*.

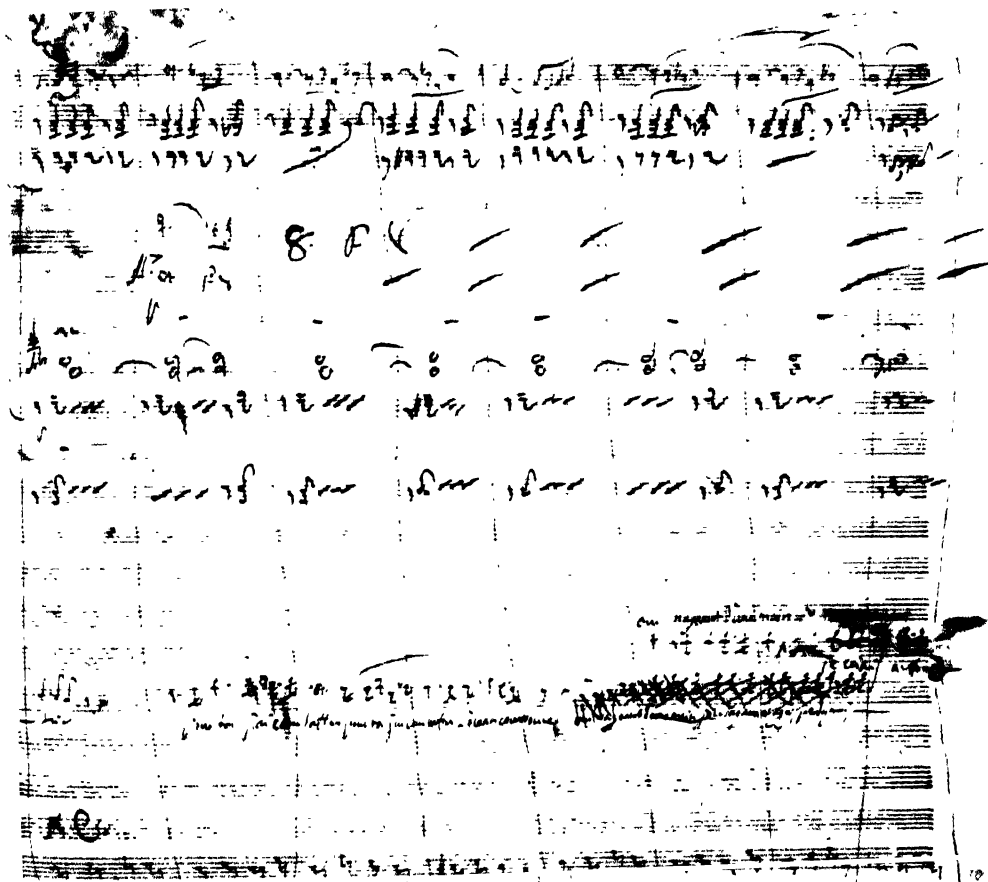

In his treatment of the voice Donizetti followed the lead first of Rossini, then of the Bellini of *La sonnambula* and after. He was particularly responsive to the individual qualities of the singers for whom he wrote. He never attempted, as Bellini once did, to impose a plain style on a florid singer. The agility of Tacchinardi-Persiani left its mark on *Rosmonda d'Inghilterra*, *Lucia* and *Pia*; the more dramatic talents of Pasta and Ronzani De Begnis were given full scope in the more directly

expressive final scenes of *Anna Bolena*, *Maria Stuarda* and *Roberto Devereux*. Confronted by a mezzo-soprano with no flexibility whatever, such as Rosine Stoltz, creator of Léonore in *La favorite*, Donizetti eschewed all decoration to achieve a noble simplicity that pervades not only the heroine's part, but the whole score, apart from the dispensable ballet. Except in *L'assedio di Calais* he followed the trend that was banishing the contralto or mezzo-soprano *en travesti* from hero to a subordinate position in the plot, such as that of the hero's or heroine's friend.

In the male parts *canto fiorito* gave way to a simpler eloquence in which syncopation usually replaces passage-work as a way of giving emphasis. Like Bellini, Donizetti treated his baritones and basses alike, but he was more successful in giving a high charge of irony to the singer's lyrical line (see 'Pour tant d'amour', *La favorite*), thereby foreshadowing Verdi. The growing incidence of important baritone roles in the later operas (in both *Maria di Rudenz* and *Maria Padilla* the baritone takes precedence over the tenor) was due to Giorgio Ronconi, who did more than any singer of his day to stimulate that forceful conception of the voice type associated with the young Verdi. For Donizetti,

however, as for most of his contemporaries, the baritone remained essentially a *basso cantante* with a tessitura roughly a tone lower than that of his Verdian counterpart. On the other hand, the Donizettian tenor has a character of his own. A poet of the voice even when a villain (as in *Pia de' Tolomei*), he first took shape in his less heroic aspects in *L'elisir d'amore*, to reach his fullest incarnation as Edgardo in *Lucia*, a role that provided two famous singers of the day with their respective sobriquets: 'the tenor of the curse' (Fraschini) and 'the tenor of the beautiful death' (Moriani). Capable of great force ('Maledetto sia l'istante', *Lucia*) and even virtuosity ('Trema Bisanzio!', *Belisario*) he excelled in the portrayal of innocence betrayed. In his mature operas Donizetti's touch never failed with the tenor yet his means were of the simplest (see ex.7). Even that degree of discord is exceptional; no composer was more adept at distilling sadness from the combination of tenor voice and plain major-key harmonies, as in 'Tu che a Dio spiegasti le ali' (*Lucia*).

Donizetti's sculpting of a tenor melody can be traced in the sketches for Ernesto's aria 'Cercherò lontana terra' in *Don Pasquale*, published by Rattalino (1970). These entirely refute the notion that the composer

4 Autograph score of part of the cavatina 'Soldats, j'ai rêvé la victoire' from Act 1 of Donizetti's *Dom Sébastien*, first performed in Paris, 1843 (F-Pn)

Ex.7 Larghetto

always wrote uncritically and at breakneck speed. Indeed, they resemble Beethoven's sketches in their painstaking adjustment of detail. But a comparison with the few known sketches by Verdi is significant. While Verdi's alterations were all directed towards a more exact representation of a particular character in a particular situation, Donizetti was here concerned purely with perfection of melodic craftsmanship in relation to the portrayal of a tenor in distress.

(iv) *Assessment.* Few of Donizetti's admirers would attempt to deny a certain generic quality in his art that recalls the outlook of a previous age. In general, the Romantic ethos insists on the unique unrepeatable masterpiece – a description that could be more easily applied to *Norma* than to any of Donizetti's serious operas. It is sometimes said that he needed the stimulus of a romantic story in order to give of his best. In fact he was at home in almost every field from theatrical satire (*Le convenienze ed inconvenienze teatrali*) to neo-classical tragedy without a love interest (*Belisario*). For the comedies *Il campanello* and *Betty* he compiled his own librettos, while in *Don Pasquale* he rewrote so much of the text that the librettist refused to acknowledge paternity of it. But as with Verdi, an unusual plot elicited unusual solutions. *Lucrezia Borgia* is matched in this respect by *L'assedio di Calais*, a patriotic grand opera on the French model, with which Donizetti hoped to 'introduce a new genre to Italy'. Of its many ensembles, not one is without some surprising feature, structural and harmonic, while the fact that the juvenile lead is a mezzo-soprano allows a play of 6ths and 3rds in his duet comparable to Bellini's 'Mira o Norma'. Yet the opera failed to circulate, doubtless because of its eccentric distribution (mezzo-soprano, baritone and bass principals, the last appearing only in Act 3; two *soprani comprimari*, including the heroine, and a host of secondary roles). Donizetti never continued along this path.

Too often the idealist in Donizetti was forced to yield to the practical man of the theatre. He might welcome the freedom from Italian operatic routine afforded him by the Parisian stage; he might express a preference for the tenor ending to *Lucrezia Borgia* as against the rondò finale that he had been obliged to write for Mme Méric-Lalande in 1833. But like Rossini and generations of Italian composers before him, Donizetti believed that operas should be re-created strictly in terms of the resources available for each revival. He was always ready to adapt his scores to the demands of different singers, to expand secondary roles into principal ones, even altering the original voice type, and to provide alternative numbers for the principals themselves – a practice made all the easier by the fact that Italian opera during the 1830s was constructed from short, finite scenes. Sometimes the alternative pieces were derived from previous scores. Thus the cabaletta from a contralto and bass duet in *Imelda di Lambertazzi* ('Restati

pur m'udrai') was transposed for soprano and tenor, fitted out with two preceding movements and introduced into *Anna Bolena* as an alternative to the much shorter duet for Anna and Percy that is printed in the definitive score ('S'ei t'aborre'). The entire duet was modified for *Marino Faliero* five years later. When Donizetti had no time to attend to the matter himself, he would advise the singer to use a 'pezzo di baule'. He even allowed the stretta of *La favorita* (Act 3) to replace that of *Maria Stuarda* (Act 2) in order to accommodate a mezzo-soprano Maria. Some of the transferences are more difficult to account for except on grounds of convenience. Thus the Larghetto concertato in Act 2 of *Maria di Rudenz* ('Chuse il di per te la ciglia') was reproduced note for note as the Act 2 concertato of *Poliuto*, whence it passed into Act 3 of the French version, *Les martyrs*. A quartet finale from *Il paria* was carried over into *Torquato Tasso*. The duet cabaletta 'A consolarmi affrettisi' that forms the 'theme song' of *Linda di Chamounix* first appeared in *Sancia di Castiglia*, while the overture to the same opera, all but the slow introduction, was adapted from a string quartet written in 1836. The overture to *Les martyrs* derives mostly from one contributed by Donizetti to a composite cantata for the death of Malibran. Perhaps the most bizarre instance of self-borrowing occurs in *La fille du régiment*, where what was once Noah's solemn invocation 'Su quell'arca nell'ira de' venti' (*Il diluvio universale*) was transformed into the jaunty 'Chacun le sait, chacun le dit'. *La favorita* was almost entirely compiled from music written for different contexts, yet welded together with such skill that the listener is unaware of any incongruity. Indeed, the fact that so many of the themes are based on the ascending or descending scale gives the opera a distinctive character that is very rare in Italian opera of the time. 'Spare-part' construction, limited range of harmony, total subordination of orchestra to voice and the artificiality that attaches to the use of set forms to clothe Romantic subjects all contributed to the low esteem in which Donizetti was held in the Wagnerian age and after. *Lucia* survived as a warhorse for sopranos, with the final scene omitted. *Lucrezia Borgia* and *La favorita* were tolerated as harbingers of Verdi. Only the comedies *L'elisir d'amore* and *Don Pasquale* were thought worthy of serious attention. Since the mid-20th century, however, a change of taste, helped by the advocacy of performers such as Maria Callas, Leyla Gencer and Gianandrea Gavazzeni, has restored Donizetti to critical favour, and the revivals of his vast operatic canon continue.

6. VOCAL CHAMBER WORKS. These represent a species of salon music much in vogue in Italy and elsewhere during the first half of the 19th century. Donizetti's consist mostly of songs and duets with piano accompaniment to texts ranging from Metastasio (still regarded as the musician's poet *par excellence*) to Romani and professional versifiers of the time such as Guaita and Tarantini. Many of the poems are of operatic provenance and were therefore set as operatic miniatures complete with recitative; some were grouped together in publications of the type popularized by Rossini's *Soirées musicales*, with evocative titles such as *Un hiver à Paris*, *Nuits d'été à Pausilippe*, *Inspirations viennoises*, but in spite of the occasional exotic vignette (*La zingara*, *Il cavallo arabo*), the scene is generally Romantic Italy, even where the collective title suggests otherwise (sig-

nificantly, these publications were usually issued simultaneously in Paris and Naples). Each song or duet usually has a separate dedication – to a friend, a music-loving patron or a famous singer. Songs in popular vein might have a chorus added (*La torre di Biasone*). Donizetti had a ready pen for this type of composition, and his vast production of salon music has not been fully explored. Many pieces remain in manuscript scattered in different collections throughout Europe, some were published in periodicals of the time and then forgotten. Nor is it always easy to distinguish between a genuine 'composizione di camera' and an old operatic number jotted down in piano reduction to oblige some singer ('Fausta sempre' listed by Weinstock (1964) as a salon piece is in fact a cantabile from *Francesco di Foix*). A verbal tradition attributes the well-known Neapolitan song *Te voglio bene assai* to him, but recent research has shown this to be doubtful (see de Mura, 1969). Like the operas, Donizetti's vocal chamber music is being revalued, but no amount of advocacy can set it beside the lieder of Schubert or Schumann, where voice and piano explore a vast range of inward feelings through an unending variety of harmony and texture. Donizetti's melodies centre on two stereotypes – the popular song and the Italian opera aria, while the piano writing rarely rises above the suggestion of a primitive orchestral accompaniment. Nonetheless, the songs are fluent, attractive and usually saved from banality by an unexpected modulation or unusual feature of design.

7 SACRED WORKS. In submitting an *Ave Maria* to Ferdinand I of Austria in 1842, Donizetti hoped to prove to the emperor that 'among writers of the theatrical genre there was still a good Christian who knew a different genre, that is, the sacred one'. By that time he had certainly made good his claim. Like every Italian composer of his day he had written quantities of liturgical music as part of his musical training. All of it suffers to some extent from that disparity of style and character that afflicted church music in Italy throughout the 19th century and which only Verdi and Rossini succeeded in overcoming – arid scholasticism in the choruses, operatic sentiment and brilliance in the solos and a general indifference to the sense of the text, yet there is no lack of skill or of musical resource. Mayr's teaching is particularly evident in some of the ensembles, with their echoes of Haydn and other German masters (an early *Dixit Dominus* includes a movement based on the main theme of Mozart's overture to *Die Zauberflöte*). After 1824 the output diminished almost to nothing, then in 1835 Donizetti returned to religious composition, apparently in a more dedicated spirit. By then all floridity had been banished from the vocal lines, and yet of the three requiems dating from those years, that in commemoration of the death of Bellini (the only one to be published) remains a coat of many colours – a Mozartian Introit, a severely fugual Kyrie with final stretto, a *Dies irae* that anticipates Verdi's in theatrical force, a *Judex ergo* that begins in solemn, measured declamation and ends in a sentimental lilt of 6ths and 3rds, and an Offertory in the style of a Neapolitan folksong. Not until his last years as court Kapellmeister in Vienna did Donizetti find a liturgical style that was both consistent and rich in variety. This can be seen in a *Miserere* in G minor originally dedicated to Pope Gregory XVI in 1837 and rewritten in 1843. No longer is there any trace of the theatre. The

movements are small but concentrated in expression. The even-numbered verses, originally to be sung to plainchant, are fully harmonized, but in a modal manner. In movements such as 'Et exultabit' and the final fugue, counterpoint is revitalized as in Rossini's *Petite messe solennelle*. The above-mentioned *Ave Maria* was justly praised by the Viennese critics for its simple dignity, one writer venturing to hope that it marked the rebirth of genuinely religious music in Italy.

8 INSTRUMENTAL WORKS. These have little importance except as evidence of a purely technical skill with which Donizetti is rarely credited. Always well written for the instruments involved, they scarcely rise above the tastes of a public for whom vocal music was paramount. The well-known Concertino in G for english horn features a melody of Schubertian freshness recalling the *Rosamunde* overture, but it soon betrays its authorship by declining into a set of purely decorative variations. Of a different order are the 19 string quartets, all but two apparently composed for musical gatherings at the house of one Bertoli in Bergamo, where Mayr often played the viola. All show a sure grasp of the possibilities of four-part string texture as well as a close thematic organization in Haydn's manner (several have monothematic finales). Donizetti also clearly aimed at giving each a different character. Nos 13, 15, in A, D and F (numbering system from the collected edition of the quartets), all have finales in the minor, that of no. 14 being designed as a Haydnesque fugato. No. 16 in B minor recalls its opening theme in the slow movement and the finale. No. 8 in F minor has a programme for each of its four movements, the last of which is a funeral march. Sometimes the material is uninteresting, as in no. 12 in C, or the ideas over-ambitious, as in the slow movement of no. 11, which suggests an acquaintance with Beethoven. But what ultimately prevents these quartets from entering the repertoire is a basic superficiality of musical thought; they are exercises rather than genuine works of art. Most of them could be arranged for string orchestra without losing their character, and the first movement of no. 19 – the most elaborate of all – did in fact furnish the basis of an opera overture.

9 CONCLUSION. It is by his operas that Donizetti's reputation stands or falls. As a composer of comedy, his position has never been seriously challenged (Mendelssohn once shocked a number of his friends by declaring that he would like to have written *La fille du régiment*). Both *Don Pasquale* and *L'elisir d'amore* have remained in the general repertory since they were composed. In the tragic genre Donizetti was both more and less than a great composer: more in that he summed up within himself a whole epoch; less in that no single one of his tragic operas makes the impact that one expects of an unqualified masterpiece. All are subject to relapses into routine craftsmanship. Yet so central was he to the vitality of the tradition he served that when he retired it began to decay. His lesser contemporaries, Mercadante and Pacini, lacking his certainty of aim, his sense of a just relation of means to ends, soon declined into mannerism and selfconsciousness. Only Verdi succeeded in putting the Donizettian heritage to a new and valid use. Donizetti's own works survive through the grace and spontaneity of their melodies, their formal poise, their effortless dramatic pace and above all the romantic vitality that underlies their veneer of artifice.

Donnberger, Georg Joseph. See DONNBERGER, GEORG JOSEPH.

Donner, Henrik Otto (b Tampere, 16 Nov 1939). Finnish composer and jazz trumpeter. After completing his studies at the Sibelius Academy, Helsinki he was a pupil of Ligeti and Koenig. Head of the light music department of Finnish radio, he has also been active in the spheres of theatre and film music. With his own ensemble he introduced new jazz trends into Finland, and he has been a pioneer in his country of 'total' serialism, aleatory writing, 'happenings' and new modes of music-theatre. His output may be divided into three main sections: experimental works, more conventional music and jazz-influenced, often socially engaged utility music (including several hundred songs).

WORKS (selective list)

Cantata profana, 3 solo vv, ens, 1962. Ideogramme 1-2, ens, tape, 1962, 1963. For Emmy, 2, 3, female vv, ens, 1963. Sym. 'Homage a Charles Ives', 1964. To whom it may concern, jazz ens, orch, 1966. XC (Pond), S, ens, 1969

MSS in SF-Hmt

ERKKI SALMENHAARA

Donnini, Girolamo (d Bonn, early 1752). Italian composer. His early life remains obscure, but Thayer discovered that at least by 1719 (Eitner said 1714) he was serving the Elector Joseph Clemens at the court in Bonn as second of its three Konzertmeister. When such music had an instrumental accompaniment, as in opera productions, Donnini, rather than the director of instrumental music, conducted. By 1722 he was also working as court composer; by 1719 he had written a three-act 'tragedy', *Esther*, to celebrate a visit by Albert Charles and Ferdinand, Princes of Bavaria (not Clemens August, as appears on the score). In this oddly constructed work, the middle act abandons the nominal plot line, and, in the voices of such allegorical personages as Fortuna, Usura, Amor proprio and Virtù, sings the praises of the visitors' distinguished family. In 1722 Donnini's singers numbered 22.

On 30 November 1723 Donnini was appointed chamber music composer, and on 29 March 1732, after Clemens August had become elector, he succeeded to the post of Kapellmeister on the death of the incumbent, Trevisani. His salary was 500 thalers, soon raised to

600. Under his directorship, which he held until his death, Beethoven's grandfather Ludwig joined Bonn's musical establishment as bass singer.

Donnini's only known compositions besides *Ester* are an undated 'divertimento pastorale', *Icaro* (both in *I-MOe*), and a violin concerto (*A-Wkm*).

JAMES L JACKMAN

Donostia, José Antonio de [Zulaica y Arregui, José Gonzalo] (b San Sebastian, 10 Jan 1886; d Lecároz, Navarre, 30 Aug 1956). Spanish composer, organist and musicologist. He studied with Echazarra at the Lecároz Franciscan College, with Esquerrá in Barcelona, with Gaviola in San Sebastian and with Cools and Roussel in Paris. Donostia (the Basque name for San Sebastian) was the name he took on ordination. He first achieved renown as a composer with a String Quartet and the four books of *Preludios vascos* for piano (1912-23), which, despite their Schumannesque style, employ the harmonic innovations of impressionism. Between the wars he composed a number of sacred stage works: *Les trois miracles de Ste Cécile* (1920) and *La vie profonde de St François d'Assise* (1926) were both produced in Paris. He lived in Toulouse (1936), in Paris (1939-40) and in Bayonne as an organist and choir-master (1941-3). On the foundation of the Spanish Musicology Institute in Barcelona (1943) he was invited to lead its folklore department; he produced a number of studies and editions of Basque folksong, as well as arrangements of 18th-century music. His later compositions show a refinement of style, with strict, concise expressiveness, they include the choral pieces *Poema de la Pasión* and *Canciones sefardies*, and Donostia's masterpiece, the Requiem. He was a member of the Madrid Fine Arts Academy and the Academy of the Basque Language.

MANUEL VALLS

Donovan, Richard Frank (b New Haven, 29 Nov 1891; d Middletown, Conn., 22 Aug 1970). American composer, organist and teacher. He studied at the Yale University School of Music, at the Institute of Musical Art, New York (MusB 1922), and with Widor in Paris. In 1923 he joined the staff of Smith College; he was later appointed instructor (1928) and then Battell Professor of theory (1947) at Yale, remaining there until 1960. From 1936 to 1951 he was conductor of the New Haven SO. After an early post-impressionist phase his style developed to a lucid polyphony, despite closely woven textures, with frequent use of modal themes, sometimes of folk tunes. After 1950 his music became more astringent and chromatic, verging towards atonality but still characterized by dense polyphony and strong asymmetrical rhythms. His *Design for Radio* won the BMI Publication Award and his organ works have been often performed.

H WILEY HITCHCOCK

Donzelli, Domenico (b Bergamo, 2 Feb 1790; d Bologna, 31 March 1873). Italian tenor. He sang as a boy soprano in Bologna, and after studying with Bianchi made his début in Bergamo as second tenor in Mayr's *Elsa* at the age of 18. The following year he went to Naples to complete his studies with Viganoni and Crivelli. For the next decade he sang the conventional florid tenor roles of the period throughout Italy, appearing in many Rossini operas, including *Tancredi*, the first performance of *Torvaldo e Dorliska*, *L'inganno felice* and *La Cenerentola*. Then his voice, which had ranged to b' (d'' in falsetto), began to grow larger and heavier, and he turned to a different repertory. In 1825 he made his Paris début in the title role of Rossini's *Otello*, a part in which he was very much admired. During his six seasons in Paris he sang in the first performances of Rossini's *Il viaggio a Reims*, Halévy's *Clari* and Bertin's *Fausto*. In 1829 he appeared at the King's Theatre, London, and the following year sang in *Il pirata*, the first Bellini opera to be heard there. He returned two years later to appear in the same composer's *La straniera*. Meanwhile Bellini had written the part of Pollione in *Norma* for him, and after the first performance at La Scala on 26 December 1831 he sang the role in London, Venice, Bologna, Trieste and Sinigaglia. By now his voice extended naturally only to a', or c'' in falsetto, but its volume and sonority had greatly increased. He appeared in many Donizetti operas, including *Fausta*, *Anna Bolena*, *Parisina*, *Belisario*, *Lucia di Lammermoor* and *Roberto Devereux*. Two of the greatest successes of his later career were in Auber's

Masaniello and **Mercadante's** *Il bravo*. He retired in 1844.

ELIZABETH FORBES

Doof (Dutch). An ORGAN STOP (*Doef*).

Doolittle, Amos (b Cheshire, Conn., 18 May 1754; d New Haven, Conn., 30 Jan 1832). American composer; see PSALMODY (ii), §II.

Doorslaer, Georges van (b Mechelen, 27 Sept 1864; d Mechelen, 16 Jan 1940). Belgian musicologist. A doctor of medicine by profession, he devoted his spare time to the history of art and music, in particular that of his native Mechelen. He spent the years 1914–18 in England, collecting material for his standard reference work on Philippe de Monte, whose provenance from Mechelen he was able to prove; later, with Jules van Nuffel and Charles van den Borren, he undertook the publication of Monte's Opera Omnia (1927–39). Another of his interests was campanology: the founding of the world-famous school at Mechelen in 1922 owed much to his efforts. He published numerous articles in the *Bulletin* of the archaeological circle of Mechelen, of which he was a member and (1919–26) president.

Van Doorslaer's work on Monte and his contemporaries owed its scholarly soundness to critical archival research, as did his work in other fields such as bell-casting and the copper industry, choir schools and court music, organists and organ building, gold- and silver-smiths, tapestry, the plastic arts and their exponents, and medical history.

GODELIEVE SPIESSENS

Doppel-Be (Ger.). Double FLAT.

Doppelflöte (Ger.). An ORGAN STOP.

Doppelkreuz (Ger.). Double SHARP.

Doppelleittonklang (Ger.). A chord derived from a major or minor triad by replacing one of the notes in the triad by the notes lying a minor 2nd above and below it, for example *e-g-a#-c'* (from *e-g-b*), *e-gb-a-c'* (from *f-a-c'*), *c-d#-f-g* (from *c-e-g*). The note most often replaced is, in the case of a major triad, its root, and of a minor triad its 5th.

Dopper, Cornelis (b Stadskanaal, nr. Groningen, 7 Feb 1870; d Amsterdam, 18 Sept 1939). Dutch composer and conductor. From 1887 to 1890 he studied at the Leipzig Conservatory with Salomon Jadassohn and Reinecke, but was for the most part self-taught. In 1896 he became coach and conductor at the Netherlands Opera in Amsterdam. After the dissolution of the company in 1903, he became conductor of the Savage Opera Company which played in North America. He succeeded J. M. S. Heuckeroth as second conductor of the Concertgebouw (1908–31) alongside Mengelberg, and gave the first Dutch performances of works by Ravel and Debussy, as well as organizing the first youth concerts in the country. His compositions are characterized by masterly orchestration, and he made excellent arrangements. In his typically late Romantic symphonies he often evoked Dutch subjects. The choral piece *De wilgen* was particularly popular.

ROGIER STARREVELD

Doppio (It.: 'double'). *Doppio movimento* is a direction to double the tempo. *Canone doppio* is a double canon. *Doppio pedale* is a term used in organ music to denote the simultaneous use of both feet on the pedals.

Doppio bemolle (It.). Double FLAT.

Doppio diesis (It.). Double SHARP.

Doppione. A mysterious woodwind instrument of the late 16th and early 17th centuries. It may well have been

a wind-cap shawm with two tubes, either of which could be played separately. For details, see WIND-CAP INSTRUMENTS.

Doppler. Polish, later Hungarian, family of composers and instrumentalists.

(1) (Albert) Franz [Ferenc] Doppler (b Lemberg [now L'vov], 16 Oct 1821; d Baden, nr. Vienna, 27 July 1883). Flautist, composer and conductor. He was taught music first by his father, the composer and oboist Joseph Doppler, and made his début in Vienna at the age of 13. After several concert tours with his brother (2) Karl Doppler he settled in Pest, where he was first flautist in the German Theatre from 1838 and in the Hungarian National Theatre from 1841. His first opera, *Benyovszky*, was produced at the National Theatre in 1847, and four further Hungarian operas were staged there during the next ten years, all with considerable success; they combine Italian influences (e.g. Donizetti) with elements of Russian (*Benyovszky*), Polish (*Wanda*) and Hungarian music. Again with his brother Karl, he took part in the foundation of the Hungarian Philharmonic Orchestra in 1853 under the conductorship of Ferenc Erkel. The two brothers continued to make successful joint concert tours throughout Europe, including a visit to the Weimar court in 1854 when they met Liszt, and to London in 1856. Franz moved in 1858 to Vienna, where he worked for the Court Opera as first flautist and assistant (later chief) conductor of the ballet. Most of his ballet music, which was widely popular, dates from this period and his only German opera, *Judith*, was performed at the court in 1870. From 1865 he taught the flute at the Vienna Conservatory. He was a skilful orchestrator, and his transcriptions of some of Liszt's Hungarian Rhapsodies became well known.

WORKS (selective list)

STAGE

- (unless otherwise stated, perf. at Hungarian National Theatre, Pest)
Benyovszky (Afanasia) (opera, 3, R. Kofflinger, after Kotzebue), 29 Oct 1847, vocal score (Pest, n.d.)
Illa es a huszartoborzó [Illa and the hussar recruiting] (opera, 3, J. Janotyckh von Adlerstein), 29 Dec 1849, vocal score (Pest, n.d.), parts (Hamburg, n.d.)
Wanda (opera, 3, T. Bakody), 20 Dec 1850, full score (n.p., n.d.), vocal score (Pest, n.d.)
A két huszár [The two hussars], 12 March 1853, ov., arr. pf (Hamburg, n.d.)
Salvator Rosa (melodrama, A. Degre), composed 1855
Erzsebet (opera, 3, J. Czanyuga), 6 May 1857 [Act 1 only, Act 2 by F. Erkel, Act 3 by K. Doppler]
Judith (Ger. opera, 4, S. H. Mosenthal), Vienna, Court Opera, 30 Dec 1870, vocal score (Vienna, 1870)
 15 ballets

OTHER WORKS

 Pf (solo unless otherwise stated): *Pásztor hangok* [Shepherd sounds] (Pest, 1859); *Kossuth-Marsch* (Pest, n.d.), *Impromptu* (Pest, 1872), *Ungarische Weisen*, 4 hands, op. 41 (Berlin, n.d.); *Blumen-Walzer*, op. 44 (Hamburg, n.d.) [from ballet *Melusine*]; *Einzugsmarsch zum Jagd-Carneval* (Vienna, 1880); *Introduction and Allegro*, 4 hands, *Régi magyar zene gyöngyei*, ed. I. Fáy (Vienna, n.d.), *Aus der Heimat*, 4 hands (Vienna, n.d.)
 Other works: Hungarian ov., orch.; ballads, vv., orch.; male choruses; songs, orch. transcrs., incl. F. Liszt, [6] Hungarian Rhapsodies (Leipzig, 1874-5), *Grand galop chromatique* (Leipzig, 1906)

(2) Karl [Károly] Doppler (b Lemberg [now L'vov], 12 Sept 1825; d Stuttgart, 10 March 1900). Flautist, composer and conductor, brother of (1) Franz Doppler.

He made several concert tours with his brother at a comparatively early age, and like him was a flautist in Pest, first in the German Theatre then in the National Theatre, where he also became conductor until 1862, and where his Hungarian Singspiel, *A gránátos tábor* ('The grenadier camp'), was performed in 1853. During this time he composed songs and incidental music with some success, both for German stage works and for Hungarian folk plays. From 1865 to 1898 he was Kapellmeister at the Stuttgart court, where he was again involved in work for the theatre. His prizewinning song *Honfi dal* ('Patriotic song'; Pest, 1857) was probably his most popular composition; he also wrote some piano pieces and collaborated with his brother in various arrangements for male chorus.

(3) Árpád Doppler (b Pest, 5 June 1857; d Stuttgart, 13 Aug 1927). Pianist and composer, son of (2) Karl Doppler. He studied at the Stuttgart Conservatory and later taught the piano there. In 1880 he went to New York to teach at the Grand Conservatory, but returned after three years to his previous post in Stuttgart. From 1889 he was chorus master at the Stuttgart Court Opera, and his comic opera *Halixula* was performed there in 1891. His other compositions include an opera on Shakespeare's *Much Ado about Nothing*, orchestral variations, a festival overture and some piano music.

 ZOLTÁN GÁRDONYI

Dorati, Antal (b Budapest, 9 April 1906). American conductor and composer of Hungarian birth. The son of professional musicians (his father was a violinist in the Budapest PO), he entered the Liszt Academy in Budapest at the age of 14. He studied there with Bartók, Kodály and Leo Weiner, and also read philosophy at Vienna University. After graduating at 18 he became a répétiteur at the Budapest Royal Opera, where he made his conducting début the same year (1924) and remained for four years.

In 1928 he became assistant to Fritz Busch at the Dresden Opera, then musical director at Münster (1929-33). He spent the next eight years as conductor with the Ballets Russes de Monte Carlo (successor to the Dyagilev company), taking musical charge of the De Basil wing after the 1938 split. He toured with the company in Europe, North America, Australia and New Zealand; his numerous guest appearances with major orchestras included his American concert début with the National Symphony of Washington in 1937. In 1941 he became musical director of the new American Ballet Theater and for four years helped significantly to establish its professional basis. He became an American citizen in 1947.

From 1945 Dorati acquired a distinguished reputation as an orchestral trainer, beginning with his postwar reorganization of the Dallas SO (1945-9). He then spent 11 years as musical director of the Minneapolis SO, making it internationally known through gramophone records. His European tours at this time included an association with the LSO (with which he made his British concert début in 1946) that

was influential on its later standards. He also took an active interest in the Hungarian refugee orchestra, the Philharmonia Hungarica, on its formation in 1957, later becoming its honorary president; between 1970 and 1973 he recorded with this orchestra all Haydn's symphonies. He was made a Chevalier des Arts et des Lettres by the French government and is a Knight of the Swedish Order of Vasa.

A frequent guest-conductor of opera in Europe and North America, Dorati made his Covent Garden début in 1962 with Rimsky-Korsakov's *The Golden Cockerel*. His talents have usually benefited most from close and continuous contact with an orchestra, and he resumed a regular appointment in 1963 as principal conductor of the BBC SO, when he rebuilt its corporate personality after it had been a year without an appointed conductor. He moved to the Stockholm PO in a similar capacity in 1966, and in 1970 he also became musical director of the Washington National Symphony, which he conducted at the inaugural concert at the Kennedy Center (9 September 1971). In 1975 he became senior conductor of the RPO. Throughout his career Dorati has championed Bartók's music, and given many first performances of contemporary works. His conducting is distinguished by vigorous direct rhythm and an acute ear for rich colour.

He has composed more than 20 works in an idiom he has described as 'recognizably contemporary but not unafraid of melody', all publicly performed, and has published numerous orchestral arrangements, including the Johann Strauss music for *Graduation Ball* (1940), a widely successful ballet by David Lichine. His autobiography, *Notes of Seven Decades*, was published in 1979.

NOËL GOODWIN

Dorati [Dorati], **Girolamo** [Geronimo, Hieronymus] (b Lucca, baptized 26 Jan 1590; d Lucca, between 17 Aug and 11 Oct 1617). Italian composer and organist. He was the son of the trombonist Michele Dorati and the grandson of the composer Nicolao Dorati. Girolamo was probably the organist at S. Piercigoli in Lucca. His *Psalmi ad Vesperas* for eight voices and organ continuo was published in Venice in 1609. He did not merely alternate the two choruses following the verse divisions, but varied the structure, often achieving an impressive sonority within a basically simple harmonic and homophonic style. Two motets by him are in *Promptuarii musici* (Strasbourg, 1617).

For bibliography see DORATI, NICOLAO.

GABRIELLA BIAGI RAVENNI

Dorati, Nicolao [Nicolaus, Niccolo, Nicolo] (b Granaiaola, Lucca, c1513; d Lucca, Feb 1593). Italian composer and trombonist. In late 1543 he was a trombonist in the Musica di Palazzo, a group of musicians

Antal Dorati in 1965

engaged by the Lucca government. In 1557 he became its director, an appointment that he held until his death. His music, though not original, shows a capable assimilation of contemporary trends, particularly in the choice of texts, expressive treatment and the use of chromaticism. Some madrigals betray Florentine influence in the prevalence of homophonic passages and syllabic text-setting.

Nicolao's younger brother Bartolomeo (d Lucca, Feb 1603) was also a trombonist in the Musica di Palazzo from February 1546 until his death. Nicolao's sons, Lorenzo (b Lucca, baptized 29 Jan 1563, d Lyons, between 1611 and 1613) and Michele (b Lucca, baptized 20 May 1560, d Lucca 5 Sept 1620) also belonged to the group, the former from 21 October 1582 to 31 January 1584 and the latter from 19 July 1581 until his death.

GABRIELLA BIAGI RAVENNI

Dordiglione (It.). TOURDION.

Doret, Gustave (b Aigle, 20 Sept 1866; d Lausanne, 19 April 1943). Swiss composer and conductor. From 1885 to 1887 he studied under Joachim in Berlin, and then he went to Paris to study composition with Théodore Dubois and Massenet. He made his career in that city, first as second conductor for the Concerts d'Harcourt, and later as concert director of the Société Nationale. He conducted the first performance of his friend Debussy's *Prélude à l'après-midi d'un faune* on 23 December 1894. His fame as a composer extended at the same time as his activities as conductor at the head of the principal orchestras of Europe: with Debussy he toured Holland in 1914. Spending half of his time in Switzerland and half in Paris, he composed *La fête des vignerons* for Vevey in 1905, and revised it in 1927. The Opéra-Comique in Paris successfully gave *Les armailles*

in 1906, and another opera, *La tisseuse d'orties*, was performed in Paris in 1927. He was very attracted to opera and wrote, in collaboration with René Morax, several works for the Théâtre du Jorat, which opened at Mézières (Vaud) in 1908 with *Henriette*. These works created a form of popular theatre which met with great success in Switzerland, France and Belgium. He also wrote a great deal of choral music.

He received numerous honours, and throughout his life he exercised a considerable influence on music in Switzerland through his uncompromising personality and his abilities as a conductor. As music correspondent for several newspapers in Lausanne and Geneva, he directed the music of French Switzerland, until then more influenced by German music, towards France, yet without losing its national character. He wrote almost no purely orchestral works, showing a great preference for vocal music through which he could frankly and bluntly express the spirit of the people evident in their historical dramas and legends. His use of timbre and his unprepared modulations remind one of Debussy, although he lacked Debussy's subtlety and mobility, and his lyrical lines betray the pupil of Massenet. Nevertheless his art is always sincere and truly personal, and he created a tradition conforming to the sensibilities of his countrymen. Several of his songs and choruses have almost been assimilated into the folk music of French speaking Europe.

PIERRE MEYLAN

Dörfel, Alfred (b Waldenburg, Saxony, 24 Jan 1821; d Leipzig, 22 Jan 1905). German music librarian and writer on music. He received his first musical training from the Waldenburg organist J. A. Trube. At the age of 14 he moved to Leipzig, where he studied with G. W. Fink, C. G. Müller, K. Kloss and later Mendelssohn and Schumann. He soon established himself in Leipzig as a piano and theory teacher. On the invitation of Schumann, he took a position with Breitkopf & Härtel in 1845, preparing piano arrangements and, from the following year, also contributing to the *Neue Zeitschrift für Musik*. Later he wrote for the *Musikalisches*

Wochenblatt and the *Leipzig Nachrichten*. In 1860 he succeeded K. F. Becker as curator of the music department of the Leipzig city library. The following year he opened his own music lending library, which was continued by his son; it was later purchased by C. F. Peters and became the basis of the Musikbibliothek Peters (founded in 1894). Dörfel was awarded an honorary doctorate from the University of Leipzig in 1885.

Dörfel was noted for his meticulous work in editing and proofreading works for Breitkopf & Härtel and Peters; Wagner praised his supervision of the publication of the score of *Tristan und Isolde*. His many editions include several volumes of the Bach Gesellschaft Gesamtausgabe of the works of Bach (including cantatas 111-30 and 171-90), an index to the first 120 cantatas and a thematic index to Bach's instrumental works. Dörfel was important as a music critic in Leipzig and contributed significantly to the Gewandhaus concerts.

GAYNOR G. JONES

Dorfman, Joseph (b Odessa, 3 Aug 1940). Israeli composer of Soviet origin. He studied with Starkowa for the piano and Kogan for composition at the Odessa Conservatory (1958-65) and took a doctorate at the Gnesin Institute (1968-71). In 1973 he moved to Israel and joined the staff of Tel-Aviv University. Though the works he wrote in the USSR were influenced by early 20th-century Russian music and by Hindemith, in Israel he turned to graphic notation and to specifically Jewish subjects.

 WILLIAM Y. ELIAS

Dorian. The common name for the second of the eight church modes, the authentic mode on D.

Originally 'Dorian' was an ancient Greek tribal name that was used to designate one of the *harmoniai*, as mentioned in Plato's *Republic* or Aristotle's *Politics*,

along with the names Phrygian, Lydian, Mixolydian and some others. The 2nd-century Hellenistic theorist Ptolemy of Alexandria used these terms, along with Hypodorian, Hypophrygian and Hypolydian, to designate the seven *tonoi*, or transposition keys. Four centuries later Boethius, basing his discussion on Ptolemy, described these seven names as *toni, tropi, vel modi* ('tones, tropes or modes') in the fourth book of his *De institutione musica*, still with the meaning of transposition keys. In the late 9th-century Carolingian treatise *Alia musica* an eighth name, Hypermixolydian, taken from another part of the fourth book of Boethius's treatise, was added; this term was replaced by Hypomixolydian in the *Nova expositio*, a commentary on the *Alia musica*. This set of eight terms, beginning with Dorian and ending with Hypomixolydian, was given a new sense in the *Nova expositio*: it designated a set of eight diatonic species of the octave, each conceived as the juxtaposition of a 5th and a 4th, which were said to be the tonal embodiments of the eight modes of Gregorian chant.

In the Middle Ages and Renaissance the Dorian mode was described in two ways: as the diatonic octave species from *d* to *d'*, divided at *a* and composed of a first species of 5th (tone–semitone–tone–tone) plus a first species of 4th (tone–semitone–tone), thus *d–e–f–g–a + a–b–c'–d'*; and as a mode whose FINAL was *d* and whose AMBITUS, or range, was *c–d'*, with upward extension 'by licence' as far as *e'* or *f'* (the note *bb'* could also occur 'by licence'). In addition to the final, the note *a* – the tenor of the corresponding first psalm tone – was regarded as an important melodic function in the first church mode.

The expression 'Dorian mode' is often used to refer to the general tonal organization of Renaissance and Baroque polyphonic compositions whose chief scale degree is *D*, whose parts range more or less within the Dorian or the HYPODORIAN ambitus and whose principle cadential degrees are *D*, *A* and *F* in the first rank and *C*, *G* and *E* in the second rank. Compositions of this kind, though their most important harmony is what is now called the *D* minor triad, cannot really be said to be in the harmonic tonality, or key, of *D* minor. This polyphonic application of the Dorian mode is often found transposed up a 4th to *G*, and works having the properties of the polyphonic Dorian mode but set in the *cantus mollis* (i.e. with a one-flat signature), and having *G* as their chief scale degree are often said to be 'in *G* Dorian'. As late as the 18th century, works in the tonal minor mode were notated as if in the polyphonic Dorian mode, with one fewer flat in the key signature and the flattened sixth degree treated as an accidental (e.g. Bach's solo Violin Sonata in *G* minor BWV1001).

'Dorian mode' is also often used to describe European folk songs, and even non-Western melodies, in which the relationship of the most prominent scale degree (the final or apparent tonic) to the scale type seems similar to that in the Dorian church mode.

HAROLD S. POWERS

Dorian, Frederick (b Vienna, 1 July 1902). American musicologist and critic of Austrian birth. In 1925 he received the PhD from the University of Vienna, where he worked with Adler. He was trained in composition and conducting at the Österreichische Staatsakademie and was a member of the Schoenberg seminar in

Vienna; he also studied theory and conducting with Webern and piano with Edward Steuermann. He was music critic of the *Berliner Morgenpost* from 1930 to 1933. In 1934 he became Parisian music correspondent for the *Frankfurter Zeitung* and from 1935 to 1936 he wrote for the *Neues Wiener Journal*. In America he held the position of professor of music at Carnegie-Mellon University from 1936 until 1971, when he was appointed Andrew Mellon Lecturer in Music there; he became professor emeritus in 1975. In 1977 he was visiting professor of musicology at the Hebrew University, Jerusalem, and later visiting professor of music history at the Curtis Institute, Philadelphia.

Dorian's books are written both for the musical scholar and the educated general reader. In *Commitment to Culture* he gave an account of the history of patronage and its contemporary sources in western Europe; *The Musical Workshop* is a lucid discussion of the creative process in music; and *The History of Music in Performance* documents its subject with the works and writings of major composers from the Renaissance to the present.

PAULA MORGAN

Dorian sixth. The raised sixth degree in the minor mode; the interval between the tonic and the raised 6th (e.g. C–A♯ in C minor, instead of C–A♭). It takes its name from the Dorian mode, in which the raised 6th is a distinguishing characteristic. The term is generally applied to neo-modal music, for example to the use of a subdominant major triad in the minor mode (F–A♯–C in C minor).

Dorico, Valerio (b Ghedi, nr Brescia, c1500; d Rome, 1565). Italian music printer. His entire professional career was spent in Rome. From March 1526 to April 1527 he collaborated with the printer Giovanni Giacomo Pasoti of Parma on six of the eight music books Pasoti printed for the Roman publisher Giacomo Giunta. By 1531 Dorico was established as an independent printer and bookseller, producing at least five collections of music and one musical treatise during the next six years. In all the music books with which his name is associated from the 1520s and 1530s, Dorico used the double-impression method of printing; after Pasoti's disappearance from Rome during the sack of 1527, Dorico retained possession of his types and decorative materials, using them in his own editions in the 1530s. After a musical hiatus of seven years, he adopted the single-impression method, devised by Attaignant, for his edition of Morales's masses in 1544. Until his death he and his brother Luigi printed 26 music books and two musical treatises. His heirs continued to print music until 1572, contributing seven additional prints.

The musical activity of the Dorico firm comprised about a sixth of its total production, and slightly more than half of all the music printed in Rome during the middle third of the 16th century, including masses, motets, madrigals, *laudi*, lute tablatures and instrumental ricercars. Some historical importance attaches to Dorico's otherwise limited musical activity: he is

credited with the first collection to use the word 'madrigal' to describe its contents (*Libro primo de la serena*, 1530), and he was the first to print the sacred music of Palestrina and Animuccia. Dorico claimed credit for choosing the music he printed only twice in his career. Apparently he preferred to receive commissions, often from local composers, a practice that guaranteed him both financial support and free editorial assistance from the musicians he served. Dorico's surviving music books are well organized, thoughtfully illustrated and reasonably well edited. His folio editions of masses by Morales, Palestrina, Rodio and Animuccia are modelled visually on Antico's *Liber quindecim missarum*, but the belief that he inherited typographical material from Antico seems to be apocryphal.

SUZANNE G CUSICK

Döring, Johann Friedrich Samuel (b Gatterstadt, nr Querfurt, 16 July 1766, d Altenburg, 27 Aug 1840). German bass and teacher. He attended the Thomasschule in Leipzig from 1779, and as a pupil of the choirmaster J F Doles he soon became the chorus prefect. In 1789 he met Mozart, who gave an organ concert there, but he declined Mozart's offer to take him to Vienna, as he was receiving a royal bursary to study theology at the University of Leipzig. He took his final examination in Dresden in 1791 and became a private tutor. On Doles's recommendation, he became Kantor at the Nikolikirche in Luckau, Lower Lusatia, in 1793, two years later, however, he moved to Görlitz, where he was active for almost two decades as a Kantor and schoolteacher. In 1814 he succeeded J G Krebs as Kantor of Altenburg.

Thoroughly schooled in music, Döring appeared with success as a bass, a violinist, a pianist and an organist. He was also highly regarded as a conductor and singing teacher. His sacred music was admired by his contemporaries for its melodic qualities, but it was largely unpublished and almost none has survived. His desire to provide a good general musical education is evident in his attempt to make the melodies in his chorale books easier to read by means of a system of letter notation similar to German organ tablature.

BERND BASELT

Dorman, Elizabeth. English singer; see YOUNG family.

Dorn (Ger.). PLECTRUM.

Dorn, Heinrich Ludwig Egmont (b Königsberg, 14 Nov 1804; d Berlin, 10 Jan 1892). German composer, conductor and writer. After having studied singing, theory, the piano and the organ, in 1823 he was forced by his family to study law. He then made several long journeys through Germany, during which he met Weber in Dresden, and moved to Berlin where he studied music with Ludwig Berger, Bernhard Klein and Zelter. In 1826 his heroic-comic opera *Rolands Knappen* was performed for the first time at the Königstadt Theatre. He became a co-editor of the *Berliner Allgemeine Musikzeitung* and was one of Spontini's defenders.

Dorn's career as a conductor began with his appointment to the city theatre of Königsberg (1828); subsequently he was conductor in Leipzig (1829-32), where Schumann became his counterpoint pupil, Hamburg (1832) and Riga, where for a time he was a friend of Wagner. In 1836 he organized the first music festival of the Russian Baltic provinces in Riga. In 1843 he succeeded Kreutzer as the opera conductor and city musical director in Cologne, from 1844 to 1847 he directed the Lower Rhine music festivals and in 1848 he founded the Rheinische Musikschule (which later became the Cologne Conservatory under his successor Ferdinand Hiller). After the death of Nicolai, he became conductor of the Berlin opera with W. Taubert and worked there until his retirement in 1869. He continued to teach and write, publishing articles in the Berlin newspaper *Die Post*.

Although he was esteemed primarily as a conductor, Dorn composed a large number of operas, including a setting of the Nibelung saga (1854), orchestral works, chamber music and choruses, but could establish a reputation only with his humorous lieder, which enjoyed some popularity during his lifetime. As a result of his association with Wagner in Riga, Dorn became an irreconcilable opponent of Wagner's music; his own is inclined to a Biedermeier-like conservatism, and he cultivated a popular naivety.

WORKS

- Operas: *Rolands Knappen* (H Dorn), Berlin, 1826, 4 pieces publ as op 1 (Berlin, c1826), *Der Zauberer und das Ungeheuer* (Dorn, von Minutoli), Berlin, 1827, *Die Bettlerin* (K. von Holten), Königsberg, 1827, *Romanze*, op 6, no 2 (Leipzig, c1827), *Abu Kara* (L. Bechstein), Leipzig, 1831, vocal score (Leipzig, 1831), ov and 8 pieces, op 18 (Leipzig, c1831), *Der Schloß von Pans* (A Wohlbruck), Riga, 1838, *Das Banner von England* (K. Alt, after Scott), Riga, 1841, *Die Nibelungen* (E. Gerber), op 73, Weimar, 1854, vocal (Berlin, 1854); *Ein Tag in Russland* (J. C. Grünbaum, after Scribe), Berlin, 1856; *Der Botenläufer von Pirna* (M. Heydrich, after Mélesville), Berlin, 1865, vocal score (Berlin, 1865), *Gewitter bei Sonnenschein* (C. Nutter), Dresden, 1865, arrct's: 'S was einmal in junger Geck' (Berlin, 1866)
 Orchestral: *Festouvertüre*, op 8; *Dombaufestouvertüre*, op 60, *Festouvertüre*, op 69; *Ouvertüre zur Gedenksfeier des Königs*, Berlin, 1850
 Chamber: *Sonata*, E, pf, vc/vn, op 5, *Bagatelle*, 2 vn, va, vc, op 106 (Berlin, 1872)

Other works. Numerous choral works, incl. Te Deum, solo vv, chorus, orch, op 65 (Mainz, c1850); pf pieces, c100 songs

HORST LEUCHTMANN

Dornel, Louis-Antoine (b c1680; d Paris, soon after 1756). French organist and composer. His name first appears in the archives of Ste Madeleine-en-la-Cité, Paris, where he was appointed organist in 1706; he had competed against Rameau on that occasion, and owed his success to Rameau's refusal to accede to the conditions laid down by the church authorities. Ten years later, in 1716, Dornel left Ste Madeleine for the abbey of Ste Geneviève where, after deputizing for André Raison until the latter's death in 1719, he was appointed his successor. In 1725 he also became *maître de musique* to the Académie Française, in which capacity he was required to write and direct a motet for the feast of St Louis celebrated each year by the Académie on 25 August. References in the *Mercure de France* (April 1726, June and July 1729, December 1736) reveal that the motets composed for these occasions were also heard at the Concert Spirituel. Unfortunately none of them has survived. Despite indications that Dornel's compositions were found pleasing (his motet of 1727 was considered 'fort beau'), and the *Mercure* for August 1731 reports that his motet *Domine Dominus noster* performed on St Louis's Day that year was 'fort applaudi'), he lost his post to Rebel in 1742. The circumstances of this premature retirement suggest that Dornel was the victim of an intrigue. Apart from a reference in the *Mercure* of June 1745 to the performance of his motet *Laudate pueri Dominum* at the king's mass, nothing more is known about his career. In view of La Borde's statement, published in 1780, that Dornel had died some 25 years previously at the age of 75, and in the absence of more precise information, it must be assumed that he died during the 1750s, but not before 1756, the date of an autograph manuscript of organ pieces.

While none of Dornel's occasional sacred music has survived, much else has. His extant works include his first serious instrumental compositions, published under the title *Livre de symphonies contenant six suites en trio ... avec une sonate en quatuor* (Paris, 1709). This was quickly followed by two other instrumental collections, one of violin sonatas and flute suites, one of trio sonatas; he also left a published collection of harpsichord pieces and the organ manuscript referred to above. He was active as a composer of secular vocal music, and published at least two solo cantatas; his name also appears in connection with *airs* published in *Mercure* (July 1731, August 1748) and in the collec-

tions of Ballard (between 1704 and 1735), as well as in other popular anthologies. His theoretical work, *Le tour du clavier sur tous les tons majeurs et mineurs*, is in part concerned with opposing the use of 'tons outrez' (keys with more than three sharps or flats).

Dornel, composing at a time when Italian music was prominent in Paris, was most overtly influenced and inspired by Corelli and the Italian school in his trios and solo sonatas. For example, the 1711 violin sonatas each have either four or five movements, alternately slow and fast, with a characteristic interplay of motifs between solo and bass, Corellian suspensions and circling sequences. Much of Dornel's writing has a polyphonic bias, due no doubt to his training as an organist. The most telling observations on his music are those by his contemporaries. La Borde reflected that Dornel 'avait beaucoup de réputation dans son temps, et la méritait en partie'. In his own time, Nemetz (*Séjour de Paris*, 1727) made favourable mention of him, as did the *Mercure*, which described the harpsichord pieces as 'fort estimées et de très facile exécution'. Dornel is certainly a minor figure, and his music is uneven. But at its best, for example in the fine set of organ versets in A minor, it reveals a competence and imaginativeness approaching that of Clérambault.

WORKS

(all printed works published in Paris)

VOCAL

Les caracteres de la musique (cantata), Iv, insts (1721)

Le tombeau de Clorinde (cantata), B, vn (1723)

Airs publ singly in the *Mercure de France* and in 18th-century anthologies

Motets, lost, incl. *Fructavit cor meum*, 1726, *Domine Dominus noster*, 1731, *Laudate pueri Dominum*

Les élèves d'Apollon (divertissement), perf. Concert Français, 1729, lost

INSTRUMENTAL

Livre de symphonies contenant 6 suites en trio, fls, vns, obs., avec 1 sonate en quatuor, 2op 1 (1709)

[8] Sonates, vn, et [4] suites, fl, bc, op 2 (1711)

[8] Sonates en trio, fls, vns, obs., op 3 (1713)

Concerts de symphonies contenant 6 concerts en trio, fls, vns, obs (1723)

Pieces de clavecin (1731)

Org pieces, F-Pg, ed. N. Dufourcq, L.-A. Dornel. *Livre d'orgue* (Paris, n.d.)

WRITINGS

Le tour du clavier sur tous les tons majeurs et mineurs (Paris, 1745)

Dorset Garden Theatre. London theatre used in the 17th century for productions with music; see LONDON, §IV, 3.

Dorsey. American family of jazz instrumentalists and band-leaders. Jimmy [James] Dorsey (b Shenandoah, Penn., 29 Feb 1904; d New York, 12 June 1957) and his brother Tommy [Thomas] Dorsey (b Shenandoah, 19 Nov 1905; d Greenwich, Conn., 26 Nov 1956) both learnt several instruments and played professionally as teenagers; Tommy concentrated on the trombone and trumpet and Jimmy on the alto saxophone and eventually the clarinet, on which he was self-taught. In New York from 1924 they worked and recorded with such influential groups as Jean Goldkette's, Red Nichols's, Paul Whiteman's and the California Ramblers. From

1928 they recorded as the Dorsey Brothers' Orchestra, and in 1933 they jointly formed a dance band under this name. After frequent quarrels they separated in 1935, Jimmy to take over the brothers' dance band and Tommy to form a jazz orchestra. Both groups were immediately successful and made a great many recordings, Jimmy's with a popular orientation and Tommy's with a substantial jazz repertory featuring prominent jazz musicians such as Bud Freeman, Bunny Berrigan, Buddy Rich, Buddy DeFranco and Charlie Shavers, as well as the arranger Sy Oliver and vocalist Frank Sinatra. The brothers collaborated in 1947 on a film *The Fabulous Dorseys*, and in 1953 Jimmy rejoined his brother's orchestra. They gained considerable popularity in 1955-6 through their successful television series.

Although the brothers were fluent instrumentalists and disciplined band-leaders, Tommy Dorsey is generally held to be the superior musician because of the more demanding music of his band and his earlier achievements as a jazz trombonist. His playing, especially on the trumpet (which he continued to play into the 1930s), absorbed much from black musicians and thus formed a transition between the unique 'white' style of Miff Mole and the black-orientated playing of Jack Teagarden, whose influence largely eclipsed Dorsey's own achievements on the trombone. In the 1930s Dorsey continued to record in Dixieland style with a group known as the 'Clambake Seven', selected from his orchestra.

JAMES DAPOGNY

Dorsey, Thomas A(ndrew) ['Georgia Tom'] (b Villa Rica, Georgia, 1899) Black American blues singer, gospel songwriter and pianist. The son of a revivalist preacher, he moved to Atlanta in 1910 and came under the influence of local blues pianists. He left for Chicago during World War I and studied at the Chicago College of Composition and Arranging, also becoming an agent for Paramount records. Dorsey's compositions at the time include *Riverside Blues* (King Oliver's Creole Jazz Band, 1923). His skill as a pianist, composer and arranger gained him a job with Les Hite's Whispering Serenaders in 1923, and soon after he formed his own Wildcat's Jazz Band, with whom Gertrude 'Ma' Rainey performed. As 'Georgia Tom' he made several recordings with her, usually including the slide guitarist Tampa Red (Hudson Whittaker). During a year of illness he wrote *Someday, Somewhere*, the first of his gospel compositions, but he had more success with the simple ditty *Tight like that* (1928, with Tampa Red); it became one of the best-selling blues records and prompted many other 'hokum' records by the team, combining urban sophistication, rural humour and often ribaldry (e.g. *Terrible Operation Blues*, 1930, with Jane Lucas). In 1932 Dorsey was appointed choral director of the Pilgrim Baptist Church in Chicago, a post he held for 40 years. He also became president of the National Convention of Gospel Chorus and Choruses.

Dorsey was the most influential figure in the gospel song movement. His earliest gospel songs, including *Stand by me, If I don't get there and We will meet him in the sweet by and by*, were strongly influenced by C. A. Tindley. They are based on church hymns and spirituals and lack his later songs' swing and open structure. In the early 1930s he made a small number of gospel recordings, including *How about you and If you see my saviour* (1932), and the widely recorded song *If I could hear my mother pray* (1934). His light voice, suited for the 'hokum' recordings, lacked conviction or excitement for gospel music and he made no more recordings, concentrating instead on writing songs that others would interpret. Of these his most successful was *Precious Lord, take my hand* (1932), written after his first wife's death. As he became known for his compositions, Dorsey toured with Mahalia Jackson and Roberta Martin, selling sheet music of his songs. Among the best known are *There'll be peace, I will put my trust in the Lord* and *The Lord has laid His hands on me*.

PAUL OLIVER

Dortmund. Town in Westphalia, Federal Republic of Germany, which played a conspicuous part in the popularization of music during the industrial expansion of the 19th century. In the Middle Ages Dortmund belonged to the Hanseatic League and enjoyed a prosperity which it subsequently lost and recovered only in the 19th century, medieval affluence is reflected in the main churches, the Marienkirche, the Reinoldikirche and the Propsteikirche, all begun in the 13th and 14th centuries. The chronicle of Dietrich Westhoff (which covers the period 750-1550) mentions the music performed in connection with the foundation of the Predigerkloster in 1331.

In the 14th century Dortmund had a company of Stadtpfeifer; music was cultivated in the schools and incorporated within religious drama. After the Reformation a Dortmund Gesangbuch (1585), based on the widely used Rostocker Gesangbuch, was issued. Prior Hermann von Recklinghausen built Dortmund's first organ in the Propsteikirche in 1415.

Although Dortmund was only a small town of about 300 inhabitants it assumed at least regional musical importance during the 18th century through its collegium musicum, which owed much to the energy and initiative of its first two directors, the Kantors Preller and Friedrich Gunther. A collegium musicum programme normally comprised an overture, a symphony and a selection of vocal and choral music. As the industrial potential of the Ruhr district was realized Dortmund expanded, as did its musical activities. By 1830 the town possessed a competent concert orchestra of 38 players; in 1840 a *Liedertafel* was established, and the tercentenary of the Gymnasium in 1843 stimulated much music-making. Conspicuous figures in the music education in the town included Friedrich Eduard Wilsing (1809-93), Franz Giesenkirche (1830-85), and Rudolf Breidenstein, who conducted the Dortmunder Musikverein (founded in 1845) for 20 years.

A Westphalian Music Festival was inaugurated in 1852, with a choir of 300 drawn from Bielefeld, Dortmund, Gütersloh, Haltingen, Hamm, Soest and Witten which performed the standard repertory. The festival was first held in Hamm, but in 1854 and 1862 moved to Dortmund, where it continued to be held at irregular intervals; it was restructured under Julius Jansen in 1890, when the size of the choir was doubled. Max Bruch, however, was apparently disenchanted with Dortmund and its district, observing that 'Westphalia is a region where people are interested in material things, but not in intellectual or musical things'. In 1910 the first Max Reger Festival took place in Dortmund; 50 years later another festival was held as a jubilee celebration. Georg Hüttner (1861-1919) arrived in Dortmund in 1887 and was principally responsible for the development of orchestral music.

Choral music continued to flourish and at the beginning of the 20th century a Palestrina Society, a Bach Society (which instigated a Bach festival) and a madrigal choir were established, largely through the initiative of Karl Holtschneider. The town has a conservatory of music, founded in 1901 by Hüttner, an orchestra which also serves the municipal theatre and a municipal chamber orchestra.

PERCY M. YOUNG

Dørumsgaard, Arne (Oddvar) (b Fredrikstad, 7 Dec 1921). Norwegian composer, singer and writer. He studied the piano with Sandra Droucker, harmony and counterpoint with Karl Andersen and composition with Brustad. Resident in France from 1950, he studied singing in Paris with Maria Castellazi (1952-60). His first published compositions were the Three Songs (1941), which were followed by other songs and piano pieces published by Fabritius, Lyche, Musikkhuset and Norsk Musikforlag. But his main work has been the edition of Canzone Scordate (Paris, 1963-), an anthology of European song from 1400 to 1900. He has also published Østens Gamle Poesi, a series of 20 volumes of ancient oriental verse in Norwegian translation.

RANDI MARGRETE SELVIK

Dorus-Gras [née Van Steenkiste], **Julie(-Aimée-Joséphine [Joséphine])** (b Valenciennes, 7 Sept 1805; d Paris, 6 Feb 1896). South Netherlands soprano. She studied at the Paris Conservatoire and made her début at the Théâtre de la Monnaie, Brussels, in 1825. She sang Elvira at the first Brussels performance of Auber's *La muette de Portici* (12 February 1829) and also took part in the historic performance of that opera on 25 August 1830 that sparked off the Belgian revolution. In 1831 she was engaged at the Paris Opéra, and during the next 15 years created many roles there, including Alice in *Robert le diable* (21 November 1831), Eudoxie in *La juive* (23 February 1835), Marguerite de Valois in *Les Huguenots* (29 February 1836), Teresa in *Benvenuto*

Cellini (3 September 1838) and other roles by Auber and Halévy. In 1839 she appeared in London on the concert platform, and in November 1847 she sang the title role of *Lucia di Lammermoor* in English at Drury Lane, with Berlioz conducting. In 1849, when she sang at Covent Garden in three of her most famous roles, Elvira (*La muette de Portici*), Alice and Marguerite de Valois, she was still, according to Chorley, 'an excellent artist, with a combined firmness and volubility of execution which have not been exceeded, and were especially welcome in French music'. She was not a particularly convincing actress, but the accuracy of her singing and the brilliance of her voice ensured her success.

ELIZABETH FORBES

Doss, Adolf von (b Pfarrkirchen, Bavaria, 10 Sept 1823, d Rome 13 Aug 1886). German composer and writer. The descendant of a Swedish noble family which had moved to Germany for religious reasons, he studied at the Dutch Institute in Munich from 1835 to 1843. After some secret journeys to Switzerland, he moved there to enter the Jesuit Order in Brig (11 November 1843). He studied at Fribourg, Vals-les-Bains (France), Namur, Maastricht, Cologne and Louvain and was ordained a priest on 12 September 1855. He was active in Münster (1855-62), Bonn (1862-6) and Mainz (1866-73). While he was in Mainz (where he was also a local superior of the Jesuit community) the Jesuit Order was being suppressed in Germany. He moved in 1873 as an exile to Liège, becoming professor at St Servais Jesuit College, where he was free to use his musical talents to serve the church. From 1884 he was father confessor at the Collegio Germanico in Rome.

Doss's outstanding contribution to the Jesuit Order is as a writer of practical religious works for young people: these were translated into several languages. His musical contribution is devoted exclusively to church music: masses, oratorios, over 100 motets and over 50 sacred songs. He wrote neither instrumental nor secular works: a few operas and some stage music in his repertory should really be classed as sacred music. He aimed to reform church music by expelling from it all secular influences. Through the circulation of his compositions in Germany, France, Belgium and Switzerland, he played an important role in the revival of sacred music.

WORKS

MSS in St Servais College, Liège, unless otherwise stated, operas incidental music and oratorios for solo vv, chorus, orch and first performed at St Servais College

OPERAS

GAYNOR G. JONES

Dostal, Nico (b Korneuburg, Lower Austria, 27 Nov 1895). Austrian composer. The nephew and grandson of military composers, he studied at the church music department of the Vienna Music Academy in Klosterneuburg. He then worked as a theatre composer and arranger in Innsbruck, Salzburg and Berlin until in 1933 he had his first operetta success with *Clivia*. In 1943 he left Berlin and in 1946 returned to Austria.

WORKS

(selective list)

Operettas *Clivia*, Berlin, 1933, Die Vielgeliebte, Berlin, 1934, Prinzessin Nofretete, Cologne, 1935, Extrablätter, Bremen, 1937, Monika, Stuttgart, 1937, Die ungarische Hochzeit, Stuttgart, 1938, Die Flucht ins Glück, Stuttgart, 1940, Die grosse Tanne, 1941, Manina, Berlin, 1942, Der Kurier der Königin, Hamburg, 1950, Zirkusblut, Bielefeld, 1951, Doktor Eisenbart, Nuremberg, 1952, Rhapsodie der Liebe, Nuremberg, 1963.

Other stage works. Eva im Abendkleid (comedy with music), Chemnitz, 1941. Susse kleine Freundin (Kleine Freundin gesucht) (comedy with music), Wuppertal 1950, So machi man Karriere (chamber musical) Nuremberg, 1961.

Other works. film scores, waltzes, masses, songs.

Dostoyevsky, Fyodor Mikhailovich (b Moscow, 11 Nov 1821; d St Petersburg, 9 Feb 1881) Russian novelist. Son of a doctor, he was for a short time a military engineer. His first novel *Poor Folk* was published in 1846. Arrested in 1849 as a member of the Petrashevsky socialist group, he was condemned to death, reprieved at the place of execution, and sent to Siberia. During his penal servitude in Omsk (1850-54), Dostoyevsky underwent a profound spiritual crisis, and became deeply religious, seeing the Orthodox Church as the fullest expression of Christianity. In 1859 he received an amnesty and returned to St Petersburg. From then on he lived by writing. He suffered from epilepsy, was a compulsive gambler, and was constantly in debt. From 1867 to 1871 he lived abroad to escape his creditors. He was twice married, the second time (1867) to his young secretary. His most important works are *Notes from the House of the Dead* (1860-62), *Notes from the Underground* (1864), *Crime and Punishment* (1866), *The Idiot* (1868-9), *The Possessed* (1871-2) and *The Brothers Karamazov* (1879-80).

Dostoyevsky's works have probably had a more far-reaching influence on literature and thought both in Russia and the rest of the world than those of any other Russian novelist. With his profound understanding of good and evil, he was one of the first writers to analyse the psychological motives which prompt men's actions;

many people have also acclaimed him as a religious philosopher of a 'new Christianity'. Although his ideas have certainly influenced many musicians, notably Mahler and Bartók, relatively few musical compositions have been inspired by his works, and few of these are by Russian composers. Dostoyevsky's ideas were ahead of their time, and it is only in the 20th century that composers have attempted to translate them into music. Since 1917 in the Soviet Union Dostoyevsky's reputation has fluctuated; many of his religious and political ideas are alien to the official Soviet viewpoint, and this may explain why so few Soviet composers have been attracted to his work.

WORKS SET TO MUSIC

Belve noch! [White nights] (short story, 1848) opera by M. Tsvetayev, 1933, chamber opera by Yu. Butsko, Moscow, 1971, Le notti bianche, opera by L. Cortese, Milan, 1973.

Zapiski iz myortvogo doma [Notes from the house of the dead] (novel, 1862) Z. mrtvého domu, opera by Janáček, Brno, 1930.

Igrok [The gambler] (novel, 1866) opera by Prokofiev, Brussels, 1929.

Prestupleniye i nakazaniye [Crime and punishment] (novel, 1866).

Raskolnikoff, 2 ovs. by Reznček, 1925, 1929, Delitto e castigo, opera by A. Pedrollo, Milan, 1926, Crime et châtiment, film music by Honegger, 1934, Raskolnikoff, incidental music by J. H. Hallnas, 1936, Raskolnikoff, opera by H. Sutermeister, Stockholm, 1948, Raskolnikoff's Traum, dramatic scene by G. Klebe, 1956, Raskolnikoff, ballet by Lutz, Linz, 1964-5, incidental music by H. C. Maréchal.

Idiot [The idiot] (novel, 1868-9) Der Idiot, ballet by Henze, Berlin, 1952, Nastas'ya Filippovna, opera by V. N. Bogdanov-Berezovsky, 1968.

Mal chik u Khrista na volke [Christ, the boy, and the Christmas tree] (short story, 1876) Yolká, opera by V. I. Rebikov, Moscow, 1903.

Brat'ya Karamazovi [The brothers Karamazov] (novel, 1879-80).

Bratři Karamazovi, opera by O. Jeremiáš, Prague, 1928, Der Grossinquisitor, dramatic oratorio by B. Blacher, Berlin, 1948, Bratři Karamazovi, pf suite by I. Berg, 1949.

Also based on Dostoyevsky: Racconto d'inverno, ballet by Rossellini, Rome, 1947, Vocal sym. by V. Sommer, 1958.

APRIL FITZLYON

Dot (Fr. *point*, Ger. *Punkt*; It. *punto*; Lat. *punctum*). Dots are used in various notational contexts. Above a note, a dot signifies that the note is to be played staccato or (if beneath a slur) portato (see BOW, §II, 2-3); in some keyboard sources of the early 16th century it may however indicate chromatic alteration. Placed to the right of a note, it indicates that the value of that note should be augmented by half (in earlier notation systems, the modification may be different; see DOTTED RHYTHMS and NOTE VALUES). In early mensural notation, a dot may indicate rhythmic division (see NOTATION, §III, 3, and PUNCTUM). Dots in vertical pairs or groups of four alongside a bar-line or (more commonly) a double bar indicate a passage to be repeated (see REPEAT). For tablature dot notations, see DOT-WAY.

Dot notation. See DOT-WAY.

Dotted note. (1) See PERFORMING PRACTICE.

(2) See NOTE VALUES.

Dotted rhythms. Rhythms in which long notes alternate with one or more short notes, so called because the long notes are usually written with the aid of the dot of addition (see NOTE VALUES). The essential feature of

dotted rhythms, however, is not their notation (the dot may be replaced by a rest or a tie) but their unevenness in performance. Dotted rhythms are found in mensurally notated music of all periods, particularly after 1600; this article deals mainly with music of the 17th and 18th centuries, for which there is evidence that written dotted rhythms were often altered in performance (see also NOTES INÉGALES; for notational meanings of the dot before 1600 see NOTATION, §III).

It is not strictly correct to say, as many writers have, that the dot was variable in the Baroque period. In the theory and pedagogy of the time it was always defined as increasing the value of the note it followed by half, just as it is today. The flexibility of dotted rhythms was discussed not in connection with note values but as an aspect of good execution, along with many other kinds of rhythmic alteration or nuance. One of the main reasons for altering dotted figures was to bring the short notes into synchronization with other rhythms in the piece (see ex.1). When dotted figures are found against

Ex.1 Bach Goldberg Variations, variation 16

triplets, it may usually be assumed that the dotted rhythm is to be assimilated to the triplet rhythm; this is stipulated by many theorists, and countless scores cannot sensibly be interpreted otherwise. But two powerful arguments qualify this rule: a statement by J. F. Agricola in a review of Löhlein's *Clavier-Schule* (1765) that J. S. Bach taught his pupils to play such rhythms as notated, 'otherwise the difference between duple metre ... and 3/8, 6/8, 9/8 and 12/8 would be eliminated', and the possibility that the triplets were themselves sometimes assimilated to duple rhythm (Collins, 1966). Where both dotted figures and evenly notated duplets are set against a predominant triplet motion, as in the third movement of Bach's Sonata for violin and harpsichord BWV1017 (ex.2), it is possible that the duplets are

Ex.2 Bach Sonata no 4 for violin and harpsichord BWV1017, 3rd movt

to be assimilated to the triplets and the short notes of the dotted figures played after the third note of the triplets.

When dotted figures in different note values occur at the same time in different voices, the short note of the figure in larger values may be delayed to sound with the short note in the smaller value. This type of alteration may be applied also to successive dotted figures in different values, especially when the rhythmic motion is pervaded by dotting in the smaller values. In Bach's 'St Anne' Prelude BWV552, however, whose ritornellos are

dominated by such a rhythm, the great care with which the music is notated casts doubt on the advisability of such alteration; although common Baroque practice would double-dot the crotchet in ex.3a, the notation at ex.3b-c is so exact as to suggest that the composer desired these different rhythmic configurations of his motif to be respected in performance.

Ex 3 Bach 'St Anne' Prelude BWV552

In French music the dot and its complementary note are subject to the same rules of inequality as pairs of notes of equivalent value, that is, the dot is lengthened and the note shortened to whatever degree the expression of the piece demands.

A second reason for altering the strict values of dotted rhythms is for expressive purposes. Where the dotting is cautionary, that is, where the composer feels he cannot count on his performers to play *notes inégales* and therefore writes them out with dotted figures (as is commonly found in English music, especially Purcell, and sometimes even in French music), the dotted effect will usually be softened and varied; but in French music, in cases where even notes would normally be made unequal, dotting may well be a signal to exaggerate the dotted effect.

A third reason for altering the written notation is to exaggerate the effect of dotted rhythms in the 'splendid style' (the style of French overtures and other pompous or majestic genres). In this style certain French and German writers are agreed that whatever follows the dot must be played rapidly and energetically. When many short notes in one part are to be played against one or two in another they must be altered so as to produce the maximum energy, regardless of the written values (see ex.4).

Ex.4 Bach: Partita no. 4 BWV828, Overture

Dotted rhythms were also exaggerated as part of a general principle. This was laid down flatly by C. P. E. Bach in part 1 of his *Versuch über die wahre Art das Clavier zu spielen* (1753) and qualified in part 2 (1762) with instances that require its relaxation. Bach's precepts often apply mainly to music in the *galant* style, however, and not even Quantz and Leopold Mozart were quite as sweeping as he was in recommending overdotting. Where the final note of a cadence is anticipated by the short note of a dotted figure (see ex.5)

Ex 5

the note of anticipation should normally be played lightly and as close as possible to the following resolution: the dotted note should be trilled, stopping soon enough for the main note to be clearly heard. This rule is found as early as 1668 in Bénigne de Bacilly's *Remarques curieuses sur l'art de bien chanter*.

A common notational peculiarity of Baroque music was the failure to shorten the initial note of dotted passages beginning with an upbeat (see ex.6). In most

Ex 6

cases the first note should be shortened to conform to the dotted rhythm which follows, but in carefully written music one must make sure that the rhythm as notated is not intended (as it probably is, for example, in variation 26 of Bach's Goldberg Variations). Ex.7 shows five anomalous uses of the dot in the Baroque period. In the first the number of short notes varies and the number of beams is arbitrary. When such figures occur in the 'splendid style' the conventions of that style hold (exx.1 and 4), but the notation is used in all styles and the meaning must be conjectured for each case. The use of a dot without a complementary shortening of the following note to suggest the gentle inequality of *notes inégales* (ex.7b) occurs in Nivers' *Livre d'orgue* (1665) and Perrine's *Pièces de luth en musique* (c1680). François Couperin multiplied the beams of short notes following a dot in order to ensure the most rapid execution possible (ex.7c-d). C. P. E. Bach advocated two new uses for the dot which were not taken up: adding a second dot with a stroke over it to indicate a silence of articulation in a double-dotted figure (ex.7e), and dotting the figures of a continuo part to show the rhythm of the realization (ex.7f). Not anomalous but logical was the habit of writing the dot where it occurred rhythmically instead of directly after the note it prolonged (ex.8). This often put it across the bar-line, where it obviated the need for a tie.

(f) *ibid.*, 373

Double dotting occurs in French sources of the 17th century (see ex.8). There are several examples in the organ works of Louis Couperin, and Marais in his *Pièces de violes* (1701) used a large and a small dot to show that the second was half the value of the first. The double dot was rare, however, in the Baroque and pre-Classical periods.

DAVID FULLER

Dotti, Anna Vincenza (b Bologna; fl 1716–27). Italian contralto. She sang in three operas at Venice (two of them by Vivaldi) in 1716 and nine at Naples between 1717 and 1720. These included works by Orlandini and Leo, Porpora's *Faramondo*, A. Scarlatti's *Cambise*, four by D. Sarro, and the version of Handel's *Rinaldo* with additions by Leo given at the royal palace on 1 October 1718, in which she played Almirena. From the autumn of 1724 she was for three seasons a member of the Royal Academy company in London as second woman to Cuzzoni, singing in six or seven operas by Handel. Ariosti's *Artaserse*, *Dario* and *Lucio Vero*, Bononcini's *Astianatte* and the pasticcios *Elpidia* and *Elisa*. Her début as Irene in *Tamerlano* (a part originally planned for a soprano) on 31 October 1724 inspired a contemptuous reference from Lady Bristol. She was the first Eudige in *Rodelinda* on 13 February 1725, sang Gismonda, another soprano part modified and transposed, in the February 1726 revival of *Ottone*, and appeared in revivals of *Giulio Cesare* (Cornelia) and probably *Floridante* (Elmira). Handel wrote the part of Rosalba in *Scipione* for her, but it was cut before performance. After the arrival of Faustina Bordoni in the spring of 1726 Dotti was allotted parts of less importance. Handel gave her only one aria in *Alessandro* and *Admeto*, in both of which (as on other occasions) she played male roles. Her compass was narrow (*a* to *e''*), and her lower notes were evidently weak. She is sometimes confused with Anna Maria Dotti, who sang in two operas at Venice in 1708. One of the two sang in Lotti's *Teuzzone* at Bologna in November 1711.

WINTON DEAN

Dot-way [dot notation]. A system of notation for the recorder, used in England in the second half of the 17th century (an example printed in 1704 is mentioned in *Hawkins II*, 737). It is a form of tablature, using a six-line staff, each line of which represents a finger-hole. A small vertical stroke placed on a line indicates that the hole is to be closed; a horizontal dash through the stroke on the top line indicates that the octave is to be achieved.

Dotzauer, (Justus Johann) Friedrich (b Häselerth, nr Hildburghausen, 20 Jan 1783, d Dresden, 6 March 1860). German cellist, teacher and composer. He was the father of the pianist Justus Bernhard Friedrich Dotzauer (1808–74) and of Karl Ludwig Dotzauer (1811–97), cellist at the Kassel court. Friedrich Dotzauer's early musical talent was fostered by his father. The organist Rüttinger, a former student of J. S. Bach's pupil J. C. Kittel, taught him composition; he studied the piano and violin with Heuschkel and Gleichmann, and also had cello, double bass, horn and clarinet lessons. He made his début as a cellist at a court concert at the age of 15. In 1799 he went to Meiningen for cello lessons with J. J. Krieger, a pupil of J. L. Duport. From 1801 to 1805 Dotzauer played in the court orchestra there, and for the next six years in the Leipzig orchestra, also giving solo and quartet performances. In 1806 he visited Berlin, where he heard and was deeply influenced by Romberg. Dotzauer was appointed to the Dresden royal orchestra in 1811, becoming

soloist in 1821 and remaining there until his retirement in 1850. He travelled throughout Germany and appeared in Vienna and the Netherlands but declined an invitation to go to St Petersburg.

Combining great musicianship with a technique advanced beyond contemporary standards, Dotzauer's work represented a milestone in the development of cello performance. His teaching ability and didactic publications resulted in the so-called 'Dresden School' of playing, which influenced such pupils as F. A. Kummer, C. Drechsler, C. Schubert and his own son Karl Ludwig, and through them Grützmacher, Cossman, J. Goltermann and their pupils. Most of Dotzauer's 178 or so compositions were quickly forgotten. However, the pedagogical works remain important teaching material, and extracts have frequently appeared in later composers' collections of exercises and studies. Dotzauer published an edition of Bach's six cello suites.

F. VAN DER STRAETEN/LYNDA LLOYD REES

Double. (1) A French word for a variation, particularly one in which more or less elaborate ornamentation is added to the original melody, while the supporting harmonies remain the same. *Double* is thus close in meaning to the English word *DIVISION*. In 18th-century keyboard suites, single dances are often supplied with *doubles*, for example, the Courante in Bach's first English Suite, and the Saraband in his sixth. For further information, see M. Reimann 'Zur Entwicklungsgeschichte des Double', *MJ*, v (1952), 317, vi (1953), 97.

(2) An adjective used to indicate a lower octave. Thus the double bassoon plays in the octave below the bassoon, the double bass an octave below the violoncello and so on. This usage derives from the old practice of identifying notes below *gamma ut* (the G on the bottom line of the bass staff) by double letters, FF, EE and so on. Organ builders still refer to these low pitches as 'double F', 'double E', etc.

Keyboard instruments with two manuals are called 'double'. But in the 16th and 17th centuries the terms 'double harpsichord', 'double regals', 'double virginals' or even 'double curtall' (and also the *Doppelfagott* mentioned by Praetorius in 1619) more often referred to instruments whose ranges extended below *gamma ut*. For further information see F. W. Galpin: *Old English Instruments of Music* (London, 4/1965), 212ff.

(3) Some modern makers combine two brass instruments into one. The double euphonium, for example, has a wide euphonium bell and a narrow Saxotromba bell. The player can manipulate a valve to direct the windstream into one or the other bell and thus change the tone quality of the instrument. A valve on the

double horn, on the other hand, controls the pitch but not the timbre of the instrument, which can be played in either F or B \flat .

(4) Singers who undertake two roles in the same work and instrumentalists who play more than one instrument are said to 'double' one with the other. A 'double' is also a singer who understudies a part in an opera or other vocal work, in order to replace the regular performer in case of need.

HOWARD MAYER BROWN

Double apostrophe. See DISTROPHA, FRISTROPHA

Double bar. Two vertical lines drawn through the staff to mark off a section of a piece; see BAR.

Double bass [contrabass, string bass, bass] (Fr. *contre-basse*; Ger. *Kontrabass*; It. *contrabasso*, *contrabbasso*, Sp. *contrabajo*). The largest and lowest-pitched bowed string instrument in use, having four or (less commonly) five strings tuned in 4ths and sounding an octave lower than the cello. It is best known for its contribution to the orchestra where it supplies not only the power and weight but also the basic rhythmic foundation. More rarely the bass is heard as a soloist in which field its surprisingly large repertory includes over 200 concertos. The instrument, played pizzicato, is an essential member of jazz and dance bands; in many countries it is used in military and concert bands.

1 Structure and tuning 2 The bow 3 History 4 Repertory and performers.

1 **STRUCTURE AND TUNING** Double basses vary in shape and size more than almost any other instrument. There are two basic designs: one is shaped like a viola da gamba, the other like a violin. There are also a few examples of other shapes (e.g. guitar-like). Viol-shaped basses usually have a flat back, of which the top part slopes towards the neck; the two holes in the belly are sometimes C-shaped, and very occasionally there is a third hole in the form of a rose. Other instruments are more closely modelled on the violin, although for convenience of playing their backs also are sometimes flat, and their shoulders less square.

Of the smallest basses (*bassetti* and chamber basses) some are little bigger than a cello, while some of the larger (full-size) instruments can have a body of anything up to about 140 cm in length. The normal (three-quarter) size found in orchestras is about 115 cm. The largest ever made is 4.8 metres high and was built by Paul de Wit for the Cincinnati music festival of 1889. A great three-string 'octobass' was built by J. B. Vuillaume in 1851 who was so proud of it that he incorporated its design in a crest on his headed notepaper. The instrument is tuned C'-G'-C and is now in the museum of the Paris Conservatoire. Berlioz thought highly of it, but it can be regarded as little more than a curiosity. Another large instrument (which belonged to Dragonetti) is in the Victoria and Albert Museum, London.

Normal four-string instruments are tuned E-A'-D-G. On five-string basses the additional bottom string is most commonly tuned to B' (sometimes C'). Occasionally a mechanical attachment with levers serves instead of a fifth string. This device enables the player to extend the length of the fourth string, thus

lowering its pitch to C': although useful in the orchestra it is impractical for playing rapid passages or glissandos. Much of the solo repertory requires the use of scordatura, the most common being F \sharp '-B'-E-A. Since aluminium-covered steel or nylon core strings have replaced their thick gut predecessors it is arguable whether the practice of scordatura tuning is still necessary. Strings are tuned by means of brass machines with steel worm-screws, but early basses had large wooden pegs. As with the size of the instrument itself there is no standard length of playing stop. Many orchestral instruments have a stop of about 105 cm, but variations from 100 to 110 cm are not uncommon. Orchestral music for the instrument is notated an octave higher than the actual pitch, although much of the solo repertory is notated at pitch

1. Possibly the earliest illustration of a double bass: drawing from the 'Schempartbuch' (1518) (Germanisches Nationalmuseum, Nuremberg)

2. **THE BOW** There are two types of bass bow in use today (see BOW, fig.12). The French bow, like a violin bow (but shorter and heavier than a cello's), is the most common in England, France, Italy and parts of Scandinavia: players in Germany, Austria, the USSR and most of the USA prefer the German bow which has a deeper frog and is held underhand; this is historically a viol-type bow (for illustration, see BOW, fig.13). Opinions differ widely concerning the merits of the two bows but it is doubtful whether either has any advantage over the other. The Dragonetti bow, which was also held underhand but arched away from the hair, was still in use in England until the early 20th century.

3. **HISTORY.** Research into the evolution of the double bass reveals a tangled web of several hundred years of changes in design and fashion in the dimensions of the

instrument and consequently in its stringing and tuning. The picture is further complicated by the simultaneous use during any one period of different forms of bass in different countries. The earliest known illustration of a double bass type of instrument dates from 1518 (fig.1) but in 1493 Prospero wrote of 'viols as big as myself' (Planyavsky, 1970). Planyavsky pointed out that it is more important to look for an early double bass tuning rather than for any particular instrument by shape or name. A deep (double- or contra-) bass voice is first found among the viols. There existed simultaneously two methods of tuning – one using 4ths alone, the other using a combination of 3rds and 4ths ('3rd–4th' tuning). Agricola wrote of the *contrabasso di viola* as being the deepest voice available. He was referring to an instrument comparable with that made by Hanns Vogel in 1563 and now in the Germanisches Nationalmuseum, Nuremberg (see fig.3). This ornately and beautifully

decorated bass is fitted with gut frets like other viols and tuned *G'–C–F–A–d–g*. This high '3rd–4th' tuning was given by Praetorius (*Syntagma musicum*) for a six-string *VIOLONE* (a name also confusingly used in the 16th century to denote the bass of the viol family). He listed several other tunings, both high and low, for five- and six-string *violoni*. Most interesting of all is the low tuning *D'–E'–A'–D–G*, only one step removed from the modern *E'–A'–D–G* instrument. Orlando Gibbons scored for the 'great dooble base' in two viol fantasias. Whether a low '3rd–4th' tuning was used or a higher one cannot be certain.

Some fine basses, many of which were probably converted from their original form into three- or later four-string instruments, date from the late 16th century and early 17th. A notable three-string bass, originally built as such, is that by Gasparo da Salò owned by Dragonetti and now in the museum of St Mark's, Venice

2. (a) Six-string violone by Giovanni Paolo Maggini, Brescia, early 17th century (Dolmetsch Instrumental Collection, Haslemere); (b) viol-shaped violone by Ventura Linarol, Padua, 1585 (Kunsthistorisches Museum, Vienna)

A beautiful six-string violone of much lighter construction by Da Salò's apprentice Giovanni Paolo Maggini is in the Dolmetsch collection at Haslemere (fig.2a). This is of violin shape, with a flat back, and makes interesting comparison with the viol-shaped violone by Ventura Linarol (Padua, 1585) in the Kunsthistorisches Museum, Vienna (fig.2b).

During the early 17th century the five-string bass was most commonly used in Austria and Germany. Leopold Mozart referred in the 1787 edition of his *Violinschule* to having heard concertos, trios and solos played with great beauty on instruments of this kind. The earliest known playing instructions, by Johann Jacob Prinner (*Musicalischer Schliessl*, 1677, autograph US-Wc), are for an instrument tuned $F'-A'-D-F\sharp-B$. Much more usual, however, is the tuning $F'-A'-D-F\sharp-A$ cited in 1790 by Albrechtsberger, for a violone or contrabass with thick strings and frets tied at every semitone round the fingerboard. Michel Corrette's 1773 *Méthode* throws much light on the bass techniques and tunings in use during the 18th century and early 19th when the bass was enjoying some popularity as a solo instrument. Many of the virtuoso pieces from the Viennese school of that period and later abound with passages of double stopping and, in view of the tunings required, were thought by early 20th-century authorities not to have been written for the bass at all. Later research revealed that the instrument has in the past been tuned in some 40 or 50 different ways; although the repertory is quite practical with the tunings the composers envisaged (e.g. one of the '3rd-4th' tunings), much is unplayable on the modern conventionally tuned instruments. There are in fact numerous solo concertos from this period.

In Italy an early tuning (cited by Planyavsky) is Adriano Banchieri's of 1609 for his 'Violone in contrabasso', $D'-G'-C'-E-A-d$. Later the number of strings was reduced, and three-string instruments were preferred. Even during the early 18th century a three-string bass tuned $A'-D-G$ or $G'-D-G$ was normal. It had no frets and with the growth of the symphony orchestra it was logical that this more powerful instrument should supersede earlier models. Not until the 1920s was the additional E' string expected of most professional players. Until then any passages going below A' were transposed up an octave, resulting in the temporary disappearance of the 16' line.

Apart from those of the Italian makers already mentioned, basses by Amati, Bergonzi, Grancino and Testore are particularly prized. Among the good English makers are Forster, Kennedy, Lott and Tarr (fig.4). In Austria fine basses were made by Jacob Stainer. Others have come from the schools of Mittenwald and Mirecourt.

4 REPERTORY AND PERFORMERS. The earliest known works for a solo double bass instrument are the sonatas composed by or for Giovannino del Violone in the Bodleian Library, Oxford. Their origin is by no means certain, but they probably date from about 1690. No solo music is known from the 18th century (Stamitz's concerto, for example, is a transcription of a viola work) until the solo parts in Haydn's symphonies (e.g. nos.6-8) of the early 1760s; then, in the four years from 1765, no fewer than 28 concertos appeared (by Vanhal, Zimmermann, Haydn, Franz Hoffmeister, Johannes Sperger and Dittersdorf).

In 1791 Mozart wrote his aria *Per questa bella mano*

3. Double bass viol by Hanns Vogel, Nuremberg, 1563 (Germanisches Nationalmuseum, Nuremberg)

(K612) for bass and double bass to be performed by the singer Gerl with the bassist Friedrich Pischelberger (1741-1813); both were engaged in the production of *Die Zauberflöte* under Schikaneder. This work was published in 1822 - one of the first virtuoso double bass works to appear in print. Pischelberger and Johannes Sperger were the most outstanding virtuosos of the Austrian school at that time and it is unlikely that solo bass playing had ever before reached such a peak. Sperger's works include 18 concertos, three concert arias with soprano and a number of cassations and quartets. He played a five-string bass which he tuned in a number of different ways. Josef Kämpfer (1735-88), a Hungarian virtuoso, toured Europe towards the end of the 18th century and is said to have greatly impressed Haydn. Although he travelled as widely as St Petersburg, Copenhagen, Hamburg and London, it was not until Domenico Dragonetti settled in London that

the bass gained popularity in England.

Dragonetti's success was unique in that for over 50 years no musical gathering was considered complete without him. Not only did his fine performances win him recognition throughout Europe, but his kind, amiable personality endeared him to the British public. He counted among his friends Haydn, Beethoven, Hummel, Spohr, Liszt and many other composers. Rossini thought highly of him, and in 1824 composed a duet for him to play with the banker Sir David Salomons, an amateur cellist. At Rossini's insistence Dragonetti had a copy of his bow made for Cherubini, who had begun a double bass class at the Paris Conservatoire. The bass players there used the French overhand bowing which some thought to lack the power of Dragonetti's underhand bow. Rossini delivered the

bow himself but the introduction was not a success. The British Library contains a large collection of Dragonetti manuscripts and most British players are still taught in a tradition directly descended from his pupils.

The later Italian virtuoso Giovanni Bottesini had a different approach to the bass. While some critics praised Dragonetti's powerful tone and his ability to play in tune, others scorned his loud and rasping style. For Bottesini there was little but praise; his delicate tone and agile technique stunned audiences and his ability to 'dart from one end of the instrument to the other' was remarkable (H. R. Haweis). The second half of his *Metodo completo per contrabbasso* explains how he extended the technique of the instrument by the use of arpeggios and very high harmonics. Bottesini was not only an internationally famous virtuoso but a highly respected composer, conductor and musical director. On occasions he directed and conducted his own operas and even performed solos on the double bass during the intervals between the acts. He studied composition with Verdi, whose works he knew well – his numerous virtuoso solos have a close affinity with the style of popular 19th-century Italian opera. Among his lesser-known works are some concertos for two double basses.

In 1874 Franz Simandl published his *Neueste Methode des Contrabass-Spiels*, reprinted many times and still widely used. Simandl studied in Prague under Josef Hrabě and worked most of his life in Vienna. In France the *Méthode complète* (c1920–25) of Edouard Nanny has been more popular than that of Simandl. The early 20th century saw the rise of Sergey Koussevitzky, another virtuoso who conducted. The recordings he made in 1929 of his *Chanson triste*, *Valse miniature* and Láska's *Wiegenlied* show the perfect command he had of his instrument. Koussevitzky wrote comparatively little for the bass, his recital programmes consisting largely of transcriptions (notably the Cello Sonata by Strauss, Bruch's *Kol Nidrei*, Mozart's Bassoon Concerto and many Baroque works).

Since Koussevitzky many virtuosos have made recordings, and traditional bass technique has been greatly developed since the 1950s. Gary Karr has a repertoire of more than 30 concertos, many of which he commissioned. The American Bertram Turetzky has commissioned over 200 works and has developed his own particular style of playing, centred on pizzicato and non-traditional bow techniques. In England Barry Guy has explored new avenues of sound by coupling the bass to electronic apparatus controlled during performance at the player's discretion. Other noted double bassists are the Berlin player Klaus Stoll and the Viennese Ludwig Streicher, another Viennese, Alfred Planyavsky, is an eminent historian of the instrument.

It is hard to be certain when the double bass obtained a regular place in the orchestra. Many 17th-century orchestras did not use '16' tone; there was no double bass in the Paris Opéra orchestra, for example, until the early years of the 18th century. But court orchestras of the mid-18th century included double basses; usually they were more numerous than the cellos. A modern symphony orchestra generally has at least eight (for a fuller discussion see ORCHESTRA).

Any principal orchestral player must attain a standard equal to that of the virtuoso soloist; advanced technique is required for most of the works of, for example, Schoenberg, Strauss and Stravinsky. Some of the more exposed passages occur in Britten's *Young Person's*

4. Double bass by William Tarr, Manchester, 1847 (private collection)

Guide to the Orchestra and *A Midsummer Night's Dream*, Ginastera's *Variaciones concertantes*, Mahler's First Symphony, Musorgsky's *Pictures from an Exhibition*, Prokofiev's suite *Lieutenant Kijé*, Rossini's six early string sonatas, Saint-Saëns's *Le carnaval des animaux* and Stravinsky's suite *Pulcinella*. Chamber music with double bass includes several works by Mozart of a divertimento character (attesting the use of the instrument in such contexts in 18th-century Austria), Beethoven's Septet, Schubert's 'Trout' Quintet and Octet, Spohr's Octet and Nonet, and many works by Hummel, Onslow and others. Dvořák used it in a string quintet (op.77). More recently composers have turned their attention to the instrument in their search for less familiar tone colours, e.g. Prokofiev's Quintet and works by Henze, many of which use artificial harmonics.

Double counterpoint. Two-part INVERTIBLE COUNTERPOINT.

Double croche (Fr.). SEMIQUAVER (16th-note); *seizième* is also used. See also NOTE VALUES.

Double cursus. A term used in modern studies of medieval song and poetry to designate the repetition of a whole musical or formal section. It is found particularly in the sequence (see SEQUENCE (1)), where the music and the poetic scheme of three or four stanzas are repeated with new text. Paul von Winterfeld coined the term in order to describe the form of the French 9th-century poem *Buona pucella fut Eulalia* in his article 'Rhythmen und Sequenzstudien, I: Die lateinische Eulaliasequenz und ihre Sippe', *Zeitschrift für deutsches Altertum*, xlv (1901), 133.

RODNEY SLATFORD

Double bassoon [contrabassoon] (Fr. *contrebasson*; Ger. *Kontrafagott*; It. *contrafagotto*) A BASSOON whose basic pitch is one octave below that of the normal bassoon, from *B* \flat '' (or even *A*'') upwards to *f* or even *c*'.

(For illustration see BASSOON, fig. 10.)

Double bémol (Fr.) Double FLAT

Double chorus. Separately alternating choirs in poly-choral music (see CORI SPEZZATI). Singing from opposite sides of the church or choir stalls is generally held to have originally inspired the composition of polyphonic music for two spatially separated choirs. The practice is first documented at the court of Ferrara in the 1470s and developed in the early 16th century in double-chorus works by, for example, Ruffino d'Assisi. Willaert's *Salmi spezzati* (1550) and Zarlino's codification of the techniques used by Willaert to provide harmonic independence of spatially separated choirs provided artistic and theoretical impetus, the style became virtually synonymous with Venetian music especially in the works of the Gabrieli. The international diffusion of double-chorus music is attested in the works of composers as widespread as Palestrina in Rome, Lassus in Munich and Jacob Handl in Prague. Schütz, after his period of study in Venice with Giovanni Gabrieli, helped to introduce the style into Germany where it remained popular up to Bach's time. It was also used in secular dialogues for double chorus during the 16th century in Italy. In addition to a choral division corresponding to the division of the speakers in the text, secular dialogues for double chorus differ from their sacred counterparts in that the choirs were not usually intended to be separated spatially (see DIALOGUE).

See also CHORUS (1)

Double fugue. A FUGUE on two subjects; by analogy, a triple fugue is on three subjects. By convention a double fugue is referred to as one in which two themes are stated together at the outset. Such fugues are, however, probably better regarded as normal, single-subject fugues in which one or more counter-subjects are stated together with the subject in the initial entry (see COUNTER-SUBJECT).

The terms 'double fugue' and 'triple fugue' are better applied to cases in which the subsidiary themes, instead of being stated with the subject at the outset, have their own exposition later in the fugue, thus establishing their individuality. Usually, though not invariably, such subsidiary themes subsequently combine with the main subject. In the last movement of Beethoven's Hammerklavier Sonata op.106, for example, the subsidiary subject is stated at bar 240 and then combined with the main subject (in incomplete form) at bar 269. But in Bach's Organ Fugue in C minor BWV537 a subsidiary subject stated with its own counter-subject at bar 57 is never combined with the main subject. (For an example of triple fugue, see Bach, *Das wohltemperirte Clavier*, II, no.14, second subject exposition bars 20–24, third subject exposition bars 36–9.)

ROGER BULLIVANT

Double harpsichord. A two-manual HARPSICHORD; see also RUCKERS family.

Double organ. The word 'organ' was frequently put in the plural in late medieval sources, though left singular by Chaucer. A 'payre of orgonys' was mentioned at Sandwich in 1444, indicating a single-manual organ; by 1650–70 (Evelyn, Pepys) a 'pair of organs' sometimes indicated two or more manuals. 'Double' occurred in the 16th century not to indicate two rows of pipes, much less two manuals, but perhaps to indicate a keyboard compass longer than the common *F–a'*. In most instances there is no means of knowing what the writer meant. But by 1613 the new two-manual organ of Worcester Cathedral was called 'Double Organs' and it is this kind of instrument which was normally meant both in 17th-century contracts (e.g. Durham, Wells and Canterbury, all 1662) and in the voluntaries for Double organ popular from c1640. The Canterbury agreement is explicit: 'A Double Organ, viz' a great Organ and a Chaire Organ'. In some voluntaries, 'double' is the registration term for GREAT ORGAN, 'single' for the CHAIR ORGAN – an interpretation of the phrase even more odd when composers became more specific (cf Blow's 'Vers for the Cornett and Single Organ').

PETER WILLIAMS

Double punctum. See BI-PUNCTUM, TRI-PUNCTUM.

Double sharp. See SHARP.

Double stopping. See MULTIPLE STOPPING.

Double subject [double theme]. The subject of a FUGUE and its COUNTER-SUBJECT, when the latter is treated as a second subject, i.e. when it figures prominently in the thematic structure of the fugue. A fugue with a double subject is distinguished from a DOUBLE FUGUE insofar as its subjects are stated consecutively, rather than simultaneously; this is a significant feature of the early RICERCARE.

Double theme. See DOUBLE SUBJECT.

Double tonguing. A technique employed in playing woodwind or brass instruments to articulate detached notes cleanly in faster tempos (see TONGUING). The tip and back of the tongue are used alternately, forming the consonants 'T' and 'K' in succession, thus: 'T-K-T-K-T-K', and so on.

Doublette (Fr.). An ORGAN STOP.

Double virga. See BI-VIRGA, TRI-VIRGA.

Doubling. (1) In part-writing, the repetition of one of the notes in a chord either in unison or at the octave (or 15th, 22nd etc); in four-part harmony, for instance, one note of every triad is doubled, usually the root.

(2) In polyphonic music, the performance of one part by different instruments or voices in unison or at the octave (or 15th, 22nd etc). For example, in the Classical symphony the double basses usually double the cellos at the lower octave, and the bassoons often double the cellos in unison.

(3) Playing more than one instrument or role in a performance, for example, a flautist in an ensemble might double on the piccolo, and a singer in *Don Giovanni* might double the Commendatore and Masetto

Doubrava, Jaroslav (b Chrudim, east Bohemia, 25 April 1909; d Prague, 2 Oct 1960). Czech composer. He was, with Hanuš, one of the foremost composition pupils of Jeremiáš, with whom he studied from 1931 to 1937. Between 1945 and 1955 he worked for Czech radio as a reviewer, producer and lecturer, and at the same time was active in the Union of Czech Composers and the Prague Society of Artists. A distinguishing mark of his style is his synthesis of modality, inventive instrumentation and musical symbolism. His modality, as well as his dramatic and ballad conceptions, was decidedly influenced by Janáček, while the foundations of his lyricism may be traced to Suk. Though motor rhythm and constructivism were dominant influences on his early pieces (e.g. the Suite and the Sonatina for piano, both of 1937), in the 1940s his music became simpler in expression and structure (e.g. the oratorio *Poselství*, 'Message', and the Symphony no.2 'Stalingradská'). These works take an anti-fascist stance; Doubrava was himself a member of a partisan group during the German occupation. After the war he composed a number of stage works in which his style is shown at its most fully developed, incorporating timbral drama, symbolism and modern linear polyphony.

WORKS

(selective list)

- Operas: *Sen noci svatojanské* [A midsummer night's dream] (Doubrava, R. Vonásek, after Shakespeare), 1945–9, Opava, 1969; *Balada o lásce* [Ballad of love] (J. Weng, Doubrava, after Z. Winter), 1960, orchestration completed by Hanuš, Prague, 1962.
- Ballets: *Král Lávro* [King Lávro] (after K. H. Borovský), 1951, Olomouc, 1955, *Don Quixote* (Doubrava, J. Bachtík, after Cervantes), 1955, Brno, 1957.
- Orch: Sym no.1 'Chorální', 1938–40, Sym no.2 'Stalingradská', 1943–4; Sym no.3 'Tragická', 1956–8.
- Choral: *Poselství* [Message] (J. A. Komenský), oratorio, 1940, *Balada o krásné smrti* [Ballad of a beautiful death] (J. Čápek), cantata, 1941.
- Song cycles: *Epigramy* (Borovský), 1939, *Noci* [Nights] (J. Hora, F. Halas), 1944, *Mladost* [Youth] (Moravian and Slovakian trad.), 1956; *Čarovná láska* [Enchanting love] (trad.), 1956; *Ráj domova* [Paradise of home] (Čápek), 1956.
- Inst: Pf Suite, 1937, Pf Sonatina, 1937; Sonata, vn, 1942; Sonata, vn, pf, 1942; Pf Sonata, 1949.

Douglas, Clive Martin (b Rushworth, Victoria, 27 July 1903; d Melbourne, 29 April 1977). Australian composer and conductor. After early training as a violinist with Franz Schieblich and Alberto Zelman, he studied under A. E. H. Nickson and Sir Bernard Heinze at the Melbourne University Conservatorium (MusB 1934). He received the doctorate in music at Melbourne University in 1958. Appointed to the Australian Broadcasting Commission in 1936, he was resident staff conductor to the State Orchestras in Tasmania (1936-41), Brisbane (1941-7), Sydney (1947-53) and Melbourne (1953-66), playing a pioneering role in the development of orchestral and choral broadcasts. He retired from the ABC in 1966. After 1950 he was awarded numerous prizes and commissions by the Australasian Performing Right Association and the ABC. His major works reflect an interest in aboriginal folklore and a preference for a dramatic narrative programme; they are richly orchestrated and tonally based, although Douglas's growing interest in serialism is clear in *Three Frescoes*.

ELIZABETH WOOD

Douglas, Minnie. See MEMPHIS MINNIE.

Douglas, Roy (b Tunbridge Wells, 12 Dec 1907). English composer and arranger. A self-taught musician who has consistently shunned official appointments, he had the demanding responsibility of helping Vaughan

Williams prepare his works for performance and publication after 1944. He recalled his experiences in *Working with R.V.W.* (Oxford, 1972). Douglas is better known as an arranger than as a composer: his orchestrations of Chopin for *Les sylphides* have been performed throughout the world. Chief among his original works are the *Six Dance Caricatures* (1939) for wind quintet, the *Elegy* (1946) for string orchestra and *Festivities* (1972) for full orchestra. His music is published by Boosey & Hawkes and Oxford University Press.

CHRISTOPHER PALMER

Dounias, Minos E. (b Cetate, Romania, 26 Sept 1900; d Athens, 20 Oct 1962). Greek musicologist and violinist. His family moved soon after his birth to Constantinople, where he attended Robert College (1914-21), learning the violin and playing in a string quartet and orchestra. Subsequently he studied the violin at the Berlin Conservatory with Moser and Kulenkampff (1921-6) and musicology with Schering and Abert at Berlin University (1926-32), taking his doctorate under Schering in 1932 with a dissertation on Tartini's violin concertos (*Die Violinkonzerte Giuseppe Tartinis*, Wolfenbüttel, 1935, 2/1966). Concurrently he played the violin in various string quartets, orchestras and early music groups. While working as professor of music at Pierce College, Athens (from 1934), he organized various vocal ensembles and instrumental groups which were the first in Greece to perform music of the late medieval, Renaissance and Baroque periods: the New Hellenic Choral Society (1936-7), the Choral Society of the Anglo-Hellenic League (1938-40) and the Athens Musical Society (1945-53). He also had an influential career as a music critic, first with the newly established journal *Neoellinika grammata* ('Modern Greek literature', 1936-49) and then with the Athenian *Kathimerini* ('Daily') newspaper (1948-62), through which he was able to raise the standards of musical taste in Greece (a selection of his criticism was published as *Mousikokoutika*, Athens, 1963). At the same time he gave numerous public lectures and broadcast extensively. Between 1950 and 1961 he served as president of the Society of the Friends of Nikos Skalkottas, and in the early 1950s acted as music adviser to the Greek Broadcasting Commission. His publications include an edition of Mozart's sonatas for organ and orchestra (Neue Ausgabe sämtlicher Werke, vi/16, Kassel, 1957).

DIMITRI CONOMOS

Dourlen, Victor-Charles-Paul (b Dunkirk, 3 Nov 1780; d Batignolles, Paris, 8 Jan 1864). French teacher and composer. His academic and practical abilities won him honourable mentions and prizes at the Paris Conservatoire from 1799. In 1805 he gained the Prix de Rome with the cantata *Cupidon pleurant Psyché*. His comic opera *Philoclès*, performed in 1806 before his departure for Italy, gave further evidence of early mastery. The works he wrote as a student in Rome were well received, and at the same time he apparently also produced stage works for Paris; he was accepted as an assistant professor at the Conservatoire in 1812. In 1816 he was made professor of harmony, a post held until his retirement in 1842. Dourlen's compositions were not popular, except for *Le frère Philippe*, and there is little doubt that teaching was his principal interest; but it is equally certain that he was not a pedant. The

foreword to his *Traité d'harmonie* salutes the innovations of Mozart and Beethoven and suggests a sensibility that is lacking in Dourlen's own music.

Douwes, Claas (b ?Hennaard, Friesland, c1650; d Tzum, c1725). Netherlands writer on music, organist and schoolmaster. While mysteries remain about Douwes's biography and publications, there is no doubt that his little *Grondig ondersoek* (Franeker, 1699/R1971) is one of the most important sources of information for historians and makers of keyboard instruments, offering unique details on the scaling of the clavichord and virginals. His general musical education came from such Dutch authors as J. A. Ban, but his data on instruments (useful, like his discussion of musical intervals, to remote Friesian organists) were more empirical and, though based on an uncertain unit of measurement, much more practical than those of any European theorist of his period. His treatise is concerned with the notes (*toonens*) of music: how to tune them, how to use them harmonically and how to

produce them on different instruments. It does not seem to have been widely known at the time.

Douwes built at least one organ, probably gaining experience from the lively tradition then surrounding Franeker (a university town from 1585 to 1811), not least as it concerned builders such as Baders and Schnitger (an organ at Sneek, 1710).

Douzième (Fr.). TWELFTH.

Dow, Daniel (b ?Kirkmichael, Perthshire, 1732; d Edinburgh, 20 Jan 1783). Scottish antiquarian and composer. He was giving guitar lessons in Edinburgh by the 1770s. In 1776 he published in Edinburgh *A Collection of Ancient Scots Music*. never before printed, consisting of *Ports, Salutations, Marches or Pibrochs &c.*, an interesting pioneer collection of Gaelic music a generation before the more important scholarly work of Gunn, Campbell and Fraser. Earlier, in 1773, Dow had brought out *Twenty Minuets and Sixteen Reels or Country Dances* of his own composition, set for 'Violin, Harpsichord or German Flute'; but the minuets are so predominantly in the key of E \flat that they were probably arranged from pieces originally scored for an orchestra with B \flat clarinets and E \flat horns. Around 1780 Dow's *37 New Reells and Strathspeys* appeared, and a further *14 New Reells and Strathspeys* about 1800. His son John Dow achieved considerable local fame as a folk-fiddler in Perthshire.

DAVID JOHNSON

Dowd, (Eric) Ronald (b Sydney, 23 Feb 1914). Australian tenor. After singing in concerts, he made his operatic début in *Les contes d'Hoffmann* with the Australian National Opera in 1954. In 1956 he joined the Sadler's Wells Opera in London and, until 1971, sang many roles with the company, notably Canio, Florestan, Peter Grimes, Stravinsky's King Oedipus, Idomeneus, Tannhauser and Weill's Jimmy Mahoney. He made his début at Covent Garden in 1960 as Walther in *Die Meistersinger* and subsequently sang Canio, Peter Grimes, the Drum-Major, and Aeneas (*Les troyens*). He created the parts of Claudius in Searle's *Hamlet* (Covent Garden, 1969) and the Lover in Goehr's *Arden muss sterben* (Hamburg, 1967). With Scottish Opera he was a memorable Aeneas in the company's first performance of *Les troyens* in 1969 (he also sang the role in Boston in 1972). In 1972 he returned to Australia to become a leading tenor with the newly formed Australian Opera. During his years in Britain he frequently sang in concerts, and his Gerontius in particular was much admired. His virile, grainy tenor and fervent delivery never fail to make their mark.

ALAN BLYTH

Dowd, William (Richmond) (b Newark, NJ, 28 Feb 1922). American harpsichord maker. He studied English at Harvard (AB 1948). His interest in music

began while he was at school, where he had piano lessons. At Harvard he and his friend Frank Hubbard became increasingly interested in early keyboard instruments, and built a clavichord. They decided not to follow their proposed careers as teachers of English and instead to found a workshop for building harpsichords constructed on historical principles. In summer 1948 while Hubbard studied in Europe Dowd served an apprenticeship in the Detroit workshop of John Challis, a disciple of Arnold Dolmetsch and the pioneer builder of harpsichords in the USA. In autumn 1949 they established their workshop in Boston, Massachusetts. By 1955, when Hubbard left for a research trip in Europe, the firm had constructed 13 harpsichords and four clavichords, and restored several important antique instruments. Dowd continued the firm's production and restoration work during Hubbard's absence, and worked out an important design based on the two-manual harpsichords of Pascal Taskin. This French double harpsichord soon found wide favour with performers as a general-purpose concert instrument.

After the dissolution of the firm in late 1958 Dowd established his own workshop in Cambridge, Massachusetts, which continued production of harpsichords based on historical models, attaining an annual output of 22 to 24 instruments, a large number for instruments of the highest quality.

In 1971 Dowd established an additional workshop under his name in Paris in collaboration with Reinhard von Nagel, which now produces between 12 and 15 instruments annually. Both the Cambridge and Paris workshops are largely given over to the production of two-manual harpsichords based on the great French prototypes by the Blanchets, Hemsch and Taskin, including Taskin's reconstructions *en grand ravalement* of Ruckers harpsichords. They also make a smaller double harpsichord of Flemish design and a French single-manual model, as well as specially commissioned instruments based on other models, and restorations of antique harpsichords. Dowd harpsichords are probably in wider use by leading professional performers in North America and Europe than those of any other maker.

HOWARD SCHOTT

Dowiakowska-Klimowiczowa, Bronisława (Apolonia Izabela) (b Warsaw, 9 Feb 1840; d Warsaw, 3 Feb 1910). Polish soprano. She studied with Quattrini and made her début in Warsaw in 1857. On 20 April 1858 she made her stage début in Warsaw in *Alessandro Stradella*, later singing in *Les Huguenots* and *Don Giovanni*. From 1859, for 35 years, she sang about 100 operatic soprano roles, including all of Moniuszko's operas as well as operas by Kurpiński, Münchheimer, Auber, Hérold, Grossman, Bellini, Donizetti, Meyerbeer, Weber, Flotow, Halévy, Rossini, Marschner, Mozart, Wagner, Bizet and others; she was the first in Poland to sing Marguerite in Gounod's *Faust* (1865). She made guest appearances in Lwów (1873, 1880, 1883, 1885), Kraków (1873, 1885), Kiev, Odessa (1881) and Nice (1888–9). Her compass was *a* to *e''*, and she possessed a brilliant technique and an ability for clear enunciation. Her final appearance was as Mignon at the Warsaw Opera (2 September 1894).

IRENA PONIATOWSKA

Dowland, John (b ?London, 1563, d London, buried 20 Feb 1626). English composer and lutenist. Dowland, according to his own statement, was born in 1563. Thomas Fuller, in *The History of the Worthies of England* (London, 1662), said he believed him to have been born in the City of Westminster. There is no satisfactory evidence to support the claim, originally made by W. H. Grattan Flood in the *Gentleman's Magazine* (London, 1906), that he was born in Dalkey, Co. Dublin.

In 1580 he went to Paris as 'servant' to Sir Henry Cobham, ambassador to the King of France. He returned to England, probably during 1584, having been converted to Catholicism during his stay.

On 8 July 1588 he was admitted to the BMus, from Christ Church, Oxford. In 1590 we hear for the first time of music which was almost certainly Dowland's being performed at a court ceremony; on 17 November, at the Accession Day celebrations, Sir Henry Lee resigned from the voluntarily assumed position of Queen's Champion, and the song *His golden locks to silver now are turned* (sic) was sung by Robert Hales during an entertainment staged in the tiltyard at Westminster. By this time Dowland was probably married, although nothing is known about his wife. In 1592 he had an opportunity of playing before Queen Elizabeth herself, when she was entertained at Sudeley Castle with the masque of *Daphne and Apollo*. During this same year six harmonizations of psalm tunes by Dowland appeared in Thomas East's *The Whole Booke of Psalmes*.

In 1594 John Johnson, one of the queen's lutenists, died, and Dowland applied for the vacant post. His application was refused, and in a mood of bitterness and frustration he decided to travel abroad. Later, in a letter from Nuremberg to Sir Robert Cecil, he stated his belief that his Catholicism had caused the refusal, but this seems unlikely since after his return from France he made no declaration of faith, and committed no overt acts that could have given grounds for discrimination against him. Moreover, his licence to travel abroad was signed by both Sir Robert Cecil and the Earl of Essex, neither of whom would have performed this service for an openly professed Catholic.

On leaving England he proceeded to the court of Henry Julio, Duke of Brunswick, and from there he travelled to the court of Moritz, Landgrave of Hesse, at Kassel. He was treated with exceptional courtesy and generosity by both noblemen, and, according to his own statement, was invited to remain in the service of the Landgrave. He declined this invitation, however, wishing to travel to Italy to meet Marenzio, whose work he particularly admired. After passing through Venice, Padua and Ferrara he eventually reached Florence and became entangled with a group of exiled English Catholics engaged in plotting the assassination of Queen Elizabeth. On learning of their plans he took fright and returned precipitately to Nuremberg, where on 10 November 1595 he wrote a long letter to Sir Robert Cecil disclosing all he knew of the plot.

About this time Dowland was honoured by a number

of literary tributes of which the most important are Thomas Campion's Latin poem in 1595, and Richard Barnfield's well-known sonnet *If music and sweet poetry agree*, in 1598. His fellow composers also began soliciting commendatory poems for their publications from him.

Dowland is next heard of in a letter addressed to him at the court of the Landgrave of Hesse from his friend and former master Henry Noel, a prominent courtier and one of the queen's favourites. Noel urged Dowland to return to England, pointing out that Elizabeth had asked for him. Dowland returned, probably late in 1596 or early in 1597, but Noel died before he could plead Dowland's cause with the queen, and the post again eluded him. For Noel's burial in Westminster Abbey on 10 February 1596/7, he wrote *Mr Henry Noell his funerall Psalmes*.

During 1597 Dowland collected 21 of his songs and an 'invention for two to playe upon one Lute', and issued them in such a form that they could be sung by a solo voice and lute or as four-part ayres (with or without lute), under the title *The First Booke of Songes or Ayres of Foure Parties with Tableture for the Lute*. It was graced with a Latin epigram by Campion and a letter from Marenzio. This volume enjoyed an enormous popularity and was reprinted at least four, if not five times, the edition of 1606 being substantially revised. On the title-page Dowland described himself as 'Bachelor of Musick in both the Universities'. No information concerning his Cambridge degree can be traced, but Thomas Fuller, in his *History of the University of Cambridge* (London, 1655), wrote that the records were badly kept between the years 1589 and 1601. 'let Thomas Smith University Register bear the blame'.

On 9 February 1598 Montz, Landgrave of Hesse, wrote a letter of great warmth to Dowland asking him to return to Kassel, having heard of his failure to obtain the court post in England. Whether Dowland accepted the landgrave's offer is not known, but by 18 November 1598 he was a lutenist at the court of Christian IV of Denmark, at the exceptionally generous salary of 500 daler a year, though not (as is sometimes said) a sum equal to the emoluments of an admiral.

At first all went well and in 1600 he sent the MS of *The Second Booke of Songs or Ayres* to his wife in England, the dedication to Lucy, Countess of Bedford, being dated 'From Helsingnoure in Denmarke the first of June. 1600'. After the publication of the book there was a complicated series of lawsuits between the publisher, George Eastland, who had bought the MS from Mrs Dowland, and the printer, Thomas East.

It has been suggested that at this time Dowland encountered some kind of financial difficulties. However, fuller examination of the court records (see Ward, 1977) shows that this was not in fact the case, and indeed he remained in high favour with the king: it is recorded that he was presented by him with a 'portrait of his Majesty in crown gold'. After the payment made to Dowland on 15 July 1603, he left Denmark for England 'on his own commitments', and did not return until some 12 months later. *The Third and Last Booke of Songs* was registered in London on 21 February 1603, when Dowland was still in Denmark.

In the prefatory matter to *Lachrimae or Seaven Teares* Dowland's house in Fetter Lane is mentioned for the first time. Dowland also stated there that he 'had

access' to Queen Anne at Winchester. This meeting was probably in late September or early October 1603, on the occasion of 'a gallant masque' given by the queen in honour of Prince Henry. Possibly he was summoned to play during the course of the entertainment.

By July 1605 he was back in Denmark, and the unhappy record of accumulating debts continued, in spite of Christian's attempt to help him by placing a boy in his care for training for the payment of an extra 100 daler a year. By 10 March 1606, when he was finally dismissed, he was almost penniless.

After his return to England he published in 1609 his translation of Andreas Ornithoparchus's *Musicae activae micrologus* (Leipzig, 1517), under the title *Andreas Ornithoparchus his Micrologus*. From it we learn that the family was still living in Fetter Lane, and that Dowland was still promising his readers 'shortly to divulge a more peculiar worke of mine owne: namely my *Observations and Directions concerning the Art of Lute-playing*', a project possibly identical with his intention, first announced in *The First Booke of Songes*, 'to set forth the choicest of all my Lessons in print', since a set of instructions followed by a collection of compositions was the usual form for printed lute music.

Between 1609 and 1612 he entered the service of Theophilus Howard, Lord Walden, a prominent courtier holding a number of crown appointments. In spite of this position, in his address 'To the Reader' in *A Pilgrimes Solace* he complained bitterly of neglect, and of criticism from younger 'Professors of the Lute'. He was specially antagonistic towards Tobias Hume for claiming, in *The First Part of Ayres* (London, 1605), that 'the statefull instrument Gambo Violl, shall with ease yeelde full various and as devisefull Musicke as the Lute'. To what extent were these complaints justified? Examination of the surviving contemporary English lute MSS shows that all the most important collections contained examples of Dowland's solo works. On the Continent his compositions were included, either with or without acknowledgment, in many printed collections and MSS until some nine or ten years after this date. Arrangements of numbers of his compositions were made for other instruments, both in England and abroad, by many of the most distinguished composers of the time. In particular his *Lachrimae* is found in arrangements of every degree of accomplishment; its famous opening phrase was also consciously incorporated into the structure of countless works by other composers. He obviously considered his fame to rest largely on this piece, for when he signed the opening of the tune of the Lord's Prayer from the English Protestant Psalter which he wrote in the *Album amicorum* of Johannes Cellarius of Nuremberg he put 'Jo. dolandi de Lachrimae his own hande' (see illustration). The numerous references to *Lachrimae* in theatrical and other literary works of the time show it to have transcended the barriers of class distinction, and to have been known from the court downwards to the common people. References to, or quotations from, some of his other songs also appear in other plays of this period. That *The First Booke of Songs* was reprinted the year after he complained shows that the songs in this volume had not lost their appeal. The breath of change was in the air, but certainly not, at this time, to an extent that could affect the enormous popularity of Dowland's music.

It seems rather that resentment at his continued

The opening of the tune of the Lord's Prayer, with John Dowland's signature, from the *'Album amicorum'* (1599–1606) of Johannes Cellarius of Nuremberg (GB-Lbm Add.27579, f.88)

failure to secure a post at the English court soured all other success. It seems likely that it was neglect at court rather than any failure of popularity elsewhere that prompted his friend Henry Peacham to include his poem on Dowland, 'Heere, Philomel, in silence sits alone', in *Minerva Britannia* (London, 1612). Whether events were prompted by Peacham's poem it is impossible to say, but on 28 October 1612, by letters under the Signet, Dowland was at last appointed one of the King's Lutes, at a salary of 20d a day.

Oddly, inspiration seems to have deserted Dowland on the achievement of his life's ambition; only a handful of his surviving pieces cannot be ascribed to an earlier period.

In 1614 he contributed commendatory poems to two musical publications, one to Leighton's *Teares or Lamentacions of a Sorrowfull Soule* and one to Ravenscroft's *A Brieve Discourse*.

In 1621 his second harmonization of Psalm c appeared in Thomas Ravenscroft's *The Whole Booke of Psalmes*, and here, for the first time, he is referred to as 'Dr' John Dowland. The degree is confirmed (though it is not known by which university it was conferred) in the Audit Office Accounts, where from the year 1622 onwards he was given that title, his name standing first on the list of lutenists. From this year until his death he continued to receive tributes and to be named among the greatest in his profession.

The last recorded incident in his life is that he was a member of 'The Consorte' that played during the funeral solemnities of James I on 5 May 1625. The final entry

in the Audit Office Declared Accounts which concerns Dowland runs: 'Doctor Dowland for one quarter of a year ending Xmas 1625 & 26 days. Robert Dowland son of the said Doctor Dowland deceased succeeding' (by letters under the Signet 26 April 2 Chas.I). Dowland was buried in the parish of St Anne, Blackfriars.

Dowland's character appears to have been as full of contradictions as the age in which he lived. Described by Fuller as 'a cheerful person . . . passing his days in lawful merriment', there is, nevertheless, much evidence to show that he suffered periods of intense melancholy. Though capable of writing charming trifles, all his greatest works are inspired by a deeply felt tragic concept of life, and a preoccupation with tears, sin, darkness and death. While consumed with the ambition to obtain a post at court, he appears to have been unable to restrain himself from actions that were prejudicial to this end: his friend Henry Peacham said 'in regard he has slipt many opportunities in advancing his fortunes'.

The style of his lute music is founded in contemporary polyphony. This shows itself most strongly in his fantasias where the opening theme passes from voice to voice and is intricately woven into the fabric of the composition. Those such as *Forlorne Hope* and *Farewell*, in which the theme consists of a descending and an ascending chromatic hexachord respectively, achieve a tragic poignancy, and in them Dowland shows a mastery of the lute seldom equalled in the music of the period. His compositions in dance forms, and the settings of ballad tunes, though agreeing fairly closely in the form of the undecorated strains, vary so greatly from source to source in the divisions and variations as to suggest that his performance may have been largely improvisatory.

The 'seven teares' of the *Lachrimae* set constitute an achievement of great originality. Each pavan starts with the famous theme in one of the voices, and other phrases are passed on from one pavan to another so that each, though showing an individual character of its own, falls into place as part of a larger whole. The lute is used with consummate mastery to add its own particular quality to the texture, and to provide some of the most important of the recurring passages which enhance the sense of unity in the seven pavans. (For an illustration of the original publication, see TABLE-BOOK.)

It is, however, in his songs that Dowland's genius is shown to best advantage. Those in *The First Booke* are all strophic; several consist of words fitted to pre-existing dance-tunes. Most of the melodies are of memorable beauty, but harmonically they keep mostly within the diatonic conventions of the time. Only one, *Come heavy sleepe*, shows something of the haunting melancholic quality that was to characterize many of his later works. In this song the melody and the harmonic structure have been directly inspired by the words of the first stanza. In later books Dowland made less use of strophic form, and the melodies are more appropriate to the meaning and the rhythm of the words themselves, while the use of chromaticism and biting discords lends support to the tragic sentiments of the greatest of the songs.

Curiously, though Dowland was so great an innovator in some directions, only in the very late songs is the mannerism of word-painting absent. The influence of Italian composers seeking to rid vocal music of this mannerism is reflected increasingly in his songs; their

influence is seen also in his use of almost recitative-like passages.

In the greatest of his songs, *In darknesse let mee dwell*, Dowland freed himself from almost all the conventions of his time. The strange and beautiful melody rises from the words with a sense of inevitability, while the demands of verbal rhythms override conventional bar-lines. Biting discords from the lute enhance the tragedy in the words and chords with augmented and diminished intervals are used to express emotional intensity to an extent unsurpassed in any other song at that time.

DIANA POULTON

Dowland, Robert (b ?London, c1591; d London, 1641). English editor, composer and lutenist, son of JOHN DOWLAND. From the dedicatory letter to Sir Robert Sidney in *A Muscull Banquet* (London, 1610) we learn that Sir Robert was Robert's godfather. We also learn from *Varietie of Lute-Lessons* (London, 1610), in the dedication to Sir Thomas Mounson, that he received part of his education in Mounson's household while his father was abroad. In February 1613 he was still in England; his name appears among the lute players who were engaged to play in Chapman's *Masque of the Inner Temple and Lincoln's Inn*, given at Whitehall as part of the marriage celebrations of Princess Elizabeth and Frederick, Elector Palatine. At some time in the early 1620s he was travelling on the Continent with a group of English actors who sought permission on 30 August 1623 to return home from the Duke of Wolgast in Pomerania.

On 20 or 21 January 1626 Dowland succeeded to his father's post at court but the warrant confirming his appointment was not made out until 26 April 1626. Not long after his appointment he married Jane Smalley. In his marriage allegation (now in London's Guildhall Library), dated 11 October 1626, he declared himself to be 'aged about xxxv yeares'. The registers of St Anne, Blackfriars, show that their infant son, John, was buried on 22 December 1627, and a daughter, Mary, was baptized on 24 April 1629. His death must have been late in 1641 since by a warrant issued on 1 December 1641, John Mercure is sworn 'in place of Robert Dowland deceased'.

Robert Dowland's main claim to fame lies in his editorship of two anthologies: *A Muscull Banquet* and *Varietie of Lute-Lessons* (both printed in London, 1610). They contain works of the highest order by both English and continental composers. Only four compositions bear his own name: *Sir Thomas Monson his Pavin* and *The Honorable the Lady Cliftons Spirit*, both in *Varietie of Lute-Lessons*, the three main strains of the latter being those of his father's *K. Darcies Spirite* (GB-Cu Dd.2.11); Katherine Darcy married Sir Gervase Clifton in 1591, so the earliest form of the piece must have been written at about the time of Robert's birth. The Margaret Board Lutebook contains a piece entitled *Almande Ro: Dowlande* written out in John Dowland's unmistakable script. The fourth piece bearing his name is a rather poor version of his father's *The King of Denmark's Galliard* ascribed to Robert in G. L. Fuhrmann's *Testudo gallo-germanica* (Nuremberg, 1615), an obvious mistake on Fuhrmann's part.

DIANA POULTON

Downbeat. The explicit or implied impulse that coincides with the beginning of a bar in measured music, by analogy with the downstroke in conducting (the 'thesis' of ARSIS, THESIS). The term is mainly applied to music in a regular metre, where downbeats create a periodic occurrence and are usually given articulation through dynamic increase (i.e. ACCENT) or lengthening of durational value (i.e. AGOGIC accent). It is contrasted with UPBEAT, the name given to a relatively weak impulse at which a note or succession of notes anticipates the downbeat, and with OFF-BEAT, a term denoting a weaker impulse following the downbeat and usually applied to situations in which the downbeat is silent, tied over from the previous bar or otherwise understressed.

For a discussion of the concept of downbeat in unmeasured music in the 15th and 16th centuries, see TACTUS.

See also RHYTHM

Down-bow. See BOW, §II.

Downes, Edward (Thomas) (b Birmingham, 17 June 1924). English conductor. He studied at the University of Birmingham and composition and the horn at the Royal College of Music, subsequently becoming a lecturer at Aberdeen University. In 1948 he was awarded the Carnegie Scholarship, which he used in studying for two years with Hermann Scherchen. He thereupon embarked on a career devoted principally to opera conducting. He joined the musical staff of the Carl Rosa Opera Company in 1950, transferring in 1952 to Covent Garden where he first made his mark conducting a new production of *Der Freischütz* on 23 April 1954. The following October he took over, at the last moment and without an orchestral rehearsal, a new production of *Les contes d'Hoffmann*. In 1963 he conducted Covent Garden's production of Shostakovich's *Katerina Izmailova* in his own English translation: the first stage performances in the West of the composer's postwar revision of this opera. A student of Russian from his schooldays, he also made performing translations for Musorgsky's *Khovanshchina*, Prokofiev's *War and Peace* and Shostakovich's *The Nose*. In 1966 he was given the title of assistant to the musical director, and in 1967 he became the first English conductor since Beecham to conduct a full cycle of the *Ring*. He resigned from his staff appointment at Covent Garden at the end of the 1968-9 season but returned as a guest to conduct the premières of Bennett's *Victory* in 1970 and of Maxwell Davies's *Taverner* in 1972. Working mainly in the shadow of Solti, he had little chance to achieve a marked personal impact with the larger public, but he is much admired for his eloquent conducting of Verdi and of Russian operas. His musical achievement brought engagements to conduct on the Continent, and his appointment as musical director of the Australian Opera (1972-6) where he conducted Prokofiev's *War and Peace* (in his own translation) as the first operatic performance in the new Sydney Opera House on 28 September 1973. In 1975 he made his first appearance with the Welsh National Opera, conducting *Der fliegende Holländer*. In 1980 he became principal conductor of the BBC Northern SO. He has directed many premières, including Birtwistle's *Chorales for Orchestra* (with the New Philharmonia, 1967) and Brian's *Symphonies* nos. 14 and 21 (with the LSO, 1970). He wrote 'Bel Canto 1956' in *Opera Annual* 3 (London, 1956), p. 48.

ARTHUR JACOBS

Downes, Edward O(lin) D(avenport) (b Boston, 12 Aug 1911). American musicologist, son of Olin Downes. He attended Columbia University, the Manhattan School of Music and universities in Paris and Munich. From 1939 to 1941 he was music critic for the *Boston Transcript*. He taught at Wellesley College and the Longy School of Music in 1948 and 1949, and from 1950 to 1955 he was assistant professor of music at the University of Minnesota. He received a PhD in musicology from Harvard University in 1958. From 1959 to 1965 he was musicologist-in-residence at the Bayreuth Festival master classes. Since 1966 he has been professor of music history at Queens College of the City University of New York.

As a musicologist Downes has concentrated on opera of the early Classical period and the development of music criticism in the USA. He is also active outside the academic community: in 1958 he became quizmaster for the Metropolitan Opera radio broadcasts, and he has written programme notes for the New York Philharmonic since 1960. He has also written numerous articles in journals such as *Opera News* and *High Fidelity*.

PAULA MORGAN

Downes, (Edwin) Olin (b Evanston, Ill., 27 Jan 1886, d New York, 22 Aug 1955). American music critic, father of Edward O. D. Downes. He studied the piano at the National Conservatory of Music, New York, and, at Boston, history and analysis with Louis Kelterborn, the piano with Carl Baermann, theory with Homer Norris and Clifford Heilman, and music criticism with John P. Marshall. His career was as music critic of the *Boston Post* (1906-24) and the *New York Times* (1924-55). He was also a guest lecturer at Boston University, Lowell Institute, Harvard University (1911), the Curtis Institute and the Metropolitan Opera Guild, and a commentator for concerts at the Brooklyn Academy of Arts and Sciences (1932-4) and the Berkshire Music Festival (1937). He was particularly well known for his quiz programme during the intervals of the Metropolitan Opera's Saturday afternoon broadcasts. The Cincinnati Conservatory of Music awarded him an honorary doctorate in 1939.

Downes's reviews strongly influenced contemporary popular musical opinion in the USA. Though the taste defined in them has dated, he recognized the value of new works by Richard Strauss, Stravinsky, Prokofiev

and Shostakovich before their reputations were established in the USA. In particular he was a passionate advocate of Sibelius's music; he secured its American reputation, and in return Finland awarded him the order Commander of the White Rose (1937) and invited him to speak at Sibelius's 75th-birthday celebration (1940). Downes's papers, acquired by the University of Georgia, include about 50,000 letters to and from composers (Bloch, Prokofiev, Stravinsky, Varèse, Vaughan Williams), musicologists, performers and critics.

JON NEWSOM

Downes, Ralph (William) (b Derby, 16 Aug 1904). English organist whose influence on organ design in his own country has been considerable. He entered the Royal College of Music in 1922 as a pupil of Walter Alcock, Henry Ley and Edgar Cook, and became organ scholar of Keble College, Oxford, in 1925. After taking his degree he went to the USA in 1928 as musical director and organist of the new chapel of Princeton University, where he helped to establish a musical curriculum. Private studies with Lynnwood Farnam, Fernando Germani and at the Pius X School of Liturgical Music (New York) enriched his own work. He returned to London in 1936 as organist of Brompton Oratory, and soon earned a reputation as recitalist and broadcaster. He gave British premieres of works by Milhaud, Hindemith and Schoenberg in the 1930s and 1940s, and his Bach recordings of the 1960s were widely praised.

In 1948, as resident organist of the LPO, he was commissioned to design an organ for the new Festival Hall, and his deep and long-standing interest in the organ reform movement was thereby given a practical outlet. Aiming at an instrument of all-round excellence, he broke with much contemporary English practice such as high wind pressures, demarcation of loud and soft stops, and quasi-orchestral tone families, and reverted to earlier, purer traditions based on tightly integrated ensembles and other concepts characteristic of the Baroque age. A source of controversy at the time, this project decisively changed the direction of English organ building, and Downes has left his imprint on many other notable instruments, including those of Paisley Abbey, Scotland (1968), and Gloucester Cathedral (1972). He was made a CBE in 1969.

STANLEY WEBB

Doxastarion. A collection of Byzantine doxastika; see DOXASTIKON.

Doxastikon. A TROPARION. One appears after the first half of the lesser doxology, 'Glory be to the Father', and a second after the second half, 'Both now and forever'.

Doxology (Lat. and Gk. *doxologia*: 'giving of glory', from *doxa*: 'glory', and *logos*: 'word'). Liturgical formula praising God. Various types of Christian doxology may be distinguished: the greater doxology (*doxologia major, hymnus angelicus*), i.e. the GLORIA IN EXCELSIS DEO; the lesser doxology (*doxologia minor, hymnus glorificationis*), i.e. Gloria Patri, which like the greater doxology is sometimes abbreviated to 'Gloria', and is further discussed below; and other doxologies of less frequent occurrence. These doxologies occur in both Western and Eastern Christian rites. Doxologies properly require a congregational response, generally AMEN.

The most important Hebrew doxologies, both used in synagogue worship since early times, are the *kaddish* and *kedusha*. The *kaddish* comprises four paragraphs with responses such as 'Blessed be he' and 'Amen'; the *kedusha* ('thrice-holy') occurs in three main types, with variants, all with responses, of which the so-called *kedusha* of Yotzer may be datable as early as the 1st century AD (Werner, p.287). Ex.1 shows part of a Yemenite Jewish doxology melody that may be of great antiquity. There are also lesser Hebrew doxologies with 'amen' as a response.

Ex 1 from A. Z. Idelsohn *Songs of the Yemenite Jews*,
 Thesaurus of Oriental Hebrew Melodies, 1 (1925), 9

The early Christians addressed prayer to God through Jesus Christ, and hence doxologies often named Christ beside God the Father, as in 2 *Corinthians* i.3. In early liturgical sources the Holy Spirit is also named in doxologies, in such formulae as 'Glory to the Father through the Son in the Holy Spirit'. In the 4th century the Arians interpreted such formulae to imply a subordination of the Son to the Father; in consequence, the doxology came to occupy a central place in doctrinal controversy, and the orthodox party adopted a form (no doubt based on *Matthew* xxviii.19) in which the three Persons of the Trinity were clearly given parity: 'Glory to the Father and to the Son and to the Holy Spirit, now

and always and to the ages of ages. Amen'. This form is still commonly used in the oriental Christian rites. The second phrase of the Western lesser doxology beginning 'Sicut erat' was adopted in the Christian West (not in Spain) from the second Council of Vaison in 529.

In the traditional Roman rite the lesser doxology concludes nearly all psalms (whether at the Offices or at the introit of the Mass) and most canticles, and is followed where appropriate by the repetition of the antiphon to the psalm or canticle. In the Byzantine Offices, it occurs after each *stasis* of the psalter. Similar doxological formulae occur after the eucharistic consecration prayer, the Lord's Prayer etc. The acclamations known as the *Laudes regiae* also incorporate a threefold doxology. In Western responsories, the first half alone of the doxology is used; the doxology was added to the responsory only at the time of Amalar of Metz, and not at all to other responsorial chants such as the gradual.

The music to which the doxology is sung (whether monophonic or, since the Notre Dame repertory, polyphonic) has generally been determined by the music of the psalms, responsories etc with which it is associated. Owing to its frequent use, the doxology was often not copied in full in liturgical books; one of the commonest Western abbreviations, EVOVAL, indicates the underlay of the text.

Latin Office hymns, by analogy with the psalms, conclude with doxologies, necessarily metrical, sung to the hymn melodies, with a simple concluding amen. Until 1960 these doxologies generally incorporated references to the Proper of the day (the abandonment at that time of Proper doxologies resulted in the abandonment of a number of hymn melodies). In this feature Latin metrical doxologies differed from the metrical vernacular doxologies of reformed denominations, which were otherwise modelled on them. Doxologies were devised in each metre used in the versification of the psalms and hymns in the reformed churches, though some denominations dropped the doxology altogether.

Besides the greater and lesser doxologies, other chants may be regarded as doxologies, such as the *Te decet laus* (prescribed in the Rule of St Benedict for the Offices, and prescribed, with two melodies, for use after Benediction in Benedictine houses, AM, pp.1260f), and the *Te Deum*.

GEOFFREY CHEW

Doyagüe, Manuel José (b Salamanca, 17 Feb 1755; d Salamanca, 18 Dec 1842). Spanish composer. He was a choirboy in his native town, where he was taught music by Juan Martín, choirmaster at the cathedral. When Martín retired in 1781, Doyagüe provisionally took on his post and won it by competition after Martín's death in 1789. Previously he had been appointed professor of music at Salamanca University. He held both these posts with brilliance until his death.

All Doyagüe's compositions are sacred – masses, motets, psalms and villancicos. Some of them, particularly some of the *Miserere* settings and Lamentations, have a notably dramatic character. The autograph score of one of his *Magnificat* settings, because it was considered his finest work, was buried with him. He was one of the best-known Spanish composers of his time, and although modest and retiring, he received honours that few can equal: for example, he was invited on various occasions to provide music for particular solemn ceremonies at the royal palace and to conduct them; he was made honorary director of the Madrid Conservatory; Rossini himself once wrote to him of having been profoundly moved by one of his *Miserere* settings. But all this did nothing to alter his regulated way of life; he worked untiringly and meticulously, living only for his duties as choirmaster and for composition. The style of his works is typical of the period, but they are superior to those of many of his contemporaries, showing great nobility of melody, purity of technique and depth of inspiration. A large part of his output is in the archives of Salamanca Cathedral, and other works are in various Spanish cathedrals; there are several manuscript copies of the best of them.

Dozza, Evangelista (fl Bologna, 2nd half of the 17th century). Italian printer. He was active in Rome before transferring the business to Bologna in 1638. He apparently published no music himself, but the 'Eredi di Evangelista Dozza', namely Carlo Manolesi and Pietro Dozza, probably Dozza's son, issued music during 1663 and 1664, concentrating on Cazzati's work. They also published Cazzati's reply to a critical attack on his music made by Arresti. The firm's usual mark was a pine cone in an elaborate frame.

ANNE SCHNOEBELN

Draaiorgel (Dutch). FAIRGROUND ORGAN.

Draconi, Giovanni Andrea. See DRAGONI, GIOVANNI ANDREA.

Draeske, Felix (August Bernhard) (b Coburg, 7 Oct 1835; d Dresden, 26 Feb 1913). German composer. His father was court preacher at Coburg; his grandfather held a superior church appointment, and his mother also came from a clerical family. He had his early schooling at Coburg. Although intended for the church, he decided at 17 to devote himself to music and, having overcome his father's objections, entered the Leipzig Conservatory. After hearing *Lohengrin* at Weimar he began composing an opera, *König Sigurd*. In 1854, while studying composition under Julius Rietz, he wrote overtures inspired by Shakespeare's *Julius Caesar* and Tegnér's *Frithjof*. At 20 he continued to study

Dragatakis, Dimitri

under Rietz, but privately, the conservatory having disapproved of his progressive tendencies. In 1856 his first symphony was performed at Coburg; after meeting Liszt (1857), who liked his opera and wanted to produce it at Weimar, he settled at Dresden. In 1860 he composed a long symphonic poem on *Julius Caesar*, having destroyed the earlier overture. In 1860 and 1861 he visited Liszt at Weimar, having by this time sided passionately with the New German school. He met Wagner there in 1861 at the musicians' congress, where his *Germania-Marsch* was given a very unfavourable reception by the audience. In 1862 an overture for the name-day of Prince Constantin of Hohenzollern-Hechingen was so much disliked by the prince that it could not be performed. The *Frithhof* overture was destroyed in 1862 and a symphonic poem written on the subject.

Discouraged by these failures, Draeseke moved to Switzerland in 1862, settling as a piano teacher at Vevey on Lake Geneva and then, having found no pupils there, at Yverdon, which he found so dull that he moved to Lausanne, where the number of his pupils increased and he sketched a number of works. In 1865 he visited Munich for the production of *Tristan und Isolde* and consulted a specialist on account of an alarming deterioration of his hearing, which troubled him for the rest of his life. In 1870 his father died, and his engagement to one of his pupils was broken off by her parents. His works' continued lack of success produced a period of stagnation and profound depression, and a professorship at the Geneva Conservatory, which he had hoped to obtain by moving there in 1875, failed to materialize. No longer able to afford to live in Switzerland because of unsuccessful speculations, he returned to Germany in 1876 in the hope of an appointment there. He settled once more at Dresden, but as he had inherited a small fortune from his godfather he was in no hurry to tie himself to a post. It was not until 1884 that he was offered and accepted the composition professorship at the Dresden Conservatory, succeeding Franz Wüllner. He did excellent work there, receiving the official title of professor in 1892 and that of *Hofrat* in 1898.

The character of Draeseke's music underwent a profound change during his years in Switzerland. He abandoned the radical, programmatic elements of his earlier works, cultivating Classical forms in his instrumental music, which also reflects the great contrapuntal mastery that he had achieved meanwhile. He also produced much vocal music in this period. His opera *Gudrun* was produced at Hanover in 1884, *Herrat* at Dresden in 1892, *Fischer und Kalif* at Prague in 1905. Two others were not performed in his lifetime. His most ambitious work was *Christus*, a prelude and trilogy of oratorios of Wagnerian proportions, composed in 1895-9 and given its only complete performances at Berlin and Dresden in 1912. He wrote his own texts.

WORKS

(printed works published in Leipzig unless otherwise stated)

OPERAS

(librettos by Draeseke)

König Sigurd, 1853-7, unperf.

Herrat [Dietrich von Bern], 1877-9, Dresden, 1892; vocal score (?1892)

Gudrun, Hanover, 1884; vocal score (?1884)

Bertran de Born, 1892-4, unperf.

Fischer und Kalif (comic opera), 1894-5, Prague, 1905

EDWARD DANNREUTHER/R

Drag. An embellishment used in playing the side drum; see DRUM, §3.

Dragatakis, Dimitri (b Platanoussa, Epirus, 22 Jan 1914). Greek composer. At the National Conservatory, Athens, he studied the violin under George Psyllas (graduating in 1939) and composition under L. Zoras and Kalomiris (graduating in 1955), but his interest in new techniques was developed independently. Setting out from a Shostakovich-like neo-classicism, he has evolved a free atonal style in which very disparate elements can be combined into curiously homogeneous and solid formal blocks. After about 1970 his style has become more direct and incisive, notably in such works as *Strophes I-X* and *Anadromés*.

WORKS

(selective list)

Stage: Zalouh, 4 insts, 4 actors, 1971, 9 incidental scores, 1968-72

GEORGE S. LEOTSAKOS

Dräger, Hans-Heinz (b Stralsund, 6 Dec 1909; d Austin, Texas, 9 Nov 1968). German musicologist. He studied musicology with Blume, Hornbostel, Sachs, Schering and Schunemann at Berlin University (1931–7), taking the doctorate there in 1937 with a dissertation on the development of the bow and its use in Europe. Subsequently he held posts in Berlin as assistant in the history department at the State Institute for German Music Research (1937), as assistant (1938) and administrative director (1939) of the State Museum of Musical Instruments, and as lecturer in organology at the Hochschule für Musik (1939). Having completed his *Habilitation* at Kiel in 1946 with an important work on the classification of instruments, he was concurrently professor of musicology at Greiswald (1947–9) and at Rostock (1948–9) and thereafter professor of systematic musicology in Berlin at the Humboldt University (1949–53) and the Free University (1953–61). He visited the USA initially as a Fulbright Scholar and visiting professor at Stanford University, California (1955), and returned there as professor of musicology at Austin, Texas (1961–6); he was naturalized in 1966. In the 1950s he turned to the theoretical and mathematical aspects of intonation and pitch. He was particularly interested in the relation between words and notes: Susanne Langer included his 'Begriff des Tonkörpers' (1952) in her anthology *Reflections on Art* (1958); and at his death he had planned a book on the quantitative analysis of musical semantics. His publications are characterized by a gift for clarifying difficult concepts.

Draghi, Antonio (b Rimini, probably between 17 Jan 1634 and 16 Jan 1635; d Vienna, 16 Jan 1700). Austrian composer, administrator and librettist of

Italian birth, possibly a brother of Giovanni Battista Draghi. He was one of the most prominent musicians in Vienna during the last third of the 17th century and an exceptionally prolific composer of operas, oratorios and other theatre music.

1 Life 2 Operas and other secular works 3 Sacred works.

1. **LIFE.** Rimini is shown as Draghi's place of birth in an entry dated June 1661 in the marriage records of St Stephen's Cathedral, Vienna. The period during which he seems to have been born derives from his death certificate (dated 18 January 1700 and also at St Stephen's), which gives his age as 65. Suggestions that he spent part of his formative years in Rome and as a member of the court orchestra at Mantua have not been substantiated, though, since Mantua provided a large number of musicians for the imperial court in Vienna, the second of these suggestions is plausible. The style of his music, however, makes it seem more likely that he received his training in Venice. He was certainly in Venice for a time, for in the earliest source in which he is recorded, the libretto of P. A. Ziani's opera *Le fortune di Rodope e di Damira*, performed in 1657 at the Teatro S Apollinare there, he is listed as a bass singer, but no position is specified. In 1658 he began his long career at the imperial court in Vienna, probably in a minor position in the Kapelle of the dowager Empress Eleonora, the widow of Ferdinand III. His creative output began with his writing the libretto for the opera *L'Almonte*, with music by Giuseppe Trecarico, which was performed in Vienna on 9 June 1661. He continued to be active as a librettist during his early years in Vienna and provided texts for dramatic works by such composers as Bertali and P. A. Ziani as well as for a number of his own works. The first music that can be assigned to him without doubt, the opera *La Mascherata*, dates from 1666. Draghi's gradual advance towards the highest musical posts at the Habsburg court indicates the recognition he won as a composer and administrator. He continued to serve the dowager empress, and in 1668 he became assistant Kapellmeister and in 1669 Kapellmeister at her court. (Her first choice for Kapellmeister was Legrenzi, but the Emperor Leopold I or his court persuaded her to accept Draghi.) During this period he also provided a number of dramatic works for performance at the emperor's court. In recognition of these services and because of the continuing expansion of theatrical activities at the imperial court, he was appointed director of dramatic music there in 1673. Despite his heavy duties in this post, he continued as Kapellmeister to the dowager empress until, on 1 January 1682, he succeeded J. H. Schmelzer as Kapellmeister of the imperial court, a position he held for the remainder of his life.

Draghi's son Carlo Domenico (b Vienna, 21 May 1669; d Vienna, 2 May 1711) was accepted into the Hofkapelle as a pupil of F. T. Richter in 1688. In recognition of his father's service to the court, a special stipend from the emperor enabled him to study in Italy in 1692–3. From 1 October 1698 until his death he was one of the large number of court organists. He wrote several arias for some late secular works by his father, including the operas *L'Arcace* and *La forza dell'amor filiale* and the *Terza accademia* (all 1698), and for the 1697 revival of *Sulpitia* (all are in *A-Wn*).

2. **OPERAS AND OTHER SECULAR WORKS.** Of Draghi's 174 secular works, 124 are operas or other stage works.

and the remaining 50 are vocal chamber works. In the stage works he collaborated especially with the court poet, Nicolò Minato, and the court theatre architect and stage designer, Burnacini (for one of his designs see BURNACINI, LODOVICO OTTAVIO); they provided most of the dramatic works, sacred as well as secular, performed at the Habsburg court between 1668 and 1697. The secular stage works range between one and four acts, but the vast majority belong to one of two types: the three-act *dramma per musica* and the one-act entertainment. There are 59 of the former, a few of which have other designations, such as *componimento drammatico per musica*. They were mostly performed either on birthdays of the imperial family or during Carnival, but a few were given on the emperor's name day. All of them, except those for Carnival, have a declaration of homage to the personage honoured, usually in the form of a *licenza*, occasionally in a prologue too. There are 60 one-act works. Generally, those designated *fiesta teatrale* or *musicale* were given on the empress's birthday and name day, those marked *introduzione per un balletto* on name days and *trattenimenti per musica* during Carnival. The stage works include music for Italian, Spanish and Latin plays, but there is only one non-Italian opera (if indeed it is by him), the Spanish *Aun vencido, vence amor*, for the birthday of the Queen of Spain.

As was normal at the time, the subject matter of the operas is from Greek and Roman history and mythology, only *Gundeberga* treats of events from German history. The usual love intrigue, involving many disguises, abounds. There are also comic scenes, and the acts end with ballets, for which other composers, notably Schmelzer and his son Andreas Anton, wrote the music. The Emperor Leopold I wrote some arias and scenes. The style of the music is predominantly that of the Venetian opera of the mid-17th century, though the arias contain extensive virtuoso coloratura passages. The ensembles and choruses are carefully composed. Two stylistic developments can be seen: in the recitatives Draghi increasingly used the stereotyped closing formula involving a falling 4th or 3rd in the vocal part and a cadence for continuo alone; and strophic arias, including some with a brief da capo of a line or two, gave place to single-strophic arias with full-scale da capos.

The chamber works, to texts which are almost without exception either mythological or allegorical, bear various designations. Some are serenatas. Others, marked (*composizione per*) *musica di camera*, were written for the Archduke Joseph's birthday. The other two categories are the same as the last two of the one-act stage works (see above); it is noteworthy that between Carnival 1682 and Carnival 1692 Draghi's output consisted almost exclusively of one-act stage pieces and chamber works. His chamber works are different from the operas in that arias are at least as frequent as recitatives and are all in two strophes, separated by a ritornello; there are no da capo arias proper.

The popular style of Draghi's own librettos seems to have been influenced by the *commedia dell'arte*.

3. SACRED WORKS. Draghi's 41 sacred dramatic works, many produced in collaboration with the poet Minato and the designer Burnacini (see §2 above), are not only the largest number of such works by a single composer in the later 17th century but can also be considered

representative of the repertory of sacred dramatic music at the court of Leopold I. According to the manner of performance, the nature of the texts, and the musical treatment, these works can be divided into two groups, oratorios and *sepolcri*. Oratorios, presented during Lent before Maundy Thursday, were executed in the traditional manner, i.e. without scenery, costumes or acting. *Sepolcri* were presented either on Maundy Thursday in the Kapelle of the dowager empress, with a costumed cast acting around a replica of the holy sepulchre, or on Good Friday in the Hofkapelle, with additional painted scenery, designed by Burnacini, as a backdrop (see ORATORIO, fig.2). The selection of

Autograph MS of the opening of Draghi's *sepolcro* 'La vita nella morte', first performed in the Vienna Hofkapelle, 16 April 1688 (A-Wn Cod 18870, f.2v)

sources and themes for the texts also shows a marked difference between the two types. Only a minority of works by Draghi, all oratorios, draw on popular sources such as hagiography and dramatic episodes from the Old and New Testaments which are presented in a clearly defined chronology of events, emphasizing a conflict between the forces of good and evil. Most of the works, including all the *sepolcri*, treat one aspect of the Passion of Christ – the period between the burial and the Resurrection – and emphasize the laments of the followers of Christ as well as the relationship of the Passion to events related in the Old Testament. To some degree the contrast between the two types can also be seen in elements in the style of the music. Most of the oratorios, in two sections, are scored for two violins and continuo and have a relatively wide melodic range, with much coloratura writing. On the other hand, in the *sepolcri*, which are in a single section, Draghi favoured the low sonorities of violas and gambas (often in the

archaic four- or five-part grouping; see illustration), affective, syllabic melodies and short aria-like and arioso sections.

The general style of Draghi's sacred dramatic music, like that of his secular works, clearly derives from that of the Venetian school of the mid-17th century. A special notable feature is the frequent use, as in the works of Cavalli and Cesti, of arioso sections within and following recitatives. The frequency, placing and melodic and harmonic style of these sections ensure that Draghi is seen at his best in his handling of recitative. Further Venetian traits can be seen in the instrumental pieces, choruses and slow arias: in the first two, chordal and imitative sections regularly alternate, and the last include laments (though there are very few chaconne basses). Distinct differences from the Venetian style can be seen in the absence of dance-like rhythms, especially in the fast movements of overtures and in arias, and in the small number of da capo arias.

Except for a gradual change in the structure of overtures, and the increasingly frequent use of instrumentally accompanied arias and more fully scored ritornellos - which may have been prompted by the greater resources available to him at Leopold's court than at Eleonora's and/or by the greater importance of Good Friday than Maundy Thursday celebrations - there is no stylistic development in Draghi's sacred dramatic output. This may have been due to the fact that he had no contact with composers outside the Viennese circle, that his vast output did not leave him time for experiments and that he was aware of the emperor's preference for, and satisfaction with, the style of his music.

WORKS

Edition. *A. Draghi Kirchenwerke*, ed. G. Adler, DTÖ, xlvii, Jg xxiii/1 (1916/R1960) [A]

STAGE

Unless otherwise stated all MSS in *A-Wn*, all librettos by N. Minato and all works performed in Vienna

La Mascherata (A. Draghi), 1 March 1666, 5 pieces ed in Neuhaus
Vero amore fa soave ogni fatica (Draghi), 6 Feb 1667, music lost, pubd lib *Wn*

Comedia ridicula (anon.), carn. 1667
